(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen blueberries that possess similar varietal characteristics; that possess a good color; that are reasonably free from defects; that possess a reasonably good character; that possess a normal flavor and odor; and that score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of frozen blueberries that possess similar varietal characteristics; that possess a fairly good color; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor and odor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is the quality of frozen blueberries that fail to meet the requirements of U. S. Grade C or U. S. Standard.

FACTORS OF QUALITY

§ 52.614 *Ascertaining the grade.* (a) The grade of frozen blueberries may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) The scores for the factors of color, absence of defects, and character of frozen blueberries are determined when the product is sufficiently free from ice crystals to permit handling of the blueberries.

(d) "Normal flavor and odor" means that the product is free from objectionable flavors and objectionable odors of any kind.

§ 52.615 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for such factors and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.616 *Color*—(a) *(A) classification.* Frozen blueberries that possess a very good color may be given a score of 18 to 20 points. "Very good color" means that the blueberries possess a practically uniform, bright, dark blue-purple color typical of properly matured berries for the variety and that there may be present not more than 5 percent by count of berries that possess a red-purple color. Frozen blueberries that are undercolored (not at least red-purple color) or that have a definite green cast are considered "green berries." (See § 52.617 (a).)

(b) *(B) classification.* If the frozen blueberries possess a good color, a score of 16 or 17 points may be given. "Good color" means that the blueberries possess a reasonably uniform, dark blue-purple color typical of reasonably well-matured berries for the variety and that there may be present not more than 10 percent by count of berries that possess a red-purple color. Frozen blueberries that are under-colored (not at least red-purple color) or that have a definite green cast are considered "green berries." (See § 52.617 (a).)

(c) *(C) classification.* If the frozen blueberries possess a fairly good color, a score of 14 or 15 points may be given. Frozen blueberries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the blueberries may be moderately variable in color, but are not definitely dull or off color, and there may be present not more than 20 percent by count of berries that possess a red-purple color. Frozen blue berries that are undercolored (not at least red-purple color) or that have a definite green cast are considered "green berries." (See § 52.617 (a).)

(d) *(SStd) classification.* Frozen blueberries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.617 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material (such as leaves and large stems); from clusters; from cap stems; from green berries, undeveloped berries, or edible berries other than blueberries; and from berries damaged by insect, pathological, or any other injury.

(1) "Green berries" are blueberries that are undercolored and do not possess at least a red-purple color or that have a definite green cast, even though the over-all color of the berries may not be a true green color.

(2) "Cap stems" are small stems which attach berries to the branch and means single cap stems or joined double cap stems with or without berries attached.

(3) A "cluster" means three or more joined cap stems with or without berries attached.

(4) "Undeveloped berries" are mummified berries with wrinkled or tough skins or which may be pathologically defective.

(b) *(A) classification.* Frozen blueberries that are practically free from defects may be given a score of 36 to 40 points. "Practically free from defects" means that the frozen blueberries are reasonably free from cap stems and for each 16 ounces of net weight, or the equivalent thereof, there may be present:

(1) Not more than a total of 2 whole leaves or large stems, provided such whole leaves and any other portions of leafy material do not exceed ½ square inch;

(2) Not more than a total of 10 berries that are green or undeveloped or edible berries other than blueberries or berries that are damaged, provided not more than 5 berries are undeveloped or edible berries other than blueberries or berries that are damaged; and

(3) In Native (or wild) type, not more than an average of 12 clusters in all samples or containers comprising the sample, provided there are no more than 16 clusters in any single sample or in any single container; or

(4) In Cultivated type, not more than 4 clusters.

(c) *(B) classification.* If the frozen blueberries are reasonably free from defects, a score of 32 to 35 points may be given. Frozen blueberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the frozen blueberries are reasonably free from cap stems and for each 16 ounces of net weight, or the equivalent thereof, there may be present:

(1) Not more than a total of 4 whole leaves or large stems, provided such whole leaves and any other portions of leafy material do not exceed ¾ square inch;

(2) Not more than a total of 16 berries that are green or undeveloped or edible berries other than blueberries or berries that are damaged, provided not more than 8 berries are undeveloped or edible berries other than blueberries or berries that are damaged; and

(3) In Native (or wild) type, not more than an average of 20 clusters in all samples or containers comprising the sample, provided there are no more than 28 clusters in any single sample or in any single container; or

(4) In Cultivated type, not more than 8 clusters.

(d) *(C) classification.* If the frozen blueberries are fairly free from defects, a score of 28 to 31 points may be given. Frozen blueberries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the frozen blueberries are fairly free from cap stems and for each 16 ounces of net weight, or the equivalent thereof, there may be present:

(1) Not more than a total of 6 whole leaves or large stems, provided such whole leaves and any other portions of leafy material do not exceed 1 square inch;

(2) Not more than a total of 20 berries that are green or undeveloped or edible berries other than blueberries or berries that are damaged, provided not more than 10 berries are undeveloped or edible berries other than blueberries or berries that are damaged; and

(3) In Native (or wild) type, not more than an average of 28 clusters in all samples or containers comprising the sample, provided there are no more than 40 clusters in any single sample or in any single container; or

(4) In Cultivated type, not more than 12 clusters.

(e) *(SStd) classification.* Frozen blueberries that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.618 *Character*—(a) *(A) classification.* Frozen blueberries that possess a good character may be given a score of 36 to 40 points. "Good character" means that the blueberries are reasonably firm, reasonably fleshy, practically whole, and practically intact with not more than 6 percent by weight of berries that may be crushed, mushy, or broken.

(b) *(B) classification.* If the frozen blueberries possess a reasonably good character, a score of 32 to 35 points may be given. Frozen blueberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the blueberries may be lacking in firmness and fleshy texture but are reasonably whole and reasonably intact with not more than 10 percent by weight of berries that may be crushed, mushy, or broken.

(c) *(C) classification.* If the frozen blueberries possess a fairly good character, a score of 28 to 31 points may be given. Frozen blueberries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the blueberries are fairly whole and fairly intact with not more than 20 percent by weight of berries that may be crushed, mushy, or broken.

(d) *(SStd) classification.* Frozen blueberries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.619 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen blueberries, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.620 *Score sheet for frozen blueberries.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN BROCCOLI [1]

PRODUCT DESCRIPTION, STYLES AND GRADES

§ 52.631 *Product description.* "Frozen broccoli" is prepared from the fresh, headed stalks or shoots of the broccoli plant (Brassica oleracea botrytis) by trimming, washing, and blanching and is frozen and stored at temperatures necessary for preservation of the product.

§ 52.632 *Styles of frozen broccoli.* (a) "Stalks" is the style that consists of the head and adjoining portions of the stem and attached leaves. Stalks that are cut longitudinally (including, but not limited to, quarters or halves) are considered as this style.

(b) "Cuts" or "Cut Broccoli" is the style that consists of portions cut from stalks with not less than 35 percent by weight of the broccoli that is head material.[2] "Head material" consists of buds or bud clusters whether or not attached to stalks or portions of stalks and includes such stalks or portions thereof. Units that possess practically no buds are not considered as head material.

(c) "Pieces" is the style that consists of any cut portions of stalks and that does not meet the foregoing definition for "Cuts" or "Cut Broccoli".

§ 52.633 *Grades of frozen broccoli.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen broccoli that possesses similar varietal characteristics; that possesses a good color; that is practically free from defects; that possesses good character; that possesses a good flavor and odor; and is of such quality with respect to uniformity of size as to score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen broccoli that possesses similar varietal characteristics; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a fairly good

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] The amount of head material is determined by averaging the weight of the head material from all containers comprising the sample, provided no single container contains less than 25 percent by weight of head material.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

flavor and odor; and is of such quality with respect to uniformity of size as to score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of frozen broccoli that fails to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.634 *Ascertaining the grade.* (a) The grade of frozen broccoli may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given for such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Uniformity of size | 20 |
| Absence of defects | 20 |
| Character | 40 |
| Total score | 100 |

(c) The scores for the factors of color, uniformity of size, absence of defects, and character with respect to development are determined immediately after thawing to the extent that the product is substantially free from ice crystals and can be handled as individual units. The degree of tenderness and freedom from fiber and flavor and odor are determined after the product is cooked.

(d) "Good flavor and odor" means that the product after cooking has a good, characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Fairly good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.635 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for such factors and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.636 *Color*—(a) *(A) classification.* Frozen broccoli that possesses a good color may be given a score of 17 to 20 points. "Good color" means that the frozen broccoli possesses a characteristic green color which may include lighter colored areas typical of young and tender broccoli that do not materially affect the appearance of the product.

(b) *(B) classification.* If the frozen broccoli possesses a reasonably good color, a score of 14 to 16 points may be given. Frozen broccoli that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the frozen broccoli possesses a characteristic green color which may be variable but is not off color.

(c) *(SStd) classification.* Frozen broccoli that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.637 *Uniformity of size*—(a) *General.* "Diameter" of a stalk, whether or not cut longitudinally means the greatest crosswise dimension measured 1 inch above the lowest portion of the main stem of the stalk at approximate right angles to the length.

(b) *(A) classification.* Frozen broccoli that is practically uniform in size may be given a score of 17 to 20 points. "Practically uniform in size" has the following meanings with respect to the following styles:

(1) *Stalks.* The longest stalk does not exceed the shortest stalk by more than 2 inches and in the 90 percent, by count, of stalks which have the most uniform lengths, the length of the longest stalk does not exceed the length of the shortest stalk by more than 1 inch; and the diameter of the stalk with the greatest diameter does not exceed the diameter of the stalk with the shortest diameter by more than 1 inch and in the 90 percent, by count, of stalks which have the most uniform diameters, the diameter of the stalk with the greatest diameter does not exceed the diameter of the stalk with the shortest diameter by more than $\frac{3}{4}$ inch.

(2) *Cuts; pieces.* Not more than 5 percent, by weight, of the units may be longer than 2 inches.

(c) *(B) classification.* If the frozen broccoli is reasonably uniform in size, a score of 14 to 16 points may be given. "Reasonably uniform in size" has the following meanings with respect to the following styles:

(1) *Stalks.* In the 90 percent, by count, of stalks which have the most uniform lengths, the length of the longest stalk does not exceed the length of the shortest stalk by more than 2 inches; and in the 90 percent, by count, of stalks which have the most uniform diameters, the diameter of the stalk with the greatest diameter does not exceed the diameter of the stalk with the shortest diameter by more than $\frac{3}{4}$ inch.

(2) *Cuts; pieces.* Not more than 10 percent, by weight, of the units may be longer than $2\frac{1}{2}$ inches.

(d) *(SStd) classification.* Frozen broccoli that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule).

§ 52.638 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from grit, harmless extraneous materials, detached fragments, loose leaves, loose pieces of leaves, and poorly trimmed stalks; and from units that are damaged or seriously damaged.

(1) "Grit" means sand or other rough, hard particles of earthy sediment.

(2) "Harmless extraneous material" means vegetable substances other than broccoli, such as weeds and grass and any portions thereof, that are harmless.

(3) "Loose leaves and loose pieces of leaves" means leaves or pieces of leaves not attached to a unit.

(4) "Detached fragments" means any detached portions of stalks including bud clusters, shattered materials, portions of stems without bud clusters regardless of size or length, and portions of stems with bud clusters, which portions are 2 inches or less in the greatest straight dimension.

(5) "Poorly trimmed" means that the appearance of the stalk is seriously affected by attached leaves and by ragged or partial trimming of the leaves, by ragged or partial removal of leaves, and poor cutting of the stem of the stalk.

(6) "Damaged" means discoloration, mechanical injury, pathological injury, insect injury, hollow stems, pithy stems, or other injuries which, singly or in combination, on a unit or in a unit materially affect the appearance or eating quality of the unit.

(7) "Seriously damaged" means damage to such an extent that the appearance or eating quality of the unit is seriously affected.

(b) *(A) classification.* Frozen broccoli that is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" has the following meanings with respect to the following styles:

(1) *Stalks.* No grit that affects the appearance or eating quality may be present; not more than one piece of harmless extraneous material may be present for each 20 ounces of net weight; detached fragments, loose leaves, and loose pieces of leaves that do not materially affect the appearance may be present; and stalks that are poorly trimmed, damaged, or seriously damaged do not exceed 10 percent, by count, of all the stalks, but of such 10 percent, not more than one-half thereof, or not more than 5 percent by count of all the stalks, may be seriously damaged. One stalk in a single container is permitted to be poorly trimmed, damaged, or seriously damaged if such stalk exceeds the respective allowances of 10 percent or 5 percent, provided that in all containers comprising the sample such poorly trimmed, damaged, or seriously damaged stalks do not exceed an average of 10 percent, by count, but of such 10 percent average, not more than one-half thereof, or not more than an average of 5 percent, may be seriously damaged.

(2) *Cuts; pieces.* No grit that affects the appearance or eating quality may be present; not more than one piece of harmless extraneous material may be present for each 20 ounces of net weight; loose leaves and loose pieces of leaves that do not materially affect the appearance may be present; and units that are damaged or seriously damaged do not exceed 8 percent, by weight, but of such 8 percent not more than one-half thereof, or not more than 4 percent, by weight, of all the units, may be seriously damaged.

(c) *(B) classification.* If the frozen broccoli is reasonably free from defects, a score of 14 to 16 points may be given. Frozen broccoli that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" has the following meanings with respect to the following styles:

(1) *Stalks.* No grit that affects the appearance or eating quality may be present; not more than two pieces of harmless extraneous material may be present for each 20 ounces of net weight; detached fragments, loose leaves, and loose pieces of leaves that do not materially affect the appearance may be present; and stalks that are poorly trimmed, damaged, or seriously damaged do not exceed 20 percent, by count, of all the stalks, but of such 20 percent, not more than one-half thereof, or not more than 10 percent, by count, of all the stalks, may be seriously damaged.

(2) *Cuts; pieces.* No grit that affects the appearance or eating quality may be present; not more than two pieces of harmless extraneous material may be present for each 20 ounces of net weight, loose leaves and loose pieces of leaves that do not materially affect the appearance may be present; and units that are damaged or seriously damaged do not exceed 16 percent, by weight, but of such 16 percent, not more than one-half thereof, or not more than 8 percent, by weight, of all the units, may be seriously damaged.

(d) *(SStd) classification.* Frozen broccoli that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.639 *Character*—(a) *General.* The factor of character refers to the degree of development and tenderness and to the degree of freedom from stringy, fibrous development.

(b) "Well developed" means that the branching bud clusters of the unit form a practically compact head, that the individual buds in the bud clusters are all practically closed, and that the immediate stems supporting the individual buds in the bud clusters show no more than slight elongation.

(c) "Reasonably well developed" means that the branching bud clusters of the unit may be spread or spreading; that the individual buds in the bud clusters may have reached a moderate stage of enlargement but practically none of the buds are in the flowered or open stage; and that the immediate stems supporting the individual buds in the bud clusters may be moderately elongated.

(d) After the broccoli has been tested for development, the broccoli is cooked before making the determination for the degree of tenderness and the degree of freedom from fibrous development.

(b) *(A) classification.* Frozen broccoli that possesses a good character may be given a score of 34 to 40 points. "Good character" has the following meanings with respect to the following styles:

(1) *Stalks.* Not less than 80 percent, by count, of the stalks are well developed and the remainder are reasonably well developed; and all of the stalks are tender.

(2) *Cuts; pieces.* The units are at least reasonably well developed; and the broccoli is tender.

(c) *(B) classification.* If the frozen broccoli possesses a reasonably good character, 28 to 33 points may be given. Frozen broccoli that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" has the following meanings with respect to the following styles:

(1) *Stalks.* Not less than 90 percent, by count, of the stalks are at least reasonably well developed; the stalks are reasonably tender and practically free from stringy, fibrous development.

(2) *Cuts; pieces.* Not less than 95 percent, by weight, of the bud clusters of the units are at least reasonably well developed; the broccoli is reasonably tender and practically free from stringy, fibrous development.

(d) *(SStd) classification.* Frozen broccoli that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.640 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen broccoli, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

STUPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN BRUSSELS SPROUTS [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.651 *Product description.* Frozen Brussels sprouts are prepared from the fresh heads of the Brussels sprouts plant (Brassica oleracea gemmifera) by trimming, washing, and blanching and are frozen and maintained at temperatures necessary for the preservation of the product.

§ 52.652 *Grades of frozen Brussels sprouts.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen Brussels sprouts that possess similar varietal characteristics; that possess a good color; that are practically free from defects; that possess a good character; that possess a good flavor and odor; and that score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen Brussels sprouts that possess similar varietal characteristics; that possess a reasonably good color; that are reasonably free from defects; that possess a reasonably good character; that possess a good flavor and odor; and that score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of frozen Brussels sprouts that possess a fairly good color; that are fairly free from defects; that possess a fairly good character; that possess a fairly good flavor and odor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is the quality of frozen Brussels sprouts that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FACTORS OF QUALITY

§ 52.653 *Ascertaining the grade.* (a) The grade of frozen Brussels sprouts is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed nu-

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

merically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 30 |
| Absence of defects | 40 |
| Character | 30 |
| Total score | 100 |

(c) The scores for the factors of color and absence of defects of Brussels sprouts are determined immediately after thawing so that the product is sufficiently free from ice crystals to permit proper handling as individual units and the product is completely thawed to determine the factor of character. The product is cooked to determine the flavor and odor.

(d) "Good flavor and odor" means that the product after cooking has a good, characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Fairly good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.654 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "27 to 30 points" means 27, 28, 29, or 30 points).

§ 52.655 *Color*—(a) *General.* The color of Brussels sprouts is based on the characteristic and predominating color of the outer surfaces of the Brussels sprouts.

(1) "Yellow-green" means a predominating characteristic green color with a definite yellow cast.

(2) "Yellow" means a predominating characteristic yellow color with slight tinges of green or a predominating characteristic yellow color typical of the color Brussels sprouts possess after the outer green leaves have been removed.

(b) (*A*) *classification.* Frozen Brussels sprouts that possess a good color may be given a score of 27 to 30 points. "Good color" means that not more than 5 percent, by count, of the units may be yellow and that the remainder of the units are yellow-green or more green in color. One Brussels sprout in a single container is permitted to be yellow if such unit exceeds the allowance of 5 percent.

(c) (*B*) *classification.* If the frozen Brussels sprouts possess a reasonably good color, a score of 24 to 26 points may be given. Frozen Brussels sprouts that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that more than 5 percent, by count, but not more than 25 percent, by count, of the units are yellow and that the remainder of the units are yellow-green or more green in color.

(d) (*C*) *classification.* If the frozen Brussels sprouts possess a fairly good color, a score of 21 to 23 points may be given. Frozen Brussels sprouts that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that more than 25 percent, by count, of the units are yellow and that the remainder, if any, are yellow-green or more green in color but are not off-color for any reason.

(e) (*SStd*) *classification.* Frozen Brussels sprouts that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.656 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from grit, silt, harmless extraneous material, loose leaves and loose small pieces, poorly trimmed units, and from units damaged by discoloration, mechanical injury, pathological injury, insect injury, or other means.

(1) "Grit" (or sand) is rough, hard particles of earthy sediment.

(2) "Silt" is fine earthy sediment from material such as mud or clay.

(3) "Harmless extraneous material" means vegetable substances other than from Brussels sprouts, such as weeds and grass and any portion thereof, that are harmless.

(4) "Loose leaves and loose small pieces" means leaves, pieces of leaves, and small pieces of edible stalk or stems not attached to a unit, whether or not damaged.

(5) "Poorly trimmed units" means (i) that the butt end is not trimmed smoothly and closely at the approximate point of attachment of the outer leaves; or (ii) that the appearance of the unit is materially damaged from excessive cutting into the head. Brussels sprouts heads from which the leaves have been stripped, whether or not excessively, are not considered "poorly trimmed units."

(6) "Damaged" means any unit damaged by surface or internal discoloration, mechanical injury, pathological injury, insect injury, or by other means to the extent that the appearance or eating quality is materially affected.

(7) "Seriously damaged" means any unit damaged to such an extent that the appearance or eating quality is seriously affected.

(b) (*A*) *classification.* Frozen Brussels sprouts that are practically free from defects may be given a score of 36 to 40 points. "Practically free from defects" means that no grit or silt that affects the appearance or eating quality of the product is present; no harmless extraneous material is present; loose leaves and loose small pieces that do not affect the appearance or eating quality of the product may be present; and that units that are damaged or seriously damaged do not exceed 10 percent, by count, of all the units, but of such 10 percent not more than one-half thereof or not more than 5 percent, by count, of all the units may be seriously damaged; and, in addition, not more than 10 percent, by count, of all the units may be poorly trimmed.

(c) (*B*) *classification.* If the frozen Brussels sprouts are reasonably free from defects, a score of 32 to 35 points may be given. Frozen Brussels sprouts that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that no grit or silt that affects the appearance or eating quality of the product is present; not more than one piece of harmless extraneous material may be present for each 20 ounces of net weight; loose leaves and loose small pieces that do not materially affect the appearance or eating quality of the product may be present; and that units that are damaged or seriously damaged do not exceed 20 percent, by count, of all the units, but of such 20 percent not more than one-half thereof or not more than 10 percent, by count, of all the units may be seriously damaged, and, in addition, not more than 15 percent, by count, of all the units may be poorly trimmed.

(d) (*C*) *classification.* Frozen Brussels sprouts that are fairly free from defects may be given a score of 28 to 31 points. Frozen Brussels sprouts that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that a slight trace of grit or silt that does not affect materially the appearance or eating quality of the product may be present, not more than two pieces of harmless extraneous material may be present for each 20 ounces of net weight; loose leaves and loose small pieces that do not seriously affect the appearance or eating quality of the product may be present, and that units that are damaged, seriously damaged, or poorly trimmed do not exceed 50 percent, by count, of all the units, but of such 50 percent not more than three-tenths thereof or not more than 15 percent, by count, of all the units may be seriously damaged and of such 50 percent not more than two-fifths thereof or not more than 20 percent, by count, of the units may have butt ends that are not trimmed smoothly and closely at the approximate point of attachment of the outer leaves.

(e) (*SStd*) *classification.* Frozen Brussels sprouts that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.657 *Character*—(a) *General.* The factor of character refers to the degree of development and tenderness and texture of the Brussels sprouts heads.

(1) "Well developed" means that a Brussels sprout head is well formed, compact, and reasonably firm.

(2) "Reasonably well developed" means that a Brussels sprout head is reasonably well formed, reasonably compact, and fairly firm.

(3) "Fairly well developed" means that a Brussels sprout head is fairly well formed but may have been reduced in size or excessively stripped by removal of leaves.

(4) "Very loose-structured" means that a Brussels sprout head is very light in weight in comparison to its size and possesses large open spaces resulting in a very spongy condition that yields easily and considerably to moderate pressure.

(b) (*A*) *classification.* Frozen Brussels sprouts that possess a good character may be given a score of 27 to 30 points. "Good character" means that not less than 80 percent, by count, of the units are well developed and that the remainder are reasonably well developed or fairly well developed and not more than an occasional unit may be very loose-structured.

(c) (*B*) *classification.* If the frozen Brussels sprouts possess a reasonably good character, a score of 24 to 26 points may be given. Frozen Brussels sprouts that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that not less than 50 percent, by count, of the units are at least reasonably well developed; not more than 10 percent, by count, may be very loose-structured units; and the remainder are fairly well developed.

(d) (*C*) *classification.* Frozen Brussels sprouts that possess a fairly good character may be given a score of 21 to 23 points. Frozen Brussels sprouts that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that not less than 50 percent, by count, of the units are at least fairly well developed.

(e) (*SStd*) *classification.* Frozen Brussels sprouts that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.658 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen Brussels sprouts, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED CARROTS [1]

IDENTITY, STYLES, AND GRADES

§ 52.671 *Identity.* "Canned carrots" means the canned product properly prepared from the clean, sound root of the carrot plant as defined in the definitions and standards of identity for canned vegetables (21 CFR 52.990) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.672 *Styles of canned carrots.* (a) "Whole" or "whole carrots" means canned carrots consisting of whole carrots that retain the approximate original conformation of the whole carrot.

(b) "Slices" or "sliced carrots" means canned carrots consisting of carrot slices produced by slicing whole carrots transverse to the longitudinal axis.

(c) "Quarters" or "quartered carrots" means canned carrots consisting of quarters of carrots produced by cutting whole carrots longitudinally into four approximately equal units. Whole carrots cut longitudinally into six units approximating the size and appearance of the quartered carrots are also permitted in this style.

(d) "Diced carrots" means canned carrots consisting of units produced by cutting whole carrots into cubes having edges, other than the rounded outer edges, measuring approximately ½ inch or less.

(e) "Julienne," "French style," or "shoestring" means canned carrots consisting of strips of carrots.

(f) "Cut" means canned carrots consisting of units which with respect to size or shape do not conform to any of the foregoing styles. Carrots which have been cut longitudinally into two approximately equal units are included in this style.

(g) "Unit" means an individual carrot or portion of a carrot in canned carrots.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 52.673 *Grades of canned carrots.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned carrots that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a good color; that are practically free from defects; that are tender; that are practically uniform in size and shape; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned carrots that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a fairly good color; that are fairly free from defects; that are fairly tender; that are fairly uniform in size and shape; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of canned carrots that fail to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER AND DRAINED WEIGHTS

§ 52.674 *Recommended fill of container.* The recommended fill of container is not incorporated in the grade of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that the container of canned carrots be filled as full as practicable with carrots without impairment of quality and that the product and packing medium occupy not less than 90 percent of the total capacity of the container.

§ 52.675 *Recommended minimum drained weight.* The minimum drained weight recommendations in Table No. I of this section are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of canned carrots is determined by emptying the contents of the container upon a U. S. Standard No. 8 sieve of proper diameter so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage and allowing to drain for two minutes. The drained weight is the weight of the sieve and carrots less the weight of the dry sieve. A sieve 8 inches in diameter is used for the No. 2½ size can (401 x 411) and smaller sizes; and a sieve 12 inches in diameter is used for containers larger than the No. 2½ size can.

TABLE NO. I—RECOMMENDED MINIMUM DRAINED WEIGHTS, IN OUNCES, OF CARROTS

| Container size or designation | Style of canned carrots | | | | |
|---|---|---|---|---|---|
| | Whole | Diced | Quartered cut | Sliced | Julienne |
| 8-ounce tall | 5½ | 6 | 6 | 5¾ | 5½ |
| 8-ounce glass | 5½ | 6 | 6 | 5¾ | 5½ |
| No. 1 picnic | 7¼ | 7¾ | 7½ | 7¾ | 7 |
| No. 300 | 9½ | 10 | 10 | 9½ | 9 |
| No. 303 | 10½ | 11 | 11 | 10½ | 10 |
| No. 303 glass | 10½ | 11 | 11 | 10½ | 10 |
| No. 2 | 12½ | 14 | 12½ | 12½ | 12 |
| No. 2½ | 18½ | 19 | 18½ | 18½ | 18¼ |
| No. 2½ glass | 18¼ | 18¼ | 18¼ | 18¼ | 18 |
| No. 10 | 68 | 72 | 70½ | 69 | 68 |

SIZES

§ 52.676 *Sizes of carrots in whole carrots.* The size of any carrot is determined by measuring the longest diameter through the center transverse to the longitudinal axis of the carrot.

§ 52.677 *Sizes of carrot slices in sliced carrots.* The size of any slice in sliced carrots is determined by measuring the smallest diameter of the largest surface of the slice.

§ 52.678 *Sizes of carrot quarters in quartered carrots.* The size of any quarter in quartered carrots with respect to diameter is determined by measuring the largest cut surface transverse to the longitudinal axis.

FACTORS OF QUALITY

§ 52.679 *Ascertaining the grade.* (a) The grade of canned carrots is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size and shape, absence of defects, and texture.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | Points |
|---|---|
| Color | 25 |
| Uniformity of size and shape | 15 |
| Absence of defects | 30 |
| Texture | 30 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the canned carrots are free from objectionable flavors and objectionable odors of any kind.

§ 52.680 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range for the rating of each factor is inclusive (for example, "12 to 15 points" means 12, 13, 14, or 15 points).

§ 52.681 *Color*—(a) *(A) classification.* Canned carrots that possess a good color may be given a score of 21 to 25 points. "Good color" means that the canned carrots possess an orange-yellow color that is bright and typical of canned carrots, and that the presence of green units does not more than slightly affect the appearance or eating quality of the product.

(b) *(C) classification.* If the canned carrots possess a fairly good color, a score of 18 to 20 points may be given. Canned carrots that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the canned carrots possess the typical color of canned carrots, that such color may be slightly dull but not off-color, and that the presence of green units does not materially affect the appearance or eating quality of the product.

(c) *(SStd) classification.* Canned carrots that are off-color for any reason or that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 17 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.682 *Uniformity of size and shape*—(a) *(A) classification.* Canned carrots that are practically uniform in size and shape may be given a score of 12 to 15 points. "Practically uniform in size and shape" has the following meanings with respect to the various styles of canned carrots:

(1) *Whole carrots.* The size of the individual carrot is not more than $1\frac{3}{4}$ inches in diameter, measured as aforesaid; the carrots may vary moderately in shape and the diameter of the largest unit is not more than 50 percent greater than the diameter of the second smallest unit.

(2) *Quartered carrots.* The carrots from which the quarters have been prepared were of a size not more than $2\frac{1}{2}$ inches in diameter, measured as aforesaid, and the diameter of the largest quarter is not more than 50 percent greater than the diameter of the second smallest quarter, and the length of the longest quarter is not more than 50 percent greater than the length of the second shortest quarter.

(3) *Sliced carrots.* The individual slice is not more than $\frac{3}{8}$ inch in thickness when measured at the thickest portion; the size of each slice is not more than $2\frac{1}{2}$ inches in diameter, measured as aforesaid, and the diameter of the largest slice is not more than 50 percent greater than the diameter of the second smallest slice.

(4) *Diced carrots.* The units are practically uniform in size and shape with edges, other than the rounded outer edges, measuring approximately $\frac{1}{2}$ inch or less; and the aggregate weight of all units of irregular shape which are noticeably smaller than one-half the volume of an average size cube and of all noticeably large and large irregular shaped units does not exceed 12 percent of the weight of all the units.

(5) *Julienne, French style, or shoestring.* The strips of carrots are practically uniform in size and shape, with cross sections measuring approximately $\frac{5}{16}$ inch, and the aggregate weight of all strips less than $\frac{1}{2}$ inch in length does not exceed 12 percent of the weight of all the strips.

(6) *Cut.* The individual units weigh not less than $\frac{1}{4}$ ounce and the largest unit is not more than four times the weight of the second smallest unit. When cut longitudinally into two approximately equal units, the carrots from which the units have been prepared were of a size not more than $2\frac{1}{2}$ inches in diameter, measured as aforesaid, and the weight of the largest unit is not more than 50 percent greater than the weight of the second smallest unit.

(b) *(C) classification.* If the canned carrots are fairly uniform in size and shape a score of 8 to 11 points may be given. Canned carrots that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly uniform in size and shape" has the following meanings with respect to the various styles of canned carrots:

(1) *Whole carrots.* The size of the individual carrot is not more than $2\frac{1}{4}$ inches in diameter, measured as aforesaid; the carrots may vary considerably in shape, and the diameter of the largest unit is not more than twice the diameter of the second smallest unit.

(2) *Quartered carrots.* The carrots from which the quarters have been cut were of a size not more than $2\frac{1}{2}$ inches in diameter, measured as aforesaid, and the diameter of the largest quarter is not more than twice the diameter of the second smallest unit, and the length of the longest quarter is not more than twice the length of the second shortest quarter.

(3) *Sliced carrots.* The individual slice is not more than $\frac{3}{8}$ inch in thickness when measured at the thickest portion; the size of each slice is not more than $2\frac{1}{2}$ inches in diameter, measured as aforesaid; and the diameter of the largest slice is not more than twice the diameter of the second smallest slice.

(4) *Diced carrots.* The units are fairly uniform in size and shape, with edges, other than the rounded outer edges, measuring approximately $\frac{1}{2}$ inch or less; and the aggregate weight of all units of irregular shape which are noticeably smaller than one-half the volume of an average size cube and of all noticeably large and large irregular shaped units does not exceed 25 percent of the weight of all the units.

(5) *Julienne, French style, or shoestring.* The strips of carrots are fairly uniform in size and shape, with cross sections measuring approximately $\frac{3}{16}$ inch and the aggregate weight of all the strips less than $\frac{1}{2}$ inch in length does not exceed 25 percent of the weight of all the strips.

(6) *Cut.* The individual units weigh not less than $\frac{1}{8}$ ounce and the largest unit is not more than twelve times the weight of the second smallest unit. When cut longitudinally into two approximately equal units, the carrots from which the units have been prepared were of a size not more than $2\frac{1}{2}$ inches in diameter, measured as aforesaid, and the weight of the largest unit is not more than twice the weight of the second smallest unit.

(c) *(SStd) classification.* Canned carrots that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 7 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.683 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from defective units. Defective units are units damaged by mechanical injury, unpeeled units, units blemished or seriously blemished by brown or black internal or external discoloration, sunburn, or green colored units, pathological injury or insect injury, and units blemished or seriously blemished by other means.

(1) "Damaged by mechanical injury" means crushed, broken, or cracked units, units with excessively frayed edges and surfaces, excessively trimmed units, or damaged by other means.

(2) "Unpeeled unit" means any unit possessing an unpeeled area greater than the area of a circle $\frac{1}{4}$ inch in diameter.

(3) "Blemished" means any unit blemished to the extent that the appearance or eating quality is materially affected.

(4) "Seriously blemished" means any unit blemished to the extent that the appearance or eating quality is seriously affected.

(b) *(A) classification.* Canned carrots that are practically free from defects may be given a score of 26 to 30 points. "Practically free from defects" has the following meanings with respect to the various styles of canned carrots:

(1) *Whole carrots.* The aggregate weight of all defective units does not exceed 15 percent of the weight of all the units, and of such 15 percent not more than $\frac{1}{2}$ thereof or one carrot, whichever weighs more, may consist of blemished units and seriously blemished units: *Provided*, That not more than 1 percent, by weight, of all the units may be seriously blemished, and that the presence of blemished and seriously blemished units does not more than slightly affect the appearance or eating quality of the product.

(2) *Sliced, quartered, and cut carrots.* The aggregate weight of all defective units does not exceed 15 percent of the weight of all the units, and of such 15 percent not more than $\frac{1}{2}$ thereof or one slice, quarter or cut, whichever weighs more, may consist of blemished units and seriously blemished units: *Provided*, That not more than 1 percent, by weight, of all the units may be seriously blemished, and that the presence of blemished and seriously blemished units does not more than slightly affect the appearance or eating quality of the product.

(3) *Diced, Julienne, French style, or shoestring carrots.* The aggregate weight of all defective units does not exceed 10 percent of the weight of all the units and of such 10 percent not more than $\frac{1}{2}$ thereof may consist of blemished units and seriously blemished units: *Provided*, That not more than 1 percent, by weight, of all the units may be seriously blemished, and that the presence of blemished and seriously blemished units does not more than slightly affect the appearance or eating quality of the product.

(c) *(C) classification.* Canned carrots that are fairly free from defects may be given a score of 22 to 25 points. Canned carrots that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" has the following meanings with respect to the various styles of canned carrots:

(1) *Whole carrots.* The aggregate weight of all defective units does not exceed 25 percent of the weight of all the units, and of such 25 percent, not more than $\frac{1}{2}$ thereof may consist of blemished units and seriously blemished units: *Provided*, That not more than 2 percent, by weight, of all the units may be seriously blemished, and that the presence of blemished and seriously blemished units does not seriously affect the appearance or eating quality of the product.

(2) *Sliced, quartered, and cut carrots.* The aggregate weight of all defective units does not exceed 25 percent of the weight of all the units, and of such 25 percent not more than $\frac{1}{2}$ thereof or one slice, quarter or cut, whichever weighs more, may consist of blemished units and seriously blemished units: *Provided*, That not more than 2 percent, by weight, of all the units may be seriously blemished, and that the presence of blemished and seriously blemished units does not seriously affect the appearance or eating quality of the product.

(3) *Diced, Julienne, French style, or shoestring carrots.* The aggregate weight of all defective units does not exceed 20 percent of the weight of all the units, and of such 20 percent not more than $\frac{1}{2}$ thereof may consist of blemished units and seriously blemished units: *Provided*, That not more than 2 percent, by weight, of all the units may be seriously blemished, and that the presence of blemished and seriously blemished units does not seriously affect the appearance or eating quality of the product.

(d) *(SStd) classification.* Canned carrots that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.684 *Texture*—(a) *General.* The factor of texture refers to the tenderness of the carrots and the degree of freedom from coarse and fibrous units.

(b) *(A) classification.* Canned carrots that possess a tender texture may be given a score of 26 to 30 points. "Tender texture" means that the carrots are tender and firm but not fibrous, and possess a practically uniform texture.

(c) *(C) classification.* If the canned carrots possess a fairly tender texture, a score of 22 to 25 points may be given. Canned carrots that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender texture" means that the carrots are fairly tender, may be variable in texture but not soft or mushy, tough or hard, and there may be present a few units which possess a coarse or fibrous texture.

(d) *(SStd) classification.* Canned carrots that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.685 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned carrots, the grade for such lot will be determined by averaging the total score of all containers if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.686 *Score sheet for canned carrots.*

| Factors | Score points | | |

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN DICED CARROTS [1]

PRODUCT DESCRIPTION, STYLE, AND GRADES

§ 52.701 *Product description.* Frozen diced carrots is the clean and sound product prepared from the fresh root of the carrot plant (Daucus carota) by washing, sorting, peeling, trimming, and blanching, and is then frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.702 *Style of frozen diced carrots.* "Diced carrots" means frozen carrots consisting of units produced by cutting whole carrots into cubes having edges other than the rounded outer edges, measuring approximately $\frac{1}{2}$ inch or less.

§ 52.703 *Grades of frozen diced carrots.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen diced carrots that possess similar varietal characteristics; that possess a good

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

flavor and odor; that possess a good color; that are practically free from defects; that are tender; and that are practically uniform in size and shape; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen diced carrots that possess similar varietal characteristics; that possess a reasonably good flavor and odor; that possess a reasonably good color; that are reasonably free from defects; that are reasonably tender; that are reasonably uniform in size and shape; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen diced carrots that fail to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.704 *Ascertaining the grade.* (a) The grade of frozen diced carrots may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size and shape, absence of defects, and texture.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | *Points* |
|---|---|
| Color | 25 |
| Uniformity of size and shape | 15 |
| Absence of defects | 30 |
| Texture | 30 |
| Total score | 100 |

(c) The score for the factors of color, uniformity of size and shape, and absence of defects in frozen diced carrots is determined immediately after thawing to the extent that the product is substantially free from ice crystals and can be handled as individual units. A representative sample of the product is cooked to determine texture and flavor and odor.

(d) "Good flavor and odor" means that the product after cooking has a good characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Reasonably good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from obectionable flavors and objectionable odors of any kind.

§ 52.705 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "12 to 15 points" means 12, 13, 14, or 15 points).

§ 52.706 *Color*—(a) *(A) classification.* Frozen diced carrots that possess a good color may be given a score of 21 to 25 points. "Good color" means that the frozen diced carrots possess an orange-yellow color that is bright and typical of frozen carrots, and that the presence of green units does not more than slightly affect the appearance or eating quality of the product.

(b) *(B) classification.* If the frozen diced carrots possess a reasonably good color, a score of 18 to 20 points may be given. Frozen diced carrots that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the frozen diced carrots possess the typical color of frozen carrots and such color may be slightly dull but not off color, and that the presence of green units does not materially affect the appearance or eating quality of the product.

(c) *(SStd) classification.* Frozen diced carrots that are off color for any reason or that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 17 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.707 *Uniformity of size and shape*—(a) *(A) classification.* Frozen diced carrots that are practically uniform in size and shape may be given a score of 12 to 15 points. "Practically uniform in size and shape" means that the units are practically uniform in size and shape with edges, other than the rounded outer edges, measuring approximately $\frac{1}{2}$ inch or less; and the aggregate weight of all units of irregular shape which are noticeably smaller than one-half the volume of an average size cube and of all noticeably large and large irregular shaped units does not exceed 12 percent of the weight of all the units.

(b) *(B) classification.* If the frozen diced carrots are reasonably uniform in size and shape a score of 8 to 11 points may be given. Frozen diced carrots that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably uniform in size and shape" means that the units are reasonably uniform in size and shape with edges, other than the rounded outer edges, measuring approximately $\frac{1}{2}$ inch or less; and the aggregate weight of all units of irregular shape which are noticeably smaller than one-half the volume of an average size cube and of all noticeably large and large irregular shaped units does not exceed 25 percent of the weight of all the units.

(c) *(SStd) classification.* Frozen diced carrots that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 7 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.708 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from defective units. Defective units are units damaged by mechanical injury, unpeeled units, units blemished or seriously blemished by brown or black internal or external discoloration, sunburn, or green colored units, pathological injury or insect injury, and units blemished or seriously blemished by other means.

(1) "Damaged by mechanical injury" means crushed, broken or cracked units, units with excessively frayed edges and surfaces, or damaged by other means.

(2) "Unpeeled unit" means any unit possessing an unpeeled area greater than the area of a circle $\frac{1}{8}$ inch in diameter.

(3) "Blemished" means any unit blemished to the extent that the appearance or eating quality is materially affected.

(4) "Seriously blemished" means any unit blemished to the extent that the appearance or eating quality is seriously affected.

(b) *(A) classification.* Frozen diced carrots that are practically free from defects may be given a score of 26 to 30 points. "Practically free from defects" means that the aggregate weight of all defective units does not exceed 10 percent of the weight of all the units, and of such 10 percent not more than one-half thereof may consist of blemished units and seriously blemished units: *Provided*, That not more than 1 percent, by weight, of all the units may be seriously blemished and that the presence of blemished and seriously blemished units does not more than slightly affect the appearance or eating quality of the product.

(c) *(B) classification.* Frozen diced carrots that are reasonably free from defects may be given a score of 22 to 25 points. Frozen diced carrots that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the aggregate weight of all defective units does not exceed 16 percent of the weight of all the units and of such 16 percent not more than $\frac{1}{2}$ thereof may consist of blemished units and seriously blemished units: *Provided*, That not more than 2 percent, by weight, of all the units may be seriously blemished and that the presence of blemished and seriously blemished units does not materially affect the appearance or eating quality of the product.

(d) *(SStd) classification.* Frozen diced carrots that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.709 *Texture*—(a) *General.* The factor of texture refers to the tenderness of the carrots and the degree of freedom from coarse or fibrous units.

(b) *(A) classification.* Frozen diced carrots that possess a tender texture may be given a score of 26 to 30 points. "Tender texture" means that the carrots are tender, not fibrous, and possess a practically uniform texture.

(c) *(B) classification.* If the frozen diced carrots possess a reasonably tender texture, a score of 22 to 25 points may be given. Frozen diced carrots that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably tender texture" means that the carrots are reasonably tender, may be variable in texture but not tough or hard, and there may be present a few units which possess a coarse or fibrous texture.

(d) *(SStd) classification.* Frozen diced carrots that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.710 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen diced carrots the grade for such lot will be determined by averaging the total scores of all containers, if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN CAULIFLOWER [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.721 *Product description.* Frozen cauliflower is prepared from the fresh flower heads of the cauliflower plant (Brassica oleracea botrytis) by trimming, washing, and blanching and is frozen and maintained at temperatures necessary for preservation of the product.

§ 52.722 *Grades of frozen cauliflower.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen cauliflower that possesses similar varietal characteristics; that possesses a good flavor and odor; that possesses a good color; that is practically free from defects; that possesses a good character; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen cauliflower that possesses similar varietal characteristics; that possesses a fairly good flavor and odor; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen cauliflower that fails to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.723 *Ascertaining the grade.* (a) The grade of frozen cauliflower is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | *Points* |
|---|---|
| Color | 40 |
| Absence of defects | 40 |
| Character | 20 |
| Total score | 100 |

(c) The scores for the factors of color, absence of defects, and character are determined immediately after thawing so that the product is sufficiently free from ice crystals to permit proper handling as individual units, except that buds or buttons which are slightly dark in typical color are cooked before evaluating the factor of color. The product is cooked to determine the flavor and odor.

(d) "Good flavor and odor" means that the product after cooking has a good, characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Fairly good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.724 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.725 *Color*—(a) *(A) classification.* Frozen cauliflower that possesses a good color may be given a score of 34 to 40 points. "Good color" means that the buds or buttons possess a characteristic white to light cream color over the tops, which color may be slightly variable, and that the product may possess a characteristic green color or bluish tint on the branches and greenish yellow to light green modified leaves or bracts: *Provided*, That the buds or buttons may possess a color slightly darker than light cream which disappears upon cooking.

(b) *(B) classification.* If the frozen cauliflower possesses a reasonably good color, a score of 28 to 33 points may be given. Frozen cauliflower that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the buds or buttons may possess a variable characteristic color ranging from white or light cream to dull white or dark cream over the tops, and that the product may possess a characteristic green color or bluish tint on the branches and greenish yellow to light green modified leaves or bracts: *Provided*, That the buds or buttons may possses a color darker than dark cream, but not seriously darkened, which color disappears upon cooking to the extent that the appearance of the product is no more than slightly affected.

(c) *(SStd) classification.* Frozen cauliflower that is off color for any reason or that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.726 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from poorly trimmed clusters and small clusters, from damaged and seriously damaged clusters and small clusters, from pieces and detached fragments, and from any other defects which detract from the appearance or edibility of the product.

(1) "Portion of a head" means an individual portion or section of a head made up of buds or buttons and the adjoining stems or portions of stems and attached modified leaves or bracts.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(2) "Cluster" means a portion of a head which weighs more than ¼ ounce and which is not less than ¾ inch in the greatest dimension measured across the top of the cluster.

(3) "Small cluster" means a portion of a head which weighs not more than ¼ ounce and which is not less than ¾ inch in the greatest dimension measured across the top of the cluster.

(4) "Piece" means a small portion of a head which is less than ¾ inch in the greatest dimension measured across the top of the cluster. "Pieces" are considered as defects whether or not defective.

(5) "Detached fragments" are detached leaves, detached modified leaves or bracts, or detached portions of stems. Detached fragments are considered as defects whether or not defective.

(6) "Poorly trimmed cluster" or "poorly trimmed small cluster" means that the appearance of the cluster is seriously affected by ragged cutting or gouging, or both, or is seriously affected by attached modified leaves or bracts.

(7) "Damaged cluster" or "damaged small cluster" means that the cluster is damaged by dark discoloration, pathological injury, insect injury, or any other injury or defect which singly or in combination affect materially the appearance or edibility of the cluster.

(8) "Seriously damaged cluster" or "seriously damaged small cluster" means that the cluster is damaged to the extent that the appearance or edibility of the cluster is seriously affected.

(b) *(A) classification.* Frozen cauliflower that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that the product is practically free from pieces and detached fragments and from any defects not specifically mentioned that affect materially the appearance or edibility of the product, and, in addition, means that:

(1) No seriously damaged clusters are present; and

(2) Not more than a total of 15 percent, by weight, of the cauliflower may be poorly trimmed clusters, poorly trimmed small clusters, damaged clusters, damaged small clusters, and seriously damaged small clusters: *Provided*, Not more than 10 percent, by weight, of the cauliflower are damaged clusters,[2] damaged small clusters, and seriously damaged small clusters: *Further provided*, Not more than 5 percent, by weight, of the cauliflower are seriously damaged small clusters.

(c) *(B) classification.* If the frozen cauliflower is reasonably free from defects, a score of 28 to 33 points may be given. Frozen cauliflower that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the product is reasonably free from pieces and detached fragments and from any defects not specifically mentioned that affect seriously the appearance or edibility of the product, and in addition, means that:

(1) Not more than a total of 30 percent, by weight, of the cauliflower may be poorly trimmed clusters, poorly trimmed small clusters, damaged clusters, damaged small clusters, seriously damaged clusters, and seriously damaged small clusters: *Provided*, Not more than 15 percent, by weight, of the cauliflower are damaged clusters, damaged small clusters, seriously damaged clusters, seriously damaged small clusters: *Further provided*, Not more than 10 percent, by weight, of the cauliflower are seriously damaged clusters and seriously damaged small clusters.

(d) *(SStd) classification.* Frozen cauliflower that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.727 *Character*—(a) *General.* The factor of character refers to the development, texture, and degree of freedom from ricey and fuzzy units.

(1) "Ricey units" are sections of the head on which the ultimate branches have become elongated, causing the flower clusters to separate and present a loose or open and sometimes granular appearance.

(2) "Fuzzy units" are sections of the head that have elongated individual flowers or pedicels that result in a very fuzzy appearance.

(b) *(A) classification.* Frozen cauliflower that possesses a good character may be given a score of 17 to 20 points. "Good character" means that not less than 80 percent, by weight, of the cauliflower are firm and compact clusters of buds or buttons; and that the remainder of the clusters may be reasonably firm and reasonably compact or may be slightly soft, slightly ricey, or slightly fuzzy.

(c) *(B) classification.* If the frozen cauliflower possesses a reasonably good character, a score of 14 to 16 points may be given. Frozen cauliflower that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that not less than 60 percent, by weight, of the cauliflower are at least reasonably firm and reasonably compact clusters of buds or buttons; and that the remainder of the clusters may be soft, ricey, or fuzzy but not more than 10 percent, by weight, of the cauliflower may be mushy.

(d) *(SStd) classification.* Frozen cauliflower that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.728 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen cauliflower, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated:

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF SULFURED CHERRIES[1]

PRODUCT DESCRIPTION, STYLES, SIZES, AND GRADES

§ 52.741 *Product description.* "Sulfured cherries" are prepared from properly matured whole cherries (Prunus avium or Prunus cerasus) of similar varietal characteristics; are packed with or without the addition of a hardening agent, in a solution of sulfur dioxide of sufficient strength to preserve the product.

§ 52.742 *Styles of sulfured cherries.* (a) "Unstemmed and unpitted" is the style of sulfured cherries consisting of whole cherries (irrespective of size) with pits, and not less than 80 percent, by weight, of all the cherries have the stems attached.

(b) "Stemmed and unpitted" is the style of sulfured cherries consisting of whole cherries (irrespective of size) with pits and not more than ½ of 1 percent, by weight, of all the cherries are cherries with stems attached.

(c) "Stemmed and pitted" is the style of sulfured cherries consisting of whole cherries of which not more than ½ of 1 percent, by weight, of all the cherries are cherries with stems attached and: (1) For each 40 ounces of all the cherries there may be present not more than 2 cherries with pits when all cherries are of small size or extra small size; (2) for each 40 ounces of all the cherries there may be present not more than 1 cherry with a pit when all cherries are of medium size, large size, or different sizes; and (3) for each 60 ounces of all the cherries there may be present not more than 1 cherry with a pit when all cherries are of extra large size.

(d) "Unstemmed and pitted" or "cocktail" is the style of sulfured cherries consisting of whole cherries of which not more than 7 percent, by weight, of all the cherries are cherries without the stems firmly attached and: (1) For each 40 ounces of all the cherries there may be present not more than 2 cherries with pits when all cherries are of small size or extra small size; (2) for each 40 ounces of all the cherries there may be present not more than 1 cherry with a pit when all cherries are of medium size, large size, or different sizes; and (3) for each 60 ounces of all the cherries there may be present not more than 1 cherry with a pit when all cherries are of extra large size.

(e) "Unclassified" consists of sulfured cherries which do not conform to any of the foregoing styles.

(f) "Pit" means an entire pit or portion thereof attached to a sulfured cherry or within the pit cavity.

§ 52.743 *Recommended sizes of sulfured cherries.* (a) Although size is a factor in connection with some styles of sulfured cherries, it is not a factor of quality for the purpose of these grades. The size range of sulfured cherries varies on the basis of the diameter of the fruit. The diameter of the sulfured cherry is the minimum diameter of the fruit that will pass through a rigid ring of the same diameter without using pressure. The name designations of the various sizes are shown in the first column of Table No. I of this section. Sulfured cherries will be considered as meeting a particular designated size if not more than 10 percent, by weight, of all the cherries are 1 mm. smaller or 2 mm. smaller and not more than 10 percent, by weight, of all the cherries are 1 mm. larger or 2 mm. larger than the diameter range of the particular size designation: *Provided*, That not more than 1 percent, by weight, of all cherries are no more than 2 mm. smaller than the minimum diameter for the designated size and not more than 1 percent, by weight, of all cherries are no more than 2 mm. larger than the maximum diameter for the designated size.

TABLE NO. I—SIZES OF CHERRIES IN SULFURED CHERRIES

| Name designation: | *Minimum and maximum diameter* |
|---|---|
| Extra small | 14 mm. to, and including, 16 mm. |
| Small | 16 mm. to, and including, 18 mm. |
| Medium | 18 mm. to, and including, 20 mm. |
| Large | 20 mm. to, and including, 22 mm. |
| Extra large | 22 mm. and over. |

§ 52.744 *Grades of sulfured cherries.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of sulfured cherries that are clean; that possess a good color; that are practically free from defects; that possess a good character; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of sulfured cherries that are clean; that possess a reasonably good color; that are reasonably free from defects; that possess a reasonably good character; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Seconds" is the quality of sulfured cherries that are clean, but for other reasons fail to meet the requirements of U. S. Grade B or U. S. Choice.

(d) "U. S. Combination Grade" is the quality of sulfured cherries that are clean; and that with respect to color, absence of defects, and character meets the following requirements:

(1) Not less than 90 percent, by weight, of all the cherries, possess at least a reasonably good color and a reasonably good character and are free from misshapen cherries, cherries seriously damaged by mechanical injury, and seriously blemished cherries; and

(2) Unless otherwise specified, at least 50 percent, by weight, of all the cherries, possess a good color and a good character; and are free from blemished cherries or seriously blemished cherries, misshapen cherries, and cherries damaged by mechanical injury or cherries seriously damaged by mechanical injury.

§ 52.745 *Definition.* "Clean" means that the product is practically free from loose pits, leaves, detached stems, bark, fruit spurs, dirt or other foreign material.

FACTORS OF QUALITY

§ 52.746 *Ascertaining the grade with respect to "U. S. Grade A" or "U. S. Fancy" and "U. S. Grade B" or "U. S. Choice."* (a) The grade of sulfured cherries is ascertained by considering, in addition to the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

§ 52.747 *Ascertaining the ratins for each factor which is scored.* The essential variations within each factor which is scored are so described that the value may be ascertained and expressed numerically. The numerical range for the ratings of such factors is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.748 *Color*—(a) *(A) classification.* Sulfured cherries that possess a good color may be given a score of 17 to 20 points. "Good color" means that the cherries possess a practically uniform color typical of well-bleached sulfured cherries for the variety.

(b) *(B) classification.* If the sulfured cherries possess a reasonably good color, a score of 14 to 16 points may be given. "Reasonably good color" means that the cherries possess a reasonably uniform color typical of reasonably well-bleached sulfured cherries for the variety. Sulfured cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

(c) *(SStd) classification.* Sulfured cherries that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points. Sulfured cherries that fall into this classification shall not be graded above U. S. Grade D or Seconds, regardless of the total score for the product (this is a limiting rule).

§ 52.749 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from misshapen cherries, cherries damaged or seriously damaged by mechanical injury, and cherries blemished or seriously blemished by discoloration, rain or solution cracks, bird pecks, pathological injury, insect injury or blemished by other means.

(1) "Misshapen cherries" means any deformed cherries or double cherries.

(2) "Cherries damaged by mechanical injury" means any pitter tear or pitter tears which materially affect the appearance of the cherry; any open pitter hole measuring more than ⅛ inch across, but not more than 3/16 inch across, or open pitter holes aggregating more than ⅛ inch across, but not more than 3/16 inch across; any pitter hole where there is a material loss of flesh; and other mechanical injury which materially affects the appearance of the cherry.

(3) "Cherries seriously damaged by mechanical injury" means any pitter tear or pitter tears which seriously affect the appearance of the cherry; any open pitter hole measuring more than 3/16 inch across, or open pitter holes aggregating more than 3/16 inch across, any pitter hole where there is a serious loss of flesh; and other mechanical injury which seriously affects the appearance of the cherry.

(4) "Blemished cherry" means any cherry which is affected by:

(i) Dark surface discoloration exceeding in the aggregate the area of a circle 3/16 inch in diameter, but not exceeding

[2] One cluster in a single container is permitted to be damaged if such cluster exceeds 10 percent, by weight, provided that in all containers comprising the sample, such damaged cluster does not exceed an average of 10 percent by weight.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

in the aggregate ⅛ of the surface of the cherry;

(ii) Any rough surface areas which slightly affect the appearance of the cherry;

(iii) Light surface discoloration exceeding in the aggregate ⅛ of the surface of the cherry, but not exceeding in the aggregate ½ of the surface of the cherry;

(iv) Rain checks or rain cracks (*a*) in the stem basin more than ¼ inch in length, but not more than ½ inch in length, (*b*) any rain checks or rain cracks outside the stem basin more than $\frac{3}{16}$ inch in length but not more than ⅜ inch in length;

(v) Any solution cracks or other blemish or combination of any blemishes which materially affect the appearance of the cherry. The term "blemished cherry" also means any cherry the flesh of which is materially discolored.

(5) "Seriously blemished cherry" means any cherry which is affected by:

(i) Dark surface discoloration exceeding in the aggregate ⅛ of the surface of the cherry;

(ii) Any rough surface areas which materially affect the appearance of the cherry;

(iii) Light surface discoloration exceeding in the aggregate ½ of the surface of the cherry;

(iv) Rain checks or rain cracks (*a*) in the stem basin more than ½ inch in length, (*b*) any rain checks or rain cracks outside the stem basin, more than $\frac{3}{16}$ inch in length.

(v) Any solution cracks or other blemish or combination of any blemishes which seriously affect the appearance of the cherry. The term "seriously blemished cherry" also means any cherry the flesh of which is seriously discolored.

(b) (*A*) *classification.* Sulfured cherries that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that not more than a total of 10 percent, by weight, of cherries are misshapen cherries, cherries damaged by mechanical injury, seriously damaged by mechanical injury, blemished cherries or seriously blemished cherries of which not more than five percent, by weight, of all cherries are misshapen cherries, cherries seriously damaged by mechanical injury or seriously blemished cherries.

(c) (*B*) *classification.* Sulfured cherries that are reasonably free from defects may be given a score of 28 to 33 points. "Reasonably free from defects" means that not more than a total of 10 percent, by weight, of cherries are misshapen cherries, cherries seriously damaged by mechanical injury, or seriously blemished cherries. Sulfured cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

(d) (*SStd*) *classification.* Sulfured cherries that fail to meet the requirements of paragraph (c) of this section for any reason may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Seconds, regardless of the total score for the product (this is a limiting rule).

§ 52.750 *Character*—(a) *General.* The factor of character refers to the firmness of the cherries and to the condition of the flesh.

(b) (*A*) *classification.* Sulfured cherries that possess a good character may be given a score of 34 to 40 points. "Good character" means that the cherries possess a firm fleshy texture, retain their approximate original shape, are not shriveled or watery, and do not show more than slight collapsed areas of flesh. To score in this classification, sulfured cherries may contain not more than five percent, by weight, of cherries which fail to meet requirements for "good character."

(c) (*B*) *classification.* If the sulfured cherries possess a reasonably good character, a score of 28 to 33 points may be given. Sulfured cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the cherries possess a reasonably firm texture, may have slightly lost their original shape, may be slightly shriveled, or may show moderate collapsed areas of flesh. To score in this classification, sulfured cherries may contain not more than 10 percent, by weight, of cherries which fail to meet the requirements for "reasonably good character."

(d) (*SStd*) *classification.* Sulfured cherries that are soft, flabby, wrinkled, leathery, or have materially lost their original shape, or show seriously collapsed areas of flesh, or fail to meet the requirements of paragraph (c) of this section for any reason may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Seconds, regardless of the total score for the product (this is a limiting rule).

§ 52.751 *Ascertaining the grade with respect to U. S. Combination Grade.* (a) The combination grade of sulfured cherries is ascertained by considering color, absence of defects, character, and the cleanliness of the product.

(b) The definition for cleanliness and the terms defined with respect to ascertaining "U. S. Grade A" or "U. S. Fancy" and "U. S. Grade B" or "U. S. Choice" outlined under the factors of color, absence of defects and character for these grades are also applicable for ascertaining the U. S. Combination Grade.

LOT CERTIFICATION TOLERANCES

§ 52.752 *Tolerance for certification of officially drawn samples for U. S. Combination Grade of sulfured cherries.* (a) When certifying samples that have been officially drawn and which represent a specific lot of sulfured cherries, the percent, by weight, of cherries which possess at least a reasonably good color and a reasonably good character, and are free from misshapen cherries, cherries seriously damaged by mechanical injury, and seriously blemished cherries is computed by averaging the percent, by weight, of such cherries in all samples of the lot if:

(1) None of the samples in the lot contain less than 80 percent, by weight of such cherries.

(b) The percent, by weight, of cherries for the lot which possess a good color and a good character, and are free from blemished cherries or seriously blemished cherries, misshapen cherries and cherries damaged by mechanical injury or cherries seriously damaged by mechanical injury, is computed by averaging the percent, by weight, of such cherries in all samples of the lot if:

(1) None of the samples in the lot contains less than 35 percent, by weight, of such cherries.

§ 52.753 *Tolerance for certification of officially drawn samples for "U. S. Grade A" or "U. S. Fancy" and U. S. Grade B" or "U. S. Choice."* (a) When certifying samples that have been officially drawn and which represent a specific lot of sulfured cherries, the grade for such lot will be determined by averaging the total scores of the samples comprising the lot, if:

(1) Not more than one-sixth of such samples fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such samples which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all samples in the lot for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the samples comprising the lot falls more than four points below the minimum score for the grade indicated by the average of the total scores; and

(3) All samples comprising the lot meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED RED SOUR (TART) PITTED CHERRIES [1]

IDENTITY AND GRADES

§ 52.771 *Identity.* "Canned red sour (tart) pitted cherries" means the canned product prepared from mature pitted cherries of the red sour varietal group (*Prunus cerasus*), as such product is defined in the standard of identity for canned cherries (21 CFR 27.39), issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.772 *Grades of canned red sour (tart) pitted cherries.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned red sour (tart) pitted cherries that possess similar varietal characteristics; that possess a good, bright typical color; that are practically free from defects; that possess a good character; that possess a normal flavor; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart. In addition to the foregoing requirements, such canned red sour (tart) pitted cherries may contain not more than 5 percent, by count, of cherries that are less than $\frac{9}{16}$ inch in diameter.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned red sour (tart) pitted cherries that possess similar varietal characteristics; that possess a fairly good typical color; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart. There is no size requirement for such canned red sour (tart) pitted cherries.

(c) "U. S. Grade D" or "Substandard" is the quality of canned red sour (tart) pitted cherries that fail to meet any requirement of "U. S. Grade C" or "U. S. Standard."

LIQUID MEDIA, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.773 *Designations of liquid media and Brix measurements.* "Cut-out" requirements for packing media are not incorporated in the grades of the finished product since sirup or any other packing medium, as such, is not a factor of quality for the purpose of these grades. Canned red sour (tart) pitted cherries are packed in the optional packing media referred to in the aforesaid standard of identity for canned cherries and such packing media include, but are not limited to, the following, which have the indicated "cut-out" Brix measurement:

| *Designation of liquid media* | *Brix measurement* |
|---|---|
| "Extra heavy sirup" | 28° or more but less than 45°. |
| "Heavy sirup" | 22° or more but less than 28°. |
| "Light sirup" | 18° or more but less than 22°. |
| "Slightly sweetened water" | Less than 18°. |

"Water" (water or any mixture of water and cherry juice).

§ 52.774 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container of canned red sour (tart) pitted cherries be filled as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the total capacity of the container.

§ 52.775 *Recommended drained weight.* The drained weight recommendations in Table No. I of this section are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of canned red sour (tart) pitted cherries is determined by emptying the contents of the container upon a circular sieve of proper diameter containing 8 meshes to the inch (0.097-inch square openings) and allowing to drain for two minutes. A sieve 8 inches in diameter is used for No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the No. 3 size can.

TABLE NO. I—RECOMMENDED DRAINED WEIGHTS

| Container size or designation | Over all dimensions | | Packed in water | Packed in any sirup or "slightly sweetened water" |
|---|---|---|---|---|
| | Width | Height | | |
| | *Inches* | *Inches* | *Ounces* | *Ounces* |
| No. 303 | $3\frac{31}{32}$ | $4\frac{45}{64}$ | 11 | $10\frac{3}{4}$ |
| No. 2 | $3\frac{7}{16}$ | $4\frac{21}{64}$ | $13\frac{1}{2}$ | $12\frac{3}{4}$ |
| No. 10 | $6\frac{3}{16}$ | 7 | 74 | $70\frac{3}{4}$ |

FACTORS OF QUALITY

§ 52.776 *Ascertaining the grade.* (a) The grade of canned red sour (tart) pitted cherries is ascertained by considering, in addition to the requirements of the respective grade (including the requirement for size in U. S. Grade A or U. S. Fancy) the respective ratings of the factors of color, absence of defects, and character.

(b) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors | *Points* |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) "Normal flavor" means that the flavor is characteristic of canned red sour (tart) pitted cherries and that the product is free from objectionable flavors of any kind.

§ 52.777 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range for the rating of each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19 or 20 points).

§ 52.778 *Color*—(a) (*A*) *classification.* Canned red sour (tart) pitted cherries that possess a good, bright typical color may be given a score of 17 to 20 points. "Good, bright typical color" means that the canned red sour (tart) pitted cherries possess a practically uniform color that is bright and typical of canned red sour (tart) pitted cherries which had been properly prepared and properly processed from properly ripened red sour cherries.

(b) (*C*) *classification.* If the canned red sour (tart) pitted cherries possess a fairly good typical color, a score of 14 to 16 points may be given. Canned red sour (tart) pitted cherries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good typical color" means that the canned red sour (tart) pitted cherries possess a fairly uniform typical color of canned red sour (tart) pitted cherries which had been properly prepared and properly processed and which color may range from a brownish cast to mottled shades of brown.

(c) (*SStd*) *classification.* Canned red sour (tart) pitted cherries that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.779 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, pits, mutilated cherries, and cherries blemished by scab, hail injury, discoloration, scar tissue, or by other means.

(1) "Cherry" means a whole cherry, whether or not pitted, or portions of such cherries which in the aggregate approximate the average size of the cherries.

(2) "Harmless extraneous material" means any vegetable substance (including, but not being limited to, a leaf or a stem, and any portions thereof) that is harmless.

(3) "Pit" means a whole pit or portions of pits computed as follows:

(i) A single piece of pit shell, whether or not within or attached to a whole

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act.

cherry, that is larger than one-half pit shell is considered as one pit;

(ii) A single piece of pit shell, whether or not within or attached to a whole cherry, that is not larger than one-half pit shell is considered as one-half pit;

(iii) Pieces of pit shell, within or attached to a whole cherry, when their combined size is larger than one-half pit shell are considered as one pit; and

(iv) Pieces of pit shell, within or attached to a whole cherry, when their combined size is not larger than one-half pit shell are considered as one-half pit.

(4) "Mutilated cherry" means a cherry that is so pitter-torn or damaged by other means that the entire pit cavity is exposed and the appearance of the cherry is seriously affected.

(5) "Blemished cherry" means any cherry the skin of which is blemished to the extent that the aggregate blemished area materially affects the appearance of the cherry. The term "blemished cherry" also means any cherry the flesh of which is materially discolored.

(6) "Seriously blemished" means any cherry blemished to the extent that the appearance or eating quality is seriously affected.

(b) *(A) classification.* Canned red sour (tart) pitted cherries that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present (1) not more than 1 piece of harmless extraneous material for each 60 ounces of net contents; (2) not more than 1 pit for each 20 ounces of net contents; and (3) not more than a total of 10 percent, by count, of cherries that are mutilated cherries and blemished cherries of which not more than 4 percent, by count, of all cherries are seriously blemished.

(c) *(C) classification.* If the canned red sour (tart) pitted cherries are fairly free from defects, a score of 28 to 33 points may be given. Canned red sour (tart) pitted cherries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present (1) not more than 1 piece of harmless extraneous material for each 20 ounces of net contents; (2) not more than 1 pit for each 20 ounces of net contents; and (3) not more than a total of 20 percent, by count, of cherries that are mutilated cherries and blemished cherries of which not more than 15 percent, by count, of all cherries are blemished.

(d) *(SStd) classification.* Canned red sour (tart) pitted cherries that fail to meet the requirements of paragraph (c) of this section for any reason may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.780 *Character—(a) General.* The factor of character refers to the degree of maturity of the cherries and the physical characteristics of the flesh of the cherries in canned red sour (tart) pitted cherries.

(b) *(A) classification.* Canned red sour (tart) pitted cherries that possess a good character may be given a score of 34 to 40 points. "Good character" means that the canned red sour (tart) pitted cherries possess a firm, fleshy texture typical of canned red sour (tart) pitted cherries which had been properly prepared and properly processed from properly ripened red sour cherries.

(c) *(C) classification.* If the canned red sour (tart) pitted cherries possess a fairly good character, a score of 28 to 33 points may be given. Canned red sour (tart) pitted cherries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the canned red sour (tart) pitted cherries possess a fairly firm or fairly fleshy texture but are not soft, tough, very thin-fleshed, or leathery in character.

(d) *(SStd) classification.* Canned red sour (tart) pitted cherries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.781 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned red sour (tart) pitted cherries, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification, including the computation of pits based on a total quantity of sample contents of 24 pounds.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN RED SOUR (TART) PITTED CHERRIES [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.801 *Product description.* Frozen red sour (tart) pitted cherries are prepared from properly ripened fruit of the cherry tree of the red sour varietal group (Prunus cerasus); are washed, pitted, and sorted; are properly drained before filling; may be packed with or without packing media; and are frozen and stored at temperatures necessary for the preservation of the product.

§ 52.802 *Grades of frozen red sour (tart) pitted cherries.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen red sour (tart) pitted cherries that possess similar varietal characteristics; that possess a good red color; that are practically free from defects; that possess a good character; that possess a normal flavor; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart. In addition to the foregoing requirements, such frozen red sour (tart) pitted cherries may contain not more than 5 percent, by count, of cherries that are less than $^{9}/_{16}$ inch in diameter.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of frozen red sour (tart) pitted cherries that possess similar varietal characteristics; that possess a reasonably good red color; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor; and score not less than 70 points when scored in accordance with the scoring system outlined in this subpart. There is no size requirement for such frozen red sour (tart) pitted cherries.

(c) "U. S. Grade D" or "Substandard" is the quality of frozen red sour (tart) pitted cherries that fail to meet the requirements of U. S. Grade C or U. S. Standard.

FACTORS OF QUALITY

§ 52.803 *Ascertaining the grade.* (a) The grade of frozen red sour (tart) pitted cherries is determined immediately after thawing to the extent that the cherries may be separated easily and the cherries are free from ice and solidified packing media. The grade is determined by considering in addition to the requirements of the respective grade (including the requirement for size in U. S. Grade A or U. S. Fancy) the respective ratings of the factors of color, absence of defects, and character.

(b) The relative importance of each factor is expressed numerically on a scale of 100. The maximum number of points that may be given each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) "Normal flavor" means that the flavor is characteristic of frozen red sour (tart) pitted cherries and that the product is free from objectionable flavors of any kind.

§ 52.804 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range for the rating of each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.805 *Color—(a) (A) classification.* Frozen red sour (tart) pitted cherries that possess a good red color may be given a score of 17 to 20 points. "Good red color" means that the frozen cherries possess a color that is bright and typical of properly ripened cherries and that is reasonably uniform in that not more than 15 percent, by count, of cherries vary markedly from this color because of discoloration due to oxidation, improper processing, or other causes, or because of undercolored cherries.

(b) *(C) classification.* If the frozen red sour (tart) pitted cherries possess a reasonably good red color, a score of 14 to 16 points may be given. Frozen red sour (tart) pitted cherries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good red color" means that the frozen cherries possess a color that is reasonably bright and typical of properly ripened cherries and that is fairly uniform in that not more than 25 percent, by count, of cherries vary markedly from this color because of discoloration due to oxidation, improper processing, or other causes, or because of undercolored cherries.

(c) *(SStd) classification.* Frozen red sour (tart) pitted cherries that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.806 *Absence of defects—(a) General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, pits, mutilated cherries, and cherries blemished by scab, hail injury, discoloration, scar tissue, or by other means.

(1) "Cherry" means a whole cherry, whether or not pitted, or portions of such cherries which in the aggregate approximate the average size of the cherries.

(2) "Harmless extraneous material" means any vegetable substance (including, but not being limited to, a leaf or a stem and any portions thereof) that is harmless.

(3) "Pit" means a whole pit or portions of pits computed as follows:

(i) A single piece of pit shell, whether or not within or attached to a whole cherry, that is larger than one-half pit shell is considered as one pit;

(ii) A single piece of pit shell, whether or not within or attached to a whole cherry, that is not larger than one-half pit shell is considered as one-half pit;

(iii) Pieces of pit shell, within or attached to a whole cherry, when their combined size is larger than one-half pit shell are considered as one pit; and

(iv) Pieces of pit shell, within or attached to a whole cherry, when their combined size is not larger than one-half pit shell are considered as one-half pit.

(4) "Mutilated cherry" means a cherry that is so pitter-torn or damaged by other means that the entire pit cavity is exposed and the appearance of the cherry is seriously affected.

(5) "Blemished cherry" means any cherry the skin of which is blemished to the extent that the aggregate area covered by the blemishes exceeds the area of a circle $^{9}/_{32}$ inch in diameter and the appearance of the cherry is materially affected by such blemishes. The term "blemished cherry" also means any cherry the flesh of which is materially discolored.

(6) "Seriously blemished" means any cherry blemished to the extent that the appearance or eating quality is seriously affected.

(b) *(A) classification.* Frozen red sour (tart) pitted cherries that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present (1) not more than 1 piece of harmless extraneous material for each 60 ounces of net contents; (2) not more than 1 pit for each 20 ounces of net contents; and (3) not more than a total of 10 percent, by count, of cherries that are mutilated cherries and blemished cherries of which not more than 4 percent, by count, of all cherries are seriously blemished.

(c) *(C) classification.* If the frozen red sour (tart) pitted cherries are fairly free from defects, a score of 28 to 33 points may be given. Frozen red sour (tart) pitted cherries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present (1) not more than 1 piece of harmless extraneous material for each 20 ounces of net contents; (2) not more than 1 pit for each 20 ounces of net contents; and (3) not more than a total of 20 percent, by count, of cherries that are mutilated cherries and blemished cherries of which not more than 15 percent, by count, of all cherries are blemished.

(d) *(SStd) classification.* Frozen red sour (tart) pitted cherries that fail to meet the requirements of paragraph (c) of this section for any reason may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.808 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen red sour (tart) pitted cherries, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample,[2] if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] The allowance for pits will be based on the average of all containers comprising the sample.

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.809 *Score sheet for frozen red sour (tart) pitted cherries.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED SWEET CHERRIES [1]

IDENTITY, TYPES, STYLES, AND GRADES

§ 52.821 *Identity.* "Canned sweet cherries" means the canned product prepared from mature cherries and as defined in the standard of identity for canned cherries (21 CFR 27.30) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.822 *Types of canned sweet cherries.* (a) "Light" type are of the light sweet varietal group and includes, but is not limited to, such varieties known as Royal Anne.

(b) "Dark" type are of the dark sweet varietal group and includes, but is not limited to, such varieties known as Bing, Black Republican, Schmidt, and Lambert.

§ 52.823 *Styles of canned sweet cherries.* Unless specifically designated as "pitted", canned sweet cherries are considered as "unpitted."

(a) "Unpitted" sweet cherries are stemmed cherries without the pits removed.

(b) "Pitted" sweet cherries are stemmed cherries with the pits removed.

§ 52.824 *Grades of canned sweet cherries.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned sweet cherries that are practically free from defects; that possess a good character; that possess a normal flavor and odor; and that are of such quality with respect to color and uniformity of size as to score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of canned sweet cherries that are reasonably free from defects; that possess a reasonably good character; that possess a normal flavor and odor; and that are of such quality with respect to color and uniformity of size as to score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of canned sweet cherries that possess a fairly good color; that are fairly uniform in size; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor and odor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of canned sweet cherries that fail to meet the requirements of U. S. Grade C or U. S. Standard and is the quality of canned sweet cherries that may or may not meet the minimum standard of quality for canned cherries issued pursuant to the Federal Food, Drug, and Cosmetic Act.

LIQUID MEDIA, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.825 *Liquid media and Brix measurements for canned sweet cherries.* "Cutout" requirements for liquid media in canned sweet cherries are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. The "cutout" Brix measurement, as applicable, for the respective designations are as follows:

| Designation | Brix measurement |
|---|---|
| "Extra heavy sirup" or "Extra heavy cherry juice sirup" | 25° or more but not more than 35°. |
| "Heavy sirup" or "Heavy cherry juice sirup" | 20° or more but less than 25°. |
| "Light sirup" or "Light cherry juice sirup" | 16° or more but less than 20°. |
| "Slightly sweetened water" or "Slightly sweetened cherry juice" | Less than 16°. |
| "In water" | Packed in water. |
| "In cherry juice" | Packed in cherry juice. |

§ 52.826 *Fill of container for canned sweet cherries.* The standard of fill of container for canned sweet cherries is the maximum quantity of cherries which can be sealed in the container and processed by heat to prevent spoilage, without crushing such ingredient. Canned sweet cherries that do not meet this requirement are "Below Standard in Fill."

§ 52.827 *Recommended minimum drained weight.* The minimum drained weight recommendations in Table I of § 52.828 are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purposes of these grades. The drained weight of canned sweet cherries is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch±3%, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and sweet cherries less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

§ 52.828 *Compliance with recommended drained weights.* Compliance with the recommended drained weights for canned sweet cherries is determined by averaging the drained weights from all the containers which are representative of a specific lot, and such lot is considered as meeting the recommendations, for the applicable styles, if:

(a) The average drained weight from all the containers meets the recommended drained weight;

(b) One-half or more of the containers meet the recommended drained weight, and

(c) The drained weights from the containers which do not meet the recommended drained weight are within the range of variability for good commercial practice.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR PITTED AND UNPITTED CANNED SWEET CHERRIES

| Container size or designation (metal, unless otherwise stated) | In extra heavy sirups and in declared "dietetic packs" whether or not packed in water | In heavy sirups | In [illegible] sirups and in [illegible] water | Other than declared "dietetic packs" packed in water |
|---|---|---|---|---|
| | (Oz.) | (Oz.) | (Oz.) | (Oz.) |
| 8 Z tall | 4¾ | 5 | [illegible] | [illegible] |
| No. 1 tall | 9¾ | 10 | [illegible] | [illegible] |
| No. 303 | 9¾ | 10 | [illegible] | [illegible] |
| No. 303 glass | 9¾ | 10 | [illegible] | [illegible] |
| No. 2 | 12 | 12½ | [illegible] | [illegible] |
| No. 2½ | 17¼ | 18 | [illegible] | [illegible] |
| No. 2½ glass | 17¼ | 17¾ | [illegible] | [illegible] |
| No. 10 | 66 | 68 | 70 | 70 |

FACTORS OF QUALITY

§ 52.829 *Ascertaining the grade.* (a) The grade of canned sweet cherries is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size, absence of defects, and character.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 30 |
| Uniformity of size | 20 |
| Absence of defects | 30 |
| Character | 20 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the canned sweet cherries are free from objectionable flavors and objectionable odors of any kind.

§ 52.830 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "27 to 30 points" means 27, 28, 29, or 30 points).

§ 52.831 *Color—(a) General.* The factor of color refers to the color typical of the varietal group— either light sweet or dark sweet; and to the intensity and brightness of such characteristic color.

(b) *(A) classification.* Canned sweet cherries that possess a good color may be given a score of 27 to 30 points. "Good color" means that the cherries are bright and possess a color typical of well-matured cherries of similar varieties which have been properly processed; that in light sweet cherries, the basic background color, exclusive of blush, is a pinkish-yellow to pale amber color and that the blush appears as a surface color ranging from very light pinkish-tan to tannish-brown; and that in dark sweet cherries, the basic background color is a typical deep-red to purple-red or purple-black.

(c) *(B) classification.* If the canned sweet cherries possess a reasonably good color, a score of 24 to 26 points may be given. "Reasonably good color" means that the cherries possess a color typical of reasonably well-matured cherries of similar varieties which have been properly processed; that in light sweet cherries, the basic background color, exclusive of blush, is a pinkish-yellow to amber color which may be no more than slightly dull and that the blush appears as a surface color ranging from tan to tannish-brown; and that in dark sweet cherries, the basic background color is a typical deep red to purple-red or purple-black which may be no more than slightly dull.

(d) *(C) classification.* If the canned sweet cherries possess a fairly good color, a score of 21 to 23 points may be given. Canned sweet cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the cherries possess a color typical of fairly well-matured cherries of similar varieties which have been properly processed; that in light sweet cherries, the basic background color and blush may be variable or may be slightly dull but is not off-color; and that in dark sweet cherries, the cherries may possess a slightly dull deep red to slightly dull purple-red color or slightly dull purple-black color that may be variable but is not off-color.

(e) *(SStd) classification.* Canned sweet cherries that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.832 *Uniformity of size—(a) General.* The factor of uniformity of size refers to the uniformity of diameters in pitted and unpitted cherries, and to the variation of weight and minimum weight in unpitted cherries.

(1) "Diameter" of a cherry is the diameter of a rigid round hole through which the cherry will just pass without using force. In pitted cherries, the diameter is that which approximates the apparent original size had the cherry not been pitted but does not apply to any pitter-torn cherries.

(b) *(A) classification.* Canned sweet cherries that are practically uniform in size may be given a score of 18 to 20 points. "Practically uniform in size" means that:

(1) In unpitted cherries,

(i) The weight of each cherry is not less than $\frac{1}{10}$ ounce (2.84 grams);

(ii) The weight of the largest cherry is not more than twice the weight of the smallest cherry; and

(iii) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{16}$ inch.

(2) In pitted cherries,

(i) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{16}$ inch.

(c) *(B) classification.* If the canned sweet cherries are reasonably uniform in size, a score of 16 or 17 points may be given. "Reasonably uniform in size" means that:

(1) In unpitted cherries,

(i) The weight of each cherry is not less than $\frac{1}{10}$ ounce (2.84 grams);

(ii) The weight of the largest cherry is not more than twice the weight of the smallest cherry; and

(iii) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{8}$ inch.

(2) In pitted cherries,

(i) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{8}$ inch.

(d) *(C) classification.* If the canned sweet cherries are fairly uniform in size, a score of 14 or 15 points may be given. Canned sweet cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Fairly uniform in size" means that:

(1) In unpitted cherries,

(i) The weight of each cherry is not less than $\frac{1}{10}$ ounce (2.84 grams);

(ii) The weight of the largest cherry is not more than twice the weight of the smallest cherry; and

(iii) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{8}$ inch.

(2) In pitted cherries,

(i) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{8}$ inch.

(d) *(C) classification.* If the canned sweet cherries are fairly uniform in size, a score of 14 or 15 points may be given. Canned sweet cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Fairly uniform in size" means that:

(1) In unpitted cherries,

(i) The weight of each cherry is not less than $\frac{1}{10}$ ounce (2.84 grams);

(ii) The weight of the largest cherry is not more than twice the weight of the smallest cherry; and

(iii) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{8}$ inch.

(2) In pitted cherries,

(i) The diameter of the cherry with the greatest diameter may exceed the diameter of the cherry with the smallest diameter by not more than $\frac{3}{16}$ inch; and in 85 percent, by count, of all the cherries with the most uniform diameters the diameter of the cherries with the greatest diameters may exceed the diameter of the cherries with the smallest diameters by not more than $\frac{1}{8}$ inch.

(e) *(SStd) classification.* Canned "unpitted" sweet cherries which fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points, shall not be graded above Substandard (this is a limiting rule), and are also "Below Standard in Quality" for the applicable reasons:

"Small";
"Mixed sizes."

§ 52.833 *Absence of defects—(a) General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material; from portions of stems; from pits or portions thereof in pitted style; from slightly damaged, damaged, slightly misshapen, misshapen, blemished, and seriously blemished cherries; and from any other defects which detract from the appearance or edibility of the product. Processing cracks are not considered as defects but are considered under the factor of character.

(1) "Cherry" means a whole cherry, whether or not pitted, or portions of such cherries which in the aggregate approximate the average size of a cherry.

(2) "Harmless extraneous material" means any vegetable substance (including, but not limited to, a leaf or portion thereof, a stem or portion thereof longer than $\frac{1}{2}$ inch) that is harmless.

(3) "Portions of cherry stems," whether loose or attached, means such portions that are $\frac{1}{2}$ inch or less and such portions are considered as a defect separate from "harmless extraneous material."

(4) A "pit" is considered as a defect only in the style of pitted cherries and means a whole pit or portions of pits computed as follows:

(i) A single piece of pit shell, whether or not within or attached to a whole cherry, that is larger than one-half pit shell is considered as one pit;

(ii) A single piece of pit shell, whether or not within or attached to a whole cherry, that is not larger than one-half pit shell is considered as one-half pit;

(iii) Pieces of pit shell, within or attached to a whole cherry, when their combined size is larger than one-half pit shell are considered as one pit; and

(iv) Pieces of pit shell, within or attached to a whole cherry, when their combined size is not larger than one-half pit shell are considered as one-half pit.

(5) "Slightly damaged" means any injury other than blemishes which affects the appearance of the cherry, and includes:

(i) Slight circular cracks with slight discoloration, such as "rain checks," confined entirely within the stem basin and more than $\frac{1}{4}$ inch, but not more than $\frac{1}{2}$ inch, in length;

(ii) Slight cracks with slight discoloration, such as "rain checks," outside the stem basin and more than $\frac{3}{16}$ inch but not more than $\frac{3}{8}$ inch in length;

(iii) Mutilated cherries in unpitted style whereby the cherry is seriously torn at the stem end and that such torn area exceeds that of a circle $\frac{1}{4}$ inch in diameter; and mutilated cherries in pitted style whereby the cherry is so pitter-torn or so damaged by other similar means that the entire pit cavity is exposed and the appearance of the cherry is seriously affected.

(6) "Damaged" means any injury other than blemishes which affects the appearance of the cherry and includes:

(i) Serious circular cracks with discoloration, such as "rain checks," confined entirely within the stem basin and more than $\frac{1}{2}$ inch in length;

(ii) Serious cracks with discoloration, such as "rain checks," outside the stem basin and more than $\frac{3}{8}$ inch in length;

(iii) Deep cracks with discoloration, in unpitted style, outside the stem basin that are so deep as to expose the pit or that otherwise seriously affect the appearance of the cherry.

(7) "Slightly misshapen" cherries includes, but is not limited to, cherries which are slightly deformed or in which there is a cleavage (or deep furrow) with the skin unbroken at the suture extending more than $\frac{1}{16}$ inch but no more than one-half the length from the stem cavity to the apex.

(8) "Misshapen" cherries means cherries which are deformed to the extent that the appearance is materially affected and includes, but is not limited to "double" cherries in unpitted style and cherries in which there is a cleavage (or deep furrow) with the skin unbroken at the suture extending more than one-half the length from the stem cavity to the apex.

(9) "Blemished" means any blemished areas on the skin, which singly or in the aggregate, materially affect the appearance of the cherry; and includes:

(i) Such surface blemishes having an aggregate area exceeding that of a circle $\frac{3}{16}$ inch in diameter, not extending into the fruit tissue but which materially affect the appearance of the cherry; or

(ii) Such blemishes having an aggregate area equivalent of, or less than, that of a circle $\frac{3}{16}$ inch in diameter and extending into the fruit tissue so that the flesh is materially discolored.

(10) "Seriously blemished" means blemished to the extent that the appearance or edibility of the cherry is seriously affected.

(b) *(A) classification.* Canned sweet cherries that are practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" means that the canned sweet cherries are practically free from any defects not specifically mentioned that affect the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(1) 1 piece of harmless extraneous material for each 60 ounces of net contents;

(2) 1 portion of cherry stem for each 20 ounces of net contents;

(3) In pitted style, 1 pit for each 20 ounces of net contents; and

(4) A total of 10 percent by count of the cherries may be slightly damaged, damaged, slightly misshapen, misshapen, blemished, seriously blemished, or any combination thereof but not more than 5 percent by count of the cherries may be damaged, misshapen, blemished, seriously blemished, or any combination thereof: *Provided*, That not more than 2 percent by count of the cherries may be seriously blemished.

(c) *(B) classification.* If the canned sweet cherries are reasonably free from defects, a score of 24 to 26 points may be given. Canned sweet cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the canned sweet cherries are reasonably free from any defects not specifically mentioned that affect the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(1) 1 piece of harmless extraneous material for each 40 ounces of net contents;

(2) A total of 5 portions of cherry stems but not more than 1 portion of cherry stem may be longer than $\frac{1}{4}$ inch but not longer than $\frac{1}{2}$ inch for each 20 ounces of net contents;

(3) In pitted style, 1 pit for each 20 ounces of net contents; and

(4) A total of 20 percent by count of the cherries may be slightly damaged, damaged, slightly misshapen, misshapen, blemished, seriously blemished, or any combination thereof but not more than 10 percent by count of the cherries may be damaged, misshapen, blemished, seriously blemished, or any combination thereof: *Provided*, That not more than 3 percent by count of the cherries may be seriously blemished.

(d) *(C) classification.* If the canned sweet cherries are fairly free from defects, a score of 21 to 23 points may be given. Canned sweet cherries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the canned sweet cherries are fairly free from any defects not specifically mentioned that affect the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(1) 1 piece of harmless extraneous material for each 20 ounces of net contents;

(2) A total of 10 portions of cherry stems but not more than 3 portions of cherry stems, each of which may be longer than $\frac{1}{4}$ inch but not longer than $\frac{1}{2}$ inch for each 20 ounces of net contents;

(3) In pitted style, 1 pit for each 20 ounces of net contents;

(4) A total of 30 percent by count of the cherries may be slightly damaged, damaged, misshapen, blemished, seriously blemished, or any combination thereof but not more than 15 percent by count of the cherries may be blemished and seriously blemished.

(e) *(SStd) classification.* Canned sweet cherries which fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points; shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule); and may be "Below Standard in Quality" for the applicable reasons:

"Partially pitted;"
"Blemished."

§ 52.834 *Character*—(a) *General.* The factor of character refers to the fleshiness and to the tenderness and texture in relation to maturity in the canned sweet cherries and to the presence of serious processing cracks in unpitted style.

(1) "Serious processing cracks" means cracks without any discoloration that are so deep as to expose the pit; processing cracks that are not serious are not scoreable.

(b) *(A) classification.* Canned sweet cherries that possess a good character may be given a score of 18 to 20 points. "Good character" means that the cherries are thick-fleshed, are tender but not soft or noticeably flabby, and otherwise possess a good texture characteristic of canned sweet cherries that have been properly processed from well-matured cherries; that not more than 10 percent by count of the cherries may possess a reasonably good character; and that, in unpitted style, not more than 5 percent by count of the cherries may possess serious processing cracks.

(c) *(B) classification.* If the canned sweet cherries possess a reasonably good character, a score of 16 or 17 points may be given. Canned sweet cherries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the cherries are reasonably thick-fleshed, are reasonably tender but not more than slightly soft nor markedly flabby, and otherwise possess a texture characteristic of canned sweet cherries that have been properly processed from reasonably well-matured cherries; that not more than 10 percent by count of the cherries may possess a fairly good character provided, in unpitted cherries, none are thin-fleshed; and that, in unpitted style, not more than 10 percent by count of the cherries may possess serious processing cracks.

(d) *(C) classification.* If the canned sweet cherries possess a fairly good character, a score of 14 or 15 points may be given. Canned sweet cherries that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the cherries may be lacking in thickness of flesh but, in unpitted cherries, the total weight of pits is not more than 12 percent of the weight of drained cherries; may be variable in tenderness and texture, ranging from firm to soft, but characteristic of canned sweet cherries that may have been processed from slightly immature to slightly over-mature cherries; that not more than 10 percent by count of the cherries may be markedly flabby; and that, in unpitted style, serious processing cracks may be present.

(e) *(SStd) classification.* Canned sweet cherries that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule). Canned pitted sweet cherries in which the total weight of the pits is more than 12 percent of the weight of drained cherries are also "Below Standard in Quality—Thin Fleshed."

LOT CERTIFICATION TOLERANCES

§ 52.835 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned sweet cherries, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule must be within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

1 Indicates limiting rule.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED CREAM STYLE CORN [1]

IDENTITY, COLORS, AND GRADES

§ 52.851 *Identity.* "Canned cream style corn" means the canned product properly prepared from the clean, sound, succulent kernels of sweet corn as defined in the definition and standard of identity for canned corn (21 CFR 51.20) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.852 *Colors of canned cream style corn.* (a) White.

(b) Golden or yellow.

§ 52.853 *Grades of canned cream style corn.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned cream style corn that possesses similar varietal characteristics; that is tender; that possesses a good color; that possesses a good consistency; that is practically free from defects; that possesses a very good flavor; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 90 points: *Provided*, That the cream style corn may possess a reasonably good color, a reasonably good consistency, a good flavor, and may be reasonably tender, scoring not less than 26 points if the total score is not less than 90 points.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of canned cream style corn that possesses similar varietal characteristics; that is reasonably tender; that possesses a reasonably good color; that possesses a reasonably good consistency; that is reasonably free from defects; that possesses a good flavor; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 80 points: *Provided*, That the cream style corn may possess a fairly good color, scoring not less than 7 points if the total score is not less than 80 points.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of canned cream style corn that possesses similar varietal characteristics; that is fairly tender; that possesses a fairly good color; that possesses a fairly good consistency; that is fairly free from defects; that possesses a fairly good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of canned cream style corn that fails to meet the requirements of U. S. Grade C or U. S. Standard and may or may not meet the minimum standards of quality for canned cream style corn issued pursuant to the Federal Food, Drug, and Cosmetic Act.

FILL OF CONTAINER

§ 52.854 *Fill of container for canned cream style corn.* The standard of fill of container for canned cream style corn is not incorporated in the grades of the finished product, since fill of container, as such, is not a factor of quality for the purpose of these grades. The standard fill of container for canned cream style corn is a fill of not less than 90 percent of the total capacity of the container. Canned cream style corn that does not meet this requirement is "Below standard in fill."

FACTORS OF QUALITY

§ 52.855 *Ascertaining the grade.* (a) The grade of canned cream style corn is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, consistency, absence of defects, tenderness and maturity, and flavor.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factor: | Points |
|---|---|
| Color | 10 |
| Consistency | 20 |
| Absence of defects | 20 |
| Tenderness and maturity | 30 |
| Flavor | 20 |
| Total score | 100 |

§ 52.856 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.857 *Color*—(a) *(A) classification.* Canned cream style corn that possesses a good color may be given a score of 9 or 10 points. "Good color" means that the cut kernels possess a practically uniform color typical of tender sweet corn and that the product is bright and is practically free from "off-variety" kernels.

(b) *(B) classification.* Canned cream style corn that possesses a reasonably good color may be given a score of 8 points. "Reasonably good color" means that the kernels possess a reasonably uniform color typical of reasonably tender sweet corn, and that the product may lack brightness but not to the extent that the appearance is materially affected, and is reasonably free from "off-variety" kernels.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(c) *(C) classification.* Canned cream style corn that possesses a fairly good color may be given a score of 6 or 7 points. Canned cream style corn that scores 7 points in this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, and if scored 6 points in this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a partial limiting rule). "Fairly good color" means that the kernels possess a fairly uniform color typical of fairly tender sweet corn and that the product may be dull, but not to the extent that the appearance is seriously affected, and is fairly free from "off-variety" kernels.

(d) *(SStd) classification.* Canned cream style corn that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.858 *Consistency*—(a) *General.* The factor of consistency refers to the viscosity of the product, to the degree of smoothness, and to the separation of free liquor.

(b) *(A) classification.* Canned cream style corn that possesses a good consistency may be given a score of 18 to 20 points. "Good consistency" means that the canned cream style corn, after stirring and emptying from the container to a dry flat surface, possesses a heavy cream-like consistency, with not more than a slight appearance of curdling, forms a slightly mounded mass, and that at the end of two minutes after emptying on the dry flat surface there is practically no separation of free liquor.

(c) *(B) classification.* If the canned cream style corn has a reasonably good consistency a score of 16 or 17 points may be given. "Reasonably good consistency" means that the canned cream style corn, after stirring and emptying from the container to a dry flat surface, has a reasonably good creamy consistency, with not more than a moderate appearance of curdling, may flow just enough to level off to a nearly uniform depth or may be moderately stiff and moderately mounded, and that at the end of two minutes after emptying on the dry flat surface there may be a slight separation of free liquor.

(d) *(C) classification.* Canned cream style corn that has a fairly good consistency may be given a score of 14 or 15 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good consistency" means that the canned cream style corn, after stirring and emptying on a dry flat surface, may be thin but not excessively thin, or thick but not excessively dry, pasty, or crumbly, or moderately but not excessively curdled, and that at the end of two minutes after emptying on the dry flat surface there may be a moderate but not excessive separation of free liquor. The approximate circular area over which the product spreads when emptied on a dry flat surface shall not exceed 12 inches: *Provided,* That when the washed, drained residue of canned cream style corn contains more than 20 percent of alcohol insoluble solids, the average diameter of the area over which the product spreads shall not exceed 10 inches.[2]

(e) *(SStd) classification.* Canned cream style corn that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality" for the following reason: Excessively liquid.

§ 52.859 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from pieces of cob, husk, silk, or other harmless extraneous vegetable matter, from pulled kernels, and from discolored kernels or other defects.

(b) *(A) classification.* Canned cream style corn that is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, discolored kernels, or other defects may be present that do not more than slightly affect the appearance or eating quality of the product.

(c) *(B) classification.* If the canned cream style corn is reasonably free from defects, a score of 16 or 17 points may be given. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, discolored kernels, or other defects may be present that do not materially affect the appearance or eating quality of the product.

(d) *(C) classification.* Canned cream style corn that fails to meet the requirements of paragraph (c) of this section may be given a score of 14 or 15 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, discolored kernels, or other defects may be present that do not seriously affect the appearance or eating quality of the product, and that:

(1) For each 20 ounces of net weight there may be present:

(i) Not more than 1 cubic centimeter of pieces of cob;[2] and

(ii) Not more than 1 square inch (1" x 1") of husk;[2] and that

(2) For each 2 ounces of net weight there may be present:

(i) Not more than 1 brown or black discolored kernel or piece of kernel;[2] and that

(3) For each 1 ounce of net weight there may be present:

(i) Not more than 6 inches of silk.[2]

(e) *(SStd) classification.* Canned cream style corn that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality" for the applicable reasons:

(1) Excessive discolored kernels.
(2) Excessive cob.
(3) Excessive husk.
(4) Excessive silk.

§ 52.860 *Tenderness and maturity*—(a) *(A) classification.* Canned cream style corn that is tender may be given a score of 27 to 30 points. "Tender" means that the kernels are in the milk, early cream, or middle cream stage of maturity, have a tender texture, and that pieces of the interior portions of corn kernels or ground kernels are characteristic of sweet corn in the milk, early cream, or middle cream stage of maturity.

(b) *(B) classification.* If the canned cream style corn is reasonably tender a score of 24 to 26 points may be given. Canned cream style corn that scores less than 26 points in this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a partial limiting rule). "Reasonably tender" means that the kernels are in the middle cream stage to late cream stage of maturity, have a reasonably tender texture, and that pieces of the interior portions of corn kernels or ground kernels are characteristic of sweet corn in the middle cream to late cream stage of maturity.

(c) *(C) classification.* Canned cream style corn that is fairly tender may be given a score of 22 or 23 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender" means that the kernels are in the early dough or dough stage of maturity, may be firm but not hard or tough, and that pieces of the interior portions of corn kernels or ground kernels are characteristic of sweet corn in the early dough or dough stage of maturity. The weight of the alcohol insoluble solids of the washed, drained material[2] does not exceed 27 percent of the weight of such material.

(d) *(SStd) classification.* Canned cream style corn that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality."

§ 52.861 *Flavor*—(a) *General.* The factor of flavor refers to the palatability of the product. The natural flavor of the sweet corn and the effects of added sugar (sucrose) and salt are considered in evaluating this factor.

(b) *(A) classification.* Canned cream style corn that possesses a very good flavor may be given a score of 18 to 20 points. "Very good flavor" means that the product including added seasoning ingredients has a very good characteristic flavor and odor typical of tender canned sweet corn.

(c) *(B) classification.* If the canned cream style corn possesses a good flavor, a score of 16 or 17 points may be given. "Good flavor" means that the product including added seasoning ingredients has a good characteristic flavor and odor typical of reasonably tender canned sweet corn.

(d) *(C) classification.* Canned cream style corn that possesses a fairly good flavor may be given a score of 14 or 15 points. Canned cream style corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means that the product may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(e) *(SStd) classification.* Canned cream style corn that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.862 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned cream style corn the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule must be within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.863 *Score sheet for canned cream style corn.*

| | | |
|---|---|---|
| [illegible], size, and kind of container | | --- |
| [illegible] marks or identification | | --- |
| [illegible] | | --- |
| [illegible] (tenderness) | | --- |
| [illegible] (texture) | | --- |
| [illegible] (white or golden) | | --- |

[2] Determined as outlined in the Standard of Quality for Canned Sweet Corn (21 CFR 51.21) promulgated under the Federal Food, Drug, and Cosmetic Act.

| Factors | | Score points | |
|---|---|---|---|
| Color | 10 | (A) | 9-10 |
| | | (B) | 8 |
| | | (C) | 6, 7 |
| | | (SStd) | 0-5 |
| Consistency | 20 | (A) | 18-20 |
| | | (B) | 16, 17 |
| | | (C) | 14, 15 |
| | | (SStd) | 0-13 |
| Absence of defects | 20 | (A) | 18-20 |
| | | (B) | 16, 17 |
| | | (C) | 14, 15 |
| | | (SStd) | 0-13 |
| Tenderness and maturity | 30 | (A) | 27-30 |
| | | (B) | 24-26 |
| | | (C) | 22-23 |
| | | (SStd) | 0-21 |
| Flavor | 20 | (A) | 18-20 |
| | | (B) | 16, 17 |
| | | (C) | 14, 15 |
| | | (SStd) | 0-13 |
| Total score | 100 | | |
| Grade | | | |

[2] Indicates limiting rule.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED WHOLE KERNEL (OR WHOLE GRAIN) CORN[1]

IDENTITY, COLOR, AND GRADES

§ 52.881 *Identity.* "Canned whole kernel (or whole grain) corn" means the canned product properly prepared from the clean, sound, succulent kernels of sweet corn as defined in the definition and standard of identity for canned corn (21 CFR 51.20) issued pursuant to the Federal Food, Drug, and Cosmetic Act. The product is considered "Vacuum Pack" or "Vacuum Packed" when the liquid in the container[2] is not more than 20 percent of the net weight and the container is closed under conditions creating a high vacuum.

§ 52.882 *Color of canned whole kernel (or whole grain) corn.* (a) White.

(b) Golden or Yellow.

§ 52.883 *Grades of canned whole kernel (or whole grain) corn.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned whole kernel (or whole grain) corn that possesses similar varietal characteristics; that is tender; that possesses a good color; that is well cut; that is practically free from defects; that possesses a very good flavor; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 90 points: *Provided,* That the canned whole kernel (or whole grain) corn may possess a reasonably good color, a good flavor, and may be reasonably well cut, if the total score is not less than 90 points.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of canned whole kernel (or whole grain) corn that possesses similar varietal characteristics; that is reasonably tender; that possesses a reasonably good color; that is reasonably well cut; that is reasonably free from defects; that possesses a good flavor; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 80 points: *Provided,* That the canned whole kernel (or whole grain) corn may possess a fairly good color, scoring not less than 7 points, and may be fairly well cut, if the total score is not less than 80 points.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of canned whole kernel (or whole grain) corn that possesses similar varietal characteristics; that is fairly tender; that possesses a fairly good color; that is fairly well cut; that is fairly free from defects; that possesses a fairly good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of canned whole kernel (or whole grain) corn that fails to meet the requirements of U. S. Grade C or U. S. Standard and may or may not meet the minimum standards of quality for canned whole kernel (or whole grain) corn issued pursuant to the Federal Food, Drug, and Cosmetic Act.

FILL OF CONTAINER AND DRAINED WEIGHTS

§ 52.884 *Recommended fill of container.* The recommended fill of container for canned whole kernel (or whole grain) corn is not incorporated in the grades of the finished product, since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container of canned whole kernel (or whole grain) corn be filled as full as practicable with the product.

§ 52.885 *Recommended minimum drained weight.* The minimum drained weight recommendations of Table No. I of this section are not incorporated in the grades of the finished product, since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of whole kernel (or whole grain) corn is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage and allowing to drain for two minutes. The drained weight is the weight of the sieve and the whole kernel (or whole grain) corn less the weight of the dry sieve. A sieve 8 inches in diameter is used for the No. 2½ size can (401" x 411") and smaller sizes and a sieve 12 inches in diameter is used for containers larger than the No. 2½ size can.

TABLE NO. I—RECOMMENDED MINIMUM DRAINED WEIGHTS IN OUNCES OF WHOLE KERNEL (OR WHOLE GRAIN) CORN (EXCEPT VACUUM PACK)

| Container size or designation | Grade A, tenderness and maturity minimum drained weight (ounces) | Grades B, C, and Substandard tenderness and maturity minimum drained weight (ounces) |
|---|---|---|
| 8 ounce, tall | 5 25 | 5 50 |
| No 1 (picnic) | 6 75 | 7 00 |
| No 300 | 9 25 | 9 50 |
| No 303 | 10 50 | 10 75 |
| No 2 | 12 75 | 13 25 |
| No 10 | 70 00 | 72 00 |

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] Determined as outlined in the Standard of Quality for Canned Sweet Corn (21 CFR 51.21) promulgated under the Federal Food, Drug, and Cosmetic Act.

FACTORS OF QUALITY

§ 52.886 *Ascertaining the grade.* (a) The grade of canned whole kernel (or whole grain) corn is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, cut, absence of defects, tenderness and maturity, and flavor.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | *Points* |
|---|---|
| Color | 10 |
| Cut | 10 |
| Absence of defects | 20 |
| Tenderness and maturity | 40 |
| Flavor | 20 |
| Total score | 100 |

§ 52.887 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.888 *Color*—(a) *(A) classification.* Canned whole kernel (or whole grain) corn that possesses a good color may be given a score of 9 or 10 points. "Good color" means that the kernels possess a practically uniform color typical of tender sweet corn and that the product is bright and is practically free from "off-variety" kernels.

(b) *(B) classification.* Canned whole kernel (or whole grain) corn that possesses a reasonably good color may be given a score of 8 points. "Reasonably good color" means that the kernels possess a reasonably uniform color typical of reasonably tender sweet corn and that the product may lack brightness but not to the extent that the appearance is materially affected and is reasonably free from "off-variety" kernels.

(c) *(C) classification.* Canned whole kernel (or whole grain) corn that possesses a fairly good color may be given a score of 6 or 7 points. Canned whole kernel (or whole grain) corn that scores 7 points in this classification shall not be graded above U. S. Grade B or U. S. Extra Standard and that scores 6 points in this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a partial limiting rule). "Fairly good color" means that the kernels possess a fairly uniform color typical of fairly tender sweet corn and that the product may be dull but not to the extent that the appearance is seriously affected and is fairly free from "off-variety" kernels.

(d) *(SStd) classification.* Canned whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.889 *Cut*—(a) *General.* The factor of cut refers to the degree of smoothness of the cut surface of the kernels, uniformity and depth of cut, and to the degree of freedom from adhering cob tissue.

(b) *(A) classification.* Canned whole kernel (or whole grain) corn which has been well cut may be given a score of 9 or 10 points. "Well cut" means that the appearance of the product is not more than slightly affected by the presence of ragged cut kernels, torn kernels, irregular cut kernels, and kernels with attached cob tissue.

(c) *(B) classification.* Canned whole kernel (or whole grain) corn in which the kernels are reasonably well cut may be given a score of 8 points. "Reasonably well cut" means that the appearance of the product is not materially affected by the presence of ragged cut kernels, torn kernels, irregular cut kernels, and kernels with attached cob tissue.

(d) *(C) classification.* Canned whole kernel (or whole grain) corn in which the kernels are fairly well cut may be given a score of 6 or 7 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Fairly well cut" means that the appearance of the product is not seriously affected by the presence of ragged cut kernels, torn kernels, irregular cut kernels, and kernels with attached cob tissue.

(e) *(SStd) classification.* Canned whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.890 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from pieces of cob, husk, silk, or other harmless extraneous vegetable matter, from pulled kernels, ragged kernels, crushed kernels, loose skins, and from damaged or seriously damaged kernels.

(1) "Damaged kernel" means any kernel affected by insect injury, or damaged by discoloration, pathological injury, or by other means to the extent that the appearance or eating quality is materially affected.

(2) "Seriously damaged kernel" means damaged to such an extent that the appearance or eating quality is seriously affected.

(b) *(A) classification.* Canned whole kernel (or whole grain) corn that is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not more than slightly affect the appearance or eating quality of the product.

(c) *(B) classification.* If the canned whole kernel (or whole grain) corn is reasonably free from defects a score of 16 or 17 points may be given. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not materially affect the appearance or eating quality of the product.

(d) *(C) classification.* Canned whole kernel (or whole grain) corn that is fairly free from defects may be given a score of 14 or 15 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that:

(1) For each 14 ounces of drained weight there may be present:

(i) Not more than 1 cubic centimeter of pieces of cob;[2]

(ii) Not more than 1 square inch (1" x 1") of husk;[2] and

(2) For each 2 ounces of drained weight there may be present:

(i) Not more than 1 brown or black discolored kernel or discolored piece of kernel;[2] and

(3) For each 1 ounce of drained weight there may be present:

(i) Not more than 7 inches of silk: *Provided*, That pieces of cob, silk or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels do not seriously affect the appearance or eating quality of the product.

(e) *(SStd) classification.* Canned whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality" for the applicable reasons:

(1) Excessive discolored kernels.
(2) Excessive cob.
(3) Excessive husk.
(4) Excessive silk.

§ 52.891 *Tenderness and maturity*—(a) *(A) classification.* Canned whole kernel (or whole grain) corn that is tender may be given a score of 36 to 40 points. "Tender" means that the kernels are in the milk or early cream stage of maturity and have a tender texture.

(b) *(B) classification.* If the canned whole kernel (or whole grain) corn is reasonably tender a score of 32 to 35 points may be given. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably tender" means that the kernels are in the cream stage of maturity and have a reasonably tender texture.

(c) *(C) classification.* Canned whole kernel (or whole grain) corn that is fairly tender may be given a score of 30 or 31 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender" means that the kernels are in the early dough or dough stage and may be firm but not hard or tough. The weight of the alcohol insoluble solids[2] shall not exceed 27 percent of the drained weight.

(d) *(SStd) classification.* Canned whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 29 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule), and may also be graded "Below Standard in Quality."

§ 52.892 *Flavor*—(a) *General.* The factor of flavor refers to the palatability of the product. The natural flavor of the sweet corn and the effects of added sugar (sucrose) and salt are considered in evaluating this factor.

(b) *(A) classification.* Canned whole kernel (or whole grain) corn that possesses a very good flavor may be given a score of 18 to 20 points. "Very good flavor" means that the product including added seasoning ingredients has a very good characteristic flavor and odor typical of tender canned sweet corn.

(c) *(B) classification.* If the canned whole kernel (or whole grain) corn possesses a good flavor a score of 16 or 17 points may be given. "Good flavor" means that the product including added seasoning ingredients has a good characteristic flavor and odor typical of reasonably tender canned sweet corn.

(d) *(C) classification.* Canned whole kernel (or whole grain) corn that possesses a fairly good flavor may be given a score of 14 or 15 points. Canned whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means that the product may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(e) *(SStd) classification.* Canned whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.893 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned whole kernel (or whole grain) corn the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN WHOLE KERNEL (OR WHOLE GRAIN) CORN[1]

PRODUCT DESCRIPTION, COLOR, AND GRADES

§ 52.911 *Product description.* Frozen whole kernel (or whole grain) corn means the frozen product prepared from fresh, clean, sound, succulent kernels of sweet corn of either the white or golden (or yellow) varieties by removing husk and silk; by sorting, trimming, and washing; and by blanching before or after removal from the cob. The frozen whole kernel (or whole grain) corn is frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.912 *Color of frozen whole kernel (or whole grain) corn.* (a) Golden (or Yellow).

(b) White.

§ 52.913 *Grades of frozen whole kernel (or whole grain) corn.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen whole kernel (or whole grain) corn that possesses similar varietal characteristics; that possesses a good flavor and odor; that is tender; that possesses a good color; that is practically free from defects; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 90 points: *Provided*, That the frozen whole kernel (or whole grain) corn may possess a reasonably good color if the total score is not less than 90 points.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen whole kernel (or whole grain) corn that possesses similar varietal characteristics; that possesses a good flavor and odor; that is reasonably tender; that possesses a reasonably good color; that is reasonably free from defects; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 80 points: *Provided*, That frozen whole kernel (or whole grain) corn may possess a fairly good color, scoring not less than 7 points if the total score is not less than 80 points.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of frozen whole kernel (or whole grain) corn that possesses similar varietal characteristics; that possesses a fairly good flavor and odor; that is fairly tender; that possesses a fairly good color; that is fairly free from defects; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of frozen whole kernel (or whole grain) corn that fails to meet the requirements of "U. S. Grade C" or "U. S. Standard."

FACTORS OF QUALITY

§ 52.914 *Ascertaining the grade.* (a) The grade of frozen whole kernel (or whole grain) corn may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and tenderness and maturity.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | *Points* |
|---|---|
| Color | 10 |
| Absence of defects | 40 |
| Tenderness and maturity | 50 |
| Total score | 100 |

(c) The grade of frozen whole kernel (or whole grain) corn is determined immediately after thawing to the extent

[1] Determined as outlined in the Standard of Quality for Canned Sweet Corn (21 CFR 51.21) promulgated under the Federal Food, Drug, and Cosmetic Act.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

that the product is substantially free from ice crystals. The product is cooked to determine flavor and odor.

(d) "Good flavor and odor" means that the product, after cooking, has a good characteristic normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Fairly good flavor and odor" means that the product, after cooking, may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.915 *Ascertaining the rating of the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for such factors and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "36 to 40 points" means 36, 37, 38, 39, or 40 points).

§ 52.916 *Color*—(a) *(A) classification.* Frozen whole kernel (or whole grain) corn that possesses a good color may be given a score of 9 or 10 points. "Good color" means that the kernels possess a practically uniform color typical of tender sweet corn and that the product is bright and is practically free from "off-variety" kernels.

(b) *(B) classification.* If the frozen whole kernel (or whole grain) corn possesses a reasonably good color a score of 8 points may be given. "Reasonably good color" means that the kernels possess a reasonably uniform color typical of reasonably tender sweet corn and that the product is reasonably bright and reasonably free from "off-variety" kernels.

(c) *(C) classification.* Frozen whole kernel (or whole grain) corn that possesses a fairly good color may be given a score of 6 or 7 points. Frozen whole kernel (or whole grain) corn that scores 6 points in this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a partial limiting rule). "Fairly good color" means that the kernels possess a fairly uniform color typical of fairly tender sweet corn and that the product may be dull but not to the extent that the appearance is seriously affected, and is fairly free from "off-variety" kernels.

(d) *(SStd) classification.* Frozen whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 5 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.917 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from pieces of cob, husk, silk, or other harmless extraneous vegetable matter, from pulled kernels, ragged kernels, crushed kernels, loose skins, and from damaged or seriously damaged kernels.

(1) "Damaged kernel" means any kernel affected by insect injury or damaged by discoloration, pathological injury, or by other means to the extent that the appearance or eating quality is materially affected.

(2) "Seriously damaged kernel" means damaged to such an extent that the appearance or eating quality is seriously affected.

(b) *(A) classification.* Frozen whole kernel (or whole grain) corn that is practically free from defects may be given a score of 36 to 40 points. "Practically free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not more than slightly affect the appearance or eating quality of the product.

(c) *(B) classification.* If the frozen whole kernel (or whole grain) corn is reasonably free from defects a score of 32 to 35 points may be given. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not materially affect the appearance or eating quality of the product.

(d) *(C) classification.* Frozen whole kernel (or whole grain) corn that is fairly free from defects may be given a score of 28 to 31 points. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that pieces of cob, husk, silk, or other harmless extraneous vegetable matter, pulled kernels, ragged kernels, crushed kernels, loose skins, and damaged or seriously damaged kernels may be present that do not seriously affect the appearance or eating quality of the product.

(e) *(SStd) classification.* Frozen whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.918 *Tenderness and maturity*—(a) *(A) classification.* Frozen whole kernel (or whole grain) corn that is tender may be given a score of 45 to 50 points. "Tender" means that the kernels are in the milk or early cream stage of maturity and have a tender texture.

(b) *(B) classification.* If the frozen whole kernel (or whole grain) corn is reasonably tender a score of 40 to 44 points may be given. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably tender" means that the kernels are in the cream stage of maturity and have a reasonably tender texture.

(c) *(C) classification.* Frozen whole kernel (or whole grain) corn that is fairly tender may be given a score of 36 to 39 points. Frozen whole kernel (or whole grain) corn that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender" means that the kernels are in the early dough or dough stage and have a fairly tender texture.

(d) *(SStd) classification.* Frozen whole kernel (or whole grain) corn that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 35 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.919 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen whole kernel (or whole grain) corn, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN CORN-ON-THE-COB [1]

PRODUCT DESCRIPTION, COLOR, AND GRADES

§ 52.931 *Product description.* Frozen corn-on-the-cob is the product which is prepared from sound, properly matured, fresh sweet corn ears (Zea Mays L.) of either the white or golden (or yellow) varieties by removing husk and silk; by sorting, trimming, washing, and blanching; and which sweet corn ears are then frozen and stored at temperatures necessary for the preservation of the product.

§ 52.932 *Colors of frozen corn-on-the-cob.* (a) Golden (or yellow).
(b) White.

§ 52.933 *Grades of frozen corn-on-the-cob.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen corn-on-the-cob that is well developed; that possesses similar varietal characteristics; that possesses a good flavor and odor; that is practically uniform in size; that possesses a good color; that is practically free from defects; that is tender; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) U. S. Grade B of U. S. Extra Standard, is the quality of frozen corn-on-the-cob that is reasonably well developed; that possesses similar varietal characteristics; that possesses a fairly good flavor and odor; that is reasonably uniform in size and symmetry; that possesses a reasonably good color; that is reasonably free from defects; that is reasonably tender; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of frozen corn-on-the-cob that fails to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.934 *Ascertaining the grade.* (a) The grade of frozen corn-on-the-cob may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and tenderness and maturity.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Tenderness and maturity | 40 |
| Total score | 100 |

(c) The grade of frozen corn-on-the-cob is determined immediately after the product has been thawed sufficiently so that the product is practically free from ice crystals.

(d) The product is cooked to determine flavor and odor.

(e) "Good flavor and odor" means that the product, after cooking, has a good, characteristic normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(f) "Fairly good flavor and odor" means that the product, after cooking, may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(g) "Practically uniform in size" means that the length of the longest ear in the sample does not exceed the length of the shortest ear by more than 1 inch and that the largest diameter of the largest ear in the sample does not exceed the largest diameter of the smallest ear by more than $1\frac{1}{2}$ inch.

(h) "Reasonably uniform in size" means that the length of the longest ear in the sample does not exceed the length of the shortest ear by more than 1 inch and that the largest diameter of the largest ear in the sample does not exceed the largest diameter of the smallest ear by more than $\frac{3}{4}$ inch.

(i) "Count of kernels per ear" means the approximate number of kernels on each ear in the sample.

(j) "Ear" means an individual ear of corn with husk and silk removed.

(k) "Well developed" means that the ear is well filled with kernels and that on ears of row varieties the appearance is not materially affected by irregular and curved rows of kernels.

(l) "Reasonably well developed" means that the ear is reasonably well filled with kernels and that on ears of row varieties the appearance is not seriously affected by irregular and curved rows of kernels.

(m) "Sample" means not less than two ears of frozen corn-on-the-cob drawn from a single shipping container or retail package.

§ 52.935 *Ascertaining the rating of the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for such factors and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.936 *Color*—(a) *(A) classification.* Frozen corn-on-the-cob that possesses a good color may be given a score of 17 to 20 points. "Good color" means that the frozen corn-on-the-cob possesses a bright, practically uniform typical color of young and tender corn.

(b) *(B) classification.* Frozen corn-on-the-cob that possesses a reasonably good color may be given a score of 14 to 16 points. Frozen corn-on-the-cob that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the frozen corn-on-the-cob possesses a reasonably bright, reasonably uniform typical color of reasonably young and reasonably tender corn.

(c) *(SStd) classification.* Frozen corn-on-the-cob that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.937 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from loose material, attached material, poorly trimmed ears, and from damaged kernels and seriously damaged kernels.

(1) "Loose material" means pieces of cob, kernels and portions of kernels, husk and portions of husk, and silk not attached to an ear.

(2) "Attached material" means silk and husk or portions of silk and husk attached to an ear.

(3) "Poorly trimmed ear" means that the end or ends of an ear are rough or ragged in appearance and that any attached stalk which may be present exceeds $\frac{1}{4}$ inch in length.

(4) "Damaged kernel" means any kernel damaged by mechanical injury and any kernel damaged by pathological injury, insect injury, discoloration, or damaged by other means to such an extent that the appearance or eating quality is materially affected. Mechanical injury means that the kernel is materially damaged by cutting or crushing. Kernels on the ends of the ear which are damaged by cutting shall not be considered as damaged by mechanical injury.

(5) "Seriously damaged kernel" mean damaged to such an extent that the appearance or eating quality is seriously affected. Kernels damaged by mechanical injury shall not be considered seriously damaged.

(b) *(A) classification.* Frozen corn-on-the-cob that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that loose material, attached material, or poorly trimmed ears that do not affect the appearance or eating quality of the product may be present in the sample; that not more than 5 percent, by count, of kernels in the sample are damaged or seriously damaged, but not more than $\frac{1}{2}$ of one percent, by count, of all the kernels are seriously damaged.

(c) *(B) classification.* If the frozen corn-on-the-cob is reasonably free from defects a score of 28 to 33 points may be given. Frozen corn-on-the-cob that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that loose material, attached material, or poorly trimmed ears that do not materially affect the appearance or eating quality of the product may be present in the sample; that not more than 10 percent, by count, of kernels in the sample are damaged or seriously damaged, but not more than 1 percent, by count, of all the kernels are seriously damaged.

(d) *(SStd) classification.* Frozen corn-on-the-cob that fails to meet the requirements of paragraph (c) of this

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.938 *Tenderness and maturity*—(a) *General.* The tenderness and maturity of the kernels is referred to under this factor. The tenderness and maturity of the kernels is determined by examining at least 3 complete adjacent rows of kernels or an equivalent number if kernels are not in rows, after removal from each ear in the sample. The kernels are removed from the ear by cutting just above the tip cap.

(b) *(A) classification.* Frozen corn-on-the-cob that is tender may be given a score of 34 to 40 points. "Tender" means that the kernels in the sample are in the milk or early cream stage of maturity and have a tender texture.

(c) *(B) classification.* If the frozen corn-on-the-cob is reasonably tender a score of 28 to 33 points may be given. Frozen corn-on-the-cob that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably tender" means that the kernels in the sample are in the cream stage of maturity and have a reasonably tender texture.

(d) *(SStd) classification.* Frozen corn-on-the-cob the kernels of which are in the early dough or dough stage of maturity or that fails in any other respect to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.939 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen corn-on-the-cob the grade of such lot will be determined by averaging the total scores of all samples if:

(1) Not more than one-sixth of the samples drawn from the lot fail to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such samples which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all samples for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the samples drawn from the lot fall more than 4 points below the minimum score for the grade indicated by the average of the total scores;

(3) In addition to the above tolerances not more than one-sixth of the samples fail to meet the requirements with respect to uniformity of size and symmetry for the respective grade; and

(4) All samples drawn from the lot meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED CRANBERRY SAUCE[1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.951 *Product description.* Canned cranberry sauce is the jellied or semi-jellied product prepared from clean, sound, matured or fairly well-matured cranberries; a sweetening ingredient or sweetening ingredients, and water. Pectin may be added but only in a quantity which reasonably compensates for deficiency, if any, of the natural pectin content of the cranberries. The mixture is concentrated and sufficiently processed by heat to assure preservation of the product in hermetically sealed containers. The soluble solids of the finished product is not less than 35 percent and not more than 45 percent.

§ 52.952 *Styles of canned cranberry sauce*—(a) *Style I.* Jellied or strained (typical of a jellied product prepared from strained cranberries).

(b) *Style II.* Whole (typical of a semi-jellied product prepared from whole or partially whole cranberries).

§ 52.953 *Grades of canned cranberry sauce.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned cranberry sauce that possesses a good color; that possesses a good consistency and good texture; that is practically free from defects; that possesses a good flavor and odor; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned cranberry sauce that possesses a fairly good color; that possesses a fairly good consistency and a fairly good texture; that is fairly free from defects; that possesses a fairly good flavor and odor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned cranberry sauce that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER

§ 52.954 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled as full as practicable with cranberry sauce and that the product occupy not less than 90 percent of the volume of the container.

FACTORS OF QUALITY

§ 52.955 *Ascertaining the grade.* The grade of canned cranberry sauce may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, consistency and texture, absence of defects, and flavor and odor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Consistency and texture | 40 |
| Absence of defects | 20 |
| Flavor and odor | 20 |
| Total score | 100 |

§ 52.956 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.957 *Color*—(a) *(A) classification.* Canned cranberry sauce that possesses a good color may be given a score of 17 to 20 points. "Good color" means the bright, dark red color typical of canned cranberries which color is free from any dullness.

(b) *(C) classification.* If the canned cranberry sauce possesses a fairly good color, a score of 14 to 16 points may be given. Canned cranberry sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means the red color typical of canned cranberries, which color may be slightly dull or may indicate slight evidence of oxidation but is not off color.

(c) *(SStd) classification.* Canned cranberry sauce that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.958 *Consistency and texture*—(a) *(A) classification.* Canned cranberry sauce that possesses a good consistency and good texture may be given a score of 34 to 40 points. "Good consistency and good texture" has the following meanings with respect to the following styles of canned cranberry sauce:

(1) *Jellied or strained.* The gel is tender to slightly firm and there may be evidence of a reasonable separation of free liquid.

(2) *Whole.* The skin particles and the semi-jellied portions are reasonably tender and the fruit, seed, and skin particles are dispersed reasonably uniform throughout the product.

(b) *(C) classification.* If the canned cranberry sauce possesses a fairly good consistency and a fairly good texture, a score of 26 to 33 points may be given. Canned cranberry sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good consistency and fairly good texture" has the following meanings with respect to the following styles of canned cranberry sauce:

(1) *Jellied or strained.* The gel may lack firmness or may be stiff but is not tough or rubbery and there may be evidence of separation of free liquid which is not excessive.

(2) *Whole.* The skin particles and the semi-jellied portions are fairly tender and the fruit, seed, and skin particles are dispersed fairly uniform throughout the product and there may be evidence of separation of free liquid which is not excessive.

(c) *(SStd) classification.* Canned cranberry sauce that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.959 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from foreign material and objectionable material and from harmless extraneous particles in Style I, Jellied or strained; and from defective cranberries and foreign berries and particles thereof, fine stems, foreign material and objectionable material, and other defects in Style II, Whole.

(b) *(A) classification.* Canned cranberry sauce that is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" has the following meanings with respect to the following styles of cranberry sauce:

(1) *Jellied or strained.* The product is free from foreign material and objectionable material, is free from any harmless extraneous particles that exceed the area of a circle $\frac{3}{16}$ inch in diameter; and is practically free from harmless extraneous particles that are the equivalent in area of a circle $\frac{3}{16}$ inch or less in diameter.

(2) *Whole.* There may be present for each 12 ounces of net weight not more than 3 defective cranberries or foreign berries and not more than 4 fine stems $\frac{3}{4}$ inch or more in length; the product is free from foreign material and objectionable material and is practically free from other defects which affect materially the appearance or edibility of the product.

(c) *(C) classification.* If the canned cranberry sauce is fairly free from defects, a score of 14 to 16 points may be given. Canned cranberry sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" has the following meanings with respect to the following styles of cranberry sauce:

(1) *Jellied or strained.* The product is free from foreign material and objectionable material; is practically free from harmless extraneous particles that exceed the area of a circle $\frac{3}{16}$ inch in diameter; and is fairly free from harmless extraneous particles that are the equivalent in area of a circle $\frac{3}{16}$ inch or less in diameter.

(2) *Whole.* There may be present for each 12 ounces of net weight not more than 6 fine stems $\frac{3}{4}$ inch or more in length; the product is free from foreign material and objectionable material and is fairly free from other defects which affect materially the appearance or edibility of the product.

(d) *(SStd) classification.* Canned cranberry sauce that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.960 *Flavor and odor*—(a) *(A) classification.* Canned cranberry sauce that possesses a good flavor and odor may be given a score of 17 to 20 points. "Good flavor and odor" means that the product possesses a good, characteristic, slightly tart flavor typical of cooked cranberries and that the product is free from any trace of a caramelized flavor, abnormal flavor, or abnormal odor.

(b) *(C) classification.* If the canned cranberry sauce possesses a fairly good flavor and odor, a score of 14 to 16 points may be given. Canned cranberry sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor and odor" means that the product possesses a normal flavor typical of cooked cranberries and that the product is free from objectionable flavors and objectionable odors of any kind.

(c) *(SStd) classification.* Canned cranberry sauce that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATION

§ 52.961 *Explanation of terms.* (a) "Soluble solids" content is determined refractometrically without correction for water-insoluble solids.

LOT CERTIFICATION TOLERANCES

§ 52.962 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned cranberry sauce, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

SUBPART—UNITED STATES STANDARDS FOR GRADES OF DRIED CURRANTS[1]

PRODUCT DESCRIPTION, TYPES, AND GRADES

§ 52.981 *Product description.* Dried currants are dried grapes of such Vinifera varieties as Black Corinth that have been properly processed by stemming, capstemming, and cleaning.

§ 52.982 *Types (varieties) of dried currants*—(a) *Type I.* Zante type (domestic).

(b) *Type II.* Other than Zante type (domestic), such as Amalias, Patras, Vostizza, and Zante varieties.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 52.983 *Grades of dried currants.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of dried currants that possess similar varietal characteristics; that possess a good typical color; that possess a good characteristic flavor; that show development characteristic of dried currants prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements (see Table I of this section):

(1) Not more than 2 pieces of stem per 16 ounces of dried currants may be present;

(2) Not more than 1½ percent, by weight, of dried currants may possess capstems;

(3) Not more than 1 percent, by weight, of dried currants may be poorly developed blowovers;

(4) Not more than 2 percent, by weight, of dried currants may be damaged;

(5) Not more than 5 percent, by weight, of dried currants may be visibly sugared; and

(6) Not more than 1 percent, by weight, of dried currants may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than ½ of 1 percent, by weight, of dried currants may be affected by decay.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of dried currants that possess similar varietal characteristics; that possess a reasonably good typical color; that possess a good characteristic flavor; that show development characteristic of dried currants prepared from reasonably well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements (see Table I of this paragraph):

TABLE I—MAXIMUMS ALLOWABLE FOR DEFECTS IN DRIED CURRANTS

| Defects | U. S. Grade A or U. S. Fancy | U. S. Grade B or U. S. Choice | Substandard |
|---|---|---|---|
| | Maximum count (per 16 ounces) | | |
| Pieces of stem | 2 | 3 | ---------- |
| | Maximum (by weight) (percent) | | |
| Currants with capstems | 1½ | 2 | No limit. |
| Poorly developed, blowovers. | 1 | 2 | ---do---- |
| Damaged | 2 | 3 | ---do---- |
| Visibly sugared | 5 | 10 | ---do---- |
| Mold, decay, fermentation, insect infestation, imbedded dirt, or other foreign material. | 1 | 2 | |
| | But not more than | | |
| Decay | ½ | 1 | |

(1) Not more than 3 pieces of stem per 16 ounces of dried currants may be present;

(2) Not more than 2 percent, by weight, of dried currants may possess capstems;

(3) Not more than 2 percent, by weight, of dried currants may be poorly developed, blowovers;

(4) Not more than 3 percent, by weight, of dried currants may be damaged;

(5) Not more than 10 percent, by weight, of dried currants may be visibly sugared; and

(6) Not more than 2 percent, by weight, of dried currants may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 1 percent, by weight, of dried currants may be affected by decay.

(c) "Substandard" is the quality of dried currants that fail to meet the requirements of U. S. Grade B or U. S. Choice.

DEFINITIONS AND EXPLANATIONS

§ 52.984 *Explanation of terms.* (a) A "piece of stem" means a portion of the branch or main stem.

(b) "Capstems" means small woody stems exceeding ⅛ inch in length which attach the grapes to the branches of the bunch. A currant for each capstem which is not attached to a currant is included and weighed with "currants with capstems" in ascertaining compliance with the allowance permitted.

(c) "Poorly developed, blowovers" refers to currants that are immature or hard, contain practically no flesh, are very light in weight, and have very coarse wrinkles.

(d) "Damaged" currants means currants affected by insect injury or injury from sunburn, scars, mechanical or other means which seriously affects the appearance, edibility, keeping quality, or shipping quality of the currants.

(e) "Visibly sugared" means the accumulation of crystallized fruit sugars in the flesh of the currant or on the surface which is readily apparent.

(f) "Mold" means mold filaments or spores (often characterized by a condition wherein the skin of the currant appears to have been dissolved, leaving a slimy or sticky appearance, and often resulting in a positive reaction when submerged in a 3-percent hydrogen peroxide solution).

(g) "Affected by insect infestation" means that the currants show the presence of insects, insect fragments, or excreta. No live insects are permitted.

WORK SHEET

SUBPART—UNITED STATES STANDARDS FOR GRADES OF DATES[1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1001 *Product description.* Dates are the properly cured fresh fruit of the date tree (Phoenix dactylifera).

§ 52.1002 *Styles of dates.* (a) "Whole unpitted dates" or "whole dates" means whole dates from which the pits have not been removed and which may or may not be slit longitudinally.

(b) "Whole pitted dates" or "pitted dates" means whole dates from which the pits have been removed.

(c) "Cut dates" means pitted dates cut into pieces not less than ½ inch in any dimension.

(d) "Macerated dates" means dates that are ground, chopped, mashed, or broken, or that are cut or sliced into small pieces less than ½ inch in any dimension.

§ 52.1003 *Grades for dates.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of whole dates or whole pitted dates of one variety that are practically uniform in color; are practically uniform in size; contain not less than 80 percent, by weight, that possess a good character and the remainder possesses a reasonably good character; may contain not more than a total of 1 percent, by weight, that possess semi-dry calyx ends, dry calyx ends, or are improperly ripened; do not exceed the allowances and limitations for defects specified in Chart No. I of § 52.1008 (b); and, with respect to whole pitted dates, there may be present not more than 1 whole pit or 2 pit fragments for each 25 ounces of whole pitted dates.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of whole dates or whole pitted dates of one variety that are reasonably uniform in color; are reasonably uniform in size; contain not less than 85 percent, by weight, that possess at least a reasonably good character and the remainder possesses not less than a fairly good character; may contain not more than a total of 5 percent, by weight, that possess semi-dry calyx ends or dry calyx ends or are improperly ripened, but, of such dates, not more than an aggregate of 1 percent, by weight, of all the dates may possess dry calyx ends or may be improperly ripened; do not exceed the allowances and limitations for defects specified in Chart No. II of § 52.1008 (b); and, with respect to whole pitted dates, there may be present not more than 1 whole pit or 2 pit fragments for each 25 ounces of whole pitted dates.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of whole dates or whole pitted dates of one variety that are fairly uniform in color; are fairly uniform in size; contain not less than 90 percent, by weight, that possess at least a fairly good character and the remainder may fail to possess fairly good character or may possess dry calyx ends or may be improperly ripened; do not exceed the allowances and limitations for defects specified in Chart No. III of § 52.1008 (c); and, with respect to whole pitted dates, there may be present not more than 1 whole pit or 2 pit fragments for each 25 ounces of whole pitted dates.

(d) "U. S. Grade D" or "Substandard" is the quality of whole dates or whole pitted dates that fail to meet the requirements of "U. S. Grade C" or "U. S. Standard."

(e) "U. S. Grade D (Cut Dates)" or "Substandard (Cut Dates)" and "U. S. Grade D (Macerated Dates)" or "Substandard (Macerated Dates)" are the grade designations for cut dates and macerated dates whether or not produced from U. S. Grade D or Substandard dates or dates of better quality.

DEFINITIONS AND EXPLANATIONS

§ 52.1004 *Definitions of varying degrees of uniformity of color.* (a) "Practically uniform in color" means, with respect to dates that are predominantly light amber in color, that there may be not more than 5 percent by count of dates that are dark amber in color; and, with respect to dates that are predominantly dark amber in color, that there may be not more than 5 percent by count of dates that are light amber in color.

(b) "Reasonably uniform in color" means, with respect to dates that are predominantly light amber in color, that there may be not more than 10 percent by count of dates that are dark amber in color; and, with respect to dates that are predominantly dark amber in color, that there may be not more than 10 percent by count of dates that are light amber in color.

(c) "Fairly uniform in color" means, with respect to dates that are predominantly light amber in color, that there may be not more than 20 percent by count of dates that are dark amber in color; and, with respect to dates that are predominantly dark amber in color, that there may be not more than 20 percent by count of dates that are light amber in color.

§ 52.1005 *Definitions of varying degrees of uniformity of size.* (a) "Practically uniform in size" means that not more than a total of 10 percent by weight of whole unpitted dates or whole pitted dates may be conspicuously larger or smaller than the approximate average size of the dates in the container.

(b) "Reasonably uniform in size" means that not more than a total of 15 percent by weight of whole unpitted dates or whole pitted dates may be conspicuously larger or smaller than the approximate average size of the dates in the container.

(c) "Fairly uniform in size" means that not more than a total of 20 percent by weight of whole unpitted dates or whole pitted dates may be conspicuously larger or smaller than the approximate average size of the dates in the container.

§ 52.1006 *Definitions of varying degrees of character.* (a) "Good character" is the character of a date which is well developed, well fleshed, soft, and translucent.

(b) "Reasonably good character" is the character of a date which is reasonably well developed, reasonably well fleshed, pliable, and semi-translucent; or is the character of a date which has reached a stage of maturity that may be expected to develop into a reasonably well-ripened date.

(c) "Fairly good character" is the character of a date which is fairly well developed, fairly well fleshed, and may be firm but is pliable; or is the character of a date which has reached a stage of maturity that may be expected to develop into a fairly well-ripened date. Dates of this character may possess semi-dry calyx ends.

(d) "Semi-dry calyx end" means that the flesh at the stem end of a date, constituting not less than one-eighth and not more than one-fourth of the date, is slightly lacking in character, is noticeably firm and materially more dry than the balance of the date.

(e) "Dry calyx end" means that the flesh at the stem end of the date, constituting more than one-fourth of the date, is materially lacking in character, hard, and materially more dry than the balance of the date.

(f) "Improperly ripened" means evidence of "green shrivel" of the date or that the date possesses a puffy flesh or a decidedly rubbery texture resulting from failure of the tissue of the date to reach a desirable soft, pliable condition.

§ 52.1007 *Definition of defects.* (a) "Damaged by discoloration" is the presence of a dark area in the flesh of the date, which dark area is visible through the skin and is more than one-fourth (¼) inch in width and extends more than the equivalent of half the length of the date, such darkening being of natural origin and not caused by mold or other organism.

(b) "Damaged by broken skin" is any rupture of the skin in a manner to expose the flesh of the date, the shortest dimension of such exposed area being not less than three-sixteenths (3/16) inch.

(c) "Damaged by checking" is the presence of fine lines, resulting from water injury, affecting the surface of the skin over an area not less than one-fourth of the total surface of the date.

(d) "Seriously damaged by checking" is the presence of heavy lines, resulting from water injury, seriously affecting the surface of the skin over an area not less than one-fourth of the total surface of the date.

(e) "Damaged by deformity" is any abnormal shape sufficient to produce an appearance discernibly at variance with the normal shape that is typical of the variety.

(f) "Damaged by puffiness" is the condition of a date of which the skin is soft and pliable and from which the skin is separated from the flesh in a balloon-like fashion, over an area not less than one-half of the total surface of the date. Soft skins which have returned and adhere to the flesh of the date are not considered "damaged by puffiness."

(g) "Seriously damaged by puffiness" is the condition of a date of which the skin is dry, hard, and brittle and from which the skin is separated from the flesh over an area not less than one-half of the total surface of the date.

(h) "Damaged by scars" are any blemishes that affect the exterior of the date and which are not less than three-sixteenths (3/16) inch in the shortest dimension.

(i) "Damaged by sunburn" is an area, usually light in color, scarred by the heat of the sun, such area being not less than three-sixteenths (3/16) inch in the shortest dimension.

(j) "Damaged by insect injury" is any blemish, resulting from the activity of insects or mites, distributed over an area of not less than one-eighth of the total surface of the date.

(k) "Damaged by improper hydrating" means that the date has been injured by excessive heat or that the hydrating process is incomplete.

(l) "Damaged by mashing" means any physical injury to the flesh and skin of the date leaving the date partially mangled but otherwise whole.

(m) "Damaged by mechanical injury" means excessive trimming or similar injury that damages the appearance or that damages or affects the eating quality of the whole date or the whole unpitted date.

(n) "Damaged by lack of pollination" means, with respect to whole unpitted dates, that pollination of the date was not accomplished, such condition being manifested by the absence of a pit in the whole unpitted dates or by thin, immature appearance of the date.

(o) "Damaged by blacknose" is severe checking in which the flesh becomes dark, crusty, and dry and which severe checking affects an area greater than one-eighth of the total surface of the date.

(p) "Damaged by side spot" means a very dark area, which generally is circular in appearance, extending into the flesh of the date and, when decayed tissue or mold is not present, affecting in the aggregate an area not less than the area of a circle three-sixteenths (3/16) inch in diameter.

(q) "Damaged by black scald" means the collapse, death, and blacken-

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

ing of the flesh along the side of the date, usually accompanied by a bitter taste in the affected area.

(r) "Damaged by other defects" means any injury or defect or group of defects not defined in this section (such as, but not limited to, heavy sugaring, and excessive scars not described in the definition "damaged by scars,") which materially affect the appearance, edibility, or keeping quality of the dates.

(s) "Affected by souring" is evidenced by the breakdown of the sugars into alcohol and acetic acid by yeasts and bacteria.

(t) "Affected by mold" is the presence of visible mold.

(u) "Affected by dirt" is the presence of any quantity of such substance.

(v) "Affected by insect infestation" is the presence of dead insects, insect parts, or excreta. (No live insects are permitted.)

(w) "Affected by foreign material" is the presence of any quantity of such substances.

(x) "Affected by decay" is a state of decomposition.

FACTORS OF QUALITY

§ 52.1008 *Specifications of allowances and limitations for defects with respect to whole dates and whole pitted dates*—(a) *U. S. Grade A or U. S. Fancy.* The following total allowance and limitations are to be used in ascertaining whether whole dates or whole pitted dates are U. S. Grade A or U. S. Fancy:

CHART NO. I

TOTAL ALLOWANCE

Not more than a total of 10 percent[1] for the following defects:

| Damaged by: | Damaged by: |
|---|---|
| Discoloration. | Side spot. |
| Broken skin. | Black scald. |
| Checking. | Other defects. |
| Deformity. | Seriously damaged by puffiness. |
| Puffiness. | Seriously damaged by checking. |
| Scars. | Affected by: |
| Sunburn. | Souring. |
| Insect injury. | Mold. |
| Improper hydrating. | Dirt. |
| Mashing. | Insect infestation. |
| Mechanical injury. | Foreign material. |
| Lack of pollination | Decay. |
| Blacknose. | |

LIMITATIONS

Not more than ⅜ of the total allowance, or 6 percent,[1] may be the following:

| Damaged by: | Affected by: |
|---|---|
| Side spot. | Mold. |
| Black scald. | Dirt. |
| Other defects. | Insect infestation. |
| Affected by: | Foreign material. |
| Souring. | Decay. |

Not more than ⅜ of the total allowance, or 4 percent,[1] may be the following:

| Affected by: | Affected by: |
|---|---|
| Souring. | Insect infestation. |
| Mold. | Foreign material. |
| Dirt. | Decay. |

Not more than 1/10 of the total allowance, or 1 percent,[1] may be the defect shown below:

Affected by decay

(b) *U. S. Grade B or U. S. Choice.* The following allowances and limitations are to be used in ascertaining whether whole dates or whole pitted dates are U. S. Grade B or U. S. Choice:

CHART NO. II

ALLOWANCES

Not more than 15 percent[1] may be the following defect:

Seriously damaged by checking

Not more than 20 percent[1] may be the following defect:

Damaged by broken skin

ADDITIONAL ALLOWANCE

Not more than a total of 15 percent[1] for the following defects:

| Damaged by: | Damaged by: |
|---|---|
| Deformity. | Side spot. |
| Puffiness. | Black scald. |
| Scars. | Other defects. |
| Sunburn. | Seriously damaged by puffiness. |
| Insect injury. | Affected by: |
| Improper hydrating. | Souring. |
| Mashing. | Mold. |
| Mechanical injury. | Dirt. |
| Lack of pollination. | Insect infestation. |
| Blacknose. | Foreign material. |
| | Decay. |

LIMITATIONS

Not more than ⅔ of the additional allowance, or 10 percent,[1] may be the following:

| Damaged by: | Affected by: |
|---|---|
| Lack of pollination. | Souring. |
| Blacknose. | Mold. |
| Side spot. | Dirt. |
| Black scald. | Insect infestation. |
| Other defects. | Foreign material. |
| | Decay. |

Not more than ½ of the additional allowance, or 5 percent,[1] may be the following:

Affected by:
Souring.
Mold.
Dirt.
Insect infestation.
Foreign material.
Decay.

Not more than 1/15 of the additional allowance, or 1 percent,[1] may be the defect shown below:

Affected by decay

(c) *U. S. Grade C or U. S. Standard.* The following total allowance and limitations are to be used in ascertaining whether whole dates or whole pitted dates are U. S. Grade C or U. S. Standard:

CHART NO. III

TOTAL ALLOWANCE

Not more than a total of 20 percent[1] for the following defects:

| Damaged by: | Seriously damaged by puffiness. |
|---|---|
| Deformity. | |
| Scars. | |
| Sunburn. | |
| Insect injury. | |
| Improper hydrating. | |
| Mashing. | |
| Mechanical injury. | Affected by: |
| Lack of pollination. | Souring. |
| Blacknose. | Mold. |
| Side spot. | Dirt. |
| Black scald. | Insect infestation. |
| Other defects. | Foreign material. |
| | Decay. |

LIMITATIONS

Not more than ½ of the total allowance, or 10 percent,[1] may be the following:

| Damaged by: | Affected by: |
|---|---|
| Lack of pollination. | Souring. |
| Blacknose. | Mold. |
| Side spot. | Dirt. |
| Black scald. | Insect infestation. |
| Other defects. | Decay. |

Not more than ⅓ of the total allowance, or 5 percent,[1] may be the following:

Affected by:
Souring.
Mold.
Dirt.
Insect infestation.
Foreign material.
Decay.

Not more than 1/10 of the total allowance, or 2 percent,[1] may be the defect shown below:

Affected by decay

[1] No limit in U. S. Grade C or U. S. Standard for "damaged by puffiness."

[2] No limit in U. S. Grade B or U. S. Choice and in U. S. Grade C or U. S. Standard for "damaged by checking."

[3] No limit in U. S. Grade C or U. S. Standard for "seriously damaged by checking."

[4] No limit in U. S. Grade C or U. S. Standard for "damaged by broken skin."

[5] No limit in U. S. Grade B or U. S. Choice and in U. S. Grade C or U. S. Standard for "damaged by discoloration."

SUBPART—UNITED STATES STANDARDS FOR GRADES OF DRIED FIGS [1]

PRODUCT DESCRIPTION, TYPES, STYLES, SIZES, AND GRADES

§ 52.1021 *Product description.* Dried figs are the fruit of the fig tree (Ficus carica) from which the greater portion of moisture has been removed. Before packing the dried figs have been thoroughly cleaned. The figs may or may not be sulphured or otherwise bleached.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[1] Percentages are by weight.

§ 52.1022 *Types (colors) of dried figs.* (a) "White" or "white figs" are white to dark brown in color and include such varieties as Calimyrna, Adriatic, and Kadota.

(b) "Black" or "black figs" are black or dark purple in color as in the Mission varieties.

§ 52.1023 *Styles and types of packs of dried figs.* (a) "Whole" or "whole figs" means dried figs in the following types of packs:

(1) Style I (a), "Whole, loose, figs" are whole dried figs, not materially changed from their original dried form, that are packed without special arrangement in a container.

(2) Style I (b), "Whole, pulled, figs" are whole dried figs which are changed from their original dried form by purposely flattening and shaping and are placed in a definite arrangement in a container. The dried figs may or may not be split slightly across the eye but are not split to the extent that the seed cavity is materially exposed.

(3) Style I (c), "Whole, layered, figs" are whole dried figs which are changed from their original dried form by purposely flattening and shaping and are placed in a staggered-layer arrangement in a container. The figs are split across the base to the extent that the seed cavity may be materially exposed.

(b) Style II, "Sliced" or "sliced figs" means dried whole figs that are cut into slices not less than ¼ inch in thickness; such slices are not recut showing more than two cut surfaces.

§ 52.1024 *Sizes of Style I (a), whole, loose, dried figs.* (a) The sizes of Style I (a), whole, loose, dried figs for the following varieties are:

BLACK MISSION

No. 1 size (Jumbo size)—1$^{7}/_{16}$ inches or larger in width.
No. 2 size (Extra Fancy size)—1$^{3}/_{16}$ inches to, but not including, 1$^{7}/_{16}$ inches in width.
No. 3 size (Fancy size)—1$^{1}/_{16}$ inches to, but not including, 1$^{3}/_{16}$ inches in width.
No. 4 size (Extra Choice size)—$^{15}/_{16}$ inch to, but not including, 1$^{1}/_{16}$ inches in width.
No. 5 size (Choice size)—$^{13}/_{16}$ inch to, but not including, $^{15}/_{16}$ inch in width.
No. 6 size (Standard size)—less than $^{13}/_{16}$ inch in width.

ADRIATIC OR KADOTA

No. 1 size (Jumbo size)—1$^{8}/_{16}$ inches or larger in width.
No. 2 size (Extra Fancy size)—1$^{5}/_{16}$ inches to, but not including, 1$^{8}/_{16}$ inches in width.
No. 3 size (Fancy size)—1$^{3}/_{16}$ inches to, but not including, 1$^{5}/_{16}$ inches in width.
No. 4 size (Extra Choice size)—1$^{1}/_{16}$ inches to, but not including, 1$^{3}/_{16}$ inches in width.
No. 5 size (Choice size)—$^{15}/_{16}$ inch to, but not including, 1$^{1}/_{16}$ inches in width.
No. 6 size (Standard size)—Less than $^{15}/_{16}$ inch in width.

CALIMYRNA

No. 1 size (Jumbo size)—1$^{9}/_{16}$ inches or larger in width.
No. 2 size (Extra Fancy size)—1$^{6}/_{16}$ inches to, but not including, 1$^{9}/_{16}$ inches in width.
No. 3 size (Fancy size)—1$^{3}/_{16}$ inches to, but not including, 1$^{6}/_{16}$ inches in width.
No. 4 size (Extra Choice size)—1$^{1}/_{16}$ inches to, but not including, 1$^{3}/_{16}$ inches in width.
No. 5 size (Choice size)—$^{15}/_{16}$ inch to, but not including, 1$^{1}/_{16}$ inches in width.
No. 6 size (Standard size)—Less than $^{15}/_{16}$ inch in width.

(b) In determining compliance with size requirements listed in paragraph (a) of this section, Style I (a), whole, loose, dried figs will be considered as of one size if not more than 10 percent by count of the figs varies from the size range. "Uniformity of size," as such, is not a requirement for Style I (a), whole, loose, dried figs.

§ 52.1025 *Grades of dried figs (not for manufacturing)*—(a) *(A) classification.* "U. S. Grade A" or "U. S. Fancy" is the quality of dried figs that are of one variety; are well-matured with not more than 5 percent by count of reasonably well-matured dried figs; are practically uniform in size, except for Style I (a) whole, loose, figs and Style II, sliced figs; possess a practically uniform typical color; possess a good distinct, typical, and normal dried fig flavor and odor; are free from foreign material; and do not exceed the maximum allowances and limitations as specified in Table No. I (Moisture), Table No. II (Defects: Styles I (a), I (b), and I (c), whole figs), or Table No. III (Defects: Style II, sliced figs) of this subpart.

(b) *(B) classification.* "U. S. Grade B" or "U. S. Choice" is the quality of dried figs that are of one variety; are reasonably well-matured with not more than 10 percent by count of fairly well-matured dried figs; are reasonably uniform in size, except for Style I (a), whole, loose, figs and Style II, sliced figs; possess a reasonably uniform typical color; possess a reasonably good, distinct, typical, and normal dried fig flavor and odor; are free from foreign material; and do not exceed the maximum allowances and limitations as specified in Table No. I (Moisture), Table No. IV (Defects: Styles I (a), I (b), and I (c), whole figs), or Table No. V (Defects: Style II, sliced figs) of this subpart.

(c) *(C) classification.* "U. S. Grade C" or "U. S. Standard" is the quality of dried figs that are of one variety or of similar varieties; are fairly well-matured; are fairly uniform in size, except for Style I (a), whole, loose, figs and Style II, sliced figs; possess a fairly uniform typical color; possess a typical and normal dried fig flavor and odor; are free from foreign material; and do not exceed the maximum allowances and limitations as specified in Table No. I (Moisture), Table No. VI (Defects: Styles I (a), I (b), and I (c), whole figs), or Table No. VII (Defects: Style II, sliced figs) of this subpart.

(d) *(SStd) classification.* "U. S. Grade D" or "Substandard" is the quality of dried figs that fail to meet the requirements of "U. S. Grade C" or "U. S. Standard."

§ 52.1026 *Moisture allowances for grades (not for manufacturing) of dried figs.* (a) Dried figs shall not exceed the moisture limits for the grades, types, styles, and groups designated in Table No. I of this section. Moisture limits are not applicable to U. S. Grade D (not for manufacturing) or Substandard (not for manufacturing). Group I includes figs in containers which do not completely enclose and seal the figs; such containers include, but are not limited to, wood boxes or fiber boxes. Group II includes figs packaged in completely sealed packages; such containers include, but are not limited to, cellophane, pliofilm, metal-foil wrapped bags or cartons.

(b) In determining compliance with the moisture limits prescribed in Table No. I, samples which represent a specific lot of dried figs may possess one percent (1%) additional moisture, provided the average moisture for all samples is within the limits stated in Table No. I.

TABLE NO. I—MOISTURE ALLOWANCES FOR DRIED FIGS

| Grades (not for manufacturing) | Types | Styles | Maximum moisture limits (by weight) | |
|---|---|---|---|---|
| | | | Group I | Group II |
| | | | *Percent* | *Percent* |
| U. S. Grade A or U. S. Fancy and U. S. Grade B or U. S. Choice and U. S. Grade C or U. S. Standard. | White | Whole | 24 | 30 |
| | do | Sliced | 23 | |
| | Black | Whole | 23 | 30 |
| | do | Sliced | 23 | |
| | Black and white (mixed) | Whole | 23 | 30 |
| | do | Sliced | 23 | |

§ 52.1027 *Grades of dried figs for manufacturing*—(a) *(A) classification.* "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" is the quality of dried figs that are of one variety or similar varieties; are reasonably well-matured with not more than 5 percent by count of fairly well-matured figs; possess a reasonably uniform typical color, possess a good, distinct, typical, and normal dried fig flavor and odor; are free from foreign material; and do not exceed the maximum allowances and limitations as specified in Table No. VIII (Moisture); Table No. IX (Defects: Styles I (a), I (b), and I (c), whole figs); or Table No. X (Defects: Style II, sliced figs) of this subpart.

(b) *(B) classification.* "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" is the quality of dried figs that are of one variety or mixed varietal types; are fairly well-matured; may possess a variable color; possess a reasonably good, distinct, typical and normal dried fig flavor and odor; are free from foreign material; and do not exceed the maximum allowances and limitations as specified in Table No. VIII (Moisture); Table No. XI (Defects): Styles I (a), I (b), and I (c), whole figs); or Table No. XII, (Defects: Style II, sliced figs) of this subpart.

(c) *(SStd) classification.* "U. S. Grade D for Manufacturing" or "Substandard for Manufacturing" is the quality of dried figs that fail to meet the requirements of "U. S. Grade B for Manufacturing" or U. S. Choice for Manufacturing."

§ 52.1028 *Moisture allowances for grades for manufacturing of dried figs.*

(a) Dried figs shall not exceed the moisture limits for the grades, types, styles, and groups designated in Table No. VIII of this subpart. Moisture limits are not applicable to U. S. Grade D for Manufacturing or Substandard for Manufacturing. Group I includes figs in containers which do not completely enclose and seal the figs; such containers include, but are not limited to, wood boxes or fiber boxes. Group II includes figs packaged in completely sealed packages; such containers include, but are not limited to, cellophane, pliofilm, metal-foil wrapped bags or cartons.

(b) In determining compliance with the moisture limits prescribed in Table No. VIII, samples which represent a specific lot of dried figs may possess one percent (1%) additional moisture, provided the average moisture for all samples is within the limits stated in Table No. VIII.

DEFINITIONS AND EXPLANATIONS

§ 52.1029 *Definitions of varying degrees of maturity.* (a) A "well-matured" dried fig means a dried fig which is well developed and in which the interior shows very good sugary tissue development that is sirupy and gumlike in consistency and texture.

(b) A "reasonably well-matured" dried fig means a dried fig which is reasonably well developed and in which (1) the interior shows good sugary tissue development that is gummy but slightly fibrous in consistency and texture or (2) one-third or less of the interior of the fig may be entirely lacking in sugary tissue, provided that the remainder of the interior of the fig is sirupy and gumlike in consistency and texture.

(c) A "fairly well-matured" dried fig means a dried fig which is fairly well developed and in which (1) the sugary tissue in the interior of the fig is gummy and fibrous in consistency and texture or (2) one-third or less of the interior of the fig may be entirely lacking in sugary tissue, provided that the remainder of the interior of the fig is gummy but slightly fibrous in consistency and texture or (3) more than one-third but less than one-half of the interior of the fig may be entirely lacking in sugary tissue, provided that the remainder of the interior of the fig is sirupy and gumlike in consistency and texture.

TABLE NO. II—ALLOWANCES FOR DEFECTS

[Style I (a), whole, loose, figs; style I (b), whole, pulled, figs; style I (c), whole, layered, figs]

| Grade (not for manufacturing) | Total allowance, not more than a total of 10% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 3/5 of the total or 6% [1] | Not more than 1/10 of the total or 1% [1] | Not more than 1/10 of the total or 1% [1] |
| U. S. Grade A or U. S. Fancy | Damaged by: Scars or disease, Sunburn, Insect injury, Mechanical injury, Visible sugaring, Other similar defects. Immature figs. Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

TABLE NO. III—ALLOWANCES FOR DEFECTS

[Style II, sliced figs]

| Grade (not for manufacturing) | Total allowance, not more than a total of 10% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 3/5 of the total or 6% [1] | Not more than 1/10 of the total or 1% [1] | Not more than 1/10 of the total or 1% [1] |
| U. S. Grade A or U. S. Fancy | Damaged by: Scars or disease, Sunburn, Insect injury, Visible sugaring, Other similar defects. Immature figs. Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

TABLE NO. IV—ALLOWANCES FOR DEFECTS

[Style I (a), whole, loose, figs.; style I (b), whole, pulled, figs.; style I (c), whole, layered, figs]

| Grade (not for manufacturing) | Total allowance, not more than a total of 15% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 5/8 of the total or 8% [1] | Not more than 1/8 of the total or 1% [1] | Not more than 2/5 of the total or 2% [1] |
| U. S. Grade B or U. S. Choice | Damaged by: Scars or disease, Sunburn, Insect injury, Mechanical injury, Visible sugaring, Other similar defects. Immature figs. Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

TABLE NO. V—ALLOWANCES FOR DEFECTS

[Style II, sliced figs]

| Grade (not for manufacturing) | Total allowance, not more than a total of 15% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 5/8 of the total or 8% [1] | Not more than 1/8 of the total or 1% [1] | Not more than 2/5 of the total or 2% [1] |
| U. S. Grade B or U. S. Choice | Damaged by: Scars or disease, Sunburn, Insect injury, Visible sugaring, Other similar defects. Immature figs. Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

TABLE NO. VI—ALLOWANCES FOR DEFECTS

[Style I (a), whole, loose, figs; style I (b), whole, pulled, figs; style I (c), whole, layered, figs]

| Grade (not for manufacturing) | Total allowance, not more than a total of 20% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 1/2 of the total or 10% [1] | Not more than 1/10 of the total or 2% [1] | Not more than 3/20 of the total or 3% [1] |
| U. S. Grade C or U. S. Standard | Seriously damaged by: Scars or disease. Damaged by: Scars or disease, Sunburn, Insect injury, Mechanical injury, Visible sugaring, Other similar defects. Immature figs. Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

TABLE NO. VII—ALLOWANCES FOR DEFECTS

[Style II, sliced figs]

| Grade (not for manufacturing) | Total allowance, not more than a total of 20% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 1/2 of the total or 10% [1] | Not more than 1/10 of the total or 2% [1] | Not more than 3/20 of the total or 3% [1] |
| U. S. Grade C or U. S. Standard | Damaged by: Scars or disease, Sunburn, Insect injury, Visible sugaring, Other similar defects. Immature figs. Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by: Souring, Mold. Dirt. Affected by decay. Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

TABLE NO. VIII—MOISTURE ALLOWANCES FOR DRIED FIGS

| Grades for manufacturing | Types | Styles | Maximum moisture limits (by weight) | |
|---|---|---|---|---|
| | | | Group I | Group II |
| | | | *Percent* | *Percent* |
| U. S. Grade A or U. S. Fancy and U. S. Grade B or U. S. Choice. | White | Whole | 24 | 30 |
| | do | Sliced | 23 | |
| | Black | Whole | 23 | 30 |
| | do | Sliced | 23 | |
| | Black and white (mixed) | Whole | 23 | 30 |
| | do | Sliced | 23 | |

(d) An "immature" fig is considered a defect (see § 52.1032 (h)).

(e) A "worthless" fig is considered a defect (see § 52.1032 (l)).

§ 52.1030 *Definitions of varying degrees of uniformity of size.* Uniformity of size applies to Style I (b), whole, pulled, figs and Style I (c), whole, layered, figs, where the original shape has been materially changed.

(a) "Practically uniform in size" means that not more than a total of 10 percent by count of dried figs may be conspicuously larger or smaller than the approximate average size of the dried figs in the container.

(b) "Reasonably uniform in size" means that not more than a total of 15 percent by count of dried figs may be conspicuously larger or smaller than the approximate average size of the dried figs in the container.

(c) "Fairly uniform in size" means that not more than a total of 20 percent by count of dried figs may be conspicuously larger or smaller than the approximate average size of the dried figs in the container.

§ 52.1031 *Definitions of varying degrees of uniformity of color.* (a) "Practically uniform typical color" means,

with respect to white varieties of dried figs that are light in color, that there may be not more than 5 percent by count of dried figs that are markedly dark figs; and, with respect to white varieties that are dark in color, that there may be not more than 5 percent by count of dried figs that are markedly light-colored figs.

(b) "Practically uniform typical color" means, with respect to black varieties of dried figs, that the color of the dried figs is a practically uniform natural black color and that dried figs affected by very light-colored scars which are not calloused and which, singly or in the aggregate on a whole dried fig, are less than one-half of the exterior surface of the dried fig do not exceed 10 percent by count of the dried figs.

(c) "Reasonably uniform typical color" means, with respect to white varieties of dried figs that are light in color, that there may be not more than 10 percent by count of dried figs that are markedly dark figs; and, with respect to white varieties that are dark in color, that there may be not more than 10 percent by count of dried figs that are markedly light-colored figs.

(d) "Reasonably uniform typical color" means, with respect to black varieties of dried figs, that the color of the dried figs is a reasonably uniform natural black color and that dried figs affected by very light-colored scars which are not calloused and which, singly or in the aggregate on a whole dried fig, are less than one-half of the exterior surface of the dried fig do not exceed 15 percent by count of the dried figs.

(e) "Fairly uniform typical color" means, with respect to white varieties of dried figs that are light in color or are very light green in color, that there may be not more than 20 percent by count of dried figs that are markedly dark figs; and, with respect to white varieties that are dark in color, that there may be not more than 20 percent by count of dried figs that are markedly light-colored figs.

(f) "Fairly uniform typical color" means, with respect to black varieties of dried figs, that the color of the dried figs is a fairly uniform natural black color and that dried figs affected by very light-colored scars which are not calloused and which, singly or in the aggregate on a whole dried fig, are less than one-half of the exterior surface of the dried fig do not exceed 20 percent by count of the dried figs.

TABLE NO. IX—ALLOWANCES FOR DEFECTS

[Style I (a), whole, loose, figs; style I (b), whole, pulled, figs; style I (c), whole, layered, figs]

| Grade for manufacturing | Total allowance, not more than a total of 15% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 1/3 of the total or 5% [1] | Not more than 1/15 of the total or 1% [1] | Not more than 1/30 of the total or 1/2% [1] |

TABLE NO. XI—ALLOWANCES FOR DEFECTS

[Style I (a), whole, loose, figs; style I (b), whole, pulled, figs; style I (c), whole, layered, figs]

| Grade for manufacturing | Total allowance, not more than a total of 30% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 1/3 of the total or 10% [1] | Not more than 1/15 of the total or 2% [1] | Not more than 1/30 of the total or 1% [1] |
| U. S. Grade B or U. S. Choice | Seriously damaged by: Scars or disease.<br>Damaged by:<br>Sunburn.<br>Insect injury.<br>Mechanical injury.<br>Other similar defects.<br>Immature figs.<br>Affected by:<br>Souring.<br>Mold.<br>Dirt.<br>Affected by decay.<br>Worthless figs. | Affected by:<br>Souring.<br>Mold.<br>Dirt.<br>Affected by decay.<br>Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

TABLE NO. XII—ALLOWANCES FOR DEFECTS

[Style II, sliced figs]

| Grade for manufacturing | Total allowance, not more than a total of 20% [1] | Limited allowances | | |
|---|---|---|---|---|
| | | Not more than 1/3 of the total or 10% [1] | Not more than 1/10 of the total or 2% [1] | Not more than 1/4 of the total or 6% [1] |
| U. S. Grade B or U. S. Choice | Damaged by:<br>Scars or disease.<br>Sunburn.<br>Insect injury.<br>Other similar defects.<br>Immature figs.<br>Affected by:<br>Souring.<br>Mold.<br>Dirt.<br>Affected by decay.<br>Worthless figs. | Affected by:<br>Souring.<br>Mold.<br>Dirt.<br>Affected by decay.<br>Worthless figs. | Affected by decay. | Worthless figs. |

[1] Percentages are by count.

§ 52.1032 *Definitions of defects.* (a) "Damaged by scars or disease" means that the area of tough or calloused scars, singly or in the aggregate on a dried fig or portion of dried fig, is equal to, or exceeds, the area of a circle 3/8 inch in diameter but is less than the area of a circle 1/2 inch in diameter.

(b) "Seriously damaged by scars or disease" means that the area of tough or calloused scars, singly or in the aggregate on a dried fig or portion of dried fig, is equal to, or exceeds, the area of a circle 1/2 inch in diameter. Figs which possess very light-colored scars that are not calloused are considered as "seriously damaged by scars" if such scars, singly or in the aggregate on a whole dried fig, are equal to one-half or more of the exterior surface of the dried fig.

(c) "Damaged by sunburn" means any substantial damage from excessive heat to the skin evidenced by dry and tough surface areas and which damage is accompanied by a lack of sugary tissue affecting one-third or more of the interior of a dried fig.

(d) "Damaged by insect injury" means healed or unhealed surface blemishes or unhealed blemishes in the flesh which affect materially the appearance, edibility, or keeping quality of the dried figs.

(e) "Mechanical injury" means injury to the styles of whole dried figs as follows: (1) In Style I (a), Whole, loose, figs and Style I (b), Whole, pulled, figs, the seed tissue is mashed out beyond the outer wall or there are excessive skin breaks which affect materially the appearance of the dried figs for the applicable style; (2) in Style I (c), Whole, layered, figs, there are excessive skin breaks (other than the normal splitting for the style) to the extent that a dried fig cannot be identified as a whole, layered, fig.

(f) "Damaged by visible sugaring" means white sugar crystals which form on the exterior surface of a dried fig so as to damage materially the appearance. Units showing a few lightly sugared spots are not considered as "damaged by visible sugaring."

(g) "Damaged by other similar defects" includes any injury or defect not specifically mentioned which affects materially the appearance, edibility, or keeping quality of the dried figs, except that stems which attach the fig to the twig of the tree are not considered as "other similar defects."

(h) An "immature" fig means a fig which does not meet the requirements of "fairly well-matured" (see § 52.1029 (c)) but is not worthless.

(i) "Affected by souring" means that a dried fig is (1) fermented, as evidenced by a distinct sour taste or odor or by the darkening in color characteristic of fermentation or souring; or (2) infested with internal rot (endosepsis).

(j) "Affected by mold" means that a dried fig shows a moldy or smutty condition, singly or in the aggregate on a dried fig or portion of dried fig, that is equal to, or exceeds, the area of a circle 3/16 inch in diameter.

(k) "Affected by decay" means that the flesh is decomposed by rot.

(l) A "worthless" fig means a fig which is tough and fibrous and may contain a trace of sugary tissue.

§ 52.1033 *Definition of varying degrees of flavor and odor.* (a) "Good, distinct, typical, and normal dried fig flavor and odor" means a clean and distinct dried fig flavor and odor free from any flavors or odors such as are characteristic of scorching or caramelization and free from other slight abnormal flavors or odors.

(b) "Reasonably good, distinct, typical, and normal dried fig flavor and odor" means a clean and distinct dried fig flavor and odor which may possess very slight flavors or odors such as are characteristic of scorching or caramelization or may possess other very slight abnormal flavors or odors.

(c) "Typical and normal dried fig flavor and odor" means a clean and distinct dried fig flavor and odor which may possess slight flavors or odors such as are characteristic of scorching or caramelization but may not possess any flavor in amounts resulting in objectionable or off-flavors.

[1] "Seriously damaged by scars or disease" applies to U. S. Grade A for Manufacturing or U. S. Fancy for Manufacturing and U. S. Grade B for Manufacturing or U. S. Choice for Manufacturing in Style I (a), Whole, loose, figs; Style I (b), Whole, pulled, figs; and Style I (c), Whole, layered, figs.

[2] No limit for "damaged by scars or disease" in U. S. Grade B for Manufacturing or U. S. Choice for Manufacturing in Style I (a), Whole, loose, figs; Style I (b), Whole, pulled, figs; and Style I (c), Whole, layered, figs.

[3] "Damaged by mechanical injury" is not applicable to any grade of Style II, sliced figs.

## UNITED STATES STANDARDS FOR GRADES OF CANNED FRUIT COCKTAIL [1]

### IDENTITY AND GRADES

§ 52.1051 *Identity.* "Canned fruit cocktail" means the food prepared from the mixture of fruit ingredients of peaches, pears, grapes, pineapple, and cherries as defined in the standard of identity for canned fruit cocktail, canned cocktail fruits, canned fruits for cocktail (21 CFR 27.40) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.1052 *Grades of canned fruit cocktail.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned fruit cocktail that is practically free from defects; that possesses a good character; that possesses a normal flavor and odor; and that is of such quality with respect to clearness of liquid media, color, and uniformity of size as to score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of canned fruit cocktail that possesses a fairly clear liquid media; that is reasonably uniform in size; that is reasonably free from defects; that possesses a reasonably good character; that possesses a normal flavor and odor; and that is of such quality with respect to color as to score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of canned fruit cocktail that fails to meet the requirements of U. S. Grade B or U. S. Choice and is the quality of canned fruit cocktail that may or may not meet the minimum standard of quality for canned fruit cocktail issued pursuant to the Federal Food, Drug, and Cosmetic Act.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

### PROPORTIONS

§ 52.1053 *Proportion of fruit ingredients.* Canned fruit cocktail shall contain the fruit ingredients in the proportions indicated in Table I.

TABLE I

| Fruit ingredient | Style | Proportions | |
|---|---|---|---|
| | | Not less than— | Not more than— |
| Peaches (any yellow variety) | Diced | 30 percent by weight of drained fruit. | 50 percent by weight of drained fruit. |
| Pears (any variety) | Diced | 25 percent by weight of drained fruit. | 45 percent by weight of drained fruit. |
| Grapes (any seedless variety) | Whole | 6 percent by weight of drained fruit. | 20 percent by weight of drained fruit. |
| Pineapple (any variety) | Diced or sectors | 6 percent by weight of drained fruit, but not less than 2 sectors or 3 dice for each 4½ ounces avoirdupois of product and each fraction thereof greater than 2 ounces. | 16 percent by weight of drained fruit. |
| Cherries (any light, sweet variety) or (artificially colored red) or (artificially colored red and artificially flavored). | Approximate halves | 2 percent by weight of drained fruit; but not less than 1 approximate half for each 4½ ounces avoirdupois of product and each fraction thereof greater than 2 ounces. | 6 percent by weight of drained fruit. |

### LIQUID MEDIA, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.1054 *Liquid media and Brix measurements for canned fruit cocktail.* "Cut-out" requirements for liquid media in canned fruit cocktail are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. The "cut-out" Brix measurement, as applicable, for the respective designations are as follows:

| Designations | Brix measurement |
|---|---|
| "Extra heavy sirup" or "Extra heavy fruit juice sirup" | 22° or more but not more than 35°. |
| "Heavy sirup" or "Heavy fruit juice sirup" | 18° or more but less than 22°. |
| "Light sirup" or "Light fruit juice sirup" | 14° or more but less than 18°. |
| "In water" | Packed in water. |
| "In fruit juice" | Packed in fruit juice. |

§ 52.1055 *Fill of container for canned fruit cocktail.* (a) The standard of fill of container for canned fruit cocktail is a fill such that the total weight of drained fruit is not less than 65 percent of the water capacity of the container. Canned fruit cocktail that does not meet this requirement is "Below Standard in Fill."

(b) Such total weight of drained fruit is determined by the following method: Tilt the open container so as to distribute the contents evenly over the meshes of a circular sieve which has been previously weighed. The diameter of the sieve is 8 inches if the quantity of the contents of the container is less than 3 pounds, and 12 inches if such quantity is 3 pounds or more. The bottom of the sieve is woven-wire cloth which complies with the specifications for such cloth set forth under "2380 Micron (No. 8)" in Table I of "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the U. S. Department of Commerce, National Bureau of Standards. Without shifting the material on the sieve so incline the sieve as to facilitate the drainage. Two minutes from the time drainage begins, weigh the sieve and drained fruit. The weight so found, less the weight of the sieve, shall be considered to be the total weight of drained fruit.

(c) The total weight of drained fruit, also termed "drained weight," shall be not less than that shown for the respective size of containers in Table II.

TABLE II

[Minimum drained weight for canned fruit cocktail]

| Container designation (metal, unless otherwise stated) | Container size | | | Capacity—weighed (filled at 68° F.) | Minimum drained weight (85 percent capacity) |
|---|---|---|---|---|---|
| | Overall width | Dimensions, height | Overflow capacity | | |
| | *Inches* | *Inches* | *Fluid ounces* | *Avdp. ounces* | *Ounces* |
| 8 Z tall | 2 1/16 | 3 4/16 | | 8 [illegible] | 5.63 |
| 8-oz. glass | | | 8.2 | 8 [illegible] | 5.63 |
| No. 300 | 3 | 4 5/16 | | 13.30 | 9.88 |
| No. 1 tall | 3 1/16 | 4 11/16 | | 16 [illegible] | 10.38 |
| No. 303 | 3 3/16 | 4 5/16 | | 16 [illegible] | 10.96 |
| 303 glass | | | 17.0 | 17 [illegible] | 11.81 |
| No. 2 | 3 5/16 | 4 5/16 | | 20 [illegible] | 13.13 |
| No. 2½ | 4 1/16 | 4 11/16 | | 23 [illegible] | 15.34 |
| No. 2½ glass | | | 28.35 | 28 [illegible] | 19.15 |
| No. 10 | 6 3/16 | 7 | | 109.45 | 71.13 |

### FACTORS OF QUALITY

§ 52.1056 *Ascertaining the grade.* (a) The grade of canned fruit cocktail is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of clearness of liquid media, color, uniformity of size, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Clearness of liquid media | 20 |
| Color | 20 |
| Uniformity of size | 20 |
| Absence of defects | 20 |
| Character | 20 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the canned fruit cocktail is free from objectionable flavors and objectionable odors of any kind.

§ 52.1057 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1058 *Clearness of liquid media*—(a) *(A) classification.* Canned fruit cocktail that possesses a reasonably clear liquid media may be given a score of 17 to 20 points. "Reasonably clear liquid media" means that the liquid drained from the fruit cocktail is reasonably bright in color without any tinge of pink color or dullness of color and may contain fine fruit particles which do not materially affect the appearance of the product.

(b) *(B) classification.* If the canned fruit cocktail possesses a fairly clear liquid media, a score of 14 to 16 points may be given. "Fairly clear liquid media" means that the liquid drained from the fruit cocktail may be slightly pink or slightly dull in color but is not off color for any reason and may contain fruit particles which materially affect, but do not seriously affect, the appearance of the product.

(c) *(SStd) classification.* Canned fruit cocktail that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1059 *Color*—(a) *General.* The factor of color refers to the general brightness and uniformity of color typical of each of the fruit ingredients; the degree of freedom from staining from artificially colored cherries, if present; and the dullness or off color in any single fruit ingredient.

(b) *(A) classification.* Canned fruit cocktail that possesses a good color may be given a score of 17 to 20 points. "Good color" means that each fruit ingredient possesses a practically uniform typical color that is bright and characteristic of at least reasonably well-matured fruit that has been properly prepared and processed; that any of the fruit ingredients may be no more than slightly affected by pink staining; and that none of the fruit ingredients are dull or off color for reasons other than being slightly affected by pink staining.

(c) *(B) classification.* If the canned fruit cocktail possesses a reasonably good color, a score of 14 to 16 points may be given. Canned fruit cocktail that falls into this classification because of staining or dullness of color shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a partial limiting rule). "Reasonably good color" means that each fruit ingredient possesses a reasonably uniform typical color that is reasonably bright and characteristic of at least fairly well-matured fruit that has been properly prepared and processed; and that any of the fruit ingredients may be more than slightly affected by pink staining but not to the extent that the appearance is materially affected by this cause or may be slightly dull in color but none of the fruit ingredients are off color for reasons other than staining or dullness within these limits.

(d) *(SStd) classification.* Canned fruit cocktail that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1060 *Uniformity of size*—(a) *General.* The factor of uniformity of size refers to the uniformity of size of intact halves of cherries and whole grapes and to the degree of deviation from the dimensions for diced units of peaches, pears, and pineapple or for sectors of pineapple, which dimensions approximate the following:

(1) Diced units are not more than ¾ inch in greatest edge dimension and will not pass through the meshes of a sieve designated as 9/16 inch in Table I of "Standard Specifications for Sieves" published March 1, 1940, in L. C. 584 of the National Bureau of Standards, U. S. Department of Commerce;

(2) Sectors of pineapple: The length of the outside arc is not more than ¾ inch but is more than ⅜ inch; the thickness is not more than ½ inch but is more than 5/16 inch; the length (measured along the radius from the inside arc to outside arc) is not more than 1¼ inch but is more than ¾ inch.

(b) *(A) classification.* Canned fruit cocktail in which each of the fruit ingredients are practically uniform in size may be given a score of 17 to 20 points. "Practically uniform in size" means that not more than 10 percent by weight of the peach units, of the pear units, or of the pineapple units if diced may fail to conform to the dimensions for diced units; that not more than 10 percent by weight of the pineapple units if in sectors may fail to conform to the dimensions for sectors of pineapple; that the largest whole grape does not weigh more than three times the weight of the smallest whole grape; and that the longest dimension on the cut surface of the largest intact cherry half does not exceed the longest dimension on the cut surface of the smallest intact cherry half by more than 33⅓ percent.

(c) *(B) classification.* If the canned fruit cocktail possesses fruit ingredients that are reasonably uniform in size, a score of 14 to 16 points may be given. Canned fruit cocktail in which more than 15 percent by weight of the peach units, of the pear units, or of the pineapple units if diced fail to conform to the dimensions for diced units and in which more than 15 percent by weight of the pineapple units if in sectors fail to conform to the dimensions for sectors of pineapple shall not be graded above U. S. Grade B (or U. S. Choice), regardless of the total score for the product (this is a partial limiting rule). "Reasonably uniform in size" means that not more than 20 percent by weight of the peach units, of the pear units, or of the pineapple units if diced may fail to conform to the dimensions for diced units; that not more than 20 percent by weight of the pineapple units if in sectors may fail to conform to the dimensions for sectors of pineapple; that the largest whole grape does not weigh more than four times the weight of the smallest whole grape; and that the longest dimension on the cut surface of the largest intact cherry half does not exceed the longest dimension on the cut surface of the smallest intact cherry half by more than 50 percent.

(d) *(SStd) classification.* Canned fruit cocktail which fails to meet the requirements of paragraph (c) of this section shall be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule); and if the canned fruit cocktail fails to meet the requirements of paragraph (c) of this section only because of the deviations from the dimensions of diced units of peaches, pears, or pineapple or of sectors of pineapple, the canned fruit cocktail is also:

Below Standard in Quality
Good Food—Not High Grade

§ 52.1061 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material; from peach and pear peel; from pits or portions thereof; from capstems; from crushed or broken grapes; from broken cherry halves; from unevenly colored cherry halves; from blemished units; and from any other defects which detract from the appearance or edibility of the product.

(1) "Harmless extraneous material" means any vegetable substance not specifically mentioned herein as a defect that is harmless.

(2) A "pit or portion thereof" means any whole pit or piece of a pit material, regardless of size.

(3) A "capstem" means a small woody stem which attaches a grape to the branch of a bunch of grapes. Capstems are considered as defects whether or not attached to a grape.

(4) A "crushed or broken grape" means a grape that is severely crushed so as to destroy its shape or that is severed into two separate parts. Portions or fragments of grapes that are the equivalent of one grape are considered as a grape in ascertaining compliance with percentages by count of grapes.

(5) A "broken cherry half" means any portion of a cherry that is definitely less than an apparent half or a definitely mutilated cherry half.

(6) An "unevenly colored cherry half" means, if the cherry halves are artificially colored, that the color in the cherry half is other than evenly distributed in the unit or other than uniform with the color of the other cherry halves.

(7) "Blemished" in the case of the peach, pear, grape, or cherry ingredients means blemished with scab, hail injury, scar tissue, objectionable pear seed cell material, objectionable portions of interior pear stems, or other abnormality which materially affects the appearance of the unit; and in the case of the pineapple ingredient means any blemish or combination of blemishes on a unit which materially affects the appearance or edibility of the unit and includes, but is not limited to, any fruit eye or portion thereof which on the exposed portion exceeds the area of a circle $\frac{1}{16}$ inch in diameter, brown spots, pieces of shell, bruised portions, or other similar blemishes.

(b) (*A*) *classification.* Canned fruit cocktail that is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that the product is practically free from harmless extraneous material, from pits or portions thereof, from the presence of peel from loose capstems, and from any other defects not specifically mentioned that more than slightly affect the appearance or edibility of the product; and that, in addition, not more than the following defective units, as applicable for the ingredient, may be present:

(1) *Peach.* 5 percent by weight of the peach units may be blemished;

(2) *Pear.* 5 percent by weight of the pear units may be blemished;

(3) *Pineapple.* 5 percent by count of the pineapple units may be blemished;

(4) *Grape.* 10 percent by count of the grapes in a container containing 10 grapes or more, and 1 grape in a container containing less than 10 grapes may be blemished; 5 percent by count of the grapes in a container containing 20 grapes or more, and 1 grape in a container containing less than 20 grapes may be crushed or broken; and 10 percent by count of the grapes in a container containing 10 grapes or more, and 1 grape in a container containing less than 10 grapes may have the capstem attached.

(5) *Cherry.* 5 percent by count of the cherry halves in a container containing 20 cherry halves or more, and 1 cherry half in a container containing less than 20 cherry halves may be blemished; 5 percent by count of the cherry halves in a container containing 20 cherry halves or more, and 1 cherry half in a container containing less than 20 cherry halves may be a broken cherry half; and 5 percent by count of the cherry halves in a container containing 20 cherry halves or more, and 1 cherry half in a container containing less than 20 cherry halves may be unevenly colored: *Provided*, That in all containers comprising the sample such blemished cherry halves do not exceed an average of 5 percent by count of the total number of cherry halves; such broken cherry halves do not exceed an average of 5 percent by count of the total number of cherry halves; and such unevenly colored cherry halves do not exceed an average of 5 percent by count of the total number of cherry halves.

(c) (*B*) *classification.* If the canned fruit cocktail is reasonably free from defects, a score of 14 to 16 points may be given. Canned fruit cocktail that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the product is practically free from harmless extraneous material and from pits or portions thereof; that the product is reasonably free from loose capstems and from any other defects not specifically mentioned that materially affect the appearance or edibility of the product; that not more than $\frac{1}{4}$ square inch of peach peel or of pear peel for each pound of net contents may be present; and that, in addition, not more than the following defective units, as applicable for the ingredient, may be present:

(1) *Peach.* 10 percent by weight of the peach units may be blemished;

(2) *Pear.* 10 percent by weight of the pear units may be blemished;

(3) *Pineapple.* 12½ percent by count of the pineapple units may be blemished;

(4) *Grape.* 20 percent by count of the grapes may be blemished; 10 percent by count of the grapes in a container containing 10 grapes or more, and 1 grape in a container containing less than 10 grapes may be crushed or broken; and 10 percent by count of the grapes in a container containing 10 grapes or more, and 1 grape in a container containing less than 10 grapes may have the capstem attached.

(5) *Cherry.* 15 percent by count of the cherry halves may be blemished; 15 percent by count of the cherry halves in a container containing more than 6 cherry halves, and 1 cherry half in a container containing 6 cherry halves or less may be a broken cherry half; and 15 percent by count of the cherry halves in a container containing more than 6 cherry halves, and 1 cherry half in a container containing 6 cherry halves or less may be unevenly colored.

(d) (*SStd*) *classification.* Canned fruit cocktail that fails to meet any of the requirements of paragraph (c) of this section shall be given a score of 0 to 13 points; shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule); and may or may not be:

Below Standard in Quality
Good Food—Not High Grade

§ 52.1062 *Character*—(a) *General.* The factor of character refers to the texture and tenderness for the fruit ingredients as prepared and processed for canned fruit cocktail.

(b) (*A*) *classification.* Canned fruit cocktail that possesses a good character may be given a score of 17 to 20 points. "Good character" means that each fruit ingredient is reasonably uniform in texture and tenderness with no more than slight disintegration and that the individual fruit ingredients meet the following requirements:

(1) *Peach.* The texture is typical of diced peaches prepared and processed from at least reasonably well-matured fruit and the units may range in tenderness from firm to soft and may possess frayed edges.

(2) *Pear.* The texture is typical of diced pears prepared and processed from properly ripened pears or from pears of marked graininess and the units may be lacking in uniformity of tenderness ranging from markedly firm to soft with rounded edges.

(3) *Pineapple.* The units are practically uniform in ripeness with fruitlets of compact structure, are reasonably free from porosity, and are practically free from hard core material.

(4) *Grape.* The units are reasonably plump and reasonably firm.

(5) *Cherry.* The units are reasonably firm.

(c) (*B*) *classification.* If the canned fruit cocktail possesses a reasonably good character, a score of 14 to 16 points may be given. Canned fruit cocktail that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that each fruit ingredient may range from a firm to soft texture without serious disintegration and that the individual fruit ingredients meet the following requirements:

(1) *Peach.* The texture is typical of diced peaches prepared and processed from at least fairly well-matured fruit and the units may range in tenderness from firm to soft and may possess frayed edges.

(2) *Pear.* The texture is typical of diced pears prepared and processed from properly ripened pears or from pears of marked graininess and the units may be lacking in uniformity of tenderness ranging from markedly firm to soft with rounded edges.

(3) *Pineapple.* The units are practically uniform in ripeness with fruitlets of compact structure, are reasonably free from porosity, and are practically free from hard core material.

(4) *Grape.* The units are reasonably plump and reasonably firm.

(5) *Cherry.* The units are reasonably firm.

(c) (*B*) *classification.* If the canned fruit cocktail possesses a reasonably good character, a score of 14 to 16 points may be given. Canned fruit cocktail that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that each fruit ingredient may range from a firm to soft texture without serious disintegration and that the individual fruit ingredients meet the following requirements:

(1) *Peach.* The texture is typical of diced peaches prepared and processed from at least reasonably well-matured fruit and the units may range in tenderness from slightly firm to slightly soft but possess fairly well-defined edges.

(2) *Pear.* The texture is typical of diced pears prepared and processed from properly ripened pears or from pears of moderate graininess and the units may range in tenderness from slightly firm to slightly soft and may have slightly rounded edges.

(3) *Pineapple.* The units are practically uniform in ripeness with fruitlets of compact structure, are reasonably free from porosity, and are practically free from hard core material.

(4) *Grape.* The units are reasonably plump and reasonably firm.

(5) *Cherry.* The units are reasonably firm.

(c) (*B*) *classification.* If the canned fruit cocktail possesses a reasonably good character, a score of 14 to 16 points may be given. Canned fruit cocktail that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that each fruit ingredient may range from a firm to soft texture without serious disintegration and that the individual fruit ingredients meet the following requirements:

(1) *Peach.* The texture is typical of diced peaches prepared and processed from at least fairly well-matured fruit and the units may range in tenderness from firm to soft and may possess frayed edges.

(2) *Pear.* The texture is typical of diced pears prepared and processed from properly ripened pears or from pears of marked graininess and the units may be lacking in uniformity of tenderness ranging from markedly firm to soft with rounded edges.

(3) *Pineapple.* The units are practically uniform in ripeness with fruitlets of compact structure, are reasonably free from porosity, and are practically free from hard core material.

(4) *Grape.* The units may be variable in texture from firm to soft but not mushy or excessively flabby.

(5) *Cherry.* The units may be fairly firm to soft but not excessively flabby.

(d) (*SStd*) *classification.* If the canned fruit cocktail fails to meet the requirements of paragraph (c) of this section, a score of 0 to 13 points may be given. Canned fruit cocktail that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1063 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned fruit cocktail the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule must be within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1064 *Score sheet for canned fruit cocktail.*

| | | | |

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FRUIT JELLY [1]

IDENTITY, TYPES, KINDS, AND GRADES

§ 52.1081 *Identity.* "Fruit jelly" means fruit jelly as defined in the definitions and standards of identity for fruit jelly (21 CFR 29.5), issued pursuant to the Federal Food, Drug, and Cosmetic Act.

(a) Compliance with the standard of identity to establish the ingredients or proportion of ingredients will be indicated on Federal inspection certificates only when these conditions are ascertained during the process of manufacture.

(b) The soluble solids for fruit jelly are not less than 65 percent.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 52.1082 *Types of fruit jelly*—(a) *Type I.* Prepared from a single variety of fruit juice ingredient.

(b) *Type II.* Prepared from a mixture of two or more varieties of fruit juice ingredients.

§ 52.1083 *Kinds of fruit jelly.*

Apple.
Apricot.
Blackberry (other than dewberry).
Black raspberry.
Boysenberry.
Cherry.
Crabapple.
Cranberry.
Damson, damson plum.
Dewberry (other than boysenberry, loganberry, and youngberry).
Fig.
Gooseberry.
Grape.
Grapefruit.
Greengage, greengage plum.
Guava.
Loganberry.
Orange.
Peach.
Pineapple.
Plum (other than damson, greengage, and prune).
Pomegranate.
Quince.
Raspberry, red raspberry.
Red currant, currant (other than black currant).
Strawberry.
Youngberry.

§ 52.1084 *Grades of fruit jelly.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of fruit jelly that possesses a good consistency; possesses a bright typical color; is free from defects; possesses a distinct and normal flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of fruit jelly that possesses a reasonably good consistency; possesses a reaonably bright, typical color; is free from defects; possesses a reasonably good and normal flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of fruit jelly that fails to meet the requirements of U. S. Grade B or U. S. Choice.

FILL OF CONTAINER

§ 52.1085 *Recommended fill of container.* It is recommended that the container be filled with jelly as full as practicable without impairment of quality and that the product occupies not less than 90 percent of the capacity of the container.

FACTORS OF QUALITY

§ 52.1086 *Ascertaining the grade.* The grade of fruit jelly may be ascertained by considering, in addition to the requirements of the respective grade, the following factors: Consistency, color, and flavor. The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Consistency | 40 |
| Color | 20 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1087 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "34 to 40 points" means 34, 35, 36, 37, 38, 39, or 40 points).

§ 52.1088 *Consistency*—(a) *General.* The factor of consistency refers to the gel strength of the product.

(b) (*A*) *classification.* Fruit jelly that possesses a good consistency may be given a score of 34 to 40 points. "Good consistency" means that the fruit jelly possesses a tender to slightly firm texture and retains a compact shape without excessive syneresis ("weeping").

(c) (*B*) *classification.* If the fruit jelly possesses a reasonably good consistency, a score of 28 to 33 points may be given. Fruit jelly that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good consistency" means that the fruit jelly may lack firmness but it is not syrupy; and that it may be more than slightly firm but is not tough or rubbery.

(d) (*SStd*) *classification.* Fruit jelly that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1089 *Color*—(a) (*A*) *classification.* Fruit jelly that possesses a bright typical color may be given a score of 17 to 20 points. "Bright typical color" means that the color is characteristic of the fruit juice ingredient or ingredients and that the fruit jelly possesses a sparkling luster or may be not more than slightly cloudy, and is free from any dullness or color.

(b) (*B*) *classification.* If the fruit jelly possesses a reasonably bright typical color, a score of 14 to 16 points may be given. Fruit jelly that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably bright typical color" means that the color is characteristic of the fruit juice ingredient or ingredients and that the fruit jelly may be slightly cloudy and may possess a slight dullness of color.

(c) (*SStd*) *classification.* Fruit jelly that is definitely off color for any reason and fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1090 *Flavor*—(a) (*A*) *classification.* Fruit jelly that possesses a distinct and normal flavor may be given a score of 34 to 40 points. "Distinct and normal flavor" means that the product possesses a good distinct flavor characteristic of the fruit ingredient or fruit ingredients after preserving and is free from any caramelized flavor or any objectionable flavor of any kind.

(b) (*B*) *classification.* If the fruit jelly possesses a reasonably good and normal flavor, a score of 28 to 33 points may be given. Fruit jelly that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good and normal flavor" means that

the product posesses a reasonably good flavor characteristic of the fruit or fruit ingredients after preserving and may possess a slight caramelized flavor but is free from any bitter flavor or other objectionable flavor or off flavor of any kind.

(c) *(SStd) classification.* Fruit jelly that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1091 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of fruit jelly, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1092 *Score sheet for fruit jelly.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FRUIT PRESERVES (OR JAMS) [1]

IDENTITY, TYPES, KINDS, AND GRADES

§ 52.1111 *Identity.* "Fruit preserves (or jams)" means preserves or jams as defined in the definitions and standards of identity for preserves, jams (21 CFR 29.3) issued pursuant to the Federal Food, Drug, and Cosmetic Act. The soluble solids for fruit preserves (or jams) in Group I are not less than 68 percent. The soluble solids for fruit preserves (or jams) in Group II are not less than 65 percent.

§ 52.1112 *Types of fruit preserves (or jams)*—(a) *Type I.* Fruit preserves (or jams) that are prepared from a single fruit (except apple) listed in Group I or Group II are "Type I."

(b) *Type II.* Fruit preserves (or jams) that are prepared from more than a single fruit listed in Group I and Group II are "Type II." [2]

§ 52.1113 *Kinds of fruit preserves (or jams) according to Group I or Group II designations.*

GROUP I

Any one singly or in combination with not more than four of the following: [1]

Blackberry (other than dewberry).
Black raspberry.
Blueberry.
Boysenberry.
Cherry.
Crabapple.
Dewberry (other than boysenberry, loganberry and youngberry).
Elderberry.
Grape.
Grapefruit.
Huckleberry.
Loganberry.
Orange.
Pineapple.
Raspberry, red raspberry.
Rhubarb.
Strawberry.
Tangerine.
Tomato.
Yellow tomato.
Youngberry.

GROUP II

Any one singly or in combination with not more than four of the following fruits and fruits in Group I: [2]

Apple (type II only).
Apricot.
Cranberry.
Damson, damson plum.
Fig.
Gooseberry.
Greengage, greengage plum.
Guava.
Nectarine.
Peach (clingstone and freestone).
Pear.
Plum (other than greengage plum and damson plum).
Quince.
Red currant, currant (other than black currant).

§ 52.1114 *Grades of fruit preserves (or jams).* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of fruit preserves (or jams) that possess a good consistency; that possess a good color; that are practically free from defects; that possess a good flavor; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of fruit preserves (or jams) that possess a reasonably good consistency; that possess a reasonably good color; that are reasonably free from defects; that possess a fairly good flavor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of fruit preserves (or jams) that fail to meet the requirements of U. S. Grade B or U. S. Choice.

FILL OF CONTAINER

§ 52.1115 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container be filled with fruit preserves (or jams) as full as practicable without impairment of quality and that the product occupy not less than 90 percent of the volume of the container.

FACTORS OF QUALITY

§ 52.1116 *Ascertaining the grade.* (a) The grade of fruit preserves (or jams) is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of consistency, color, absence of defects, and flavor.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Consistency | 20 |
| Color | 20 |
| Absence of defects | 20 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1117 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1118 *Consistency*—(a) *General.* The factor of consistency refers to the extent of the dispersion and size of the fruit or fruit particles throughout, and the gel-like properties of the product.

(b) *(A) classification.* Fruit preserves (or jams) that possess a good consistency may be given a score of 17 to 20 points. "Good consistency" means that the fruit or fruit particles are dispersed uniformly throughout the product; that the product is a tender gel or may possess no more than a very slight tendency to flow, except that a slightly less viscous consistency may be present when the fruit is chiefly in the form of whole or almost whole units; and that in the following kinds the product does not have a macerated or pureed appearance but in appearance and eating quality consists of whole units or pieces of fruit particles as indicated for the respective kinds, either singly or in combination with any other kind:

(1) Apricot: Halves or pieces or combinations thereof.

(2) Cherry: Whole or almost whole pitted cherries or combinations thereof.

(3) Gooseberry: Whole or almost whole berries or combinations thereof.

(4) Peach (clingstone and freestone): Slices or pieces or combinations thereof.

(5) Pineapple: Crushed pieces or small pieces or combinations thereof.

(6) Strawberry: Whole or almost whole berries or combinations thereof.

(c) *(B) classification.* If the fruit preserves (or jams) possess a reasonably good consistency, a score of 14 to 16 points may be given. Fruit preserves (or jams) that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good consistency" means that the fruit or fruit particles are dispersed reasonably uniformly throughout the product; and that the product may be firm but not rubbery or may be noticeably viscous but not excessively thin.

(d) *(SStd) classification.* Fruit preserves (or jams) that fail to meet the requirements for paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1119 *Color*—(a) *(A) classification.* Fruit preserves (or jams) that possess a good color may be given a score of 17 to 20 points. "Good color" means that the color is bright, practically uniform throughout, and characteristic of the variety or varieties of the fruit ingredients; and that the product is free from dullness of color due to any cause (including, but not being limited to, oxidation or improper processing or improper cooling).

(b) *(B) classification.* If the fruit preserves (or jams) possess a reasonably good color, a score of 14 to 16 points may be given. Fruit preserves (or jams) that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the color is reasonably bright, reasonably uniform throughout, and characteristic of the variety or varieties of the fruit ingredients; however, the color may be slightly dull but may not be off color due to oxidation or improper processing or improper cooling or other causes.

(c) *(SStd) classification.* Fruit preserves (or jams) that for any reason fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1120 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom, in the applicable kinds, from substances ordinarily removed in the preparation for the manufacture of fruit preserves (or jams) and includes, but is not limited to, caps, leaves, stems, seeds, pits, peel, or any portions thereof; from blemished units, underdeveloped units, or otherwise damaged units; and from any defects not specifically mentioned that affect the appearance or edibility of the product.

(1) A "cluster of cap stems" means three or more joined cap stems.

(2) A "cap" means a loose or attached full cap or a portion of a cap to which at least one sepal-like bract or portion thereof is attached. A short stem that is attached to a cap is considered a part of that cap.

(3) A "short stem" means a stem that is ⅛ inch or less in length and which may include the center portion of a cap to which no sepal-like bract or portion thereof is attached. A short stem that is attached to a cap is considered a part of that cap.

(4) A "small stem" means a stem that is longer than ⅛ inch but not more than ¼ inch in length. A small stem that is attached to a cap is considered as a defect separate from that cap.

(5) A "medium stem" means a stem that is longer than ¼ inch but not more than ½ inch in length. A medium stem that is attached to a cap is considered as a defect separate from that cap.

(6) A "long stem" means a stem that is longer than ½ inch in length. A long stem that is attached to a cap is considered as a defect separate from that cap.

(7) A "woody base-stem" means any stem in grape preserves (or jams) with an enlarged woody base approximating 1/16 inch or more in diameter.

(8) "Peel" means, with respect to these fruits, such as apples and peaches, that are commonly prepared for the manufacture of fruit preserves (or jams) by the removal of the skin or peel, any skin or peel whether or not it is attached.

(9) "Seeds" means, with respect to these fruits, such as apples, grapes, and pears, that are prepared for the manufacture of fruit preserves (or jams) by the removal of the seeds, the seeds of such fruit. "Seeds" in fruit preserves (or jams) prepared from citrus fruits means any seed or any portion thereof, whether or not fully developed, that measures more than 3/16 inch in any dimension. Seeds are not considered as defects in fruit preserves (or jams) prepared from such fruits as figs and tomatoes.

(10) "Pit" means, with respect to those fruits, such as apricots, cherries, plums, and peaches, that are prepared for the manufacture of fruit preserves (or jams) by the removal of the pits, a whole, intact pit. Portions of pits include:

(i) A "piece of pit" which means any portion of a pit that is more than ½ inch in any dimension;

(ii) A "small piece of pit" which means any portion of a pit that is not less than ¼ inch nor more than ½ inch in any dimension;

(iii) And a "pit fragment" which means any portion of a pit that is less than ¼ inch in any dimension.

(11) "Blemished, underdeveloped, or otherwise damaged" means units of fruit in which the appearance or edible quality is damaged or blemished because of discolored skin, bruised spots, dark particles, insect or similar injury, hard areas, or units that are hard and shrivelled or damaged by mechanical, pathological, or other injury.

(b) *(A) classification.* Fruit preserves (or jams) that are practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means with respect to:

(1) Type II and any kind or kinds with a macerated or pureed appearance (whether of Type I or II), that the defects do not materially affect the appearance or edibility of the product; and

(2) Type I, that the defects and defective units as applicable do not exceed the allowances for U. S. Grade A as specified in Tables I, II, III, or IV of this section and that any defects whether or not specifically mentioned in such tables do not materially affect the appearance or edibility of the product.

(c) *(B) classification.* If the fruit preserves (or jams) are reasonably free from defects, a score of 14 to 16 points may be given. Fruit preserves (or jams) that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means with respect to:

(1) Type II and any kind or kinds with a macerated or pureed appearance (whether of Type I or II), that the defects do not seriously affect the appearance or edibility of the product; and

(2) Type I, that the defects and defective units as applicable do not exceed the allowances for U. S. Grade B as specified in Tables I, II, III, or IV of this section and that any defects whether or not specifically mentioned in such tables do not seriously affect the appearance or edibility of the product.

(d) *(SStd) classification.* Fruit preserves (or jams) that fail to meet the requirements for paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product. (This is a limiting rule.)

(e) *Allowances.* Ascertaining compliance, with, and explanation of, allowances in Tables I, II, III, and IV:

(1) The term "ounces" refers to "ounces of net weight" of any individual container, of the average net weight of all the containers, or of the aggregate net weight of all the containers comprising the sample as may be applicable. The allowances as stated may be interpolated into other equivalents for containers of other sizes or on an aggregate basis.

(2) When the unit of the allowance, such as "per 200 ounces", is greater than in individual containers, the net weight of all containers in the sample may be aggregated to arrive at the approximate quantity by which to determine compliance with the stated allowance. For example, in a lot consisting of approximate 8-oz. net weight containers and with defects permitted in "1 per 200 ounces", such defect would be permitted in a total of not less than twenty-five 8-oz. containers (approximately 200 ounces in the aggregate).

(3) An occasional defect may be permitted if all the containers in a sample in the aggregate constitute a net weight less than the unit of allowance, provided such defect, singly or in combination with other defects, no more than slightly affects the appearance or edibility of the product.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[2] In accordance with the limits specified in the definitions and standards of identity for preserves, jams. (21 CFR 29.3)

TABLE I—ALLOWANCES FOR DEFECTS

| Kind of preserves (or jams) type I only | Grade and score range | Stems | Leaves | Caps or portions | Other extraneous material | Loose Sepal-like bracts | Seeds, pits, or portions thereof | Blemished, underdeveloped, or otherwise damaged |
|---|---|---|---|---|---|---|---|---|
| | | Maximum allowances | | | | | | |
| Blackberry, Boysenberry, Dewberry, Loganberry, Youngberry | U. S. Grade A (17–20 points). | Total of 1 only per 96 ounces | | | | 1 per 8 ounces | 10 per 8 ounces in "seedless." | 2 per 8 ounces. |
| | U. S. Grade B (14–16 points). | Total of 1 only per 32 ounces | | | | 3 per 8 ounces | 20 per 8 ounces in "seedless." | 4 per 8 ounces. |
| Cherry | U. S. Grade A (17–20 points). | do | | | | | 1 per 32 ounces | 5 per 8 ounces. |
| | U. S. Grade B (14–16 points). | Total of 1 only per 16 ounces | | | | | do | 8 per 8 ounces. |
| Blueberry | U. S. Grade A (17–20 points). | Total of 1 large stem or 1 leaf per 8 ounces; and 1 cluster of cap stems per 8 ounces. | | | | | | 3 per 8 ounces. |
| Elderberry, Huckleberry | U. S. Grade B (14–16 points). | Total of 3 large stems or 3 leaves per 16 ounces; and 3 clusters of cap stems per 16 ounces. | | | | | | 5 per 8 ounces. |

TABLE II—ALLOWANCES FOR DEFECTS

| Kind of preserves (or jams) type I only | Grade and score range | Stems | | | | Leaves | Other extraneous material | Seeds, pits or portions | | | Peel | Blemished, underdeveloped or otherwise damaged |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Short (3/16" or less) | Small (over 3/16" to 1/4" inclusive) | Medium (over 1/4" to 1/2" inclusive) | Long (longer than 1/2") | | | Pit or pieces of pit | Small pieces of pit | Pit fragments | | |
| | | Maximum allowances | | | | | | | | | | |
| Apricot | U. S. Grade A (17–20 points). | 1 only per 16 ounces | | | None | 1 only per 32 ounces. | 1 only per 200 ounces. | 1 only per 200 ounces. | 1 only per 128 ounces. | 1 only per 32 ounces. | No limit | 1 unit per 8 ounces. |
| | U. S. Grade B (14–16 points). | 1 only per 8 ounces | | | None | 1 only per 16 ounces. | 1 only per 128 ounces. | do | 1 only per 64 ounces. | 1 only per 16 ounces. | do | 4 units per 8 ounces. |
| Peach, Nectarine | U. S. Grade A (17–20 points). | | | | | 1 only per 32 ounces. | 1 only per 32 ounces. | 1 only per 96 ounces. | do | do | 1 square inch per 16 ounces, or 1 square inch per 8 ounces. | 2 units per 8 ounces. |
| | U. S. Grade B (14–16 points). | | | | | 1 only per 16 ounces. | 3 per 32 ounces. | 1 only per 48 ounces. | 1 only per 32 ounces. | 1 only per 8 ounces. | 1 square inch per 8 ounces. | 8 units per 8 ounces. |
| Damson plum, Green gage plum, Plum (others) | U. S. Grade A (17–20 points). | Total of 1 per 8 ounces | | | | 1 only per 128 ounces. | 1 only per 32 ounces. | 1 only per 32 ounces. | | | No limit | 1 unit per 8 ounces. |
| | U. S. Grade B (14–16 points). | Total of 3 per 16 ounces | | | | 1 only per 32 ounces. | 1 only per 16 ounces. | | | | do | 2 units per 8 ounces. |

TABLE III—ALLOWANCES FOR DEFECTS

| Kind of preserves (or jams) type I only | Grade and score range | Stems | Leaves | Other extraneous material | Loose sepal-like bracts | Seeds, pits, or portions thereof | Peel | Blemished, underdeveloped, or otherwise damaged |
|---|---|---|---|---|---|---|---|---|
| | | Maximum allowances | | | | | | |
| Cranberry, Currant (other than black), Currant, red, Fig, Gooseberry, Rhubarb, Tomato, Tomato, yellow | U. S. Grade A (17–20 points). | Total of 1 per 32 ounces. | 1 only per 200 ounces. | 3 per 16 ounces | | | 1 square inch per 16 ounces if prepared by peeling. | 2 units per 8 ounces. |
| | U. S. Grade B (14–16 points). | do | 1 only per 128 ounces. | 5 per 16 ounces | | | 1 square inch per 8 ounces if prepared by peeling. | 4 units per 8 ounces. |
| Grapefruit, Orange, Tangerine | U. S. Grade A (17–20 points). | do | 1 only per 200 ounces. | | 1 per 16 ounces | | | 3 units per 8 ounces. |
| | U. S. Grade B (14–16 points). | do | 1 only per 128 ounces. | | 1 per 8 ounces | | | 5 units per 8 ounces. |
| Pineapple | U. S. Grade A (17–20 points). | | | | | | | 2 units per 8 ounces. |
| | U. S. Grade B (14–16 points). | | | | | | | 4 units per 8 ounces. |

TABLE IV—ALLOWANCES FOR DEFECTS

| Kind of preserves (or jams) type I only | Grade and score range | Stems | | | | Leaves | Caps or portions | Other extraneous material | Loose sepal-like bracts | Seeds | Blemished, underdeveloped or otherwise damaged |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Short (3/16" or less) | Small (over 3/16" to 1/4" inclusive) | Medium (over 1/4" to 1/2" inclusive) | Long (longer than 1/2") | | | | | | |
| | | Maximum allowances | | | | | | | | | |
| Grape | U. S. Grade A (17–20 points). | 3 short or small thin stems, including only 1 woody base stem per 16 ounces. | | | | 1 only per 32 ounces. | | 1 only per 200 ounces. | 3 per 16 ounces. | 3 seeds per 8 ounces. | 2 units per 8 ounces. |
| | U. S. Grade B (14–16 points). | 3 short or small thin stems, including only 1 woody base stem per 8 ounces. | | | | do | | 1 only per 128 ounces. | 5 per 16 ounces. | 6 seeds per 8 ounces. | 4 units per 8 ounces. |
| Strawberry | U. S. Grade A (17–20 points). | 4 per 8 ounces. | 2 small or medium or long stems, including only 1 long stem— | | | 1/2 square inch if measurable by area or—1 piece harmless extraneous material such as weeds or grass, per 32 ounces | | | | | Do. |
| | U. S. Grade B (14–16 points). | 8 per 8 ounces. | 4 small or medium or long stems, including only 1 long stem— | | | 1/2 square inch if measurable by area or—1 piece harmless extraneous material such as weeds or grass, per 32 ounces | | | | | 8 units per 8 ounces. |
| Raspberry, Raspberry, black, Raspberry, red | U. S. Grade A (17–20 points). | 4 per 8 ounces. | 2 small or medium or long stems, including only 1 long stem— | | | 1/2 square inch if measurable by area or—1 piece harmless extraneous material such as weeds or grass, per 32 ounces | | | | | 4 units per 8 ounces. |
| | U. S. Grade B (14–16 points). | 8 per 8 ounces. | 4 small or medium or long stems, including only 1 long stem— | | | 1/2 square inch if measurable by area or—1 piece harmless extraneous material such as weeds or grass, per 32 ounces | | | | | 8 units per 8 ounces. |

§ 52.1121 *Flavor—(a) (A) classification.* Fruit preserves (or jams) that possess a good flavor may be given a score of 34 to 40 points. "Good flavor" means:

(1) that the product possesses a good and distinct flavor; and

(2) that the flavor is characteristic of the applicable kind of fruit ingredient or applicable kinds of fruit ingredients.

(b) *(B) classification.* If the fruit preserves (or jams) possess a fairly good flavor a score of 28 to 33 points may be given. Fruit preserves (or jams) that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means:

(1) that the product possesses a flavor reasonably characteristic of the applicable kind of fruit ingredient or applicable kinds of fruit ingredients; and

(2) may possess a slightly caramelized flavor but is free from any bitter flavor or other objectionable flavor or off flavor of any kind.

(c) *(SStd) classification.* Fruit preserves (or jams) that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1122 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of fruit preserves (or jams), the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample fall more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1123 *Score sheet for fruit preserves (or jams).*

| Factors | Score points | |
|---|---|---|
| Consistency | 20 | (A) 17–20; (B) 14–16; (SStd.) 0–13 |
| Color | 20 | (A) 17–20; (B) 14–16; (SStd.) 0–13 |
| Absence of defects | 20 | (A) 17–20; (B) 14–16; (SStd.) 0–13 |
| Flavor | 40 | (A) 34–40; (B) 28–33; (SStd.) 0–27 |
| Total score | 100 | |
| Grade | | |

[1] Indicates limiting rule.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED GRAPEFRUIT [1]

PRODUCT DESCRIPTION, AND GRADES

§ 52.1141 *Product description.* Canned grapefruit, commonly known as canned grapefruit sections, is prepared from sound, mature grapefruit (Citrus paradisi) which have been properly washed; the segments thereof have been separated; and the core, seeds, and major portions of membrane have been removed. The product is packed with or without the addition of water, grapefruit juice, or sweetening ingredients and is sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

§ 52.1142 *Grades of canned grapefruit.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned grapefruit that possesses a drained weight or average drained weight, as the case may be, of not less than 58 percent of the capacity of the container in containers smaller than the equivalent of No. 2 cans and of not less than 60 percent of the capacity of the container in containers the equivalent of No. 2 cans and larger; that consists of not less than 75 percent by weight of the drained grapefruit which is in whole segments or almost whole segments; that possesses a good color; that is practically free from defects; that possesses a good character; that possesses a good flavor and odor; and that scores not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of canned grapefruit that possesses a drained weight or average drained weight, as the case may be, of not less than 55 percent of the capacity of the container regardless of the size of the container; that consists of not less than 50 percent by weight of the drained grapefruit which is in whole segments or almost whole segments; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a fairly good flavor and odor; and that scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(c) "U. S. Broken" is the quality of canned grapefruit that possesses a drained weight or average drained weight, as the case may be, of not less than 55 percent of the capacity of the container; that consists of less than 50 percent by weight of the drained grapefruit which is in whole or almost whole segments; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a fairly good flavor and odor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of canned grapefruit that fails to meet the requirements of U. S. Grade B or U. S. Choice and U. S. Broken.

LIQUID MEDIA AND FILL OF CONTAINER

§ 52.1143 *Recommended designations of liquid media and Brix measurements.* "Cut-out" requirements for liquid media in canned grapefruit are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. It is recommended that canned grapefruit have the following indicated "cut-out" Brix measurement for the respective designation, which designations include, but are not limited to, the following:

| Designation of liquid media: | *Brix measurement* |
|---|---|
| Heavy sirup | 18° or more. |
| Light sirup | 16° or more, but less than 18°. |
| Slightly sweet | 12° or more, but less than 16°. |

§ 52.1144 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of canned grapefruit be filled with grapefruit as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the volume of the container.

FACTORS OF QUALITY

§ 52.1145 *Ascertaining the grade.* (a) The grade of canned grapefruit is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of drained weight, wholeness, color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | *Points* |
|---|---|
| Drained weight | 20 |
| Wholeness | 20 |
| Color | 20 |
| Absence of defects | 20 |
| Character | 20 |
| Total score | 100 |

§ 52.1146 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor

which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.1147 *Drained weight*—(a) *General.* The drained weight of canned grapefruit is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch, ±3 percent, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and the grapefruit less the weight of the dry sieve. The grapefruit thus drained is referred to in this section as "drained grapefruit" or "drained weight." A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can. "Capacity of the container" means the weight of distilled water at 68° Fahrenheit which the sealed container will hold.

(b) (*A*) *classification.* Canned grapefruit in containers smaller than the equivalent of No. 2 cans that possesses a drained weight of not less than 58 percent of the capacity of the container may be given a score of 18 to 20 points for the respective containers as outlined in Table I; canned grapefruit in containers the equivalent of No. 2 cans and larger that possesses a drained weight of not less than 60 percent of the capacity of the container may be given a score of 18 to 20 points for the respective containers as outlined in Table II. Whenever more than 1 container of the product is being graded, the score for drained weight of each container is determined by averaging the drained weights of the containers. If the average drained weight indicates a score of 18 to 20 points (in accordance with Table I or II) such score will be assigned to each container: *Provided,* That the drained weight of no individual container indicates a score of less than 16 points. However, if any individual container scores less than 16 points, each container will be assigned the score for its own drained weight.

(c) (*B*) *classification.* If the drained weight of the canned grapefruit in containers smaller than the equivalent of No. 2 cans is less than 58 percent of the capacity of the container, or if the drained weight of the canned grapefruit in containers the equivalent of No. 2 cans and larger is less than 60 percent of the capacity of the container but in either case the drained weight is not less than 55 percent of the capacity of the container, a score of 16 or 17 points may be given for the respective containers as outlined in Table I or II. Whenever more than 1 container of the product is being graded, the score for drained weight of each container is determined by averaging the drained weights of the containers. If the average drained weight indicates a score of 16 or 17 points (in accordance with Table I or II) such score will be assigned to each container: *Provided,* That the drained weight of no individual container indicates a score of less than 14 points. However, if any individual container scores less than 14 points, each container will be assigned the score for its own drained weight. Canned grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

TABLE I—SCORE FOR DRAINED WEIGHTS OF CANNED GRAPEFRUIT

| Grade classification | Score points | Percentage that drained weight is of capacity of container | Drained weight on basis of container designation and size | |
|---|---|---|---|---|
| | | | SZ Tall (2 13/16 x 3 11/16 inches) | No. 303 (3 3/16 x 4 1/16 inches) |
| | | | *Ounces* | *Ounces* |
| U. S. Grade A or U. S. Fancy | 20 | 61 percent or more | 5.28 or more | 10.28 or more |
| | 19 | 59½ to 61 percent | 5.15 to 5.27, inclusive | 10.03 to 10.27, inclusive. |
| | 18 | 58 to 59½ percent | 5.02 to 5.14, inclusive | 9.77 to 10.02, inclusive. |
| U. S. Grade B or U. S. Choice or U. S. Broken | 17 | 56½ to 58 percent | 4.89 to 5.01, inclusive | 9.52 to 9.7[illegible], inclusive. |
| | 16 | 55 to 56½ percent | 4.76 to 4.88, inclusive | 9.27 to 9.51, inclusive. |
| Substandard | 15 | 52½ to 55 percent | 4.54 to 4.75, inclusive | 8.85 to 9.26, inclusive. |
| | 14 | 50 to 52½ percent | 4.33 to 4.53, inclusive | 8.43 to 8.84, inclusive. |
| | 13 or less | Less than 50 percent | Less than foregoing drained weights | |

TABLE II—SCORE FOR DRAINED WEIGHTS OF CANNED GRAPEFRUIT

| Grade classification | Score points | Percentage that drained weight is of capacity of container | Drained weight on basis of container designation and size | | |
|---|---|---|---|---|---|
| | | | No. 2 (3 7/16 x 4 2/16 inches) | No. 3 Cyl. (4 4/16 x 7 inches) | No. 5 (5[illegible] x 5 10/16 inches) |
| | | | *Ounces* | *Ounces* | *Ounces* |
| U. S. Grade A or U. S. Fancy | 20 | 65 percent or more | 13.33 or more | 33.56 or more | 36.42 or more. |
| | 19 | 62½ to 65 percent | 12.84 to 13.32, inclusive. | 32.27 to 33.55, inclusive. | 35.01 to 36.41, inclusive. |
| | 18 | 60 to 62½ percent | 12.33 to 12.83, inclusive. | 30.98 to 32.26, inclusive. | 33.59 to 35.45, inclusive. |
| U. S. Grade B or U. S. Choice or U. S. Broken | 17 | 57½ to 60 percent | 11.79 to 12.32, inclusive. | 29.69 to 30.97, inclusive. | 33.59 to 35.45, inclusive. |
| | 16 | 55 to 57½ percent | 11.28 to 11.78, inclusive. | 28.40 to 29.68, inclusive. | 32.71 to 33.96, inclusive. |
| Substandard | 15 | 52½ to 55 percent | 10.77 to 11.27, inclusive. | 27.10 to 28.39, inclusive. | 31.[illegible] to 32.70, inclusive. |
| | 14 | 50 to 52½ percent | 10.25 to 10.76, inclusive. | 25.81 to 27.09, inclusive. | 29.55 to 31.02, inclusive. |
| | 13 or less | Less than 50 percent. | Less than foregoing drained weights | | |

(d) (*SStd*) *classification.* Canned grapefruit that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1148 *Wholeness*—(a) *General* "Whole" or "whole segment" means any grapefruit segment that retains its apparent original conformation and is not excessively trimmed.

(1) "Almost whole" or "almost whole segment" means any portion of a grapefruit segment that is not less than 75 percent of the apparent original segment size.

(2) "Broken" or "broken segment" means (i) any portion of a grapefruit segment that is less than 75 percent of the apparent original segment size, (ii) a "whole segment" or "almost whole segment" that is excessively trimmed, and (iii) portions of segments that are joined together only by a "thread" or membrane.

(b) (*A*) *classification.* Canned grapefruit that consists of not less than 75 percent by weight of the drained grapefruit in whole segments or almost whole segments may be given a score of 18 to 20 points.

(c) (*B*) *classification.* If the canned grapefruit consists of not less than 50 percent by weight of the drained grapefruit in whole segments or almost whole segments, a score of 16 or 17 points may be given. Canned grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

(d) (*Broken*) *classification.* If less than 50 percent by weight of the drained grapefruit is in whole segments or almost whole segments, a score of 0 to 15 points may be given. Canned grapefruit that falls into this classification shall not be graded above U. S. Broken, regardless of the total score for the product (this is a limiting rule).

§ 52.1149 *Color*—(a) (*A*) *classification.* Canned grapefruit that possesses a good color may be given a score of 18 to 20 points. "Good color" means a practically uniform, bright, typical color free from any noticeable tinge of amber.

(b) (*B*) *classification.* If the canned grapefruit possesses a reasonably good color, a score of 16 or 17 points may be given. Canned grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means a fairly bright color which may be variable in color but is not off color for any reason.

(c) (*SStd*) *classification.* Canned grapefruit that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1150 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, from seeds, from portions of albedo, from portions of tough membrane, and from damaged units.

(1) "Harmless extraneous material" means leaves, portions of leaves, small pieces of peel, and other similar material that is harmless.

(2) "Seed" means any seed or any portion thereof, whether or not fully developed, that measures more than 3/16 inch in any dimension. A "large seed" is one that may be plump and measures more than 3/8 inch in any dimension.

(3) "Damaged unit" means any grapefruit segment or portion thereof that is damaged by pathological injury, by lye peeling, by discoloration, or by similar injury or that is damaged to such an extent that the appearance or eating quality of the unit is seriously affected.

(b) (*A*) *classification.* Canned grapefruit that is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that no harmless extraneous material is present; that not more than 5 percent by weight of the drained grapefruit may be damaged units; and that for each 20 ounces of net weight there may be present:

(1) Not more than 4 seeds including not more than one large seed; and

(2) Not more than an aggregate area of 2 square inches on the units covered by tough membrane or albedo.

(c) (*B*) *classification.* If the canned grapefruit is reasonably free from defects, a score of 16 or 17 points may be given. Canned grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that not more than 15 percent by weight of the drained grapefruit may be damaged units; and that for each 20 ounces of net weight there may be present:

(1) Not more than 1 small piece of harmless extraneous material;

(2) Not more than 12 seeds including not more than 3 large seeds; and

(3) Not more than an aggregate area of 3 square inches on the units covered by tough membrane or albedo.

(d) (*SStd*) *classification.* Canned grapefruit that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1151 *Character*—(a) *General.* The factor of character refers to the structure and condition of the cells of the grapefruit and reflects the maturity of the grapefruit.

(b) (*A*) *classification.* Canned grapefruit that possesses a good character may be given a score of 18 to 20 points. "Good character" means that the grapefruit is moderately firm and fleshy; that the segments or portions thereof possess a juicy, cellular structure free from dry cells, or "ricey" cells, or fibrous cells that materially affect the appearance or eating quality of the product; and that the product is reasonably free from loose floating cells.

(c) (*B*) *classification.* If the canned grapefruit possesses a reasonably good character, a score of 16 or 17 points may be given. Canned grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the grapefruit may be affected, but not seriously affected, by dry cells, "ricey" cells, or fibrous cells that materially affect the appearance or eating quality of the product.

(d) (*SStd*) *classification.* Canned grapefruit that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 15 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS

§ 52.1152 *Explanation of terms.* (a) "Good flavor and odor" means that the product has a distinct and normal flavor and odor typical of canned grapefruit and is free from objectionable odors and objectionable flavors of any kind.

(b) "Fairly good flavor and odor" means that the product may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(c) "Brix" means the degrees Brix of the liquid media surrounding the canned grapefruit when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If the liquid media is tested at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in the "Official Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of the liquid media may be determined by any other method which gives equivalent results.

LOT CERTIFICATION TOLERANCES

§ 52.1153 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned grapefruit, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1154 *Score sheet for canned grapefruit.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN GRAPEFRUIT [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1171 *Product description.* Frozen grapefruit is prepared from the matured fruit of the grapefruit tree (Citrus paradisi), after the fruit has been washed and peeled, and has been separated into segments by removing the core, seeds, and membrane; may be packed with or without packing media; and is frozen and stored at temperatures necessary for the preservation of the product.

§ 52.1172 *Grades of frozen grapefruit.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen grapefruit of which not less than 75 percent by weight of the grapefruit consists of segments that are whole or almost whole; that possesses a practically uniform, bright, typical color; that is practically free from defects; that possesses a good character; that possesses a normal flavor and odor; and score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen grapefruit of which not less than 50 percent by weight of the grapefruit consists of segments that are whole or almost whole; that possesses a reasonably uniform and reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a normal flavor and odor; and scores not less than 80 points when scored in

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

accordance with the scoring system outlined in this subpart.

(c) "U. S. Broken" is the quality of frozen grapefruit of which less than 50 percent by weight of the grapefruit consists of segments that are whole or almost whole; that possesses a reasonably uniform and reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a normal flavor and odor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is the quality of frozen grapefruit that fails to meet the requirements of U. S. Grade B or U. S. Choice and U. S. Broken.

FACTORS OF QUALITY

§ 52.1173 *Ascertaining the grade.* (a) The grade of frozen grapefruit is determined immediately after thawing to the extent that the units may be separated easily. Such grade may be ascertained by considering, in addition to the requirements of the respective grade, the following factors: Wholeness, color, absence of defects, and character.

(b) The relative importance of each factor has been expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Wholeness | 20 |
| Color | 20 |
| Absence of defects | 30 |
| Character | 30 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the grapefruit is free from objectionable flavors, off flavors, and objectionable odors of any kind.

§ 52.1174 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.1175 *Wholeness*—(a) *Definitions.* (1) "Whole" or "whole segment" means any segment that retains its apparent original conformation, is not excessively trimmed, and weighs not less than $^3/_8$ ounce. A whole segment that is excessively trimmed or that weighs less than $^3/_8$ ounce is considered a broken segment.

(2) "Almost whole" or "almost whole segment" means any portion of a segment that is not less than 75 percent of the apparent original segment size, is not excessively trimmed, and weighs not less than $^3/_8$ ounce. An almost whole segment that is excessively trimmed or that weighs less than $^3/_8$ ounce is considered a broken segment.

(3) "Broken" or "broken segment" means a portion of a segment that is less than 75 percent of the apparent original segment size, a whole or almost whole segment that is excessively trimmed, a whole or almost whole segment that weighs less than $^3/_8$ ounce, and portions of segments that are joined together only by a "thread" or membrane.

(b) *(A) classification.* Frozen grapefruit that consists of not less than 75 percent by weight of units that are whole or almost whole segments may be given a score of 18 to 20 points.

(c) *(B) classification.* If the frozen grapefruit consists of at least 50 percent but less than 75 percent by weight of units that are whole or almost whole segments, a score of 16 or 17 points may be given. Frozen grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

(d) *(Broken) classification.* If the frozen grapefruit consists of less than 50 percent by weight of the units that are whole or almost whole segments, a score of 0 to 15 points may be given. Frozen grapefruit that falls into this classification shall not be graded above U. S. Broken, regardless of the total score for the product (this is a limiting rule).

(e) *General.* The evaluation of the score points for the factor of wholeness may be determined from Table No. I of this paragraph which indicates the score range in the respective grades and denotes the minimum requirement for whole or almost whole segments and the maximum allowances for broken segments for the score indicated.

TABLE No. I

| Grade | Score points | Whole or almost whole segments | Broken segments |
|---|---|---|---|
| | | *Minimum (by weight)* | *Maximum (by weight)* |
| U. S. Grade A or U. S. Fancy. | 20 | 100% | 0% |
| | 19 | 85% | 15% |
| | 18 | 75% | 25% |
| U. S. Grade B or U. S. Choice. | 17 | 60% | 40% |
| | 16 | 50% | 50% |
| | 15 | 45% | 55% |
| | 14 | 40% | 60% |
| | 13 | 35% | 65% |
| | 12 | 30% | 70% |
| | 11 | 25% | 75% |
| | 10 | 20% | 80% |
| | 9 | 15% | 85% |
| | 8 | 10% | 90% |
| U. S. Broken | 7 | 5% | 95% |
| | 6 | 0% | (1) |
| | 5 | 0% | (1) |
| | 4 | 0% | (1) |
| | 3 | 0% | (1) |
| | 2 | 0% | (1) |
| | 1 | 0% | (1) |
| | 0 | 0% | (1) |

[1] Large to small: 100% and depending on size of broken units.

§ 52.1176 *Color*—(a) *General.* Federal inspection certificates may designate pink grapefruit whenever that fact is determined.

(1) The uniformity and intensity of the typical color is considered in determining the factor of color.

(b) *(A) classification.* Frozen grapefruit that possesses a practically uniform, bright, typical color may be given a score of 18 to 20 points. "Practically uniform, bright, typical color" means that the grapefruit may possess not more than a slight variation from the typical color of properly matured grapefruit or pink grapefruit from which prepared.

(c) *(B) classification.* If the frozen grapefruit possesses a reasonably uniform and reasonably good color, a score of 16 or 17 points may be given. Frozen grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably uniform and reasonably good color" means that the grapefruit may be variable in color, is fairly bright, and is not off color.

(d) *(SStd) classification.* Frozen grapefruit that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 15 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1177 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, from seeds, from portions of covering membrane, and from damaged units.

(1) "Harmless extraneous material" means leaves, small pieces of peel, and other similar material.

(2) "Seed" means any seed, whether or not fully developed, that measures more than $^3/_{16}$ inch in any dimension. A "large seed" is one that may be plump and measures more than $^3/_8$ inch in any dimension.

(3) "Damaged unit" means any unit that is damaged by pathological injury, by lye peeling, by discoloration, or by similar injury or that is damaged to such an extent that the appearance or eating quality of the unit is seriously affected.

(b) *(A) classification.* Frozen grapefruit that is practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" means that no harmless extraneous material is present; that not more than 5 percent by weight of the grapefruit may be damaged units; and that for each 16 ounces of net weight there may be present:

(1) Not more than 6 seeds including not more than 1 large seed; and

(2) Not more than an aggregate area of 1 square inch on the units covered by membrane.

(c) *(B) classification.* If the frozen grapefruit is reasonably free from defects, a score of 24 to 26 points may be given. Frozen grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that not more than 10 percent by weight of the grapefruit may be damaged units; and that for each 16 ounces of net weight there may be present:

(1) Not more than 1 small piece of harmless extraneous material;

(2) Not more than 12 seeds including not more than 3 large seeds; and

(3) Not more than an aggregate area of 2 square inches on the units covered by membrane.

(d) *(SStd) classification.* Frozen grapefruit that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 23 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

(e) *General.* The evaluation of the score points for the factor of absence of defects may be determined from Table No. II of this paragraph which indicates the maximum allowances for each type of defect for the score indicated.

TABLE No. II

| Grade and score points | Harmless extraneous material | Damaged units | Seeds | Aggregate area covered by membrane |
|---|---|---|---|---|
| | Maximum | | | |
| | Per 16 ounces | By weight | Per 16 ounces | |
| U. S. Grade A or U. S. Fancy: | | | | |
| 30 | None | 1% | None | None. |
| 29 | None | 2% | 2, but no large seeds | ½ square inch. |
| 28 | None | 3% | 4, but no large seeds | ¾ square inch. |
| 27 | None | 5% | 6, including 1 large seed | 1 square inch. |
| U. S. Grade B or U. S. Choice and Broken: | | | | |
| 26 | 1 small piece | 7% | 8, including 1 large seed | 1¼ square inches. |
| 25 | 1 small piece | 9% | 10, including 2 large seeds | 1¾ square inches. |
| 24 | 1 small piece | 10% | 12, including 3 large seeds | 2 square inches. |
| U. S. Grade D or Substandard: | | | | |
| 23 or less | More than allowances permitted for 24 points. | | | |

§ 52.1178 *Character*—(a) *General.* The factor of character refers to the structure and condition of the cells and reflects the maturity of the grapefruit.

(b) *(A) classification.* Frozen grapefruit that possesses a good character may be given a score of 27 to 30 points. "Good character" means that the grapefruit is moderately firm and fleshy; that the segments possess a well-developed, juicy, cellular structure; that the product is fairly free from loose cell sacs; and that not more than 5 percent by weight of the grapefruit consists of soft, fibrous, or "ricey" segments.

(c) *(B) classification.* If the frozen grapefruit possesses a reasonably good character, a score of 24 to 26 points may be given. Frozen grapefruit that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the grapefruit is fairly firm and fleshy and that not more than 15 percent by weight of the grapefruit consists of soft, fibrous, or "ricey" segments.

(d) *(SStd) classification.* Frozen grapefruit that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 23 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1179 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen grapefruit, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1180 *Score sheet for frozen grapefruit.*

Size and kind of container _____

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED GRAPEFRUIT JUICE [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1191 *Product description.* Canned grapefruit juice is the undiluted, unconcentrated, unfermented juice obtained from mature fresh fruit of the grapefruit tree (Citrus paradisi) which fruit has been properly washed; is packed with or without the addition of sweetening ingredients; is sufficiently processed by heat to assure preservation of the product; and is packed in containers which are hermetically sealed.

§ 52.1192 *Grades of canned grapefruit juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned grapefruit juice that shows no coagulation; that possesses a very good color; is practically free from defects; possesses a very good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned grapefruit juice that may show slight coagulation; that possesses a good color; is fairly free from defects; that possesses a good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned grapefruit juice that fails to meet to the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER

§ 52.1193 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that the container be filled as full as practicable with grapefruit juice and that the product occupy not less than 90 percent of the total capacity of the container.

FACTORS OF QUALITY

§ 52.1194 *Ascertaining the grade.* (a) The grade of canned grapefruit juice may be ascertained by considering, in addition to the requirements in § 52.1192 of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor has been expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1195 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1196 *Color*—(a) *(A) classification.* Canned grapefruit juice that possesses a very good color may be given a score of 17 to 20 points. "Very good color" means (1) in the case of canned grapefruit juice prepared from white-fleshed grapefruit that the color is bright and typical of juice freshly extracted from white-fleshed grapefruit and is free from browning due to scorching, oxidation, caramelization, or other causes; and (2) in the case of canned grapefruit juice prepared from pink-fleshed grapefruit, that the color is bright, and typical

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

of juice freshly extracted from fairly deep-pink-fleshed grapefruit, is free from browning due to scorching, oxidation, caramelization, or other causes, and is so distinctive in color as to distinguish it clearly from canned grapefruit juice prepared from a mixture of white-fleshed grapefruit and pink-fleshed grapefruit or from light colored pink-fleshed grapefruit the juice of which is so light in color that it cannot be distinguished from such a mixture.

(b) *(B) classification.* If the canned grapefruit juice possesses a good color, a score of 14 to 16 points may be given. Canned grapefruit juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good color" means (1) in the case of canned grapefruit juice prepared from white-fleshed grapefruit, that the color is fairly typical of juice extracted from white-fleshed grapefruit and may be dull or show evidence of slight browning, but is not off color; and (2) in the case of canned grapefruit juice prepared from pink-fleshed grapefruit and mixtures of white-fleshed grapefruit and pink-fleshed grapefruit that the color is fairly typical of juice extracted from pink-fleshed grapefruit or mixtures of white-fleshed grapefruit and pink-fleshed grapefruit and may be dull or show evidence of slight browning, but is not off color.

(c) *(SStd) classification.* Canned grapefruit juice that for any reason fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points, and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1197 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from free and suspended pulp, recoverable oil, seeds and seed particles, or other defects.

(1) "Free and suspended pulp" means particles of membrane, core, skin, and other similar extraneous material in canned grapefruit juice.

(2) Canned grapefruit juice that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that the juice may contain not more than 10 percent free and suspended pulp and that there may be present not more than 0.015 percent by volume of recoverable oil; and does not contain seeds or seed particles or other defects that more than slightly affect the appearance of the product.

(b) *(A) classification.* If the canned grapefruit juice is fairly free from defects, a score of 28 to 33 points may be given. Canned grapefruit juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the juice may contain not more than 15 percent free and suspended pulp and that there may be present not more than 0.020 percent by volume of recoverable oil; and does not contain seeds or seed particles or other defects that materially affect the appearance of the product.

(c) *(SStd) classification.* If the canned grapefruit juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 27 points may be given. Canned grapefruit juice that falls into this classification shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1198 *Flavor*—(a) *(A) classification.* (1) Canned grapefruit juice that possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means a fine, distinct canned grapefruit juice flavor which is free from off flavors of any kind and meets the following requirements:

(i) Brix—Not less than 9.5 degrees.

(ii) Acid—Not less than 0.90 gram nor more than 2.0 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 7 to 1 nor more than 14 to 1.

(2) Canned grapefruit juice is considered "sweet" if the juice possesses a very good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 1.0 gram nor more than 2.0 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 9 to 1 nor more than 14 to 1, provided that when the Brix is 16 degrees or more, the Brix-acid ratio may be less than 9 to 1.

(b) *(C) classification.* (1) If the canned grapefruit juice possesses a good flavor, a score of 28 to 33 points may be given. Canned grapefruit juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good flavor" means a good, normal canned grapefruit juice flavor which is free from off flavors of any kind and meets the following requirements:

(i) Brix—Not less than 9.0 degrees.

(ii) Acid—Not less than 0.75 gram (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 6.5 to 1.

(2) Canned grapefruit juice is considered "sweet" if the juice possesses a good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 0.85 gram (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 9 to 1, provided that when the Brix of the juice is 16 degrees or more, the Brix-acid ratio may be less than 9 to 1.

(c) *(SStd) classification.* Canned grapefruit juice that fails to meet the requirements of paragraph (b) of this section, or is off flavor or unpalatable for any reason, may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1199 *Definitions of terms as used in the standards.* (a) "Brix" means the degrees Brix of canned grapefruit juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of canned grapefruit juice may be determined by any other method which gives equivalent results.

(b) "Acid" means grams of acid (calculated as anhydrous citric acid) per 100 ml. of juice in canned grapefruit juice determined by titration with standard sodium hydroxide solution using phenolphthalein indicator.

§ 52.1200 *Explanation of analyses.* (a) Free and suspended pulp is determined by the following method:

(1) Graduated centrifuge tubes with a capacity of 50 ml. are filled with juice and placed in a suitable centrifuge. The speed is adjusted, according to diameter, as indicated in Table No. I, and the juice is centrifuged for exactly 10 minutes. As used in this subpart, "diameter" means the over-all distance between the bottoms of opposing centrifuge tubes in operating position. After centrifuging, the milliliter reading at the top of the layer of pulp in the tube is multiplied by 2 to give the percentage of pulp.

TABLE No. I

| Diameter | Approximate revolutions per minute | Diameter | Approximate revolutions per minute |
|---|---|---|---|
| 10 inches | 1,699 | 15½ inches | 1,209 |
| 10½ inches | 1,570 | 16 inches | 1,271 |
| 11 inches | 1,534 | 16½ inches | 1,232 |
| 11½ inches | 1,500 | 17 inches | 1,204 |
| 12 inches | 1,468 | 17½ inches | 1,176 |
| 12½ inches | 1,438 | 18 inches | 1,150 |
| 13 inches | 1,410 | 18½ inches | 1,182 |
| 13½ inches | 1,384 | 19 inches | 1,161 |
| 14 inches | 1,359 | 19½ inches | 1,142 |
| 14½ inches | 1,336 | 20 inches | 1,122 |
| 15 inches | 1,313 | | |

(b) Recoverable oil is determined by the following method:

(1) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1 and Figure 2.[3]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) *Procedure.* Exactly 2 liters of juice are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from bottom to top, and bring the juice to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute. By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(i) The number of milliliters of oil recovered divided by 20 equals the percent by volume of recoverable oil.

[3] Filed with the Federal Register Division as part of the original document.

LOT CERTIFICATION TOLERANCES

§ 52.1201 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned grapefruit juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1202 *Score sheet for canned grapefruit juice.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN CONCENTRATED GRAPE FRUIT JUICE [1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1221 *Product description.* Frozen concentrated grapefruit juice is the frozen product of concentrated, unfermented juice obtained from sound, mature grapefruit (Citrus paradisi). The fruit is prepared by sorting and by washing prior to extraction of the juice to assure a clean product. Upon extraction of such juice, it is concentrated; and single-strength grapefruit juice is admixed to the concentrate. The concentrated grapefruit juice is packed in accordance with good commercial practice and is frozen and maintained at temperatures necessary for the preservation of the product.

§ 52.1222 *Styles of frozen concentrated grapefruit juice*—(a) *Style I, without sweetening ingredient added.* The Brix value of the finished concentrate shall be not less than 38 degrees nor more than 42 degrees.

(b) *Style II, with sweetening ingredient added.* The finished concentrate, exclusive of added sweetening ingredient, has a Brix value of not less than 36 degrees; and the finished concentrate, including added sweetening ingredient, shall have a Brix value of not less than 38 degrees but not more than 48 degrees.

§ 52.1223 *Grades of frozen concentrated grapefruit juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen concentrated grapefruit juice which reconstitutes properly and of which the reconstituted juice possesses the appearance of fresh grapefruit juice; possesses a very good color; is practically free from defects; possesses a very good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen concentrated grapefruit juice which reconstitutes properly and of which the reconstituted juice possesses a good color; is reasonably free from defects; possesses a good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen concentrated grapefruit juice that fails to meet the requirements of U. S. Grade B or U. S. Choice.

FILL OF CONTAINER

§ 52.1224 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled with frozen concentrated grapefruit juice as full as practicable without impairment of quality.

FACTORS OF QUALITY

§ 52.1225 *Ascertaining the grade.* (a) The grade of frozen concentrated grapefruit juice is ascertained by considering in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1226 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1227 *Color*—(a) *(A) classification.* Frozen concentrated grapefruit juice of which the reconstituted juice possesses a very good color may be given a score of 17 to 20 points. "Very good color" means that the color is bright and typical of freshly extracted grapefruit juice and is free from any trace of browning.

(b) *(B) classification.* If the reconstituted juice possesses a "good color", a score of 14 to 16 points may be given. Frozen concentrated grapefruit juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Good color" means that the color is typical of freshly extracted grapefruit juice which may be slightly dull or show traces of browning but is not off color for any reason.

(c) *(SStd) classification.* If the reconstituted juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 13 points may be given. Frozen concentrated grapefruit juice that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1228 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from seeds and portions thereof, from excessive juice cells, from free and suspended pulp, from recoverable oil, and from other defects.

(1) "Free and suspended pulp" means particles of membrane, core, and peel and other similar extraneous materials in the reconstituted grapefruit juice.

(b) *(A) classification.* Frozen concentrated grapefruit juice of which the reconstituted juice is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present: (1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch in diameter, provided such seeds or portions thereof do not materially affect the appearance or drinking quality of the juice; (2) juice cells that do not materially affect the appearance or drinking quality of the juice; (3) other defects that are not more than slightly objectionable; and (4) not more than 10 percent free and suspended pulp. To score in this classification the frozen concentrated grapefruit juice may contain not more than 0.040 milliliter of recoverable oil per 100 grams of the concentrated product.

(c) *(B) classification.* If the reconstituted juice is reasonably free from defects, a score of 28 to 33 points may be given. Frozen concentrated grapefruit juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present: (1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

in diameter, provided such seeds or portions thereof do not seriously affect the appearance or drinking quality of the juice; (2) juice cells that do not seriously affect the appearance or drinking quality of the juice; (3) other defects that are not materially objectionable; and (4) not more than 15 percent free and suspended pulp. To score in this classification the frozen concentrated garpefruit juice may contain not more than 0.048 milliliter of recoverable oil per 100 grams of the concentrated product.

(d) *(SStd) classification.* Frozen concentrated grapefruit juice that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1229 *Flavor—(a) (A) classification.* Frozen concentrated grapefruit juice of which the reconstituted juice possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means that the flavor is fine, distinct, and substantially typical of freshly extracted grapefruit juice. To score not less than 34 points frozen concentrated grapefruit juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 8 to 1 nor more than 14 to 1 (see Table I).

(2) *Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 9.5 to 1 nor more than 13 to 1 (see Table II).

(b) *(B) classification.* If the reconstituted juice possesses a good flavor, a score of 28 to 33 points may be given. Frozen concentrated grapefruit juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Good flavor" means that the flavor is fairly typical of freshly extracted grapefruit juice and is free from abnormal flavors and off flavors of any kind. To score not less than 28 points frozen concentrated grapefruit juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 7 to 1 nor more than 16 to 1 (see Table I).

(2) *Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 8 to 1 nor more than 13 to 1 (see Table II).

(c) *(SStd) classification.* If the frozen concentrated grapefruit juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 27 points may be given. Frozen concentrated grapefruit juice that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1230 *Definitions of terms as used in these standards.* (a) "Reconstituted juice" means the product obtained by mixing thoroughly 3 parts by volume of distilled water and one part by volume of frozen concentrated grapefruit juice.

(b) "Reconstitutes properly" means that the reconstituted juice shows no material separation of colloidal or suspended matter leaving a zone of definitely clear liquid without any turbidity, after standing four (4) hours at a temperature of not less than 68 degrees Fahrenheit in a clear glass tube or cylinder (such as a 50 ml. graduated cylinder).

(c) "Acid" means the percent by weight of acid (calculated as anhydrous citric acid) in frozen concentrated grapefruit juice.

TABLE I—MAXIMUM AND MINIMUM ACID FOR FROZEN CONCENTRATED GRAPEFRUIT JUICE

STYLE I. WITHOUT SWEETENING INGREDIENT ADDED

| Brix value of the concentrate in degrees Brix | U. S. Grade A or U. S. Fancy | | U. S. Grade B or U. S. Choice | |
|---|---|---|---|---|
| | Ratio 8:1 | Ratio 14:1 | Ratio 7:1 | Ratio 16:1 |
| | Acid percent by weight | | Acid percent by weight | |
| | Maximum | Minimum | Maximum | Minimum |
| 38.0° | 4.75 | 2.71 | 5.43 | 2.38 |
| 38.1° | 4.76 | 2.72 | 5.44 | 2.38 |

| 48.0° | 5.05 | 3.69 | 6.00 | 3.69 |

(d) "Brix value" in frozen concentrated grapefruit juice is the refractometric sucrose value determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions and to which the applicable correction for acid is added. (See Table III for corrections.)

TABLE III—CORRECTIONS FOR OBTAINING BRIX VALUE[1]

| Citric acid, anhydrous (percent by weight) | Correction to be added to Refractometer Sucrose Value to obtain degree Brix value | Citric acid, anhydrous (percent by weight) | Correction to be added to Refractometer Sucrose Value to obtain degree Brix value |
|---|---|---|---|
| 0 percent | 0.39 | 4.2 percent | 0.81 |
| .2 percent | .43 | 4.4 percent | .85 |
| .4 percent | .47 | 4.6 percent | .89 |
| .6 percent | .51 | 4.8 percent | .93 |
| .8 percent | .54 | 5.0 percent | .97 |
| 1.0 percent | .58 | 5.2 percent | 1.01 |
| 1.2 percent | .62 | 5.4 percent | 1.04 |
| 1.4 percent | .66 | 5.6 percent | 1.07 |
| 1.6 percent | .70 | 5.8 percent | 1.11 |
| 1.8 percent | .74 | 6.0 percent | 1.15 |
| 2.0 percent | .78 | | |

[1] Source: "Refractometric Determination of Soluble Solids in Citrus Juices," by J. W. Stevens and W. E. Baur, from the Analytical Edition of Industrial and Engineering Chemistry, Vol. 11, p. 447, Aug. 15, 1939.

§ 52.1231 *Explanation of analyses.* (a) The measurement of Brix value is determined on the thawed concentrate in accordance with the refractometric method for sugars and sugar products, outlined in the Official Methods of Analysis of the Association of Official Agricultural Chemists.

(b) "Acid", calculated as anhydrous citric acid, is determined by titration with standard sodium hydroxide solution, using phenolphthalein as indicator.

(c) "Recoverable oil" is determined by the following method:

(i) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1 and Figure 2: [2]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) *Procedure.* Exactly 400 grams of the thawed concentrate mixed with water to approximately two liters are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from the bottom to top, and bring the solution to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute.

(i) By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(ii) The number of milliliters of oil recovered divided by 4 equals the volume of recoverable oil per 100 grams of concentrate.

(d) "Free and suspended pulp" is determined by the following method: Graduated centrifuge tubes with a capacity of 50 ml. are filled with the reconstituted grapefruit juice and placed in a suitable centrifuge. The speed is adjusted, according to diameter, as indicated in Table IV, and the juice is centrifuged for exactly 10 minutes. As used herein, "diameter" means the over-all distance between the bottoms of opposing centrifuge tubes in operating position. After centrifuging, the milliliter reading at the top of the layer of pulp in the tube is multiplied by 2 to give the percentage of pulp.

[2] Filed with the Federal Register Division as a part of the original document.

TABLE IV

| Diameter | Approximate revolutions per minute | Diameter | Approximate revolutions per minute |
|---|---|---|---|
| 10 inches | 1,609 | 15½ inches | 1,292 |
| 10½ inches | 1,570 | 16 inches | 1,271 |
| 11 inches | 1,531 | 16½ inches | 1,252 |
| 11½ inches | 1,500 | 17 inches | 1,234 |
| 12 inches | 1,468 | 17½ inches | 1,216 |
| 12½ inches | 1,438 | 18 inches | 1,199 |
| 13 inches | 1,410 | 18½ inches | 1,182 |
| 13½ inches | 1,384 | 19 inches | 1,167 |
| 14 inches | 1,359 | 19½ inches | 1,152 |
| 14½ inches | 1,336 | 20 inches | 1,137 |
| 15 inches | 1,313 | | |

LOT CERTIFICATION TOLERANCES

§ 52.1232 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen concentrated grapefruit juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED GRAPEFRUIT AND ORANGE FOR SALAD [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1251 *Product description.* Canned grapefruit and orange for salad, commonly known as canned citrus salad, is prepared from sound, mature grapefruit (Citrus paradisi) and from sound, mature oranges of the orange group (Citrus sinensis) which have been properly washed; and the segments thereof have been separated and the major portions of membrane and core and the seeds removed. The product is packed with or without the addition of water, juice, or sweetening ingredients and is sufficiently processed by heat to assure preservation of the product in hermetically sealed containers. It is recommended that the number of orange units be not less than the number of grapefruit units.

§ 52.1252 *Grades of canned grapefruit and orange for salad.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned grapefruit and orange for salad of which the average weight of the orange fruit is not less than 37½ percent nor more than 60 percent of the drained weight provided no single container consists of orange fruit that is less than 25 percent nor more than 75 percent of the drained fruit in such container; that possesses a drained weight or average drained weight, as the case may be, of not less than 60 percent of the capacity of the container; that consists of not less than 75 percent by weight of the drained grapefruit and not less than 75 percent by weight of the drained orange fruit which is in whole segments or almost whole segments; that possesses a good color; that is practically free from defects; that possesses a good character; that possesses a good flavor and odor; and that scores not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of canned grapefruit and orange for salad of which the average weight of the orange fruit is not less than 32½ percent nor more than 60 percent of the drained weight provided no single container consists of orange fruit that is less than 25 percent nor more than 75 percent of the drained weight of the fruit in such container; that possesses a drained weight or average drained weight, as the case may be, of not less than 55 percent of the capacity of the container; that consists of not less than 50 percent by weight of the drained grapefruit and not less than 50 percent by weight of the drained orange fruit which is in whole segments or almost whole segments; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a fairly good flavor and odor; and that scores not less than 80 points when

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Broken" is the quality of canned grapefruit and orange for salad of which the average weight of the orange fruit is not less than 32½ percent nor more than 60 percent of the drained weight provided no single container consists of orange fruit that is less than 25 percent nor more than 75 percent of the drained weight of the fruit in such container; that possesses a drained weight or average drained weight, as the case may be, of not less than 55 percent of the capacity of the container; that consists of less than 50 percent by weight of the drained grapefruit or less than 50 percent by weight of the drained orange fruit which is in whole or almost whole segments; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a fairly good flavor and odor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is the quality of canned grapefruit and orange for salad that fails to meet the requirements of U. S. Grade B or U. S. Choice and U. S. Broken.

LIQUID MEDIA AND FILL OF CONTAINER

§ 52.1253 *Recommended designations of liquid media and Brix measurements.* "Cut-out" requirements for liquid media are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. It is recommended that canned grapefruit and orange for salad have the following indicated "cut-out" Brix measurement for the respective designation, which designations include, but are not limited to, the following:

| Designation of liquid media: | *Brix measurement* |
|---|---|
| Heavy sirup | 18° or more. |
| Light sirup | 16° or more, but less than 18°. |
| Slightly sweet | 12° or more, but less than 16°. |

§ 52.1254 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of canned grapefruit and orange for salad be filled with grapefruit and orange fruit as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the volume of the container.

FACTORS OF QUALITY

§ 52.1255 *Ascertaining the grade.* (a) The grade of canned grapefruit and orange for salad may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of drained weight, wholeness, color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | *Points* |
|---|---|
| Drained weight | 20 |
| Wholeness | 20 |
| Color | 20 |
| Absence of defects | 20 |
| Character | 20 |
| Total score | 100 |

§ 52.1256 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.1257 *Drained weight*—(a) *General.* The drained weight of canned grapefruit and orange for salad is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch, ±3%, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and the fruit less the weight of the dry sieve. The fruit thus drained is referred to in this section as "drained fruit." A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can. "Capacity of the container" means the weight of distilled water at 68° Fahrenheit which the sealed container will hold.

TABLE NO. I—SCORE FOR DRAINED WEIGHTS OF CANNED GRAPEFRUIT AND ORANGE FOR SALAD

| Grade Classification | Score Points | Percentage that drained weight is of capacity of container | Drained weight on basis of container designation and size | | | |
|---|---|---|---|---|---|---|
| | | | 8 oz. tall (2 13/16 x 3 5/16 inches) | No. 2 (3 3/16 x 4 1/16 inches) | No. 3 Cyl. (4 1/16 x 4 7/16 inches) | No. 5 (5 3/16 x 5 1/16 inches) |
| | | | *Ounces* | *Ounces* | *Ounces* | *Ounces* |
| U. S. Grade A or U. S. Fancy. | 20 | 65 percent or more. | 5.63 or more | 13.33 or more | 33.56 or more | 38.41 or more. |
| | 19 | 62½ to 65 percent. | 5.41 to 5.62 incl. | 12.84 to 13.32 incl. | 32.27 to 33.55 incl. | 36.94 to 38.41 incl. |
| | 18 | 60 to 62½ percent. | 5.19 to 5.40 incl. | 12.33 to 12.83 incl. | 30.98 to 32.26 incl. | 35.46 to 36.93 incl. |
| U. S. Grade B or U. S. Choice or U. S. Broken. | 17 | 57½ to 60 percent. | 4.98 to 5.18 incl. | 11.79 to 12.32 incl. | 29.69 to 30.97 incl. | 33.99 to 35.45 incl. |
| | 16 | 55 to 57½ percent. | 4.76 to 4.97 incl. | 11.28 to 11.78 incl. | 28.40 to 29.68 incl. | 32.51 to 33.98 incl. |
| | 15 | 52½ to 55 percent. | 4.55 to 4.75 incl. | 10.77 to 11.27 incl. | 27.10 to 28.39 incl. | 31.04 to 32.50 incl. |
| U. S. Grade D or Substandard. | 14 | 50 to 52½ percent. | 4.33 to 4.54 incl. | 10.25 to 10.76 incl. | 25.81 to 27.09 incl. | 29.56 to 31.02 incl. |
| | 13 or less | Less than 50 percent. | Less than foregoing drained weights | | | |

(d) *(SStd) classification.* Canned grapefruit and orange for salad that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 15 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1258 *Wholeness*—(a) *General.* (1) "Whole" or "whole segment" means any fruit segment that retains its apparent original conformation and is not excessively trimmed.

(2) "Almost whole" or "almost whole segment" means any portion of a fruit segment that is not less than 75 percent of the apparent original segment size.

(3) "Broken" or "broken segment" means (i) any portion of a fruit segment that is less than 75 percent of the apparent original segment size, (ii) a "whole segment" or "almost whole segment" that is excessively trimmed, and (iii) portions of segments that are joined together only by a "thread" or membrane.

(b) *(A) classification.* Canned grapefruit and orange for salad that possesses a drained weight of not less than 60 percent of the capacity of the container may be given a score of 18 to 20 points for the respective containers as outlined in Table No. I. Whenever more than 1 container of the product is being graded, the score for drained weight of each container is determined by averaging the drained weights of the containers. If the average drained weight indicates a score of 18 to 20 points (in accordance with Table No. I) such score will be assigned to each container: *Provided,* That the drained weight of no individual container indicates a score of less than 16 points. However, if any individual container scores less than 16 points, each container will be assigned the score for its own drained weight.

(c) *(B) classification.* If the drained weight of the canned grapefruit and orange for salad is less than 60 percent but not less than 55 percent of the capacity of the container, a score of 16 or 17 points may be given for the respective containers as outlined in Table No. I. Whenever more than 1 container of the product is being graded, the score for drained weight of each container is determined by averaging the drained weights of the containers. If the average drained weight indicates a score of 16 or 17 points (in accordance with Table No. I) such score will be assigned to each container: *Provided,* That the drained weight of no individual container indicates a score of less than 14 points. However, if any individual container scores less than 14 points, each container will be assigned the score for its own drained weight. Canned grapefruit and orange for salad that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

§ 52.1259 *Color*—(a) *(A) classification.* Canned grapefruit and orange for salad that possesses a good color may be given a score of 18 to 20 points. "Good color" means that the color (1) of the grapefruit is a practically uniform bright, typical color free from any noticable tinge of amber and (2) of the orange fruit is a bright, typical color which may range from deep yellow-orange to orange and which is practically uniform with not more than a slight variation in the units.

(b) *(B) classification.* If the canned grapefruit and orange for salad possesses a reasonably good color, a score of 16 or 17 points may be given. Canned grapefruit and orange for salad that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product. (This is a limiting rule.) "Reasonably good color" means that the color of the grapefruit and of the orange fruit is fairly bright, may be variable in color, but is not off color.

(c) *(SStd) classification.* Canned grapefruit and orange for salad that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 15 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1260 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, from seeds, from portions of albedo, from portions of tough membrane, and from damaged units.

(1) "Harmless extraneous material" means leaves, portions of leaves, small pieces of peel, and other similar material that is harmless.

(2) "Seed" means any seed or any portion thereof, whether or not fully developed, that measures more than 3/16 inch in any dimension. A "large seed" is one that may be plump and measures more than 3/8 inch in any dimension.

(3) "Damaged unit" means any fruit segment or portion thereof that is damaged by pathological injury, by lye peeling, by discoloration, or by similar injury or that is damaged to such an extent that the appearance or eating quality of the unit is seriously affected.

(b) *(A) classification.* Canned grapefruit and orange for salad that is practically free from defects may be given a score of 18 to 20 points. "Practically free from defects" means that no harmless extraneous material is present; that not more than 5 percent by weight of the drained fruit may be damaged units; and that for each 20 ounces of net weight there may be present:

(1) Not more than 4 seeds including not more than one large seed; and

(2) Not more than an aggregate area of 2 square inches on the units covered by tough membrane or albedo.

(c) *(B) classification.* If the canned grapefruit and orange for salad is reasonably free from defects, a score of 16 or 17 points may be given. Canned grapefruit and orange for salad that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that not more than 15 percent by weight of the drained fruit may be damaged units; and that for each 20 ounces of net weight there may be present:

(1) Not more than 1 small piece of harmless extraneous material;

(2) Not more than 12 seeds including not more than 3 large seeds; and

(3) Not more than an aggregate area of 3 square inches on the units covered by tough membrane or albedo.

(d) *(SStd) classification.* Canned grapefruit and orange for salad that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 15 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1261 *Character*—(a) *General* The factor of character refers to the structure and condition of the cells of the fruit and reflects the maturity of the grapefruit and orange fruit.

(b) *(A) classification.* Canned grapefruit and orange for salad that possesses a good character may be given a score of 18 to 20 points. "Good character" means that the grapefruit and orange fruit is moderately firm and fleshy; that the segments or portions thereof possess a juicy, cellular structure free from dry cells or "ricey" cells that materially affect the appearance or eating quality of the product; and that the product is reasonably free from loose floating cells.

(c) *(B) classification.* If the canned grapefruit and orange for salad possesses a reasonably good character, a score of 16 or 17 points may be given. Canned grapefruit and orange for salad that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the fruit is reasonably free from dry cells, "ricey" cells, or fibrous cells that materially affect the appearance or eating quality of the product but none of the fruit is seriously affected by dry cells, "ricey" cells, or fibrous cells.

(d) *(SStd) classification.* Canned grapefruit and orange for salad that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 15 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS

§ 52.1262 *Explanation of terms.* (a) "Good flavor and odor" means that the product has a distinct and normal flavor and odor typical of canned grapefruit and of canned orange fruit and is free from objectionable odors and objectionable flavors of any kind.

(b) "Fairly good flavor and odor" means that the product may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

(c) "Brix" means the degrees Brix of the liquid media surrounding the canned grapefruit and orange fruit for salad when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If the liquid media is tested at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of the liquid media may be determined by any other method which gives equivalent results.

LOT CERTIFICATION TOLERANCES

§ 52.1263 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned grapefruit and orange fruit for salad, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1264 *Score sheet for canned grapefruit and orange for salad.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED BLENDED GRAPEFRUIT JUICE AND ORANGE JUICE[1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1281 *Product description.* Canned blended grapefruit juice and orange juice is the product prepared from a combination of undiluted, unconcentrated, unfermented juices obtained from the mature fresh fruit of the grapefruit tree (Citrus paradisi) and the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines, which fruit has been properly washed; is packed with or without the addition of sweetening ingredients; is sufficiently processed by heat to assure preservation of the product; and is packed in containers which are hermetically sealed. It is recommended that canned blended grapefruit juice and orange juice be composed of not less than 50 percent orange juice; however, in oranges yielding light-colored juice it is further recommended that as much as 75 percent orange juice be used.

§ 52.1282 *Grades of canned blended grapefruit juice and orange juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned blended grapefruit juice and orange juice that shows no coagulation; possesses a very good color; is practically free from defects; possesses a very good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned blended grapefruit juice and orange juice that may show slight coagulation; possesses a good color; is fairly free from defects; possesses a good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned blended grapefruit juice and orange juice that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER

§ 52.1283 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that the container be filled as full as practicable with blended grapefruit juice and orange juice and that the product occupy not less than 90 percent of the total capacity of the container.

FACTORS OF QUALITY

§ 52.1284 *Ascertaining the grade.* (a) The grade of canned blended grapefruit juice and orange juice may be ascertained by considering, in addition to the foregoing requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1285 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1286 *Color*—(a) *(A) classification.* Canned blended grapefruit juice and orange juice that possesses a very good color may be given a score of 17 to 20 points. "Very good color" means that the blended juice possesses a light yellow-orange color that is bright and typical of freshly extracted juice and is free from browning due to scorching, oxidation, caramelization, or other causes.

(b) *(C) classification.* If the canned blended grapefruit juice and orange juice possesses a good color, a score of 14 to 16 points may be given. Canned blended juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good color" means that the blended juice possesses a fairly typical color that may range from light yellow to light amber, may be dull or show evidence of slight browning, but is not off color.

(c) *(SStd) classification.* Canned blended grapefruit juice and orange juice that for any reason fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1287 *Absence of defects—(a) General.* The factor of absence of defects refers to the degree of freedom from free and suspended pulp, recoverable oil, seeds and seed particles, or other defects.

(1) "Free and suspended pulp" means particles of membrane, core, skin, and other similar extraneous material in the canned blended juice.

(b) *(A) classification.* Canned blended grapefruit juice and orange juice that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that the juice may contain not more than 12 percent free and suspended pulp and that there may be present not more than 0.030 percent by volume of recoverable oil; and does not contain seeds or seed particles or other defects that more than slightly affect the appearance of the product.

(c) *(C) classification.* If the canned blended grapefruit juice and orange juice is fairly free from defects, a score of 28 to 33 points may be given. Canned blended juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the juice may contain not more than 18 percent free and suspended pulp and that there may be present not more than 0.050 percent by volume of recoverable oil; and does not contain seeds or seed particles or other defects that materially affect the appearance of the product.

(d) *(SStd) classification.* If the canned blended grapefruit juice and orange juice fails to meet the requirements of paragraph (c) of this section, a score of 0 to 27 points may be given. Canned blended juice that falls into this classification shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1288 *Flavor*—(a) *(A) classification.* (1) Canned blended grapefruit juice and orange juice that possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means a fine, distinct canned blended grapefruit juice and orange juice flavor which is free from off flavors of any kind and meets the following requirements:

(i) Brix—Not less than 10.0 degrees.

(ii) Acid—Not less than 0.80 gram nor more than 1.70 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 8 to 1 nor more than 17 to 1.

(2) Canned blended grapefruit juice and orange juice is considered "sweet" if the juice possesses a very good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 0.80 gram nor more than 1.70 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 10 to 1 nor more than 17 to 1, provided, that when the Brix of the juice is 16 degrees or more, the Brix-acid ratio may be less than 10 to 1.

(b) *(C) classification.* (1) If the canned blended grapefruit juice and orange juice possesses a good flavor, a score of 28 to 33 points may be given. Canned blended juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total sore for the product (this is a limiting rule). "Good flavor" means a good, normal canned blended grapefruit juice and orange juice flavor which is free from off flavors of any kind and meets the following requirement:

(i) Brix—Not less than 9.5 degrees.

(ii) Acid—Not less than 0.65 grams nor more than 1.80 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 7.5 to 1.

(2) Canned blended grapefruit juice and orange juice is considered "sweet" if the juice possesses a good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 0.65 gram nor more than 1.80 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 10 to 1, provided, that when the Brix of the juice is 16 degrees or more, the Brix-acid ratio may be less than 10 to 1.

(c) *(SStd) classification.* Canned blended grapefruit juice and orange juice that fails to meet the requirements of paragraph (b) of this section, is off flavor, or is unpalatable for any reason may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1289 *Definitions of terms.* (a) "Brix" means the degrees Brix of canned blended grapefruit juice and orange juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of canned blended juice may be determined by any other method which gives equivalent results.

(b) "Acid" means grams of acid (calculated as anhydrous citric acid) per 100 ml. of juice in canned blended grapefruit juice and orange juice determined by titration with standard sodium hydroxide solution using phenolphthalein indicator.

§ 52.1290 *Explanation of analyses.* (a) Free and suspended pulp is determined by the following method:

(1) Graduated centrifuge tubes with a capacity of 50 ml. are filled with juice and placed in a suitable centrifuge. The speed is adjusted, according to diameter, as indicated in Table No. I, and the juice is centrifuged for exactly 10 minutes. As used in this section, "diameter" means the over-all distance between the bottoms of opposing centrifuge tubes in operating position. After centrifuging, the milliliter reading at the top of the layer of pulp in the tube is multiplied by 2 to give the percentage of pulp.

TABLE NO. I

| Diameter | Approximate revolutions per minute | Diameter | Approximate revolutions per minute |
|---|---|---|---|
| 10 inches | 1,609 | 15½ inches | 1,292 |
| 10½ inches | 1,570 | 16 inches | 1,271 |
| 11 inches | 1,534 | 16½ inches | 1,252 |
| 11½ inches | 1,500 | 17 inches | 1,234 |
| 12 inches | 1,468 | 17½ inches | 1,216 |
| 12½ inches | 1,438 | 18 inches | 1,199 |

(b) Recoverable oil in canned blended grapefruit juice and orange juice is determined by the following method:

(1) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1 and Figure 2.[2]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) *Procedure.* Exactly 2 liters of juice are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from bottom to top, and bring the juice to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute. By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(i) The number of milliliters of oil recovered divided by 20 equals the percent by volume of recoverable oil.

LOT CERTIFICATION TOLERANCES

§ 52.1291 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned blended grapefruit juice and orange juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1292 *Score sheet for canned blended grapefruit juice and orange juice.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN CONCENTRATED BLENDED GRAPEFRUIT JUICE AND ORANGE JUICE[1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1311 *Product description.* Frozen concentrated blended grapefruit juice and orange juice is the frozen product prepared from a combination of concentrated, unfermented juices obtained from sound, mature grapefruit (Citrus paradisi) and from sound, mature fruit of the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines. The fruit is prepared by sorting and by washing prior to extraction of the juices to assure a clean product. The juices may be blended upon extraction of such juices or after concentration and fresh orange juice extracted from sorted and washed fruit, as aforesaid, is admixed to the concentrate. It is recommended that the frozen concentrated blended grapefruit juice and orange juice be composed of the equivalent of not less than 50 percent orange juice in the reconstituted juice; however, in oranges yielding light-colored juice it is further recommended that as much as the equivalent of 75 percent orange juice in the reconstituted juice be used. The concentrated juice is packed in accordance with good com-

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

[2] Filed with the Federal Register Division as part of the original document.

mercial practice and is frozen and maintained at temperatures necessary for the preservation of the product.

§ 52.1312 *Styles of frozen concentrated blended grapefruit juice and orange juice*—(a) *Style I, without sweetening ingredient added.* The Brix value of the finished concentrate shall be not less than 40 degrees nor more than 44 degrees.

(b) *Style II, with sweetening ingredient added.* The finished concentrate, exclusive of added sweetening ingredient, has a Brix value of not less than 38 degrees; and the finished concentrate, including added sweetening ingredient, shall have a Brix value of not less than 40 degrees but not more than 48 degrees.

§ 52.1313 *Grades of frozen concentrated blended grapefruit juice and orange juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen concentrated blended grapefruit juice and orange juice which reconstitutes properly and of which the reconstituted juice possesses the appearance of fresh juices of such a blend; possesses a very good color; is practically free from defects; possesses a very good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen concentrated blended grapefruit juice and orange juice which reconstitutes properly and of which the reconstituted juice possesses a good color; is reasonably free from defects; possesses a good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen concentrated blended grapefruit juice and orange juice that fails to meet the requirements of U. S. Grade B or U. S. Choice.

FILL OF CONTAINER

§ 52.1314 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled with frozen concentrated blended grapefruit juice and orange juice as full as practicable without impairment of quality.

FACTORS OF QUALITY

§ 52.1315 *Ascertaining the grade.* (a) The grade of frozen concentrated blended grapefruit juice and orange juice is ascertained by considering in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1316 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1317 *Color*—(a) *(A) classification.* Frozen concentrated blended grapefruit juice and orange juice of which the reconstituted juice possesses a very good color may be given a score of 17 to 20 points. "Very good color" means that the color is bright, light yellow-orange, and typical of freshly extracted juices of such a blend and is free from any trace of browning indicative of scorching, oxidation, caramelization, or other causes.

(b) *(B) classification.* If the reconstituted juice possesses a "good color," a score of 14 to 16 points may be given. Frozen concentrated blended grapefruit juice and orange juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Good color" means that the color may range from light yellow to light amber, is fairly typical of freshly extracted juices of such a blend and may be slightly dull or may show traces of browning but is not off color for any reason.

(c) *(SStd) classification.* If the reconstituted juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 13 points may be given. Frozen concentrated blended grapefruit juice and orange juice that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1318 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from seeds and portions thereof, from excessive juice cells, from free and suspended pulp, from recoverable oil, and from other defects.

(1) "Free and suspended pulp" means particles of membrane, core, and peel and other similar extraneous materials in the reconstituted blended grapefruit juice and orange juice.

(b) *(A) classification.* Frozen concentrated blended grapefruit juice and orange juice of which the reconstituted juice is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present: (1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch in diameter, provided such seeds or portions thereof do not materially affect the appearance or drinking quality of the juice; (2) juice cells that do not materially affect the appearance or drinking quality of the juice; (3) other defects that are not more than slightly objectionable, and (4) not more than 12 percent free and suspended pulp. To score in this classification the frozen concentrated blended grapefruit juice and orange juice may contain not more than 0.080 milliliter of recoverable oil per 100 grams of the concentrated product.

(c) *(B) classification.* If the reconstituted juice is reasonably free from defects, a score of 28 to 33 points may be given. Frozen concentrated blended grapefruit juice and orange juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present: (1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch in diameter, provided such seeds or portions thereof do not seriously affect the appearance or drinking quality of the juice; (2) juice cells that do not seriously affect the appearance or drinking quality of the juice; (3) other defects that are not materially objectionable, and (4) not more than 18 percent free and suspended pulp. To score in this classification the frozen concentrated blended grapefruit juice and orange juice may contain not more than 0.096 milliliter of recoverable oil per 100 grams of the concentrated product.

(d) *(SStd) classification.* Frozen concentrated blended grapefruit juice and orange juice that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1319 *Flavor*—(a) *(A) classification.* Frozen concentrated blended grapefruit juice and orange juice of which the reconstituted juice possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means that the flavor is fine, distinct, and substantially typical of freshly extracted juices of such a blend. To score not less than 34 points frozen concentrated blended grapefruit juice and orange juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 10 to 1 nor more than 16 to 1 (See Table I).

(2) *Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 11 to 1 nor more than 13 to 1 (See Table II).

(b) *(B) classification.* If the reconstituted juice possesses a good flavor, a score of 28 to 33 points may be given. Frozen concentrated blended grapefruit juice and orange juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Good flavor" means that the flavor is fairly typical of freshly extracted juices of such a blend and is free from abnormal or off flavors of any kind. To score not less than 28 points frozen concentrated blended grapefruit juice and orange juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 8 to 1 nor more than 18 to 1 (See Table I).

(2) *Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 9 to 1 nor more than 13 to 1 (See Table II).

(c) *(SStd) classification.* If the frozen concentrated blended grapefruit juice and orange juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 27 points may be given. Frozen concentrated blended grapefruit juice and orange juice that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

TABLE I—MAXIMUM AND MINIMUM ACID FOR FROZEN CONCENTRATED BLENDED GRAPEFRUIT JUICE AND ORANGE JUICE

STYLE I, WITHOUT SWEETENING INGREDIENT ADDED

| Brix value of the concentrate in degrees Brix | U. S. Grade A or U. S. Fancy | | U. S. Grade B or U. S. Choice | |
|---|---|---|---|---|
| | Ratio 10:1 | Ratio 16:1 | Ratio 8:1 | Ratio 18:1 |
| | Acid percent by weight | | Acid percent by weight | |
| | Maximum | Minimum | Maximum | Minimum |
| 40.0° | 4.00 | 2.50 | 5.00 | 2.22 |

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1320 *Definitions of terms as used in these standards.* (a) "Oranges" means oranges of the sweet orange group (Citrus sinensis) and the Mandarin group (Citrus reticulata), except tangerines.

(b) "Reconstituted juice" means the product obtained by mixing thoroughly 3 parts by volume of distilled water and one part by volume of frozen concentrated blended grapefruit juice and orange juice.

(c) "Reconstitutes properly" means that the reconstituted juice shows no material separation of colloidal or suspended matter, leaving a zone of definitely clear liquid without any turbidity, after standing four (4) hours at a temperature of not less than 68 degrees Fahrenheit in a clear glass tube or cylinder (such as a 50 ml. graduated cylinder).

(d) "Acid" means the percent by weight of acid (calculated as anhydrous citric acid) in frozen concentrated blended grapefruit juice and orange juice.

(e) "Brix value" in frozen concentrated blended grapefruit juice and orange juice is the refractometric sucrose value determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions and to which the applicable correction for acid is added. (See Table III for corrections.)

TABLE III[1]—CORRECTIONS FOR OBTAINING BRIX VALUE

| Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value | Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value |
|---|---|---|---|
| 2.0 | 0.39 | 4.0 | 0.78 |
| 2.2 | .43 | 4.2 | .81 |
| 2.4 | .47 | 4.4 | .85 |
| 2.6 | .51 | 4.6 | .89 |
| 2.8 | .54 | 4.8 | .93 |
| 3.0 | .58 | 5.0 | .97 |
| 3.2 | .62 | 5.2 | 1.01 |
| 3.4 | .66 | 5.4 | 1.04 |
| 3.6 | .70 | 5.6 | 1.07 |
| 3.8 | .74 | | |

[1] Source: "Refractometric Determination of Soluble Solids in Citrus Juices," by J. W. Stevens and W. E. Baier, from the Analytical Edition of Industrial and Engineering Chemistry, Vol. II, Page 417, Aug. 15, 1939.

§ 52.1321 *Explanation of analyses.* (a) The measurement of Brix value is determined on the thawed concentrate in accordance with the refractometric method for sugars and sugar products, outlined in the Official Methods of Analysis of the Association of Official Agricultural Chemists.

(b) "Acid," calculated as anhydrous citric acid, is determined by titration with standard sodium hydroxide solution, using phenolphthalein as indicator.

(c) "Recoverable oil" is determined by the following method:

(1) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1 and Figure 2.[2]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) *Procedure.* (i) Exactly 400 grams of the thawed concentrate mixed with water to approximately two liters are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from the bottom to top, and

[2] Filed with the Federal Register Division as a part of the original document.

bring the solution to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute.

(ii) By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(iii) The number of milliliters of oil recovered divided by 4 equals the volume of recoverable oil per 100 grams of concentrate.

(d) "Free and suspended pulp" is determined by the following method: Graduated centrifuge tubes with a capacity of 50 ml. are filled with the reconstituted blended grapefruit juice and orange juice and placed in a suitable centrifuge. The speed is adjusted, according to diameter, as indicated in Table IV, and the juice is centrifuged for exactly 10 minutes. As used herein, "diameter" means the over-all distance between the bottoms of opposing centrifuge tubes in operating position. After centrifuging, the milliliter reading at the top of the layer of pulp in the tube is multiplied by 2 to give the percentage of pulp.

TABLE IV

| Diameter | Approximate revolutions per minute | Diameter | Approximate revolutions per minute |
|---|---|---|---|
| 10 inches | 1,660 | 15½ inches | 1,202 |
| 10½ inches | 1,620 | 16 inches | 1,171 |
| 11 inches | 1,581 | 16½ inches | 1,252 |
| 11½ inches | 1,540 | 17 inches | 1,234 |
| 12 inches | 1,468 | 17½ inches | 1,216 |
| 12½ inches | 1,438 | 18 inches | 1,199 |
| 13 inches | 1,440 | 18½ inches | 1,182 |
| 13½ inches | 1,384 | 19 inches | 1,167 |
| 14 inches | 1,359 | 19½ inches | 1,152 |
| 14½ inches | 1,334 | 20 inches | 1,137 |
| 15 inches | 1,313 | | |

LOT CERTIFICATION TOLERANCES

§ 52.1322 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen concentrated blended grapefruit juice and orange juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED GRAPE JUICE [1]

PRODUCT DESCRIPTION, TYPES, STYLES, GRADES

§ 52.1341 *Product description.* Canned grape juice is the unfermented liquid obtained from properly matured fresh grapes. Such grape juice is prepared without concentration, without dilution, is packed with or without the addition of sweetening ingredients, and is sufficiently processed by heat to assure preservation of the product in hermetically sealed containers (either metal or glass).

§ 52.1342 *Types of canned grape juice.* (a) Type I: Concord type (prepared from grapes of the slip-skin varieties of the Concord type of the Labrusca species).

(b) Type II: Any type other than Concord type (prepared from a single variety of grapes other than Concord type).

(c) Type III: Blended type (prepared from two or more varieties of grapes).

§ 52.1343 *Styles of canned grape juice.* Unless specifically designated as "sweetened", canned grape juice is considered as "unsweetened."

(a) Style I, Unsweetened (without added sweetening ingredient or ingredients).

(b) Style II, Sweetened (with added sweetening ingredient or ingredients).

§ 52.1344 *Grades of canned grape juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned grape juice from which tartrate crystals have been removed; that possesses a good color; that is practically free from defects; that possesses a good flavor; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of canned grape juice from which tartrate crystals have been removed, that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned grape juice that fails to meet the requirements of U. S. Grade B or U. S. Choice.

FILL OF CONTAINER

§ 52.1345 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled as full as practicable with grape juice and that the product occupy not less than 90 percent of the volume of the container.

FACTORS OF QUALITY

§ 52.1346 *Ascertaining the grade.* The grade of canned grape juice is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 40 |
| Absence of defects | 20 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1347 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1348 *Color*—(a) *(A) classification.* Canned grape juice that possesses a good color may be given a score of 34 to 40 points. "Good color" has the following meanings with respect to the types of canned grape juice:

(1) Type I. A bright purple or bright reddish-purple color typical of properly prepared and properly processed juice from Concord type grapes.

(2) Types II and III. A bright color typical of properly prepared and properly processed juice characteristic of the varietal type or varietal types from which prepared.

(b) *(B) classification.* If the canned grape juice possesses a reasonably good color, a score of 28 to 33 points may be given. Canned grape juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" has the following meanings with respect to the types of canned grape juice:

(1) Type I: A purple or reddish-purple color typical of canned grape juice prepared from Concord type grapes and which color may be slightly dull purple, slightly dull bluish-purple, or slightly dull reddish-purple but which is not off-color for any reason.

(2) Types II and III: A color typical of canned grape juice characteristic of the varietal type or varietal types from which prepared and which color may be slightly dull but which is not off-color for any reason.

(c) *(SStd) classification.* Canned grape juice that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1349 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from sediment and other residue, from tartrate crystals, from particles of skin, from particles of pulp, from particles of seed, and from any other defects.

(b) *(A) classification.* Canned grape juice that is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that the canned grape juice may possess a slight amount of sediment and residue of an amorphous nature; may possess not more than a trace of sediment and residue of a non-amorphous nature; is practically free from tartrate crystals; and is free from particles of skin, particles of pulp, particles of seed, and from any other defects.

(c) *(B) classification.* If the canned grape juice is reasonably free from defects, a score of 14 to 16 points may be given. Canned grape juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the canned grape juice may possess a slight amount of sediment and residue of an amorphous or non-amorphous nature; may possess a slight amount of tartrate crystals; may possess not more than a trace of particles of skin, particles of pulp, particles of seed, and other defects.

(d) *(SStd) classification.* Canned grape juice that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1350 *Flavor*—(a) *(A) classification.* Canned grape juice that possesses a good flavor may be given a score of 34 to 40 points. "Good flavor" means that the flavor is a distinct and normal flavor, typical of well-matured grapes and that the canned grape juice is free from any trace of scorching, caramelization, and objectionable flavors and objectionable odors of any kind. To score in this classification, canned grape juice shall meet the following additional requirements:

(1) Brix: Style I, unsweetened—not less than 15.0 degrees.

(2) Brix: Style II, sweetened—not less than 17.0 degrees.

(3) Acid: Not less than 0.60 grams per 100 ml. nor more than 1.20 grams per 100 ml., calculated as tartaric acid.

(4) Brix-acid ratio: For both Style I, unsweetened, and Style II, sweetened, not less than 14 to 1 nor more than 28 to 1.

(b) *(B) classification.* If the canned grape juice possesses a reasonably good flavor, a score of 28 to 33 points may be given. Canned grape juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good flavor" means that the flavor is normal and typical of reasonably well-matured grapes and that the canned grape juice may be slightly astringent but is free from any trace of scorching, caramelization, and objectionable flavors and objectionable odors of any kind. To score in this classification, canned grape juice shall meet the following additional requirements:

(1) Brix: Style I, unsweetened—not less than 14.0 degrees.

(2) Brix: Style II, sweetened—not less than 16.0 degrees.

(3) Acid: Not less than 0.45 gram per 100 ml. nor more than 1.40 grams per 100 ml., calculated as tartaric acid.

(4) Brix-acid ratio: For both Style I, unsweetened, and Style II, sweetened, not less than 11.5 to 1.

(c) *(SStd) classification.* Canned grape juice that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS

§ 52.1351 *Explanation of terms.* (a) "Brix" means the degrees Brix of canned grape juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If canned grape juice is tested at a temperature other than 20 degrees C. (68 degrees F.), the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of canned grape juice may be determined by any other method which gives equivalent results.

(b) "Acid" means grams of acid (calculated as tartaric acid) per 100 ml. of juice in canned grape juice determined by titration with standard sodium hydroxide solution, using phenolphthalein as indicator or any other satisfactory indicator.

LOT CERTIFICATION TOLERANCES

§ 52.1352 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned grape juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN LEAFY GREENS [1]

PRODUCT DESCRIPTION, KINDS, STYLES, AND GRADES

§ 52.1371 *Product description.* Frozen leafy greens is the product prepared from the clean, sound, succulent leaves of fresh leafy greens (other than spinach) which may be whole or cut, with or without stems, by sorting, trimming, washing, and blanching, which is then frozen and maintained at temperatures necessary for the preservation of the product.

§ 52.1372 *Kinds of frozen leafy greens.* (a) Beet greens (Beta vulgaris).

(b) Collards (Brassica oleracea, acephala).

(c) Dandelion greens (Taraxacum taraxacum).

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(d) Endive (Cichorium endivia).
(e) Kale (Brassica oleracea, acephala).
(f) Mustard greens (Brassica juncea, brassica chinensis).
(g) Swiss chard (Beta vulgaris, cicla).
(h) Turnip greens (Brassica rapa).

§ 52.1373 *Styles of frozen leafy greens.* (a) "Whole leaf" is the style of frozen leafy greens that consist of the whole leaf or large portions of leaf, with or without adjacent portions of the stem.

(b) "Sliced" is the style of frozen leafy greens that consist of the leaf or large portions of leaf, with or without adjoining portions of the stem, which has been sliced into reasonably uniform strips.

(c) "Cut" or "chopped" is the style of frozen leafy greens that consist of the leaf or large portions of leaf, with or without adjoining portions of the stem, which has been cut into small pieces.

§ 52.1374 *Grades of frozen leafy greens.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen leafy greens that possess a good flavor and odor, that possess a good color, that possess a good character, that are practically free from defects, and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen leafy greens that possess a fairly good flavor and odor, that possess a reasonably good color, that possess a reasonably good character, that are reasonably free from defects, and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen leafy greens that fail to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.1375 *Ascertaining the grade.* (a) The grade of frozen leafy greens is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings of the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) The score for the factors of color and absence of defects is determined immediately after thawing to the extent that the product is substantially free from ice crystals and can be handled as individual units. A representative sample of the product is cooked for examination with respect to character and flavor and odor.

(d) "Good flavor and odor" means that the product, after cooking, has a good characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Reasonably good flavor and odor" means that the product after cooking may be lacking in good flavor and odor, but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1376 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1377 *Color*—(a) *(A) classification.* Frozen leafy greens that possess a good color may be given a score of 17 to 20 points. "Good color" means that the frozen leafy greens possess a practically uniform bright color characteristic of the variety.

(b) *(B) classification.* If the frozen leafy greens possess a reasonably good color, a score of 14 to 16 points may be given. Frozen leafy greens that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the frozen leafy greens possess a reasonably uniform characteristic color which may be variable but not to the extent that the appearance of the frozen product is materially affected.

(c) *(SStd) classification* Frozen leafy greens that are definitely off color for any reason, or that fail to meet the requirements of paragraph (b) of this section, may be given a score of 0 to 13 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

§ 52.1378 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from grit, sand or silt, seed stems, roots, grass and weeds, and damage by yellow, brown, or other discoloration.

(1) "Grit, sand or silt" means any particle of earthy material.

(2) "Damage" means damage by any yellow, brown, or other discoloration affecting any leaf, portion of a leaf, stem, or portion of a stem (except minute, insignificant injuries which shall not be considered as damage) to the extent that the appearance or edibility of the unit is materially affected.

(b) *(A) classification.* Frozen leafy greens that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that no grit, sand or silt may be present that affects the edibility of the frozen leafy greens; seed stems and roots may be present that do not more than slightly affect the appearance or edibility of the product; and for each 12 ounces of the product there may be present:

(1) Damage affecting leaves and stems or portions of leaves and stems aggregating not more than 4 square inches (4" x 1") in area: *Provided,* That the total damaged area or any part thereof does not materially affect the appearance or edibility of the product, and

(2) Grass and weeds aggregating not more than 8 inches in length: *Provided,* That the total amount or any part thereof does not materially affect the appearance or edibility of the product.

(c) *(B) classification.* If the frozen leafy greens are reasonably free from defects a score of 28 to 33 points may be given. Frozen leafy greens that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the product may contain a trace of grit, sand or silt that does not materially affect the edibility of the frozen leafy greens; seed stems and roots may be present that do not materially affect the appearance or edibility of the product; and for each 12 ounces of the product there may be present:

(1) Damage affecting leaves and stems aggregating not more than 8 square inches (8" x 1") in area: *Provided,* That the total damaged area or any part thereof does not seriously affect the appearance or edibility of the product, and

(2) Grass and weeds aggregating not more than 12 inches in length: *Provided,* That the total amount or any part thereof does not seriously affect the appearance or edibility of the product.

(d) *(SStd) classification.* Frozen leafy greens that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

§ 52.1379 *Character*—(a) *General.* The factor of character refers to the tenderness and texture of the leaves and stems or portions of leaves and stems. The degree of freedom from coarse or tough leaves and stems or coarse or tough portions of leaves and stems, and the degree to which the appearance may be affected by ragged and torn leaves and stems or ragged and torn portions of leaves and stems are considered under this factor.

(b) *(A) classification.* Frozen leafy greens that possess a good character may be scored 34 to 40 points. "Good character" means that the leafy greens are tender and practically free from coarse or tough leaves and stems or coarse or tough portions of leaves and stems and the appearance of the product is not materially affected by ragged and torn leaves and stems or ragged and torn portions of leaves and stems.

(c) *(B) classification.* If the frozen leafy greens possess a reasonably good character a score of 28 to 33 points may be given. Frozen leafy greens that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the leafy greens shall be reasonably tender and that the appearance and eating quality shall not be materially affected by the presence of coarse or tough leaves and stems or coarse or tough portions of leaves and stems.

(d) *(SStd) classification.* Frozen leafy greens that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1380 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen leafy greens, the grade for such lot will be determined by averaging the total score of all containers, if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF EXTRACTED HONEY; HONEY [1]

PRODUCT DESCRIPTION, TYPES, TYPES OF PROCESS, AND COLOR

§ 52.1391 *Product description.* "Extracted honey" or "honey" is honey that has been separated from the comb by centrifugal force, gravity, straining, or by other means, and is prepared and packed under sanitary conditions in accordance with good commercial practice.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 52.1392 *Types of extracted honey.* The type of extracted honey is not incorporated in the grades of the finished product since the type of extracted honey, as such, is dependent upon the method of preparation and processing, and therefore is not a factor of quality for the purpose of these grades. Extracted honey may be prepared and processed as one of the following types:

(a) *Liquid honey.* "Liquid honey" is honey that is free from visible crystals.

(b) *Crystallized honey.* "Crystallized honey" is honey that is solidly granulated or crystallized, irrespective of whether "Candied," "Fondant," "Creamed," or "Spread" types of crystallized honey.

(c) *Partially crystallized honey.* "Partially crystallized honey" is honey that is a mixture of liquid honey and crystallized honey.

§ 52.1393 *Color of honey.* The color of honey is not a factor of quality for the purpose of these grades.

(a) The color classification of honey is determined by means of the U. S. D. A. permanent glass color standards for honey.[2]

(b) The respective color designation, applicable range of each color, and color range on the Pfund scale are shown in Table No. I, together with spectrophotometric specifications for freshly prepared caramel-glycerine solutions which in thickness of 3.15 centimeters (1.24 inch) closely match the colors of the U. S. D. A. permanent glass color standards.

(c) Crystallized honey and partially crystallized honey are liquefied by heating to approximately 54.4° C. (130° F.) and cooled to approximately 20° C. (68° F.) before ascertaining the color of the honey by means of the U. S. D. A. permanent glass color standards for honey.

§ 52.1394 *Application of U. S. D. A. permanent glass color standards in classifying the color of honey*—(a) *Sample containers.* The sample containers for use in making the visual color determination as set forth in § 52.1395 are square bottles of colorless transparent glass, having an internal width at the center of 3.15 centimeters (1.24 inch), with outside base dimensions of approximately $1\frac{7}{16}$ inches by $1\frac{7}{16}$ inches, and having a capacity of approximately 2 ounces.

(b) *Comparator; viewing box.* Two comparators or viewing boxes are required for the entire color range in the visual comparison test. Each comparator is divided into five compartments approximately $1\frac{1}{2}$ inches square, with each compartment provided with openings approximately $1\frac{3}{16}$ inches square in the two parallel sides. The U. S. D. A. permanent glass color standards are mounted in a fixed position in the front openings of compartments 1, 3, and 5 of the two comparators, compartments 2 and 4 being adapted to receive the sample containers.

(c) *Clear blanks.* Six clear blanks of distilled water in capped sample containers are required. The clear blanks are placed in the compartments provided behind each permanent glass color standard.

(d) *Cloudy suspensions.* Three cloudy suspensions of bentonite in distilled water, each in a capped sample container, are required. These are referred to as "Cloudy No. 1," "Cloudy No. 2," and "Cloudy No. 3," corresponding to varying degrees of cloudiness within the range of the different grades of honey. The cloudy suspensions replace the clear blanks when cloudy honey is to be classified for color.

(e) *Visual comparison test.* The color of a sample of honey is compared with the U. S. D. A. permanent glass color standards in the following manner to determine its color classification:

(1) Place the sample of honey in a clean dry sample container.

(2) Place the clear blanks behind each permanent glass color standard.

(3) Place the container filled with the sample of honey successively in compartments 2 and 4 of the comparator, and visually compare the color of the sample with that of each of the glass color standards by looking through them at a diffuse source of natural or artificial daylight. The color is classified in accordance with the color range as given in Table No. I.

TABLE NO. I—COLOR DESIGNATION OF HONEY AND RANGE FOR EACH COLOR

| U. S. D. A. color standards | Color range U. S. D. A. color standards | Color range Pfund scales | Optical density [1] |
|---|---|---|---|
| | | *Millimeters* | |
| Water White | Honey that is Water White or lighter in color than Water White Color Standard. | 8 or less | 0.0945 |
| Extra White | Honey that is darker than Water White but not darker than Extra White Color Standard. | Over 8 to and including 17. | .189 |
| White | Honey that is darker than Extra White but not darker than White Color Standard. | Over 17 to and including 34. | .378 |
| Extra Light Amber | Honey that is darker than White but not darker than Extra Light Amber or Golden Color Standard. | Over 34 to and including 50. | .590 |
| Light Amber | Honey that is darker than Extra Light Amber but not darker than Light Amber Color Standard. | Over 50 to and including 85. | 1.386 |
| Amber | Honey that is darker than Light Amber but not darker than Amber Color Standard. | Over 85 to and including 114. | 3.008 |
| Dark Amber | Honey that is darker than Amber Color Standard | Over 114 | |

[1] Optical density (absorbance) = $\log_{10}$ (100/percent transmittance), at 560 mμ for 3.15 centimeter thickness for caramel-glycerin solutions measured versus an equal cell containing glycerin.

(4) If the sample is appreciably cloudy in appearance, the clear blanks are replaced by the cloudy suspensions, "Cloudy No. 1," "Cloudy No. 2," or "Cloudy No. 3," respectively, to facilitate color classification.

[2] An approximate color classification may be made by means of the Pfund color grader and the color designated in terms of the aforesaid U. S. D. A. color standards.

§ 52.1395 *Tolerance for certification of color of officially drawn samples*

When certifying the color of samples that have been officially drawn and which represent a specific lot of honey, the lot shall be considered as of one color if not more than one-sixth of the containers comprising the sample contains honey of a different color: *Provided, however,* that the honey in none of the containers falls below the next darker color designation.

FILL OF CONTAINER

§ 52.1396 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container be filled with honey as full as practicable, and with respect to containers of one gallon or less the honey shall occupy not less than 95 percent of the total capacity of the container.

GRADES

§ 52.1397 *Grades of honey.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of honey that contains not less than 81.4 percent soluble solids,[1] possesses a good flavor for the predominant floral source or, when blended, a good flavor for the blend of floral sources, is free from defects, and is of such quality with respect to clarity as to score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of honey that contains not less than 81.4 percent soluble solids,[1] possesses a reasonably good flavor for the predominant floral source or, when blended, a reasonably good flavor for the blend of floral sources, is reasonably free from defects, is reasonably clear, and scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is honey for reprocessing that contains not less than 80 percent soluble solids,[1] possesses a fairly good flavor for the predominant floral source or, when blended, a fairly good flavor for the blend of floral sources, is fairly free from defects, and is of such quality with respect to clarity as to score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is the quality of honey that fails to meet the requirements of "U. S. Grade C" or "U. S. Standard."

FACTORS OF QUALITY

§ 52.1398 *Ascertaining the grade.* (a) The grade of honey may be ascertained by considering in conjunction with the requirements of the various grades the respective ratings for the factors of flavor, absence of defects, and clarity.

(b) The soluble solids content of honey may be determined by means of the refractometer at 20° C. (68° F.). The refractive indices and corresponding percent soluble solids and equivalent specific gravity and percent of moisture may be ascertained from Table No. II of this section. The soluble solids content of honey and equivalent values may be determined by any other method which gives equivalent results.

(c) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | Points |
|---|---|
| Flavor | 50 |
| Absence of defects | 40 |
| Clarity | 10 |
| Total score | 100 |

(d) Crystallized honey and partially crystallized honey shall be liquefied by heating to approximately 54.4° C. (130° F.) and cooled to approximately 20° C. (68° F.) before ascertaining the grade of the product.

§ 52.1399 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range for the rating of each factor is inclusive (for example, "27 to 30 points" means 27, 28, 29, or 30 points).

§ 52.1400 *Flavor*—(a) *General.* The factor of flavor refers to the prominence of the honey flavor and aroma and to its conformity to the flavor and aroma of the predominant floral source or blend of floral sources.

(b) (*A*) *classification.* Honey that possesses a good flavor for the predominant floral source may be given a score of 45 to 50 points. "Good flavor for the predominant floral source" means that the product has a good, normal flavor and aroma for the predominant floral source or, when blended, a good flavor for the blend of floral sources and that the honey is free from caramelized flavor or objectionable flavor caused by fermentation, smoke, chemicals or other causes with the exception of the predominant floral source.

(c) (*B*) *classification.* If the honey possesses a reasonably good flavor for the predominant floral source, a score of 40 to 44 points may be given. Honey that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably good flavor for the predominant floral source" means that the product has a reasonably good, normal flavor and aroma for the predominant floral source or, when blended, a reasonably good flavor for the blend of floral sources and that the honey is practically free from caramelized flavor and is free from objectionable flavor caused by fermentation, smoke chemicals or other causes with the exception of the predominant floral source.

(d) (*C*) *classification.* Honey that possesses a fairly good flavor for the predominant floral source may be given a score of 35 to 39 points. Honey that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Standard" regardless of the total score for the product (this is a limiting rule).

"Fairly good flavor for the predominant floral source" means that the product has a fairly good, normal flavor and aroma for the predominant floral source or, when blended, a fairly good flavor for the blend of floral sources and that the honey may possess a slightly caramelized flavor, is free from objectionable flavor caused by fermentation, smoke, chemicals or other causes with the exception of the predominant floral source.

(e) (*SStd*) *classification.* Honey that fails to meet the requirements of paragraph (d) of this section or is off flavor for any reason may be given a score of 0 to 34 points and shall not be graded above "U. S. Grade D" or "Substandard" regardless of the total score for the product (this is a limiting rule).

§ 52.1401 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of cleanliness and to the degree of freedom from particles of comb, propolis, or other defects which may be in suspension or deposited as sediment in the container.

(b) (*A*) classification. Honey that is free from defects may be given a score of 37 to 40 points. "Free from defects" means that the honey contains no defects that affect the appearance or edibility of the product, and shall be at least as free from defects as honey that has been strained through a standard No. 80 sieve, at a temperature of not more than 130° F.

(c) (*B*) *classification.* If the honey is reasonably free from defects a score of 34 to 36 points may be given. Honey that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the honey may contain defects which do not materially affect the appearance or edibility of the product, and shall be at least as free from defects as honey that has been strained through a standard No. 50 sieve, at a temperature of not more than 130° F.

(d) (*C*) *classification.* Honey that is fairly free from defects may be given a score of 31 to 33 points. Honey that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Standard" regardless of the total score for the product (this a limiting rule). "Fairly free from defects" means that the honey may contain defects which may be noticeable but shall be at least as free from defects as honey that has been strained through a standard No. 18 sieve, at a temperature of not more than 130° F.

(e) (*SStd*) *classification.* Honey that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 29 points and shall not be graded above "U. S. Grade D" or "Substandard" regardless of the total score for the product (this is a limiting rule).

§ 52.1402 *Clarity*—(a) *General.* The factor of clarity has reference to the degree of freedom from air bubbles, pollen grains, or fine particles of any material which might be suspended in the product.

(b) (*A*) *classification.* Honey that is clear may be given a score of 8 to 10 points. "Clear" means that the honey may contain air bubbles which do not materially affect the appearance of the product and may contain a trace of pollen grains or other finely divided particles of suspended material which does not affect the appearance of the product.

(c) (*B*) *classification.* If the honey is reasonably clear a score of 6 to 7 points may be given. "Reasonably clear" means that the honey may contain air bubbles, pollen grains, or other finely divided particles of suspended material which does not materially affect the appearance of the product.

(d) (*C*) *classification.* Honey that is fairly clear may be given a score of 4 to 5 points. Honey that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Standard" regardless of the total score for the product (this is a limiting rule). "Fairly clear" means that the appearance of the honey may be materially but not seriously affected by the presence of air bubbles, pollen grains, or other finely divided particles of suspended material.

(e) (*SStd*) *classification.* Honey that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 3 points and shall not be graded above "U. S. Grade C" or "U. S. Standard" regardless of the total score for the product (this is a limiting rule).

TABLE NO. II—REFRACTIVE INDICES AND CORRESPONDING PERCENT SOLUBLE SOLIDS, EQUIVALENT SPECIFIC GRAVITY AND PERCENT MOISTURE IN EXTRACTED HONEY[1]

| Refractive index at 20° C. | Soluble solids (percent) | Specific gravity (20°/20° C.) at 20° C. | Moisture (percent) |
|---|---|---|---|
| 1.4844 | 79.0 | 1.3966 | 21.0 |
| 1.4840 | 79.2 | 1.3979 | 20.8 |
| 1.4835 | 79.4 | 1.3992 | 20.6 |
| 1.4825 | 79.6 | 1.4006 | 20.4 |
| 1.4822 | 79.8 | 1.4020 | 20.2 |
| 1.4818 | 80.0 | 1.4033 | 20.0 |
| 1.4871 | 80.2 | 1.4046 | 19.8 |
| 1.4867 | 80.4 | 1.4060 | 19.6 |
| 1.4863 | 80.6 | 1.4074 | 19.4 |
| 1.4858 | 80.8 | 1.4087 | 19.2 |
| 1.4850 | 81.0 | 1.4101 | 19.0 |
| 1.4845 | 81.2 | 1.4115 | 18.8 |
| 1.4900 | 81.4 | 1.4129 | 18.6 |
| 1.4895 | 81.6 | 1.4143 | 18.4 |
| 1.4891 | 81.8 | 1.4156 | 18.2 |
| 1.4885 | 82.0 | 1.4171 | 18.0 |
| 1.4880 | 82.2 | 1.4184 | 17.8 |
| 1.4875 | 82.4 | 1.4197 | 17.6 |
| 1.4870 | 82.6 | 1.4212 | 17.4 |
| 1.4865 | 82.8 | 1.4225 | 17.2 |
| 1.4940 | 83.0 | 1.4239 | 17.0 |
| 1.4935 | 83.2 | 1.4254 | 16.8 |
| 1.4930 | 83.4 | 1.4267 | 16.6 |
| 1.4925 | 83.6 | 1.4283 | 16.4 |
| 1.4920 | 83.8 | 1.4295 | 16.2 |
| 1.4915 | 84.0 | 1.4310 | 16.0 |
| 1.4910 | 84.2 | 1.4324 | 15.8 |
| 1.4975 | 84.4 | 1.4338 | 15.6 |
| 1.4970 | 84.6 | 1.4352 | 15.4 |
| 1.4965 | 84.8 | 1.4367 | 15.2 |
| 1.4960 | 85.0 | 1.4381 | 15.0 |
| 1.5035 | 85.2 | 1.4395 | 14.8 |
| 1.5030 | 85.4 | 1.4409 | 14.6 |
| 1.5025 | 85.6 | 1.4424 | 14.4 |
| 1.5019 | 85.8 | 1.4438 | 14.2 |
| 1.5015 | 86.0 | 1.4453 | 14.0 |
| 1.5010 | 86.2 | 1.4466 | 13.8 |
| 1.5005 | 86.4 | 1.4481 | 13.6 |
| 1.5000 | 86.6 | 1.4495 | 13.4 |
| 1.4995 | 86.8 | 1.4510 | 13.2 |
| 1.5041 | 87.0 | 1.4525 | 13.0 |

[1] Temperature corrections: If refractometer reading is made at temperatures above 20° C. (68° F.), add 0.00023 for each degree C., or 0.00013 for each degree F. If made below 20° C. (68° F.), subtract correction. The moisture content of honey and equivalent values may be determined by any other method which gives equivalent results.

LOT CERTIFICATION TOLERANCES

§ 52.1403 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of extracted honey, the grade for such lot will be determined by averaging the total scores of all the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor subject to such limiting rule must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal, Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1404 *Score sheet for extracted honey.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN CONCENTRATE FOR LEMONADE[1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1421 *Product description.* Frozen concentrate for lemonade is the product prepared from lemon juice and one or more nutritive sweetening ingredients; it may contain added lemon oil or concentrated lemon oil (or their extracts or emulsions) and may or may not contain water in sufficient quantities to standardize the product. The lemon juice is produced from fresh, sound, ripe, and thoroughly cleansed fruit of one or more of the high acid varieties of the species citrus limon (limonia). Such juice may be fresh or frozen or fresh concentrated or frozen concentrated: *Provided,* That not less than 20 percent, by weight, of the acidity of the product is derived from unconcentrated fresh or frozen lemon juice. The concentrate for lemonade is processed in accordance with good commercial practice and is frozen and maintained at temperatures sufficient for the preservation of the product.

§ 52.1422 *Grades of frozen concentrate for lemonade.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen concentrate for lemonade which mixes readily into a lemonade that possesses an amount of pulp, cloud, and juice sacs so as to substantially reflect the appearance of lemonade prepared from freshly expressed lemon juice; that possesses a good color; that is practically free from defects; that possesses a good flavor; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this section.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen concentrate for lemonade which mixes readily into a lemonade that possesses at least a slight, but not an excessive, amount of pulp, cloud, and juice sacs so as to reasonably reflect the appearance of lemonade prepared from freshly expressed lemon juice; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(c) "Substandard" is the quality of frozen concentrate for lemonade that fails to meet the requirements of "U. S. Grade B" or "U. S. Choice."

FILL OF CONTAINER

§ 52.1423 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container be filled as full as practicable with frozen concentrate for lemonade.

FACTORS OF QUALITY

§ 52.1424 *Ascertaining the grade.* (a) The grade of frozen concentrate for lemonade is ascertained by considering the requirements with respect to the ease with which the product mixes into a lemonade and to the amount of pulp, cloud and juice sacs present in the lemonade, which factors are not scored, and the factors of color, absence of defects, and flavor which are scored.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 20 |
| Flavor | 60 |
| Total score | 100 |

(c) The scores for the factors of color, absence of defects, and flavor are deter-

[1] Percent moisture and other equivalents may be ascertained from Table No. II of this section.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal, Food, Drug, and Cosmetic Act.

mined immediately after the product has been prepared as lemonade by thoroughly mixing the frozen concentrate for lemonade with a specific volume of water as directed by the manufacturer.

§ 52.1425 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means, 17, 18, 19, or 20 points).

§ 52.1426 *Color*—(a) *(A) classification.* Frozen concentrate for lemonade which, when prepared as lemonade, possesses a good color may be given a score of 17 to 20 points. "Good color" means a good bright characteristic color that reflects the appearance of lemonade prepared from freshly expressed lemon juice.

(b) *(B) classification.* If the frozen concentrate for lemonade, when prepared as lemonade, possesses a reasonably good color, a score of 14 to 16 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice," regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means a characteristic color that reflects to a reasonable extent the color of lemonade prepared from freshly expressed lemon juice and is not dark or otherwise discolored for any reason.

(c) *(SStd) classification.* If the lemonade fails to meet the requirements of paragraph (b) of this section, a score of 0 to 13 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

§ 52.1427 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from seeds or portions of seeds, from harmless extraneous material, from objectionable material and from other defects not specifically mentioned that affect the appearance or drinking quality of the product.

(1) "Harmless extraneous material" includes, but is not limited to, embryonic seeds or particles of seeds that measure not more than $^3/_{16}$ inch in any dimension, or other similar material which is harmless.

(2) "Seeds or portions of seeds" means any seed or portion thereof, whether or not fully developed, that measures more than $^3/_{16}$ inch in any dimension.

(b) *(A) classification.* Frozen concentrate for lemonade which, when prepared as lemonade, is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that there may be present not more than an average of 1 seed or portion of seed for each quart of prepared lemonade; and that the appearance and drinking quality of the lemonade is not materially affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(c) *(B) classification.* If the lemonade is reasonably free from defects a score of 14 to 16 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present not more than an average of 2 seeds or portions of seeds for each quart of lemonade; and that the appearance and drinking quality of the lemonade is not seriously affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(d) *(SStd) classification.* If the lemonade fails to meet the requirements of paragraph (c) of this section, a score of 0 to 13 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

§ 52.1428 *Flavor*—(a) *(A) classification.* Frozen concentrate for lemonade which, when prepared as lemonade, possesses a good flavor, may be given a score of 51 to 60 points. "Good flavor" means a fine, distinct, and substantially typical flavor of lemonade prepared from freshly expressed lemon juice and which flavor is free from terpenic, oxidized, rancid, or other off-flavors. To score in this classification, the lemonade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 grams of acid per 100 ml of the lemonade; may not contain more than 0.02 ml of recoverable oil per 100 ml of the lemonade; and the Brix-acid ratio shall not exceed 20:1.

(b) *(B) classification.* If the prepared lemonade possesses a reasonably good flavor, a score of 42 to 50 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably good flavor" means a fairly typical flavor of lemonade prepared from freshly expressed lemon juice and which flavor is practically free from terpenic, oxidized, rancid, or other off-flavors and is free from abnormal flavors of any kind. To score in this classification the lemonade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 gram of acid per 100 ml of the lemonade, may contain not more than 0.03 ml of recoverable oil per 100 ml of the lemonade; and the Brix-acid ratio shall not exceed 20:1.

(c) *(SStd) classification.* If the prepared lemonade fails to meet the requirements of paragraph (b) of this section, a score of 0 to 41 points may be given. Frozen concentrate for lemonade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1429 *Definition of terms.* (a) "Brix" means the degrees Brix of the lemonade when tested with a Brix hydrometer calibrated at 20° C. (68° F.). If used in testing lemonade at a temperature other than 20° C. (68° F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of lemonade may be determined by any other method which gives equivalent results.

(b) "Acid" means the grams of acid (calculated as anhydrous citric acid) per 100 ml of the prepared lemonade determined by titration with standard sodium hydroxide solution using phenolphthalein as an indicator.

(c) "Brix-acid ratio" means the ratio between the degrees "Brix" as determined in this section and the acid in grams per 100 ml of lemonade.

(d) "Dilution factor" is the value obtained by dividing a volume of lemonade by the volume of concentrate for lemonade used in its preparation when such lemonade is prepared in accordance with the manufacturers directions.

§ 52.1430 *Explanation of analyses.* Recoverable oil is determined by the following method:

(a) *Equipment.*

Oil separatory trap similar to either of those illustrated in Figure 1 [2] and Figure 2 [2]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(b) *Procedure.* Place exactly 1 liter of the concentrate for lemonade with approximately 1 liter of water in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from bottom to top, and bring the mixture to a boil. Continue boiling for one hour at the rate of approximately 50 drops per minute. By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered. The number of milliliters of oil recovered divided by 10 times the dilution factor is equivalent to the number of milliliters of oil per 100 milliliters of the lemonade.

LOT CERTIFICATION TOLERANCES

§ 52.1431 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen concentrate for lemonade the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

[2] Figures 1 and 2 filed as part of the original document.

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1432 *Score sheet for frozen concentrate for lemonade.*

| | | | |
|---|---|---|---|

SUBPART—UNITED STATES STANDARDS FOR GRADES OF ORANGE MARMALADE [1]

PRODUCT DESCRIPTION, KINDS, STYLES, TYPES, GRADES

§ 52.1451 *Product description.* Orange marmalade is the semi-solid or gel-like product prepared from orange fruit ingredients together with one or more sweetening ingredients and may contain suitable food acids, food pectins, lemon juice, or lemon peel. The ingredients are concentrated by cooking to such a point that the soluble solids content of the finished marmalade is not less than 68 percent.

§ 52.1452 *Kinds of orange marmalade.* (a) "Sweet orange marmalade" means that the orange fruit ingredient consists principally of such varieties as Navel and Valencia or other commercial dessert varieties other than tangerines. "Sweet orange marmalade" is prepared from not less than 30 parts by weight of orange fruit ingredient to 70 parts by weight of sweetening ingredient.

(b) "Bitter orange marmalade" means that the orange fruit ingredient consists principally of the Seville or sour type of oranges other than tangerines. "Bitter orange marmalade" is prepared from not less than 25 parts by weight of orange fruit ingredient to 75 parts by weight of sweetening ingredient.

(c) "Sweet and bitter orange marmalade" means that the orange fruit ingredient consists of a blend of sweet oranges and bitter oranges other than tangerines. "Sweet and bitter orange marmalade" is prepared from not less than 30 parts by weight of orange fruit ingredient to 70 parts by weight of sweetening ingredient. It is recommended that the orange fruit ingredient from which "Sweet and bitter orange marmalade" is prepared be approximately 50 percent by weight of sweet orange material and bitter orange material.

§ 52.1453 *Styles of orange marmalade.* (a) "Sliced" means that the peel in the orange marmalade is in thin strips.

(b) "Chopped" means that the peel in the orange marmalade is in small pieces (such as irregular shapes and dice-like shapes).

§ 52.1454 *Types of orange marmalade.* (a) "Type I, Clear" means that the peel is suspended in a translucent semi-solid or gel-like mass.

(b) "Type II, Natural" means that the peel is suspended in a cloudy or opaque semi-solid or gel-like mass.

§ 52.1455 *Grades of orange marmalade.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of orange marmalade that is practically free from defects; that possesses a good flavor and odor; and that is of such quality with respect to color and consistency and character as to score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of orange marmalade that possesses a reasonably good color; that possesses a reasonably good consistency and character; that is reasonably free from defects; that possesses a reasonably good flavor and odor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of orange marmalade that fails to meet the requirements of U. S. Grade B or U. S. Choice.

FILL OF CONTAINER

§ 52.1456 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled as full as practicable with orange marmalade and that the product occupy not less than 90 percent of the volume of the container.

FACTORS OF QUALITY

§ 52.1457 *Ascertaining the grade.* The grade of orange marmalade is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, consistency and character, absence of defects, and flavor and odor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Consistency and character | 20 |
| Absence of defects | 20 |
| Flavor and odor | 40 |
| Total score | 100 |

§ 52.1458 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1459 *Color*—(a) *(A) classification.* Orange marmalade that possesses a good color may be given a score of 17 to 20 points. "Good color" means that the product possesses a practically uniform bright color characteristic of properly prepared and properly processed orange marmalade for the respective kind; that the product is practically free from green-colored peel, and that the product is free from dullness of color due to oxidation or improper processing or improper cooling or other causes.

(b) *(B) classification.* If the orange marmalade possesses a reasonably good color, a score of 14 to 16 points may be given. "Reasonably good color" means that the product possesses a reasonably uniform color; that the product is reasonably free from green-colored peel; that the color of the product may be slightly dull but is not off-color nor excessively dark due to oxidation or improper processing or improper cooling or other causes.

(c) *(SStd) classification.* Orange marmalade that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1460 *Consistency and character*—(a) *General.* The factor of consistency and character refers to the gel strength of the product, the amount and distribution of the peel in the product, the tenderness of the peel, the uniformity of width of slices of peel, and the uniformity of size of small pieces of peel.

(b) *(A) classification.* Orange marmalade that possesses a good consistency and character may be given a score of 17 to 20 points. "Good consistency and character" means that the product is a firm but tender gel and may possess no more than a very slight tendency to flow; that the product contains a substantial, but not excessive, amount of peel; that the peel is evenly distributed; that the peel is tender; that in "sliced" style, the thin strips of peel are predominantly of strips approximating $^1/_{32}$ inch to $^1/_{16}$ inch in width; and that in

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

"chopped" style, the small pieces of peel are reasonably uniform in size.

(c) *(B) classification.* If the orange marmalade possesses a reasonably good consistency and character, a score of 14 to 16 points may be given. "Reasonably good consistency and character" means that the product may be definitely firm but is not excessively gummy nor excessively rubbery or that the product may be viscous but is not excessively thin; that the peel is fairly evenly distributed; that the peel is reasonably tender; that in "sliced" style, the thin strips of peel are predominantly of strips approximating no more than $\frac{1}{8}$ inch in width; and that in "chopped" style, the small pieces of peel are fairly uniform in size.

(d) *(SStd) classification.* Orange marmalade that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1461 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from seeds or portions of seeds, from blemished peel, from objectionable material, from harmless extraneous material, and from any other defects not specifically mentioned that affect the appearance and eating quality of the product.

(1) "Harmless extraneous material" includes, but is not limited to, small particles of leaves, undeveloped seeds or particles of seeds that measure not more than $\frac{3}{16}$ inch in any dimension, or other similar materials that are harmless.

(2) "Seeds or portions of seeds" means any seed or any portion thereof, whether or not fully developed, that measures more than $\frac{3}{16}$ inch in any dimension.

(3) "Blemished peel" means pieces of the peel blemished by surface discoloration to the extent that the appearance or eating quality is materially affected.

(b) *(A) classification.* Orange marmalade that is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that there may be present on an average for each 16 ounces net weight, not more than 1 seed or portion of seed and not more than 6 pieces of blemished peel; and that in a single container, the appearance and eating quality of the product is not materially affected by the presence of seeds, portions of seeds, blemished peel, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(c) *(B) classification.* If the orange marmalade is reasonably free from defects, a score of 14 to 16 points may be given. Orange marmalade that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present on an average for each 16 ounces net weight, not more than a total of 2 seeds or portions of seeds and not more than 10 pieces of blemished peel; and that in a single container, the appearance and eating quality of the product is not seriously affected by the presence of seeds, portions of seeds, blemished peel, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(d) *(SStd) classification.* Orange marmalade that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1462 *Flavor and odor*—(a) *(A) classification.* Orange marmalade that possesses a good flavor and odor may be given a score of 34 to 40 points. "Good flavor and odor" means that the product possesses a good and distinct flavor and aroma characteristic of properly processed orange marmalade for the respective kind; that the flavor of the product is neither excessively tart nor excessively sweet; and that the product is free from any caramelized flavor and is free from objectionable flavor and objectionable odor of any kind.

(b) *(B) classification.* If the orange marmalade possesses a reasonably good flavor and odor, a score of 28 to 33 points may be given. Orange marmalade that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good flavor and odor" means that the product possesses a reasonably good flavor characteristic of the orange marmalade for the respective kind; that the flavor of the product may be excessively tart or excessively sweet or may possess a slightly caramelized flavor but that the product is free from objectionable flavor and objectionable odor of any kind.

(c) *(SStd) classification.* Orange marmalade that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1463 *Explanation of terms or analyses.* (a) "Orange fruit ingredient" means the edible portions of clean, sound, mature oranges free from material dryness and damage by freezing, including properly prepared orange peel and orange juice but excluding oranges that are artificially colored. Orange fruit ingredients consist of a mixture of cooked orange peel or canned orange peel together with fresh, cooked, canned, concentrated, or frozen orange juice or any combination thereof. The orange juice may be strained or filtered or may contain part or all of the cellular or edible fibrous portions of the oranges used.

(b) The "weight of orange fruit ingredient" means:

(1) The weight of orange peel after the removal of waste materials commonly removed therefrom and prior to steaming or cooking or canning and exclusive of any added water, water used in preparation, added sweetening ingredients, lemon peel, or lemon juice;

(2) The weight of orange juice, whether concentrated or not, approximating the average soluble solids of single-strength juice; and

(3) That the proportion by weight of such orange peel to such orange juice approximates not more than the orange peel (exclusive of waste materials commonly removed therefrom) and orange juice from sound, mature oranges free from material dryness and damage by freezing.

(c) "Sweetening ingredients" mean sugar, invert sugar sirup, dextrose, corn sirup, corn sirup solids, glucose sirup, or any mixture thereof.

(d) The "weight of sweetening ingredient" means the weight of the solids of such ingredient or ingredients.

(e) "Soluble solids content" is determined by the method prescribed in the "Official Methods of Analysis of the Association of Official Agricultural Chemists" as outlined under the applicable method for determining the soluble solids in marmalades, except that no correction is made for water-insoluble solids.

LOT CERTIFICATION TOLERANCES

§ 52.1464 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of orange marmalade, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Note more than one sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards for quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1465 *Score sheet for orange marmalade.*

| Factors | Score points | |
|---|---|---|
| Color | 20 | (A) 17–20<br>(B) 14–16<br>(D) 1 0–13 |

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED MUSHROOMS [1]

IDENTITY, COLOR, STYLES, AND GRADES

§ 52.1481 *Identity.* "Canned mushrooms" means canned mushrooms as defined in the definitions and standards of identity for canned vegetables (21 CFR 52.990) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.1482 *Color.* (a) White or cream. (b) Brown.

§ 52.1483 *Styles of canned mushrooms.* (a) "Whole" or "whole mushrooms" means canned mushrooms consisting of the caps with the veils closed and with stems attached.

(b) "Button" or "button mushrooms" means canned mushrooms consisting of the caps with veils closed and with stems removed immediately below the veil.

(c) "Sliced whole" or "sliced whole mushrooms" means canned mushrooms consisting of slices of whole mushrooms which have been sliced parallel to the longitudinal axis.

(d) "Sliced button" or "sliced buttons" means canned mushrooms consisting of slices of buttons which have been sliced at right angles to the diameter of the cap.

(e) "Stems and pieces" means cut or broken portions of caps and stems.

(f) "Unit" means an individual mushroom or portion of a mushroom in canned mushrooms.

§ 52.1484 *Grades of canned mushrooms.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned mushrooms that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a good color; that are practically free from defects; that possess a good character; that are uniform in size and shape; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 85 points: *Provided*, That the canned mushrooms may be fairly uniform in size and shape if the total score is not less than 85 points.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned mushrooms that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a fairly good color; that are fairly free from defects; that possess a fairly good character; that are fairly uniform in size and shape; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of canned mushrooms that fail to meet the requirements of U. S. Grade C or U. S. Standard.

SIZES, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.1485 *Sizes of mushrooms in whole and button mushrooms.* (a) No. 0 (Midget) mushrooms will pass through a round opening $\frac{1}{2}$ inch in diameter.

(b) No. 1 (Tiny) mushrooms will pass through a round opening $\frac{5}{8}$ inch in diameter but will not pass through a round opening $\frac{1}{2}$ inch in diameter.

(c) No. 2 (Small) mushrooms will pass through a round opening $\frac{7}{8}$ inch in diameter but will not pass through a round opening $\frac{5}{8}$ inch in diameter.

(d) No. 3 (Medium) mushrooms will pass through a round opening $1\frac{1}{8}$ inches in diameter but will not pass through a round opening $\frac{7}{8}$ inch in diameter.

(e) No. 4 (Large) mushrooms will pass through a round opening $1\frac{3}{8}$ inches in diameter but will not pass through a round opening $1\frac{1}{8}$ inches in diameter.

(f) No. 5 (Extra Large) mushrooms are those too large to pass through a round opening $1\frac{3}{8}$ inches in diameter.

§ 52.1486 *Fill of container for canned mushrooms.* The standard for fill of container for canned mushrooms is not incorporated in the grades of the finished product, since fill of container, as such, is not a factor of quality for the purpose of these grades. The standard of fill of containers is not less than 56 percent of the water capacity of the container if such capacity is less than 11.0 ounces avoirdupois; not less than 59 percent of the water capacity of the container if such capacity is 11.0 ounces or more but less than 25 ounces avoirdupois; and not less than 62 percent of the water capacity of the container if such capacity is 25 ounces avoirdupois or more. Canned mushrooms which do not meet this requirement are "Below standard in fill."

§ 52.1487 *Minimum drained weight.* The minimum drained weights in Table No. I of this section are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of canned mushrooms is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and mushrooms less the weight of the dry sieve. A sieve 8 inches in diameter is used for No. $2\frac{1}{2}$ size cans (401" x 411") and smaller and a sieve 12 inches in diameter is used for containers larger than the No. $2\frac{1}{2}$ size can.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

TABLE NO. I—MINIMUM DRAINED WEIGHTS, IN OUNCES, OF CANNED MUSHROOMS

| Container designation | Over-all dimensions | | Weight of drained mushrooms, ounces (av. dupois) |
|---|---|---|---|
| | Diameter (inches) | Height (inches) | |
| 2 Z mushroom (202 x 204) | $2\frac{1}{4}$ | $2\frac{1}{4}$ | 2 |
| 6 Z (202 x 308) | $2\frac{1}{8}$ | $3\frac{1}{2}$ | $3\frac{1}{4}$ |
| 4 Z mushroom (211 x 212) | $2\frac{11}{16}$ | $2\frac{3}{4}$ | 4 |
| 8 Z tall (211 x 304) | $2\frac{11}{16}$ | $3\frac{3}{4}$ | $4\frac{3}{4}$ |
| 8-ounce glass | | | $4\frac{3}{4}$ |
| No. 1 picnic (211 x 400) | $2\frac{13}{16}$ | 4 | 6 |
| 8 Z mushroom (300 x 400) | 3 | 4 | 8 |
| No. 300 (300 x 407) | 3 | $4\frac{7}{16}$ | 9 |
| No. 1 tall (301 x 411) | $3\frac{1}{16}$ | $4\frac{11}{16}$ | $9\frac{3}{4}$ |
| No. 303 (303 x 406) | $3\frac{1}{16}$ | $4\frac{3}{8}$ | 10 |
| No. 303 glass | | | 10 |
| No. 2 (307 x 409) | $3\frac{7}{16}$ | $4\frac{9}{16}$ | 12 |
| Jumbo (307 x 510) | $3\frac{7}{16}$ | $5\frac{5}{8}$ | 16 |
| No. 10 (603 x 700) | $6\frac{3}{16}$ | 7 | 68 |

FACTORS OF QUALITY

§ 52.1488 *Ascertaining the grade.* (a) The grade of canned mushrooms is ascertained by considering in conjunction with the requirements of the respective grade the respective ratings for the factors of color, uniformity of size and symmetry, absence of defects, and tenderness.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | *Points* |
|---|---|
| Color | 30 |
| Uniformity of size and shape | 20 |
| Absence of defects | 30 |
| Character | 20 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the product is free from objectionable flavors and objectionable odors of any kind.

§ 52.1489 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1490 *Color*—(a) *(A) classification.* Canned mushrooms that possess a good color may be given a score of 26 to 30 points. "Good color" means that the canned mushrooms possess a color that is practically uniform, bright, and typical of canned mushrooms produced from mushrooms of similar varietal characteristics and meet the following additional requirements for the respective color:

(1) *"White" or "cream."* The color of the surface of the cap of the individual mushroom or portion of mushroom of white or cream varieties is not lighter in color than Plate 10, F–2, and is not darker in color than Plate 11, I–5, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(2) *"Brown."* The color of the surface of the cap of the individual mushroom or portion of mushroom of brown varieties is not lighter in color than Plate 11, J–6, and is not darker than

Plate 13, K–7, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(b) *(C) classification.* Canned mushrooms that possess a fairly good color may be given a score of 22 to 25 points. Canned mushrooms that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the canned mushrooms possess a color that is typical of canned mushrooms produced from mushrooms of similar varietal characteristics and that the product may be dull but not to the extent that the appearance is seriously affected and meet the following additional requirements for the respective colors:

(1) *"White" or "cream."* The color of the surface of the cap of the individual mushroom or portion of mushroom of white or cream varieties may be lighter in color than Plate 10, F–2, but not excessively white, and may be slightly darker in color than Plate 11, I–5: *Provided,* That the gills of none of the units are darker than Plate 14, K–8, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(2) *"Brown."* The color of the surface of the cap of the individual mushroom or portion of mushroom of brown varieties may be lighter in color than Plate 11, J–6, but not excessively light, and may be darker in color than Plate 13, K–7: *Provided,* That the gills of none of the units are darker than Plate 14, K–8, as illustrated in Maerz and Paul's Dictionary of Color.[2]

(c) *(SStd) classification.* Canned mushrooms that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1491 *Uniformity of size and shape*—(a) *(A) classification.* Canned mushrooms that are practically uniform in size and shape may be given a score of 17 to 20 points. "Practically uniform in size and shape" has the following meanings with respect to the various styles of canned mushrooms:

(1) *Whole mushrooms.* The stems are cut transversely and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ⅛ inch. The units shall be practically uniform in shape.

(2) *Button mushrooms.* The stems are cut transversely so that the distance from the top of the cap to the end of the stem does not exceed the diameter of the cap, and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ⅛ inch. The units shall be practically uniform in shape.

(3) *Sliced whole mushrooms.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅜ inch and the presence of irregular shaped units does not materially affect the appearance of the product.

[2] First edition.

(4) *Sliced buttons.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅜ inch and the presence of irregular shaped units does not materially affect the appearance of the product.

(5) *Stems and pieces.* Stems and pieces may be irregular in size and shape: *Provided,* That the presence of very small pieces does not materially affect the appearance of the product.

(b) *(C) classification.* If the canned mushrooms are fairly uniform in size and shape a score of 13 to 16 points may be given. "Fairly uniform in size and shape" has the following meanings with respect to the various styles of canned mushrooms:

(1) *Whole mushrooms.* The stems are cut transversely and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ¼ inch. The units shall be fairly uniform in shape.

(2) *Button mushrooms.* The stems are cut transversely so that not more than 10 percent, by count, of the mushrooms have stems of such length that the distance from the tip of the cap to the end of the stem exceeds the diameter of the cap, and the diameter of the largest cap does not exceed the diameter of the smallest cap by more than ¼ inch. The units shall be fairly uniform in shape.

(3) *Sliced whole mushrooms.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅝ inch and the presence of irregular shaped units does not seriously affect the appearance of the product.

(4) *Sliced buttons.* The length of the longest center slice does not exceed the length of the shortest center slice by more than ⅝ inch and the presence of irregular shaped units does not seriously affect the appearance of the product.

(5) *Stems and pieces.* Stems and pieces may be irregular in size and shape.

(c) *(SStd) classification.* Canned mushrooms that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 12 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1492 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from units which are damaged or seriously damaged.

(1) "Damaged" means damaged by discoloration, pathological injury, insect injury, mechanical injury, or damaged by other means to such an extent that the appearance or eating quality of the unit is materially affected. (Knife marks resulting from the preparation of sliced whole or sliced button mushrooms are not considered mechanical injury.)

(2) "Seriously damaged" means damaged to such an extent that the appearance or eating quality of the unit is seriously affected.

(b) *(A) classification.* Canned mushrooms that are practically free from defects may be given a score of 25 to 30 points. "Practically free from defects" means that there may be present not more than 5 percent, by weight, of damaged or seriously damaged units: *Provided,* That not more than 1 percent, by weight, of all the units, or 1 unit, whichever is greater, may be seriously damaged units.

(c) *(C) classification.* If the canned mushrooms are fairly free from defects, a score of 22 to 24 points may be given. Canned mushrooms that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present not more than 20 percent, by weight, of damaged or seriously damaged units: *Provided,* That not more than 2 percent, by weight, of all the units, or 2 units, whichever is greater, may be seriously damaged units.

(d) *(SStd) classification.* Canned mushrooms that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1493 *Character*—(a) *General.* The factor of character refers to the tenderness and texture of the canned mushrooms and the development of the cap.

(1) "Closed veil" means that the membrane which extends from the inner edge of the cap to the stem practically covers the gills.

(b) *(A) classification.* Canned mushrooms that possess a good character may be given a score of 17 to 20 points. "Good character" means that the units are intact, practically all are tender and free from fibrous or rubbery units, and that with respect to whole and button mushrooms at least 95 percent, by weight, of all the units possess closed veils.

(c) *(C) classification.* If the canned mushrooms have a fairly good character a score of 13 to 16 points may be given. Canned mushrooms that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the units are reasonably intact, may be fairly tender and reasonably free from fibrous or rubbery units, and that with respect to whole and button mushrooms at least 90 percent, by weight, of all the units possess closed veils.

(d) *(SStd) classification.* Canned mushrooms that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 12 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1494 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned mushrooms, the grade for such lot will be determined by averaging the total scores of all containers, if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN OKRA[1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1511 *Product description.* Frozen okra is the product prepared from the fresh, immature, succulent pods of the okra plant (Hibiscus esculentus) of either the green or white varieties, by proper washing, trimming and blanching, and which pods are then frozen and stored at temperatures necessary for the preservation of the product.

§ 52.1512 *Styles of frozen okra.* (a) "Whole okra" means frozen okra consisting of whole pods, with or without the caps removed.

(b) "Cut" or "Cuts" means frozen okra consisting of pods with or without the caps removed, which have been cut transversely into pieces not less than ½ inch in length.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(c) "Unit" means an individual pod or portion of a pod in frozen okra.

§ 52.1513 *Grades of frozen okra.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen okra that possesses similar varietal characteristics; that possesses a good flavor and odor; that possesses a good character; that is practically free from defects; and is of such quality with respect to color as to score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen okra that possesses similar varietal characteristics; that possesses a fairly good flavor and odor; that possesses a reasonably good character; that is reasonably free from defects; that possesses a reasonably good color; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of frozen okra that fails to meet the requirements of U. S. Grade B or U. S. Extra Standard.

SIZE

§ 52.1514 *Size of frozen okra.* The size of the unit is not a factor of quality for the purpose of these grades. The size of a unit is determined by measuring the length of the unit.

FACTORS OF QUALITY

§ 52.1515 *Ascertaining the grade.* (a) The grade of frozen okra may be ascertained by considering in conjunction with the requirements of the respective grade the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each scoring factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) The scores for the factors of color, absence of defects, and character with respect to development of pods and seeds are determined immediately after thawing to the extent that the product is substantially free from ice crystals and can be handled as individual units. The degree of tenderness and freedom from fiber and flavor and odor are determined after the product is cooked.

(d) "Good flavor and odor" means that the product after cooking has a good, characteristic, normal flavor and odor and is free from objectionable flavors and odors of any kind.

(e) "Fairly good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1516 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1517 *Color*—(a) *(A) classification.* Frozen okra that possesses a good color may be given a score of 17 to 20 points. "Good color" means that the color of the frozen okra is bright, practically uniform and typical of young and tender okra of similar varietal characteristics.

(b) *(B) classification.* If the frozen okra possesses a reasonably good color a score of 14 to 16 points may be given. "Reasonably good color" means that the frozen okra possesses a color that is typical of reasonably young and reasonably tender okra of similar varietal characteristics which may be dull but is not off color.

(c) *(SStd) classification.* Frozen okra that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1518 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from extraneous vegetable matter, sand, grit, or silt, poorly trimmed units, small pieces, units damaged by mechanical injury, misshapen units, and units blemished or seriously blemished by scars, pathological injury, insect injury, or blemished by other means.

(1) "Blemished unit" means any unit blemished to the extent that the aggregate blemished area materially affects the appearance of the product. (Slight discoloration frequently occurring on the ribs or blossom end of the units is not considered blemished unless the unit is materially affected.)

(2) "Seriously blemished" means blemished to such an extent that the appearance or eating quality of the unit is seriously affected.

(3) "Extraneous vegetable matter" means leaves, stems, and other similar vegetable matter.

(4) "Poorly trimmed" means attached stems in excess of ¼ inch in length and very ragged edges or units that are partially cut.

(5) "Small pieces" means pieces of pod less than ½ inch in length.

(6) "Damaged by mechanical injury" means broken or mashed to such an extent that the appearance or eating quality of the unit is seriously affected.

(7) "Sand, grit, or silt" means any particle of earthy material.

(8) "Misshapen" means any whole pod that is badly crooked, or is seriously affected by malformations.

(b) *(A) classification.* Frozen okra that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" has the following meanings with respect to the following styles of packs of frozen okra.

(1) *Whole.* "Practically free from defects" means that the product contains no sand, grit, or silt that affects the eating quality or appearance of the frozen okra, and that the combined weight of

all other defects and defective units does not exceed 10 percent of the weight of the units and that for each 12 ounces of units there may be present:

(i) Not more than 1 piece of extraneous vegetable matter;

(ii) Not more than 4 poorly trimmed units; 4 units damaged by mechanical injury or any combination of not more than 4 poorly trimmed units and units damaged by mechanical injury;

(iii) Not more than 6 percent, by count, of blemished units, and of such 6 percent not more than one-third thereof or 2 percent, by count, of all the units may consist of units that are seriously blemished;

(iv) Not more than 10 percent, by count, of misshapen units; and

(v) Not more than 2 small pieces of pods.

(2) *Cut or cuts.* "Practically free from defects" means that the product contains no sand, grit, or silt that affects the eating quality or appearance of the frozen okra, and that the combined weight of all other defects and defective units does not exceed 8 percent of the weight of the units and that for each 12 ounces of units there may be present:

(i) Not more than one piece of extraneous vegetable matter;

(ii) Not more than 4 percent, by weight, of blemished units and of such 4 percent not more than one-half thereof or 2 percent, by weight, of all the units may consist of units that are seriously blemished;

(iii) Not more than 8 poorly trimmed units, 8 units damaged by mechanical injury or any combination of not more than 8 poorly trimmed units and units damaged by mechanical injury; and

(iv) Not more than 20 small pieces of pods.

(c) (*B*) *classification.* If the frozen okra is reasonably free from defects a score of 28 to 33 points may be given. Frozen okra that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" has the following meaning with respect to the following styles of packs of frozen okra:

(1) *Whole.* "Reasonably free from defects" means that the product may contain a trace of sand, grit, or silt that does not materially affect the eating quality or appearance of the frozen okra, and that the combined weight of all other defects and defective units does not exceed 15 percent of the weight of the units and that for each 12 ounces of units there may be present:

(i) Not more than 2 pieces of extraneous vegetable matter;

(ii) Not more than 8 poorly trimmed units, 8 units damaged by mechanical injury or any combination of not more than 8 poorly trimmed units and units damaged by mechanical injury;

(iii) Not more than 12 percent, by count, of blemished units, and of such 12 percent not more than one-third thereof or 4 percent, by count, of all the units may consist of units that are seriously blemished;

(iv) Not more than 15 percent, by count, of misshapen units; and

(v) Not more than 4 small pieces of pods.

(2) *Cut or cuts.* "Reasonably free from defects" means that the product may contain a trace of sand, grit, or silt that does not materially affect the eating quality or appearance of the frozen okra, and that the combined weight of all other defects does not exceed 12 percent of the weight of the units and that for each 12 ounces of units there may be present:

(i) Not more than 2 pieces of extraneous vegetable matter;

(ii) Not more than 8 percent, by weight, of blemished units and of such 8 percent not more than one-half thereof or 4 percent, by weight, of all the units may consist of units that are seriously blemished;

(iii) Not more than 12 poorly trimmed units or 12 units damaged by mechanical injury or any combination of not more than 12 poorly trimmed units and units damaged by mechanical injury; and

(iv) Not more than 30 small pieces of pods.

(d) (*SStd*) *classification.* Frozen okra that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1519 *Character*—(a) *General.* The factor of character refers to the development of the pods and seeds and to the degree of freedom from fiber.

(b) (*A*) *classification.* Frozen okra that possesses a good character may be given a score of 34 to 40 points. "Good character" means that the units are fleshy and tender, that the seeds are in the early stages of maturity, and that not more than 5 percent, by count, of the units possess tough fibers.

(c) (*B*) *classification.* If the frozen okra possesses a reasonably good character a score of 28 to 33 points may be given. Frozen okra that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the units may have lost to a considerable extent their fleshy texture; that the units are reasonably tender; that the seeds may have passed the early stages of maturity, and that not more than 10 percent, by count, of the units possess tough fibers.

(d) (*SStd*) *classification.* Frozen okra that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1520 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen okra the grade of such lot will be determined by averaging the total scores of all containers, if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF OLIVE OIL [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1531 *Product description.* Olive oil is the edible oil obtained from the fruit of the olive tree (Olea europaea L.); is clarified, has a specific gravity of 0.910 to 0.915 at 25° C./25° C.; has an iodine number (Hanus) of 79 to 90; has a refractive index of 1.4668 to 1.4683 at 25° C.; and is packed in containers suitable for preservation of the product.

§ 52.1532 *Grades of olive oil.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of olive oil that possesses the typical greenish to light yellow color of olive oil; possesses a free fatty acid content, calculated as oleic, of not more than 1.4 percent; is free from defects; and is of such quality with respect to odor and flavor as to score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of olive oil that possesses the typical greenish to light yellow color of olive oil; possesses a free fatty acid content, calculated as oleic, of not more than 2.5 percent; is reasonably free from defects; possesses a reasonably good typical odor; possesses a reasonably good typical flavor; and scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of olive oil that possesses the typical greenish to light yellow color of olive oil; possesses a free fatty acid content, calculated as oleic, of not more than 3.0 percent; is fairly free from defects; possesses a fairly good typical odor; possesses a fairly good typical flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is the quality of olive oil that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER

§ 52.1533 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container of olive oil be filled with olive oil as full as practicable without impairment of quality.

FACTORS OF QUALITY

§ 52.1534 *Ascertaining the grade.* (a) The grade of olive oil may be ascertained by considering, in addition to the requirements of the respective grade, the following factors: Free fatty acid content, absence of defects, odor, and flavor.

(b) The relative importance of each factor is expressed numerically on a scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Free fatty acid content | 30 |
| Absence of defects | 30 |
| Odor | 20 |
| Flavor | 20 |
| Total score | 100 |

§ 52.1535 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "27 to 30 points" means 27, 28, 29, and 30 points).

§ 52.1536 *Free fatty acid content*—(a) *General.* The free fatty acid content shall be determined in accordance with the method described in the current "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists."

(b) (*A*) *classification.* Olive oil that possesses a free fatty acid content of not more than 1.4 percent, calculated as oleic acid, may be given a score of 27 to 30 points.

(c) (*B*) *classification.* If the olive oil possesses a free fatty acid content of more than 1.4 percent but not more than 2.5 percent, calculated as oleic acid, a score of 24 to 26 points may be given. Olive oil that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

(d) (*C*) *classification.* If the olive oil possesses a free fatty acid content of more than 2.5 percent but not more than 3 percent, calculated as oleic acid, a score of 21 to 23 points may be given. Olive oil that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule).

(e) (*SStd*) *classification.* Olive oil that contains more than 3 percent free fatty acid, calculated as oleic, may be given a score of 0 to 20 points, and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1537 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from cloudiness at 60° F. due to stearin, and from sediment.

(b) (*A*) *classification.* Olive oil that is free from defects may be given a score of 27 to 30 points. "Free from defects" means that the olive oil is entirely free from the defects mentioned and that no water or other liquid immiscible with the olive oil is present.

(c) (*B*) *classification.* If the olive oil is reasonably free from defects, a score of 24 to 26 points may be given. Olive oil that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the olive oil is reasonably free from the defects mentioned and that no water or other liquid immiscible with the olive oil is present.

(d) (*C*) *classification.* If the olive oil is fairly free from defects, a score of 21 to 23 points may be given. Olive oil that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the defects mentioned may be present but may not impair the quality of the olive oil and that no water or other liquid immiscible with the olive oil is present.

(e) (*SStd*) *classification.* Olive oil that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1538 *Odor*—(a) *General.* The factor of odor refers to a typical olive oil odor and the degree of freedom from strong green olive odors, from musty, moldy, butyric, zapatera odors, or any other off-odors.

(b) (*A*) *classification.* Olive oil that possesses a good typical odor may be given a score of 18 to 20 points. "Good typical odor" means that the olive oil has a typical olive oil odor and is practically free from off-odors of any kind.

(c) (*B*) *classification.* If the olive oil possesses a reasonably good typical odor, a score of 16 or 17 points may be given. "Reasonably good typical odor" means that the olive oil has a typical olive oil odor and is reasonably free from off-odors of any kind.

(d) (*C*) *classification.* If the olive oil possesses a fairly good typical odor, a score of 14 or 15 points may be given. "Fairly good typical odor" means that the olive oil has a typical olive oil odor and is fairly free from off-odors of any kind. Olive oil that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule).

(e) (*SStd*) *classification.* Olive oil that fails to meet the requirements of paragraph (d) of this section and that possesses a definite musty moldy, butyric, or zapatera odor or any other definitely objectionable odor may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1539 *Flavor*—(a) *General.* The factor of flavor refers to the typical olive oil flavor and the degree of freedom from strong green olive flavors, from musty, moldy, butyric, zapatera, rancid, or any other off-flavors.

(b) (*A*) *classification.* Olive oil that possesses a good typical flavor may be given a score of 18 to 20 points. "Good typical flavor" means that the olive oil has a typical olive oil flavor and is practically free from off-flavors of any kind.

(c) (*B*) *classification.* If the olive oil possesses a reasonably good typical flavor, a score of 16 or 17 points may be given. "Reasonably good typical flavor" means that the olive oil has a typical olive oil flavor and is reasonably free from off-flavors of any kind.

(d) (*C*) *classification.* If the olive oil possesses a fairly good typical flavor, a score of 14 or 15 points may be given. "Fairly good typical flavor" means that the olive oil has a typical olive oil flavor and is fairly free from off-flavors of any kind. Olive oil that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule).

(e) (*SStd*) *classification.* Olive oil that fails to meet the requirements of paragraph (d) of this section and that possesses a definite musty, moldy, butyric, zapatera, or rancid flavor or any other definitely objectionable flavor may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1540 *Tolerance for certification of officially drawn samples* (a) When certifying samples that have been officially drawn and which represent a specific lot of olive oil, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

limiting rule, must be within the range for the grade indicated.

(2) None of the containers comprising the sample fall more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1541 *Score sheet for olive oil.* The following score sheet may be used to summarize the factors determining the various grades:

| | | | |
|---|---|---|---|
| Size and kind of container | | | |
| Container code or marking | | | |
| Label | | | |
| Contents (liquid measure) | | | |

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED ORANGE JUICE [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1551 *Product description.* Canned orange juice is the undiluted, unconcentrated, unfermented juice obtained from mature fresh fruit of the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines, which fruit has been properly washed; is packed with or without the addition of sweetening ingredients; is sufficiently processed by heat to assure preservation of the product; and is packed in containers which are hermetically sealed.

§ 52.1552 *Grades of canned orange juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned orange juice that shows no coagulation; that possesses a very good color; is practically free from defects; possesses a very good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned orange juice that may show slight coagulation; that possesses a good color; is fairly free from defects; possesses a good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned orange juice that fails to meet the requirements of U. S. Grade C or U. S. Standard.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

FILL OF CONTAINER

§ 52.1553 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that the container be filled as full as practicable with orange juice and that the product occupy not less than 90 percent of the total capacity of the container.

FACTORS OF QUALITY

§ 52.1554 *Ascertaining the grade.* (a) The grade of canned orange juice may be ascertained by considering, in addition to the foregoing requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1555 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1556 *Color*—(a) *(A) classification.* Canned orange juice that possesses a very good color may be given a score of 17 to 20 points. "Very good color" means that the orange juice possesses a bright yellow to yellow-orange color typical of freshly extracted juice and is free from browning due to scorching, oxidation, caramelization, or other causes.

(b) *(C) classification.* If the canned orange juice possesses a good color, a score of 14 to 16 points may be given. Canned orange juice that falls into this classification shall not be graded above the U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good color" means that the orange juice may be slightly amber or very light in color but is typical of canned orange juice and may show evidence of slight browning, but is not off-color.

(c) *(SStd) classification.* Canned orange juice that for any reason fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1557 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from recoverable oil; from particles of membrane, core, or skin; from seeds or seed particles; or from other defects.

(b) *(A) classification.* Canned orange juice that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present not more than 0.030 percent by volume of recoverable oil and that the juice does not contain particles of membrane, core, or skin, seeds or seed particles, or other defects that more than slightly affect the appearance of the product.

(c) *(C) classification.* If the canned orange juice is fairly free from defects, a score of 28 to 33 points may be given. Canned orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present not more than 0.050 percent by volume of recoverable oil and that the juice does not contain particles of membrane, core, or skin, seed or seed particles, or other defects that materially affect the appearance of the product.

(d) *(SStd) classification.* If the canned orange juice fails to meet the requirements of paragraph (c) of this section, a score of 0 to 27 points may be given. Canned orange juice that falls into this classification shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1558 *Flavor*—(a) *(A) classification.* (1) Canned orange juice that possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means a fine, distinct canned orange juice flavor which is free from traces of scorching, caramelization, oxidation, or terpene; is free from off flavors of any kind; and meets the following requirements:

(i) Brix—Not less than 10.5 degrees.

(ii) Acid—Not less than 0.75 gram nor more than 1.45 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 9 to 1 nor more than 18 to 1.

(2) Canned orange juice is considered "sweet" if the juice possesses a very good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 0.75 gram nor more than 1.45 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 11 to 1 nor more than 18 to 1, provided that when the Brix of the juice is 16 degrees or more, the Brix-acid ratio may be less than 11 to 1.

(b) *(C) classification.* (1) If the canned orange juice possesses a good flavor, a score of 28 to 33 points may be given. Canned orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good flavor" means a good, normal canned orange juice flavor which may have a slightly caramelized or slightly oxidized flavor but is free from off flavors of any kind and meets the following requirements:

(i) Brix—Not less than 10.0 degrees.

(ii) Acid—Not less than 0.55 gram nor more than 1.60 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 8.5 to 1.

(2) Canned orange juice is considered "sweet" if the juice possesses a good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 0.65 gram nor more than 1.65 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 11 to 1, provided that when the Brix of the juice is 16 degrees or more, the Brix-acid ratio may be less than 11 to 1.

(c) *(SStd) classification.* Canned orange juice that fails to meet the requirements of paragraph (b) of this section, is off flavor, or is unpalatable for any reason may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1559 *Definitions of terms.* (a) "Brix" means the degrees Brix of canned orange juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of canned orange juice may be determined by any other method which gives equivalent results.

(b) "Acid" means grams of acid (calculated as anhydrous citric acid) per 100 ml. of juice in canned orange juice determined by titration with standard sodium hydroxide solution using phenolphthalein indicator.

§ 52.1560 *Explanation of analyses.* (a) Recoverable oil is determined by the following method:

(1) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1 and Figure 2.[1]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) *Procedure.* Exactly 2 liters of juice are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from bottom to top, and bring the juice to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute. By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(i) The number of milliliters of oil recovered divided by 20 equals the percent by volume of recoverable oil.

[1] Filed with the Federal Register Division as part of the original document.

LOT CERTIFICATION TOLERANCES

§ 52.1561 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned orange juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN CONCENTRATED ORANGE JUICE [1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1581 *Product description.* Frozen concentrated orange juice is the frozen product of concentrated, unfermented juice obtained from sound, mature fruit of the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines. The fruit is prepared by sorting and by washing prior to extraction of the juice to assure a clean product. Upon extraction of such juice, it is concentrated; and fresh orange juice extracted from sorted and washed fruit, as aforesaid, is admixed to the concentrate. The concentrated orange juice is packed in accordance with good commercial practice and is frozen and maintained at temperatures necessary for the preservation of the product.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetics Act, or with applicable State laws and regulations.

§ 52.1582 *Styles of frozen concentrated orange juice*—(a) *Style I, without sweetening ingredients added.* The Brix value of the finished concentrate shall be not less than 41.5 degrees nor more than 44.0 degrees.

(b) *Style II, with sweetening ingredient added.* The finished concentrate, exclusive of added sweetening ingredient, has a Brix value of not less than 40 degrees; and the finished concentrate, including added sweetening ingredient, shall have a Brix value of not less than 42 degrees but not more than 49 degrees.

§ 52.1583 *Grades of frozen concentrated orange juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses the appearance of fresh orange juice; possesses a very good color; is practically free from defects; possesses a very good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses a good color; is reasonably free from defects; possesses a good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of frozen concentrated orange juice that fails to meet the requirements of U. S. Grade B or U. S. Choice.

FILL OF CONTAINER

§ 52.1584 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that the container be filled with frozen concentrated orange juice as full as practicable without impairment of quality.

FACTORS OF QUALITY

§ 52.1585 *Ascertaining the grade.* (a) The grade of frozen concentrated orange juice is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1586 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1587 *Color*—(a) *(A) classification.* Frozen concentrated orange juice of which the reconstituted juice possesses a very good color may be given a score of 17 to 20 points. "Very good color" means that the color is the bright yellow to yellow-orange color typical of fresh orange juice.

(b) *(B) classification.* If the reconstituted juice possesses a good color, a score of 14 to 16 points may be given. Frozen concentrated orange juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Good color" means that the color is the yellow to yellow-orange color typical of fresh orange juice, which may be dull but is not off color for any reason.

(c) *(SStd) classification.* If the reconstituted juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 13 points may be given. Frozen concentrated orange juice that falls into this classification shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1588 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from seeds and portions thereof, from excessive juice cells, from pulp, from recoverable oil, and from other defects.

(1) "Pulp" means particles of membrane, core, and peel.

(b) *(A) classification.* Frozen concentrated orange juice of which the reconstituted juice is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present: (1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch in diameter, provided such seeds or portions thereof do not materially affect the appearance or drinking quality of the juice; (2) juice cells and pulp that do not materially affect the appearance or drinking quality of the juice; and (3) other defects that are not more than slightly objectionable. To score in this classification the frozen concentrated orange juice may contain not more than 0.100 milliliter of recoverable oil per 100 grams of the concentrated product.

(c) *(B) classification.* If the reconstituted juice is reasonably free from defects, a score of 28 to 33 points may be given. Frozen concentrated orange juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present: (1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding ⅛ inch in diameter, provided such seeds or portions thereof do not seriously affect the appearance or drinking quality of the juice; (2) juice cells and pulp that do not seriously affect the appearance or drinking quality of the juice; and (3) other defects that are not materially objectionable. To score in this classification the frozen concentrated orange juice may contain not more than 0.120 milliliter of recoverable oil per 100 grams of the concentrated product.

(d) *(SStd) classification.* Frozen concentrated orange juice that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1589 *Flavor*—(a) *(A) classification.* Frozen concentrated orange juice of which the reconstituted juice possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means that the flavor is fine, distinct, and substantially typical of orange juice extracted from fresh mature sweet oranges. To score not less than 34 points frozen concentrated orange juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 11.5 to 1 nor more than 18 to 1 (see Table I).

(2) *Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 12 to 1 nor more than 14 to 1 (see Table II).

(b) *(B) classification.* If the reconstituted juice possesses a good flavor, a score of 28 to 33 points may be given. Frozen concentrated orange juice that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Good flavor" means that the flavor is fairly typical of fresh orange juice extracted from fresh mature sweet oranges and is free from abnormal flavors and off flavors of any kind. To score not less than 28 points frozen concentrated orange juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 10 to 1 nor more than 19 to 1 (see Table I).

(2) *Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 10 to 1 nor more than 15 to 1 (see Table II).

(c) *(SStd) classification.* If the frozen concentrated orange juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 27 points may be given. Frozen concentrated orange juice that falls into this classification shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

TABLE I—MAXIMUM AND MINIMUM ACID FOR FROZEN CONCENTRATED ORANGE JUICE

STYLE I. WITHOUT SWEETENING INGREDIENT ADDED

| Brix value of the concentrate in degrees Brix | U. S. Grade A or U. S. Fancy | | U. S. Grade B or U. S. Choice | |
|---|---|---|---|---|
| | Ratio 11.5:1 | Ratio 18:1 | Ratio 10:1 | Ratio 19:1 |
| | Acid (percent by weight) | | Acid (percent by weight) | |
| | Maximum | Minimum | Maximum | Minimum |
| 41.5° | 3.61 | 2.31 | 4.15 | 2.18 |
| 41.6° | 3.62 | 2.31 | 4.16 | 2.19 |
| 41.7° | 3.63 | 2.32 | 4.17 | 2.19 |
| 41.8° | 3.63 | 2.32 | 4.18 | 2.20 |
| 41.9° | 3.64 | 2.33 | 4.19 | 2.21 |
| 42.0° | 3.65 | 2.33 | 4.20 | 2.21 |
| 42.1° | 3.66 | 2.34 | 4.21 | 2.22 |

EXPLANATION AND METHODS OF ANALYSES

§ 52.1590 *Definitions of terms as used in these standards.* (a) "Oranges" are fruits of the sweet orange group (*Citrus sinensis*) and the Mandarin group (*Citrus reticulata*), except tangerines.

(b) "Reconstituted juice" means the product obtained by mixing thoroughly 3 parts by volume of distilled water and one part by volume of frozen concentrated orange juice.

(c) "Reconstitutes properly" means that the reconstituted juice shows no material separation of colloidal or suspended matter, leaving a zone of definitely clear liquid without any turbidity, after standing four (4) hours at a temperature of not less than 63 degree Fahrenheit in a clear glass tube or cylinder (such as a 50 ml. graduated cylinder).

(d) "Acid" means the percent by weight of acid (calculated as anhydrous citric acid) in frozen concentrated orange juice.

(e) "Brix value" in frozen concentrated orange juice is the refractometric sucrose value determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions and to which the applicable correction for acid is added. (See Table III for corrections).

TABLE III—CORRECTIONS FOR OBTAINING BRIX VALUES[1]

| Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value | Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value |
|---|---|---|---|
| 0 | 0.30 | 3.6 | 0.70 |
| 2 | .41 | 3.8 | .74 |
| 2.4 | .47 | 4.0 | .78 |
| 3 | .51 | 4.2 | .81 |
| 3.2 | .54 | 4.4 | .85 |
| 3.4 | .58 | 4.6 | .89 |
| 3.5 | .62 | 4.8 | .93 |
| 3.6 | .66 | 5.0 | .97 |

[1] Source: "Refractometric Determination of Soluble Solids in Citrus Juices," by J. W. Stevens and W. E. Baier, from the Analytical Edition of Industrial and Engineering Chemistry, vol. II, p. 447, Aug. 15, 1939.

§ 52.1591 *Explanation of analyses.* (a) The measurement of Brix value is determined on the thawed concentrate in accordance with the refractometric method for sugars and sugar products, outlined in the Official and Tentative Methods of the Association of Official Agricultural Chemists.

(b) "Acid," calculated as anhydrous citric acid, is determined by titration with standard sodium hydroxide solution, using phenolphthalein as indicator.

(c) "Recoverable oil" is determined by the following method:

(1) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1[2] and Figure 2:[2]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) *Procedure.* Exactly 400 grams of the thawed concentrate mixed with water to approximately two liters are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from the bottom to top, and bring the solution to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute.

(i) By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(ii) The number of milliliters of oil recovered divided by 4 equals the volume of recoverable oil per 100 grams of concentrate.

LOT CERTIFICATION TOLERANCES

§ 52.1592 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen concentrated orange juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED PEARS[1]

IDENTITY, STYLES, AND GRADES

§ 52.1611 *Identity.* "Canned pears" means the canned product prepared from properly prepared, mature pears, as such product is defined in the standard of identity for canned pears (21 CFR 27.20) issued pursuant to the Federal Food, Drug, and Cosmetic Act. For the purposes of these standards, canned pears when referred to as "canned 'solid-pack' pears" means prepared pears, packed without a liquid packing medium, sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

§ 52.1612 *Styles of canned pears.* (a) "Halves" or "halved" canned pears are peeled pears, with cores and stems removed, cut longitudinally from stem to calyx into approximate halves.

(b) "Unpeeled halves" or "unpeeled halved" canned pears are unpeeled pears, with cores and stems removed, cut longitudinally from stem to calyx into approximate halves.

(c) "Quarters" or "quartered" canned pears are peeled pears, with cores and stems removed, cut longitudinally from stem to calyx into approximate quarters.

(d) "Slices" or "sliced" canned pears are peeled pears, with cores and stems removed, cut longitudinally from stem to calyx into approximately equal segments smaller than quarters.

(e) "Dice" or "diced" canned pears are peeled pears, with cores and stems removed, cut into approximate cubes.

(f) "Whole" canned pears are peeled, uncored, whole pears with or without stems removed.

(g) "Unpeeled whole" canned pears are unpeeled, uncored, whole pears with or without stems removed.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(b) "Mixed pieces of irregular sizes and shapes" are peeled and cored units of canned pears that are predominantly irregular in size and shape and which do not conform to a single style of halves, quarters, slices, dice, or whole and may consist of:

(1) Units (commonly called "salad cuts" or "salad pieces") which may have been prepared originally as pear halves but which are irregular in size and shape in that more than one-fourth of the unit appears to have been removed at the outer curved surface or which have been further cut into pieces of irregular sizes and shapes; and

(2) Mixtures of two or more of the following styles which may or may not be of normal shape: Halves, quarters, slices, dice, or whole.

§ 52.1613 *Grades of canned pears.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of halves, unpeeled halves, quarters, slices, diced, whole, or unpeeled whole canned pears that are practically free from defects; that possess a good character; that possess a normal flavor and odor; and that are of such quality with respect to color and with respect to uniformity of size and symmetry for the applicable style as to score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of halves, unpeeled halves, quarters, slices, diced, whole, unpeeled whole, or mixed pieces of irregular sizes and shapes of canned pears that possess at least a reasonably good color for the applicable style; that are at least reasonably free from defects; that possess at least a reasonably good character; that possess a normal flavor and odor; and that are of such quality with respect to uniformity of size and symmetry for the applicable style as to score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of halves, unpeeled halves, quarters, slices, diced, whole, unpeeled whole, or mixed pieces of irregular sizes and shapes of canned pears that possess a fairly good color; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor and odor; and that are of such quality with respect to uniformity of size and symmetry for the applicable style as to score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of canned pears that fail to meet the requirements of U. S. Grade C or U. S. Standard and is the quality of canned pears that may or may not meet the minimum standard of quality for canned pears issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.1614 *Grades of canned solid-pack pears.* (a) "U. S. Grade B Solid-Pack" or "U. S. Choice Solid-Pack" is the quality of halves, unpeeled halves, or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that possess at least a reasonably good color; that are at least reasonably free from defects for canned "solid-pack" pears; that possess at least a reasonably good character for canned "solid-pack" pears; that possess a normal flavor and odor; and that score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C Solid-Pack" or "U. S. Standard Solid-Pack" is the quality of halves, unpeeled halves, or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that possess a fairly good color; that are fairly free from defects for canned "solid-pack" pears; that possess a fairly good character for canned "solid-pack" pears; that possess a normal flavor and odor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard Solid-Pack" is the quality of halves, unpeeled halves, or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that fail to meet the requirements of "U. S. Grade C Solid-Pack" or "U. S. Standard Solid-Pack".

LIQUID MEDIA, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.1615 *Liquid media and Brix measurements for canned pears.* "Cut-out" requirements for liquid media in canned pears are not incorporated in the grades of the finished product since syrup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. The "cut-out" Brix measurement, as applicable, for the respective designations are as follows:

| Designations | Brix measurement |
|---|---|
| "Extra heavy sirup" or "Extra heavy pear juice sirup". | 22° or more but not more than 25°. |
| "Heavy sirup" or "Heavy pear juice sirup". | 18° or more but less than 22°. |
| "Light sirup" or "Light pear juice sirup". | 14° or more but less than 18°. |
| "Slightly sweetened water" or "Slightly sweetened pear juice". | Less than 14°. |
| "In water" | Packed in water. |
| "In pear juice" | Packed in pear juice. |

§ 52.1616 *Fill of container for canned pears.* The standard of fill of container for canned pears is the maximum quantity of the pear units which can be packed in the container and processed by heat to prevent spoilage, without crushing or breaking such ingredient. Canned pears that do not meet this requirement are "Below Standard in Fill."

§ 52.1617 *Recommended fill of container for canned "solid-pack" pears.* The recommended fill of container for canned "solid-pack" pears is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of "solid-pack" pears be filled as full as practicable without impairment of quality and that the product occupy not less than 90 percent of the volume of the container.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR HALVES AND UNPEELED HALVES

| Range of count of halves per container | Any grade in any sirup or other liquid medium | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | Metal containers | | | | | | Glass containers | |
| | 8 Z Tall (211 x 304) | No. 1 Tall (301 x 411) | No. 303 (303 x 406) | No. 2 (307 x 409) | No. 2½ (401 x 411) | No. 10 (603 x 700) | No. 303 | No. 2½ |
| | Ounces | Ounces | Ounces | Ounces | Ounces | Ounces | Ounces | Ounces |
| 3 to 6 | 4½ | 9 | 9 | 11 | 16 | | 9 | 16 |
| 7 to 9 | 4¾ | 9¼ | 9¼ | 11¼ | 16½ | | 9¼ | 16½ |
| 10 to 12 | | 9¾ | 9¾ | 11¾ | 17 | | | 16¾ |
| 13 to 15 | | | | | 17½ | | | 17 |
| 16 to 22 | | | | | 18 | 62 | | |
| 23 to 30 | | | | | | 62½ | | |
| 31 to 40 | | | | | | 63 | | |
| 41 and over | | | | | | 63 | | |

| Range of count of halves per container | "Solid-pack" only—Metal containers | |
|---|---|---|
| | No. 2½ (401 x 411) | No. 10 (603 x 700) |
| Any count | 24 ounces | 90 ounces |

TABLE II—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR QUARTERS, SLICES, DICED, AND MIXED PIECES OF IRREGULAR SIZES AND SHAPES

| Container designation (metal, unless otherwise stated) | Container size—over-all dimensions | | Any grade in any sirup or other liquid medium | | | |
|---|---|---|---|---|---|---|
| | Width | Height | Quarters | Slices | Diced | Mixed pieces of irregular sizes and shapes |
| | Inches | Inches | Ounces | Ounces | Ounces | Ounces |
| 8 Z tall | 2 11/16 | 3 4/16 | 5 | 5 | 5 | |
| 8 oz. glass | | | 5 | 5 | 5 | |
| No. 1 tall | 3 3/16 | 4 11/16 | 9 3/4 | 9 3/4 | 9 3/4 | |
| No. 303 | 3 3/16 | 4 5/16 | 9 1/4 | 9 1/4 | 9 1/4 | |
| 303 glass | | | 9 3/4 | 9 3/4 | 9 3/4 | |
| No. 2 | 3 7/16 | 4 9/16 | 12 1/4 | 12 1/4 | 12 1/4 | 12 1/4 |
| No. 2½ | 4 3/16 | 4 11/16 | 17 1/4 | 17 1/4 | 17 1/4 | 17 1/4 |
| No. 2½ glass | | | 17 1/2 | 17 1/2 | 17 1/2 | 17 1/2 |
| No. 10 | 6 3/16 | 7 | 65 | 65 | 65 | 65 |
| | | | "Solid-pack" only—mixed pieces of irregular sizes and shapes | | | |
| No. 2½ | 4 3/16 | 4 13/16 | 24 ounces | | | |
| No. 10 | 6 3/16 | 7 | 90 ounces | | | |

§ 52.1618 *Recommended minimum drained weight.* The minimum drained weight recommendations for the various applicable styles in Table I and Table II are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purposes of these grades. The drained weight of canned pears and canned "solid-pack" pears is determined by emptying the contents of the container, turning the pit cavities down in halves, upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch ± 3 percent, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and pears less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

§ 52.1619 *Compliance with recommended drained weights.* Compliance with the recommended drained weights for canned pears and canned "solid-pack" pears is determined by averaging the drained weights from all the containers which are representative of a specific lot and such lot is considered as meeting the recommendations, for the applicable styles, if in:

(a) *Halves and unpeeled halves.* (1) The average of the drained weights from all of the containers meets the average of the recommended drained weights for the counts from the containers examined;

(2) One-half or more of the containers meet the recommended drained weight from the respective count found; and

(3) The drained weights from the containers which do not meet the recommended drained weight for the count found are within the range of variability for good commercial practice.

(b) *Quarters; slices; diced; mixed pieces of irregular sizes and shapes.* (1) The average drained weight from all the containers meets the recommended drained weight;

(2) One-half or more of the containers meet the recommended drained weight; and

(3) The drained weights from the containers which do not meet the recommended drained weight are within the range of variability for good commercial practice.

FACTORS OF QUALITY

§ 52.1620 *Ascertaining the grade.* (a) The grade of canned pears is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size and symmetry, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Uniformity of size and symmetry | 20 |
| Absence of defects | 30 |
| Character | 30 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the canned pears are free from objectionable flavors and objectionable odors of any kind.

§ 52.1621 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1622 *Color—(a) General.* The factor of color refers to the color typical of the variety and its uniformity in each unit and among the units. The factor of color for canned pears that are unpeeled or spiced is not based on any detailed requirements and is not scored but the color shall be normal for unpeeled or spiced canned pears; the other three factors (uniformity of size and symmetry, absence of defects, and character as applicable) are scored and the total is multiplied by 100 and divided by 80, dropping any fractions to determine the total score.

(b) *(A) classification.* Halves, quarters, slices, diced, or whole canned pears that possess a good color may be given a score of 18 to 20 points. "Good color" means that the units of pears individually and collectively possess a characteristic, practically uniform color that is typical white or light yellow-white; that there is no more than a slight variation from an ideal color and translucency for properly prepared and properly processed canned pears; and that in halves, quarters, slices, or whole not more than 10 percent by count of the units may possess "reasonably good color", provided none of such units are "dead white" (or "chalky") in appearance. One unit of halves, quarters, slices, or whole in a single container is permitted to be "reasonably good color" if such unit exceeds the allowance of 10 percent by count.

(c) *(B) and (B–SP) classification.* Halves, quarters, slices, diced, or whole canned pears that possess a reasonably good color; mixed pieces of irregular sizes and shapes of canned pears that possess at least a reasonably good color; and halves or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that possess at least a reasonably good color may be given a score of 16 or 17 points. Mixed pieces of irregular sizes and shapes of canned pears and halves or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice or U. S. Grade B Solid-Pack or U. S. Choice Solid-Pack, whichever is applicable, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the units of pears individually and collectively possess a reasonably uniform and reasonably characteristic color that may show a very slight tint of pink or brown; that may show a slight lack of uniformity; that may vary slightly in translucency; and that in halves, quarters, slices, whole, or mixed pieces of irregular sizes and shapes not more than 10 percent by count of the units may possess "fairly good color" including units that may be "dead white" (or "chalky") in appearance. One unit of halves, quarters, slices, whole, or of mixed pieces of irregular sizes and shapes in a single container is permitted to be "fairly good color" including a unit that may be "dead white" (or "chalky") in appearance if such unit exceeds the allowance of 10 percent by count.

(d) *(C) and (C–SP) classification.* Halves, quarters, slices, diced, whole, or mixed pieces of irregular sizes and shapes of canned pears and halves or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that possess a fairly good color may be given a score of 14 or 15 points. Canned pears or canned "solid-pack" pears that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard or U. S. Grade C Solid-Pack or U. S. Standard Solid-Pack, whichever is applicable, regardless of the total score for the prod-

uct (this is a limiting rule). "Fairly good color" means that the units of pears individually and collectively may vary noticeably from a uniform, characteristic color; may be "dead white" (or "chalky") in appearance; may have a slight pink or brown cast but not a definitely pink or brown color; and are not off-color for any reason.

(c) *(SStd) and (SStd-SP) classification.* Canned pears and canned "solid-pack" pears that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard or Substandard Solid-Pack, whichever is applicable, regardless of the total score for the product (this is a limiting rule).

§ 52.1623 *Uniformity of size and symmetry*—(a) *General.* The factor of uniformity of size and symmetry for mixed pieces of irregular sizes and shapes of canned pears and for canned "solid-pack" pears is not based on any detailed requirements and is not scored; the other three factors (color, absence of defects, and character as applicable) are scored and the total is multiplied by 100 and divided by 80, dropping any fractions to determine the total score.

(b) *(A) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, or whole unpeeled canned pears that are practically uniform in size and symmetry may be given a score of 18 to 20 points. "Practically uniform in size and symmetry" has the following meanings with respect to the following styles of canned pears:

(1) *Halves, unpeeled halves, quarters, whole, unpeeled whole.* The units are very symmetrical and the weight of the largest full-size unit does not exceed the weight of the smallest full-size unit by more than 40 percent; the weight of each half is not less than $\frac{3}{5}$ ounce; and the weight of each quarter is not less than $\frac{3}{10}$ ounce.

(2) *Slices.* Not more than 10 percent by count of the units vary noticeably from the uniform shape of slices.

(3) *Diced.* Not more than 10 percent by weight of the units are more than $\frac{3}{4}$ inch in greatest edge dimension or pass through a $\frac{5}{16}$-inch square opening.

(c) *(B) classification.* Halves, unpeeled halves, quarters, slices, diced, whole unpeeled, or whole canned pears that are reasonably uniform in size and symmetry may be given a score of 16 or 17 points. "Reasonably uniform in size and symmetry" has the following meanings with respect to the following styles of canned pears:

(1) *Halves, unpeeled halves, quarters, whole, unpeeled whole.* The units are reasonably symmetrical and the weight of the largest full-size unit does not exceed the weight of the smallest full-size unit by more than 60 percent; the weight of each half is not less than $\frac{3}{5}$ ounce; and the weight of each quarter is not less than $\frac{3}{10}$ ounce.

(2) *Slices.* Not more than 15 percent by count of the units vary noticeably from the uniform shape of slices.

(3) *Diced.* Not more than 15 percent by weight of the units are more than $\frac{3}{4}$ inch in greatest edge dimension or pass through a $\frac{5}{16}$-inch square opening.

(d) *(C) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, or unpeeled whole canned pears that are fairly uniform in size and symmetry may be given a score of 14 or 15 points. "Fairly uniform in size and symmetry" has the following meanings with respect to the following styles of canned pears:

(1) *Halves, unpeeled halves, quarters, whole, unpeeled whole.* The units may vary in size, thickness, and symmetry and the weight of the largest full-size unit may be not more than twice the weight of the smallest full-size unit; the weight of each half is not less than $\frac{3}{5}$ ounce; and the weight of each quarter is not less than $\frac{3}{10}$ ounce.

(2) *Slices.* Not more than 20 percent by count of the units vary noticeably from the uniform shape of slices.

(3) *Diced.* Not more than 20 percent by weight of the units are more than $\frac{3}{4}$ inch in greatest edge dimension or pass through a $\frac{5}{16}$-inch square opening.

(e) *(SStd) classification.* Canned pears of the applicable styles which fail to meet paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above the following stated grade, regardless of the total score for the product (this is a limiting rule):

(1) Halves, unpeeled halves, quarters, whole, or unpeeled whole canned pears in which the weight of the largest full-size unit is more than twice the weight of the smallest full-size unit shall not be graded above Substandard and are also "Below Standard in Quality—Mixed Sizes."

(2) Halves or unpeeled halves of canned pears in which the weight of any half is less than $\frac{3}{10}$ ounce shall not be graded above Substandard and are also "Below Standard in Quality—Small Halves."

(3) Quarters of canned pears in which the weight of any quarter is less than $\frac{3}{10}$ ounce shall not be graded above Substandard and are also "Below Standard in Quality—Small Quarters."

(4) Slices and diced canned pears shall not be graded above Substandard.

§ 52.1624 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from peel, from blemished units, from units that are crushed or broken, from trimmed units for the applicable styles, and from any other defects which detract from the appearance or edibility of the product.

(1) "Blemished" or "blemished units" means units that are blemished with scab, hail injury, discoloration, or other abnormality covering an aggregate area exceeding the area of a circle ¼ inch in diameter. Units with black or very dark spots or any other damage which materially affect the appearance or edibility of the product are considered as "blemished", regardless of the area of the injury.

(2) "Crushed or broken" means that

(i) A unit of halves, unpeeled halves, quarters, slices, whole, and unpeeled whole canned pears is "crushed" if the unit has lost its normal shape and bears marks of crushing or is otherwise crushed not due to ripeness; and

(ii) A unit of halves, unpeeled halves, quarters, slices, whole, and unpeeled whole canned pears is "broken" if severed into definite parts; halves or unpeeled halves of canned pears that are slightly split from the edge to the core cavity or at the stem end are not considered broken. Portions equivalent to a full-size unit that has been broken are considered as one unit in determining the percentage by count.

(iii) "Crushed or broken" units are not considered defects in the style of diced or mixed pieces of irregular sizes and shapes of canned pears nor in the styles of halves, unpeeled halves, and mixed pieces of irregular sizes and shapes of canned "solid-pack" pears.

(3) "Stem" means an entire or partial external stem, whether or not attached, and is considered a defect in the applicable style of halves, unpeeled halves, quarters, sliced, diced, or mixed pieces of irregular sizes and shapes.

(4) "Cored and stemmed" means the removal of the calyx and seed cell cavity and, if applicable, the removal of the interior stem. "Stemming" refers to the removal of the interior stem.

(5) The degrees of trimming in the various styles of canned pears have the following meanings for the applicable styles:

(i) *Halves canned pears.* (*a*) "Insignificantly trimmed" means that the unit is trimmed to preserve the normal shape of a half and that the unit

(*1*) Possesses smooth contours on the backs and edges and may possess slight indentations or slight knife marks on the backs and edges that are insignificant in appearance;

(*2*) Is symmetrically cored and stemmed no deeper than necessary to remove neatly and cleanly the calyx, seed cell cavity, and interior stem;

(*3*) Possesses a distinct "bridge" or tie between the seed cell cavity and points where the calyx has been removed;

(*4*) Possesses an untrimmed face; and

(*5*) Is free from marks of "double stemming."

(*b*) "Slightly trimmed" means that the unit is trimmed but the normal shape of a half remains and that the unit

(*1*) Possesses reasonably smooth backs and edges and may possess significant indentation or significant knife marks on the backs and edges that do not materially affect the appearance of the unit;

(*2*) May be cored and stemmed deeper than necessary to remove the calyx, seed cell cavity, and interior stem or may not be symmetrically cored and stemmed but is cored and stemmed reasonably neat and reasonably clean;

(*3*) May lack a distinct "bridge" or tie between the seed cell cavity and points where the calyx has been removed;

(*4*) May possess moderate trimming on the face; and

(*5*) May show marks of "double stemming."

(*c*) "Moderately trimmed" means that the unit may be noticeably trimmed but retains the resemblance of a pear half and that the unit

(*1*) May possess gouges or similar cuts on the backs or edges or may possess indentations or knife marks on the backs or edges that do not seriously affect the appearance of the unit;

(*2*) May be deeply cored and stemmed or may not be symmetrically, neatly, and cleanly cored and stemmed;

(*3*) May or may not have the interior stem removed;

(*4*) May possess moderate trimming on the face; and

(*5*) May show marks of "double stemming."

(*d*) "Seriously trimmed" means that the unit is trimmed on the backs and edges or that portions are cut across such surfaces or away from such units but that the shape of a pear half remains.

(ii) *Quarters; whole canned pears.* (*a*) "Insignificantly trimmed" means that the unit is trimmed to preserve the normal shape of the unit and that the unit

(*1*) Possesses smooth contours or well-defined edges, as applicable; and

(*2*) May possess slight indentations or slight knife marks that are insignificant in appearance.

(*b*) "Slightly trimmed" means that the unit is trimmed but the normal shape of the unit remains and that the unit

(*1*) Possesses reasonably smooth contours or reasonably well-defined edges, as applicable; and

(*2*) May possess significant indentations or significant knife marks that do not materially affect the appearance of the unit.

(*c*) "Moderately trimmed" means that the unit may be noticeably trimmed but retains the resemblance of a normal shape for the unit and that the unit

(*1*) May possess gouges or similar cuts on the surface or edges, as applicable, that do not seriously affect the appearance of the unit.

(*d*) "Seriously trimmed" means that the unit is trimmed on the surface or edges, as applicable, but that the applicable shape for the unit remains.

(iii) *Unpeeled halves canned pears.* (*a*) "Insignificantly trimmed" means that no more than insignificant trimming may be present on the edges or on the unpeeled surface and that the unit:

(*1*) May possess slight indentations or slight knife marks that are insignificant in appearance;

(*2*) Is symmetrically cored and stemmed no deeper than necessary to remove neatly and cleanly the calyx, seed cell cavity, and interior stem;

(*3*) Possesses a distinct "bridge" or tie between the seed cell cavity and points where the calyx has been removed;

(*4*) Possesses an untrimmed face; and

(*5*) Is free from marks of "double stemming."

(*b*) "Slightly trimmed" means that the unit

(*1*) May be slightly trimmed on the edges or on the unpeeled surface and may possess significant indentations or significant knife marks that do not materially affect the appearance of the unit;

(*2*) May be cored and stemmed deeper than necessary to remove the calyx, seed cell cavity, and interior stem or may not be symmetrically cored and stemmed but is cored and stemmed reasonably neat and reasonably clean;

(*3*) May lack a distinct "bridge" or tie between the seed cell cavity and points where the calyx has been removed;

(*4*) May possess moderate trimming on the face; and

(*5*) May show marks of "double stemming."

(*c*) "Moderately trimmed" means that the unit may be noticeably trimmed on the edges or on the unpeeled surface but retains the resemblance of a pear half and that the unit

(*1*) May possess indentations or knife marks that do not seriously affect the appearance of the unit;

(*2*) May be deeply cored and stemmed or may not be symmetrically, neatly, and cleanly cored and stemmed;

(*3*) May or may not have the interior stem removed;

(*4*) May possess moderate trimming on the face; and

(*5*) May show marks of "double stemming."

(*d*) "Seriously trimmed" means that the unit is trimmed on the backs and edges or that portions are cut across such surfaces or away from such units but that the shape of a pear half remains.

(iv) *Unpeeled whole canned pears.* (*a*) "Insignificantly trimmed" means that no more than insignificant trimming may be present on the unpeeled surface and that the unit may possess slight indentations or slight knife marks that are insignificant in appearance.

(*b*) "Slightly trimmed" means that the unit may be slightly trimmed on the unpeeled surface and may possess significant indentations or significant knife marks that do not materially affect the appearance of the unit.

(*c*) "Moderately trimmed" means that the unit may be noticeably trimmed on the unpeeled surface but retains the resemblance of a whole pear and that the unit may possess indentations or knife marks that do not seriously affect the appearance of the unit.

(*d*) "Seriously trimmed" means that the unit is trimmed on the unpeeled surface but that the shape of a whole pear remains.

(b) *(A) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, or unpeeled whole canned pears that are practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" means that the canned pears are practically free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition, has the following meanings with respect to the following styles of canned pears:

(1) *Halves; quarters canned pears.* Not more than an average of ⅛ square inch of peel per 1 pound of net contents may be present; no stems nor loose or partially loose cores may be present; the units may be insignificantly trimmed but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken, slightly trimmed, moderately trimmed, or any combination thereof; and not more than 5 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, slightly trimmed, or moderately trimmed and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent and 5 percent by count: *Provided*, That in all containers comprising the sample such crushed, broken, slightly trimmed, and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 5 percent by count of the total number of units.

(2) *Whole canned pears.* Not more than an average of ⅛ square inch of peel per 1 pound of net contents may be present; the units may be insignificantly trimmed but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken, slightly trimmed, moderately trimmed, or any combination thereof; and not more than 5 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, slightly trimmed, or moderately trimmed and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent and 5 percent by count: *Provided*, That in all containers comprising the sample such crushed, broken, slightly trimmed, and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 5 percent by count of the total number of units.

(3) *Unpeeled halves canned pears.* No stems nor loose or partially loose cores may be present; the units may be insignificantly trimmed but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken, slightly trimmed, moderately trimmed, or any combination thereof; and not more than 5 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, slightly trimmed, or moderately trimmed, and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent and 5 percent by count: *Provided*, That in all containers comprising the sample such crushed, broken, slightly trimmed, and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 5 percent by count of the total number of units.

(4) *Unpeeled whole canned pears.* The units may be insignificantly trimmed but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be

crushed or broken, slightly trimmed, moderately trimmed, or any combination thereof; and not more than 5 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, slightly trimmed, or moderately trimmed and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent and 5 percent by count: *Provided*, That in all containers comprising the sample such crushed, broken, slightly trimmed, and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 5 percent by count of the total number of units.

(5) *Sliced canned pears.* Not more than an average of ⅛ square inch of peel per 1 pound of net contents may be present; no stems nor loose cores may be present; not more than 10 percent by count of the units may be crushed or broken; and not more than 5 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent and 5 percent by count: *Provided*, That in all containers comprising the sample such crushed and broken units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 5 percent by count of the total number of units.

(6) *Diced canned pears.* Not more than an average of ⅛ square inch of peel per 1 pound of net contents may be present; no stems nor loose cores may be present; and not more than 5 percent by count of the units may be blemished.

(c) *(B) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, or unpeeled whole canned pears that are reasonably free from defects and mixed pieces of irregular sizes and shapes of canned pears that are reasonably free from defects may be given a score of 24 to 26 points. Canned pears that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the canned pears are reasonably free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition, has the following meanings with respect to the following styles of canned pears:

(1) *Halves; quarters canned pears.* Not more than an average of ½ square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose or partially loose core per 3 pounds of net contents may be present; the units may be insignificantly trimmed or slightly trimmed, or both, but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken or moderately trimmed or any combination thereof; and not more than 10 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent by count: *Provided*, That in all containers comprising the sample such crushed and broken units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 10 percent by count of the total number of units.

(2) *Whole canned pears.* Not more than an average of ½ square inch of peel per 1 pound of net contents may be present; the units may be insignificantly or slightly trimmed, or both, but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken or moderately trimmed or any combination thereof; and not more than 10 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken or moderately trimmed and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent by count: *Provided*, That in all containers comprising the sample such crushed and broken and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 10 percent by count of the total number of units.

(3) *Unpeeled halves canned pears.* Not more than 1 stem or 1 loose or partially loose core per 3 pounds of net contents may be present; the units may be insignificantly trimmed or slightly trimmed, or both, but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken or moderately trimmed or any combination thereof; and not more than 10 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken or moderately trimmed and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent by count: *Provided*, That in all containers comprising the sample such crushed and broken and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 10 percent by count of the total number of units.

(4) *Unpeeled whole canned pears.* The units may be insignificantly trimmed or slightly trimmed, or both, but none of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken or moderately trimmed or any combination thereof; and not more than 10 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken or moderately trimmed and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent by count: *Provided*, That in all containers comprising the sample such crushed and broken and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 10 percent by count of the total number of units.

(5) *Sliced canned pears.* Not more than an average of ½ square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose core per 3 pounds of net contents may be present; not more than 10 percent by count of the units may be crushed or broken; and not more than 10 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent by count: *Provided*, That in all containers comprising the sample such crushed and broken units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 10 percent by count of the total number of units.

(6) *Diced canned pears.* Not more than an average of ½ square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose core per 3 pounds of net contents may be present; and not more than 10 percent by count of the units may be blemished.

(7) *Mixed pieces of irregular sizes and shapes of canned pears.* Not more than an average of ½ square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose or partially loose core per 3 pounds of net contents may be present; and not more than 10 percent by count of the units may be crushed or broken; and not more than 10 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken and one unit in a single container is permitted to be blemished if any of such units exceed the respective allowances of 10 percent by count: *Provided*, That in all containers comprising the sample such crushed and broken and moderately trimmed units do not exceed an average of 10 percent by count of the total number of units and that such blemished units do not exceed an average of 10 percent by count of the total number of units.

(d) *(B-SP) classification.* Halves, unpeeled halves, or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that are at least reasonably free from defects for canned "solid-pack" pears may be given a score of 24 to 26 points. Canned "solid-pack" pears that fall into this classification shall not be graded above U. S. Grade B Solid-pack or U. S. Choice Solid-pack, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects for canned 'solid-pack' pears" means that the canned "solid-pack" pears are reasonably free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition, has the following meanings with respect to the following styles of canned "solid-pack" pears.

(1) *Halves; unpeeled halves; mixed pieces of irregular sizes and shapes of canned "solid-pack" pears.* Not more than an average of ½ square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose or partially loose core per 3 pounds of net contents may be present; and not more than 1 blemished unit per 1 pound of net contents may be present.

(e) *(C) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, unpeeled whole, or mixed pieces of irregular sizes and shapes of canned pears that are fairly free from defects may be given a score of 21 to 23 points. Canned pears that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the canned pears are fairly free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition, has the following meanings with respect to the following styles of canned pears:

(1) *Halves; quarters canned pears.* Not more than an average of 1 square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose or partially loose core per 1 pound of net contents may be present; the units may be insignificantly trimmed, slightly trimmed, moderately trimmed, or any combination thereof, but not more than 10 percent by count of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken; and not more than 20 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, one unit in a single container is permitted to be seriously trimmed, and one unit in a single container is permitted to be blemished, if any of such units exceed the respective allowances of 10 percent and 20 percent by count of the units: *Provided*, That in all containers comprising the sample such seriously trimmed units do not exceed an average of 10 percent by count of the total number of units and such blemished units do not exceed an average of 20 percent by count of the total number of units.

(2) *Whole canned pears.* Not more than an average of 1 square inch of peel per 1 pound of net contents may be present; the units may be insignificantly trimmed, slightly trimmed, moderately trimmed, or any combination thereof, but not more than 10 percent by count of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken; and not more than 20 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, one unit in a single container is permitted to be seriously trimmed, and one unit in a single container is permitted to be blemished, if any of such units exceed the respective allowances of 10 percent and 20 percent by count of the units: *Provided*, That in all containers comprising the sample such seriously trimmed units do not exceed an average of 10 percent by count of the total number of units and such blemished units do not exceed an average of 20 percent by count of the total number of units.

(3) *Unpeeled halves canned pears.* Not more than 1 stem or 1 loose or partially loose core per 3 pounds of net contents may be present; and not more than 1 blemished unit per 1 pound of net contents may be present.

(4) *Unpeeled whole canned pears.* The units may be insignificantly trimmed, slightly trimmed, moderately trimmed, or any combination thereof, but not more than 10 percent by count of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken; and not more than 20 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, one unit in a single container is permitted to be seriously trimmed, and one unit in a single container is permitted to be blemished, if any of such units exceed the respective allowances of 10 percent and 20 percent by count of the units: *Provided*, That in all containers comprising the sample such seriously trimmed units do not exceed an average of 10 percent by count of the total number of units and such blemished units do not exceed an average of 20 percent by count of the total number of units.

(5) *Slices.* Not more than an average of 1 square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose core per 1 pound of net contents may be present; not more than 10 percent by count of the units may be crushed or broken; and not more than 20 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken if such unit exceeds the allowance of 10 percent by count of the units.

(6) *Diced canned pears.* Not more than an average of 1 square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose core per 1 pound of net contents may be present; and not more than 20 percent by count of the units may be blemished.

(7) *Mixed pieces of irregular sizes and shapes of canned pears.* Not more than an average of 1 square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose or partially loose core per 1 pound of net contents may be present; the units may be insignificantly trimmed, slightly trimmed, moderately trimmed, or any combination thereof, but not more than 10 percent by count of the units may be seriously trimmed; not more than 10 percent by count of the units may be crushed or broken; and not more than 20 percent by count of the units may be blemished. One unit in a single container is permitted to be crushed or broken, one unit in a single container is permitted to be seriously trimmed, and one unit in a single container is permitted to be blemished, if any of such units exceed the respective allowances of 10 percent and 20 percent by count of the units: *Provided*, That in all containers comprising the sample such seriously trimmed units do not exceed an average of 10 percent by count of the total number of units and such blemished units do not exceed an average of 20 percent by count of the total number of units.

(f) *(C–SP) classification.* Halves, unpeeled halves, or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that are fairly free from defects for canned "solid-pack" pears may be given a score of 21 to 23 points. Canned "solid-pack" pears that fall into this classification shall not be graded above U. S. Grade C Solid-pack or U. S. Standard Solid-pack, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects for canned 'solid-pack' pears" means that the canned "solid-pack" pears are fairly free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition, has the following meanings with respect to the following styles of canned "solid-pack" pears:

(1) *Halves; unpeeled halves; mixed pieces of irregular sizes and shapes of canned "solid-pack" pears.* Not more than an average of 1 square inch of peel per 1 pound of net contents may be present; not more than 1 stem or 1 loose or partially loose core per 1 pound of net contents may be present; and not more than 2 blemished units per 1 pound of net contents may be present.

(g) *SStd and (SStd-SP) classification.* Canned pears or canned "solid-pack" pears which fail to meet the requirements of paragraphs (e) and (f) of this section may be given a score of 0 to 20 points and shall not be graded above the following stated grades, as applicable, regardless of the total score for the product (this is a limiting rule):

(1) Halves, quarters, whole canned pears shall not be graded above Substandard and may also be "Below Standard in Quality" for the applicable reasons:

Not well peeled.
Partly crushed or broken.
Unevenly trimmed.
Blemished.

(2) Unpeeled halves, unpeeled whole canned pears shall not be graded above Substandard and may also be "Below Standard in Quality" for the applicable reasons:

Partly crushed or broken.
Unevenly trimmed.
Blemished.

(3) Sliced, diced, mixed pieces of irregular sizes and shapes canned pears shall not be graded above Substandard and may also be "Below Standard in Quality" for the applicable reasons:

Not well peeled.
Blemished.

(4) Canned "solid-pack" pears shall not be graded above Substandard Solid-pack.

§ 52.1625 *Character*—(a) *General.* The factor of character refers to the degree of ripeness, the texture, and tenderness of the product.

(b) *(A) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, or unpeeled whole canned pears that possess a good character may be

given a score of 27 to 30 points. "Good character" has the following meanings with respect to the various styles of canned pears:

(1) *Halves, unpeeled halves, quarters canned pears.* The units possess a texture typical of properly and uniformly ripened pears that are properly processed; the texture is fleshy and free from noticeable graininess or toughness; the units are tender; the units are uniformly intact and pliable but firm enough to possess well-defined edges with no visible breaking down of the flesh; and not more than 10 percent by count of the units may possess a reasonably good character. One unit in a container is permitted to have a reasonably good character if one unit exceeds the allowance of 10 percent by count: *Provided,* That in all containers comprising the sample, the units with reasonably good character do not exceed an average of 10 percent by count of the total number of units.

(2) *Whole, unpeeled whole canned pears.* The units possess a texture typical of properly and uniformly ripened pears that are properly processed; the texture is fleshy and free from noticeable graininess or toughness; the units are uniformly intact and firm with no visible breaking down of the flesh; and not more than 10 percent by count of the units may possess a reasonably good character. One unit in a container is permitted to have a reasonably good character if one unit exceeds the allowance of 10 percent by count: *Provided,* That in all containers comprising the sample the units with reasonably good character do not exceed an average of 10 percent by count of the total number of units.

(3) *Slices; diced canned pears.* The product generally possesses a texture typical of properly and uniformly ripened pears that are properly prepared and processed and not more than 10 percent by weight of the drained pears may be disintegrated or mushy.

(c) *(B) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, or unpeeled whole canned pears that possess a reasonably good character and mixed pieces of irregular sizes and shapes of canned pears that possess at least a reasonably good character may be given a score of 24 to 26 points. Canned pears that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" has the following meanings with respect to the following styles of canned pears:

(1) *Halves, unpeeled halves, quarters, mixed pieces of irregular sizes and shapes of canned pears.* The units possess a texture typical of properly ripened pears that are properly processed; the units may possess a texture of moderate graininess; the units are reasonably tender or the tenderness may be variable within the unit; the units may be slightly firm or slightly ragged with slightly frayed edges or slightly soft but are not mushy; and not more than 10 percent by count of the units may possess a fairly good character. One unit in a container is permitted to have a fairly good character if one unit exceeds the allowance of 10 percent by count: *Provided,* That in all containers comprising the sample the units with fairly good character do not exceed an average of 10 percent by count of the total number of units.

(2) *Whole, unpeeled whole canned pears.* The units possess a texture typical of properly ripened pears that are properly processed; the units may possess a texture of moderate graininess; the units are reasonably tender or the tenderness may be variable within the unit; the units may be slightly firm or slightly ragged or slightly soft but are not mushy; and not more than 10 percent by count of the units may possess a fairly good character. One unit in a container is permitted to have a fairly good character if one unit exceeds the allowance of 10 percent by count: *Provided,* That in all containers comprising the sample the units with fairly good character do not exceed an average of 10 percent by count of the total number of units.

(3) *Slices, diced canned pears.* The product generally possesses a texture typical of properly ripened pears that are properly prepared and processed and not more than 15 percent by weight of the drained pears may be disintegrated or mushy.

(d) *B-SP classification.* Halves, unpeeled halves, or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that possess at least a reasonably good character for canned "solid-pack" pears may be given a score of 24 to 26 points. Canned "solid-pack" pears that fall into this classification shall not be graded above U. S. Grade B Solid-pack or U. S. Choice Solid-pack, regardless of the total score for the product (this is a limiting rule). "Reasonably good character for canned 'solid-pack' pears" has the following meaning with respect to the styles of canned "solid-pack" pears:

(1) *Halves; unpeeled halves; mixed pieces of irregular sizes and shapes of canned "solid-pack" pears.* The product generally possesses a texture of properly ripened pears that are properly processed as "solid-pack" pears; the texture may be of moderate graininess or variable in tenderness or may be soft; not less than 80 percent by weight of the drained pears are in reasonably intact units and the balance may be mushy or consist of units with hard-calyx ends.

(e) *(C) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, unpeeled whole, or mixed pieces of irregular sizes and shapes of canned pears that possess a fairly good character may be given a score of 21 to 23 points. Canned pears that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" has the following meanings with respect to the following styles of canned pears:

(1) *Halves, unpeeled halves, quarters, mixed pieces of irregular sizes and shapes of canned pears.* The units possess a texture of properly processed pears which may be variable; the units may possess a texture of marked graininess; the units may be lacking uniformity of tenderness; the units may be markedly firm or markedly ragged with frayed edges or may be soft; and not more than 10 percent by weight of the drained pears may be mushy or consist of units with hard-calyx ends or units that are not tender.

(2) *Whole, unpeeled whole canned pears.* The units possess a texture of properly processed pears which may be variable; the units may possess a texture of marked graininess; the units may be lacking uniformity of tenderness; the units may be markedly firm or markedly ragged or soft; and not more than 10 percent by count of the units may be mushy or consist of units with hard-calyx ends or units that are not tender. One unit in a container is permitted to be mushy or possess hard-calyx ends or not tender: *Provided,* That in all containers comprising the sample, all of such units do not exceed an average of 10 percent by count of the total number of units.

(3) *Slices; diced canned pears.* The product generally possesses a texture typical of properly prepared and processed pears and not more than 20 percent by weight of the drained pears may be disintegrated or mushy.

(f) *(C-SP) classification.* Halves, unpeeled halves, or mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that possess a fairly good character may be given a score of 21 to 23 points. Canned "solid-pack" pears that fall into this classification shall not be graded above U. S. Grade C Solid-pack or U. S. Standard solid-pack regardless of the total score for the product (this is a limiting rule). "Fairly good character for canned 'solid-pack' pears" has the following meaning with respect to the styles of canned "solid-pack" pears:

(1) *Halves; unpeeled halves; mixed pieces of irregular sizes and shapes of canned "solid-pack" pears.* The product generally possesses a texture of properly processed pears which may be variable; the texture may be of marked graininess or may be soft; not less than 60 percent by weight of the drained pears are in reasonably intact units and the balance may be mushy or consist of units with hard-calyx ends.

(g) *(SStd) classification.* Halves, unpeeled halves, quarters, slices, diced, whole, unpeeled whole, and mixed pieces of irregular sizes and shapes of canned pears that fail to meet the requirements of paragraph (e) of this section or that are "not tender" may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule). Halves, unpeeled halves, quarters, slices, diced, whole, unpeeled whole, or mixed pieces of irregular sizes and shapes of canned pears that are "not tender" are also "Below Standard in Quality—Not Tender."

(h) *(SStd–SP) classification.* Halves, unpeeled halves, and mixed pieces of irregular sizes and shapes of canned "solid-pack" pears that fail to meet the requirements of paragraph (f) of this section may be given a score of 0 to 20 points and shall not be graded above Substandard Solid-pack, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1626 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned pears, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED FIELD PEAS AND CANNED BLACK-EYE PEAS[1]

IDENTITY AND GRADES

§ 52.1641 *Identity.* (a) "Canned field peas" means canned field peas as defined in the definitions and standards of identity for canned vegetables (21 CFR 52.990), issued pursuant to the Federal Food, Drug, and Cosmetic Act.

(b) "Canned black-eye peas" means canned black-eye peas as defined in the definitions and standards of identity for canned vegetables (21 CFR 52.990), issued pursuant to the Federal Food, Drug, and Cosmetic Act.

(c) "Canned peas" means canned field peas or canned black-eye peas.

(d) "Snap" or "snaps" means a piece or pieces of immature unshelled pods.

(e) "Canned peas without snaps" means canned peas which do not contain immature unshelled pods or pieces thereof.

(f) "Canned peas with snaps" means canned peas which contain pieces of immature unshelled pods.

(g) "Unit" means an individual field pea or black-eye pea or a piece of immature unshelled pod of either.

§ 52.1642 *Grades of canned peas.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned peas that possess similar varietal characteristics; that possess a normal flavor and odor; that are fairly young; that are practically free from defects; that possess at least a fairly good color; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned peas that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a fairly good color; that are nearly mature; that are fairly free from defects; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned peas that fail to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER AND DRAINED WEIGHTS

§ 52.1643 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container of canned peas be filled with field peas or black-eye peas as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the total capacity of the container.

§ 52.1644 *Recommended drained weight.* The drained weight recommendations in Table No. 1 of this section are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of canned peas is determined by emptying the contents of the container upon a No. 8 sieve of proper diameter and allowing to drain for 2 minutes. A sieve 8 inches in diameter is used for the No. 2½ size can (401 x 411) and smaller sizes; and a sieve 12 inches in diameter is used for containers larger than the No. 2½ size can.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

TABLE NO. 1

[Recommended minimum drained weight, in ounces, of field peas or black-eye peas, including snaps when canned with snaps]

| Container size or designation: | Ounces |
|---|---|
| No. 1 (Picnic) | 7 |
| No. 1 Tall | 10½ |
| No. 300 | 9¼ |
| No. 303 | 11 |
| No. 2 | 13½ |
| No. 10 | 72 |

FACTORS OF QUALITY

§ 52.1645 *Ascertaining the grade.* (a) The grade of canned peas may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings of the factors of color, absence of defects, and character.

(b) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the canned peas are free from objectionable flavors and objectionable odors of any kind.

§ 52.1646 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "15 to 20 points" means 15, 16, 17, 18, 19, or 20 points).

§ 52.1647 *Color—(a) (A) classification.* Canned peas that possess a good color may be given a score of 15 to 20 points. "Good color" means that the canned peas possess a fairly uniform color and are typical of fairly young field peas or black-eye peas of similar varietal characteristics.

(b) *(C) classification.* Canned peas that possess a fairly good color may be given a score of 10 to 14 points. "Fairly good color" means that the canned peas possess a color that may be variable and typical of nearly mature field peas or black-eye peas of similar varietal characteristics.

(c) *(SStd) classification.* Canned peas that are definitely off color for any reason or fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 9 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1648 *Absence of defects—(a) General.* The factor of absence of defects refers to the degree of freedom from extraneous vegetable matter, from loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, mashed or broken units, and units blemished by pathological injury, insect injury, or other means.

(1) "Extraneous vegetable matter" means hulls or pieces of hulls, unshelled pods or pieces of unshelled pods (except in peas canned with snaps), leaves,

stems and other similar vegetable matter.

(2) "Mashed or broken" means seriously crushed so that the unit has lost its original conformation or is broken to the extent that a cotyledon or portion thereof has become separated from the unit.

(3) "Blemished" means discolored or spotted by pathological injury, insect injury, or other means to such an extent that the appearance or eating quality of the unit is materially affected.

(b) *(A) classification.* Canned peas that are practically free from defects may be given a score of 35 to 40 points. "Practically free from defects" means that for each 12 ounces drained weight of units there may be present not more than 2 pieces of extraneous vegetable matter, and the combined weight of all loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, and mashed or broken units does not exceed 5 percent, and the weight of blemished units does not exceed 2 percent of the drained weight of the canned peas.

(c) *(C) classification.* If the canned peas are fairly free from defects, a score of 30 to 34 points may be given. Canned peas that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that for each 12 ounces drained weight of units there may be present not more than 4 pieces of extraneous vegetable matter, and the combined weight of all loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, and mashed or broken units does not exceed 10 percent, and the weight of blemished units does not exceed 6 percent of the drained weight of the canned peas.

(d) *(SStd) classification.* Canned peas that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 29 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1649 *Character—(a) General.* This factor refers to the tenderness and maturity of the canned peas.

(b) *(A) classification.* Canned peas that are fairly young may be given a score of 35 to 40 points. "Fairly young" means that the units are tender and in a fairly early stage of maturity.

(c) *(C) classification.* If the field peas or black-eye peas are nearly mature, a score of 30 to 34 points may be given. Canned peas that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Nearly mature" means that the units are fairly tender and may be mealy but not hard.

(d) *(SStd) classification.* Canned peas that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 29 points, and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1650 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned peas without snaps or canned peas with snaps, the grade for such lot will be determined by averaging the total scores of all containers if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total score, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN FIELD PEAS AND FROZEN BLACK-EYE PEAS [1]

PRODUCT DESCRIPTION, DEFINITIONS, AND GRADES

§ 52.1661 *Product description.* "Frozen field peas" is the product prepared from the clean and sound immature seed of the field pea plant (Vigna sinensis) by shelling, sorting, washing, and blanching, and is then frozen and maintained at temperatures necessary for the preservation of the product. "Frozen black-eye peas" is the product prepared from the clean and sound immature seed of the black-eye pea plant (Vigna sinensis) by shelling sorting, washing, and blanching, and is then frozen and maintained at temperatures necessary for the preservation of the product.

§ 52.1662 *Definitions.* (a) "Frozen peas" means frozen field peas or frozen black-eye peas.

(b) "Unit" means an individual field pea or black-eye pea in frozen peas.

§ 52.1663 *Grades of frozen peas.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen peas that possess similar varietal characteristics; that possess a good flavor and odor; that possess a good character; that possess a good typical color; that are practically free from defects; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen peas that possess similar varietal characteristics; that possess a reasonably good flavor and odor; that possess a reasonably good character; that possess a reasonably good typical color; that are reasonably free from defects; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen peas that fail to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.1664 *Ascertaining the grade.* (a) The grade of frozen peas may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) The score for the factors of color and absence of defects in frozen peas is determined after thawing so that the product is substantially free from ice crystals and can be handled as individual units. A representative sample of the product is cooked for examination with respect to character and for flavor and odor.

(d) "Good flavor and odor" means that the product after cooking has a good characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Reasonably good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1665 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive for example, "15 to 20 points" means 15, 16, 17, 18, 19, or 20 points).

§ 52.1666 *Color—(a) (A) classification.* Frozen peas that possess a good typical color may be given a score of 15 to 20 points. "Good typical color" means that the frozen peas possess a color that is typical of reasonably young field peas or black-eye peas of similar varietal characteristics, that possess not less than 50 percent, by count, of peas which show at least a tinge of green color, and that there may be present not more than 5 percent, by weight, of field peas or black-eye peas which are of markedly different varietal colors.

(b) *(B) classification.* Frozen peas that possess a reasonably good typical color may be given a score of 10 to 14 points. Frozen peas that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard regardless of the total score for the product (this is a limiting rule). "Reasonably good typical color" means that the frozen peas possess a color that is typical of fairly young field peas or black-eye peas of similar varietal characteristics and that there may be present not more than 5 percent, by weight, of field peas or black-eye peas which are of markedly different varietal colors.

(c) *(SStd) classification.* Frozen peas that are definitely off color for any reason or that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 9 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

§ 52.1667 *Absence of defects—(a) General.* The factor of absence of defects refers to the degree of freedom from extraneous vegetable matter, from loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, broken units, and units blemished by pathological injury, insect injury, or other means.

(b) "Extraneous vegetable matter" means hulls or pieces of hulls, unshelled peas or pieces of unshelled pods, leaves, stems, and other similar vegetable matter.

(c) "Blemished" means discolored or spotted by pathological injury, insect injury, or other means to such an extent that the appearance or eating quality of the unit is materially affected.

(d) *(A) classification.* Frozen peas that are practically free from defects may be given a score of 35 to 40 points. "Practically free from defects" means that for each 16 ounces of units, or per package if less than 16 ounces, there may be present not more than 2 pieces of extraneous vegetable matter and the combined weight of all loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, and broken units does not exceed 5 percent, and the weight of blemished units does not exceed 3 percent of the weight of the frozen peas.

(e) *(B) classification.* If the frozen peas are reasonably free from defects, a score of 30 to 34 points may be given. Frozen peas that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that for each 16 ounces of units, or per package if less than 16 ounces, there may be present not more than 4 pieces of extraneous vegetable matter and the combined weight of all loose skins and pieces of skins, loose cotyledons and pieces of cotyledons, and broken units does not exceed 10 percent, and the weight of the blemished units does not exceed 5 percent of the weight of the frozen peas.

(f) *(SStd) classification.* Frozen peas that fail to meet the requirements of paragraph (e) of this section may be given a score of 0 to 29 points. The product shall not be graded above Substandard if the weight of blemished units exceeds 5 percent of the weight of the frozen peas regardless of the total score for the product (this is a partial limiting rule).

§ 52.1668 *Character—(a) General.* This factor refers to the maturity of the field peas or blackeye peas and the tenderness of the units.

(b) *(A) classification.* Frozen peas that possess a good character may be given a score of 35 to 40 points. "Good character" means that the units are tender and in a reasonably young stage of maturity.

(c) *(B) classification.* If the field peas or black-eye peas possess a reasonably good character, a score of 30 to 34 points may be given. Frozen peas that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the units are reasonably tender and in a fairly young stage of maturity.

(d) *(SStd) classification.* Frozen peas that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1669 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen peas, the grade for such lot will be determined by averaging the total scores of all containers if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total score, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CUCUMBER PICKLES [1]

PRODUCT DESCRIPTION, STYLES, GRADES, AND TYPES

§ 52.1681 *Product description.* Cucumber pickles means the pickled product prepared from fresh immature cucumbers (Cucumis Sativus) which have been cured by natural fermentation in a solution of common salt with or without the addition of dill herbs and processed or preserved in a liquid packing medium which may be seasoned with sugar or a combination of sugar and dextrose (refined corn sugar) or a combination of sugar and corn sirup or corn sirup solids, or a combination of sugar, dextrose and corn sirup, or corn sirup solids, salt, a vinegar or vinegars, spices or flavoring or both, and onions or garlic or both, and with or without other seasoning or flavoring ingredients to give the product the flavor and characteristics of the respective type. Cucumber pickles may be processed or preserved with or without the addition of other pickled vegetables which have been cured as aforesaid.

§ 52.1682 *Styles of cucumber pickles.* (a) "Whole" or "whole pickles" means cucumber pickles consisting of whole cucumbers.

(b) "Cross cut," "slices" or "sliced" means cucumber pickles consisting of units irrespective of whether such units are cut at right angles to the longitudinal axis into units of approximately equal thickness or cut longitudinally into halves, quarters, eighths or into units with parallel surfaces.

(c) "Cut" or "cut pickles" means cucumber pickles (1) which are not uniform in size or shape or (2) which do not conform to any of the foregoing styles.

(d) "Finely cut" or "finely chopped pickles" means cucumber pickles which have been finely cut or finely chopped.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(e) "Unit" means an individual cucumber pickle or pickle ingredient or portion of either in cucumber pickles.

§ 52.1683 *Grades of cucumber pickles.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of cucumber pickles that possess: a practically uniform typical color; are practically free from defects; possess a good texture; possess a normal flavor and normal odor; and are of such quality with respect to uniformity of size and shape as to score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of cucumber pickles that possess: a fairly uniform typical color; are fairly free from defects; possess a fairly good texture; possess a normal flavor and normal odor; and are of such quality with respect to uniformity of size and shape as to score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of cucumber pickles that fail to meet the requirements of U. S. Grade C or U. S. Standard.

§ 52.1684 *Types of cucumber pickles.* The type of cucumber pickles is not incorporated in the grades of the finished product, since type of cucumber pickles is not a factor of quality for the purpose of these grades. The type of cucumber pickles is dependent upon the method of preparation and processing. Cucumber pickles are usually prepared and processed as any one of the following types:

(a) "Dills" or "dill pickles" are of two classifications:

(1) Genuine dills or genuine dill pickles consist of cucumber pickles prepared from fresh immature cucumbers cured by natural fermentation in a solution of common salt with dill herbs with or without dill flavoring in a liquid packing medium, with or without additional spices, spice flavorings, or other seasonings or flavoring ingredients. Dill herb and other herbs may be added. The packing medium contains not less than 0.6 gram of acid (calculated as lactic) per 100 milliliters.

(2) Processed dills or processed dill pickles consist of cucumber pickles prepared from fresh immature cucumbers cured by natural fermentation in a solution of common salt in a liquid packing medium containing dill flavored brine, a vinegar or vinegars, spices, spice flavoring, or other seasoning or flavoring ingredients. Dill herb and other herbs may be added. The packing medium contains not less than 0.6 gram of acid (calculated as acetic) per 100 milliliters.

(b) "Sour pickles" consist of sour cucumber pickles in a liquid packing medium to which has been added salt, a vinegar or vinegars, with or without the addition of spices, spice flavoring, or other seasoning or flavoring ingredients. The packing medium contains not less than 1.4 grams acid (calculated as acetic) per 100 milliliters nor more than 2.4 grams acid (calculated as acetic) per 100 milliliters.

(c) "Sweet pickles" consist of sweet cucumber pickles in a liquid packing medium to which has been added sugar or a combination of sugar and dextrose (refined corn sugar), or a combination of sugar and corn sirup or corn sirup solids, or a combination of sugar, dextrose, and corn sirup or corn sirup solids, salt, a vinegar or vinegars, with or without the addition of spices, spice flavoring, or other seasoning or flavoring ingredients. The packing medium contains not more than 3.0 percent salt.

(d) "Mixed pickles" consist of mixed cucumber pickles which may be of any of the foregoing styles except finely cut or finely chopped cucumber pickles to which has been added onions and cut cauliflower with or without the addition of red peppers, pimientos, or pieces of red peppers or pimientos in a liquid packing medium with or without the addition of sugar or a combination of sugar and dextrose (refined corn sugar), or a combination of sugar and corn sirup or corn sirup solids, or a combination of sugar, dextrose, and corn sirup or corn sirup solids, salt, a vinegar or vinegars, with or without the addition of spices, spice flavoring, and other seasoning or flavoring ingredients. Mixed pickles may contain ingredients in the following proportions:

| | *Percent by weight* |
|---|---|
| Cucumbers | 60 to 80 |
| Cauliflower | 10 to 30 |
| Onions | 5 to 10 |
| Red peppers or pimientos | Optional ingredient |

(1) Mixed pickles are of two classifications:

(i) Sour mixed pickles consist of mixed cucumber pickles in a liquid packing medium to which has been added salt, a vinegar or vinegars, with or without the addition of spices, spice flavoring, or other seasoning or flavoring ingredients. The packing medium contains not less than 1.4 grams acid (calculated as acetic) per 100 milliliters or more than 2.4 grams acid (calculated as acetic) per 100 milliliters.

(ii) Sweet mixed pickles consist of mixed cucumber pickles in a liquid packing medium to which has been added salt, a vinegar or vinegars, sugar or a combination of sugar and dextrose (refined corn sugar) or a combination of sugar and corn sirup or corn sirup solids, or a combination of sugar, dextrose, and corn sirup or corn sirup solids with or without the addition of spices, spice flavoring, and other seasoning or flavoring ingredients. The packing medium may contain not more than 3.0 percent salt.

(e) "Chow chow" consists of chow chow cucumber pickles which may be of any of the foregoing styles, except finely cut or finely chopped cucumber pickles, to which has been added onions and cut cauliflower, with or without the addition of red peppers or pimientos, or pieces of red peppers or pimientos, in a sauce of proper consistency, with or without the addition of sugar or a combination of sugar and dextrose (refined corn sugar), or a combination of sugar and corn sirup or corn sirup solids, or a combination of sugar, dextrose and corn sirup, or corn sirup solids, salt, a vinegar or vinegars, and mustard, with or without the addition of spices, spice flavoring, and other seasoning or flavoring ingredients. Chow chow may contain ingredients in the following proportions:

| | *Percent by weight* |
|---|---|
| Cucumbers | 60 to 80 |
| Cauliflower | 10 to 30 |
| Onions | 5 to 10 |
| Red peppers or pimientos | Optional ingredient |

(1) Chow chow is of two classifications:

(i) Sour chow chow consists of chow chow cucumber pickles in a sauce of proper consistency, to which has been added salt, a vinegar or vinegars, and mustard, with or without the addition of spices, spice flavoring, and other seasoning or flavoring ingredients.

(ii) Sweet chow chow consists of chow chow cucumber pickles in a sauce of proper consistency, to which has been added salt, a vinegar or vinegars, mustard, sugar or a combination of sugar and dextrose (refined corn sugar), or a combination of sugar and corn sirup or corn sirup solids, or a combination of sugar, dextrose and corn sirup or corn sirup solids with or without the addition of spices, spice flavoring, and other seasoning or flavoring ingredients.

(f) "Sweet pickle relish" consists of finely cut or finely chopped sweet cucumber pickle relish, to which may be added cauliflower, onions, with or without the addition of green tomatoes, red peppers or pimientos, in a liquid packing medium with the addition of salt, a vinegar or vinegars, sugar or a combination of sugar and dextrose (refined corn sugar), or a combination of sugar and corn sirup or corn sirup solids, or a combination of sugar, dextrose and corn sirup or corn sirup solids, with or without the addition of spices, spice flavoring and other seasoning or flavoring ingredients. Sweet pickle relish may contain ingredients in the following proportions:

| | *Percent by weight* |
|---|---|
| Cucumbers | 60 to 100 |
| Cauliflower [1] | 10 to 30 |
| Onions [1] | 5 to 10 |
| Green tomatoes | [2] |
| Red peppers or pimientos | Optional ingredient |

[1] Optional.

[2] Optional—not to exceed 10% by weight when used in lieu of equal quantities of cauliflower.

The packing medium may contain not more than 3.0 percent salt.

FILL OF CONTAINER AND DRAINED WEIGHTS

§ 52.1685 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since the fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container of cucumber pickles be filled as full as practicable without impairment of quality, that the product be entirely covered with the packing medium and that the product and packing medium occupy not less than 90 percent of the total capacity of the container.

§ 52.1686 *Recommended minimum drained weight.* (a) The minimum drained weight recommendations in Table I are not incorporated in the grades of the finished product since drained weight as such, is not a factor of quality for the purpose of these grades.

(b) The drained weight of all types of cucumber pickles except chow chow pickles is determined by emptying the contents of the container upon a circular sieve of proper diameter, containing 8 meshes to the inch (0.097-inch square openings) and allowing to drain for two minutes. A sieve 8 inches in diameter is used for container one-quart size or less and a sieve 12 inches in diameter is used for containers or samples larger than one-quart size.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS, IN OUNCES, OF PICKLES

| Container size or designation | Sour whole, cut, mixed, and dill pickles | Sweet whole, cut, and mixed pickles | Sweet pickle relish |
|---|---|---|---|
| Pint (16 ounces) | ---------- | 11 | 14 |
| Quart (32 ounces) | 17 | 22 | 28 |
| Gallon (128 ounces) | 85 | 90 | 112 |
| No. 2½ | 17 | 21 | 26½ |
| No. 10 | 72 | 76 | 94 |
| No. 12 | 85 | 90 | 112 |

SIZES

§ 52.1687 *Sizes of cucumber pickles in whole cucumber pickles.* The size of any whole cucumber pickle is determined by measuring the shortest diameter transverse to the longitudinal axis at the thickest portion of the pickle and by measuring the distance from stem to blossom end.

§ 52.1688 *Sizes of cross cut or sliced cucumber pickles.* The size of any unit cut at right angles to the longitudinal axis is determined by measuring the shortest diameter of the surface of the unit. The size of any unit cut longitudinally is determined by measuring the longest distance parallel to the longitudinal axis.

FACTORS OF QUALITY

§ 52.1689 *Ascertaining the grade.* (a) The grade of cucumber pickles may be ascertained by considering, in addition to the foregoing requirements of the respective grade, the following factors: Color, uniformity of size and shape, absence of defects, and texture. The relative importance of each factor is expressed numerically on a scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Uniformity of size and shape | 20 |
| Absence of defects | 30 |
| Texture | 30 |
| Total | 100 |

(b) "Normal flavor and normal odor" means that the cucumber pickles are free from objectionable flavors and objectionable odors of any kind.

§ 52.1690 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "16 to 20 points" means 16, 17, 18, 19, or 20 points).

§ 52.1691 *Color*—(a) *(A) classification.* Cucumber pickles that possess a practically uniform typical color may be given a score of 16 to 20 points. "Practically uniform typical color" means that the skin of the cucumber ingredient is practically free from bleached areas; that the skin of not more than 10 percent by weight of the cucumber ingredient may vary markedly from a typical yellow-green to green color; and that in mixed pickles, chow chow pickles and pickle relish, all of the pickle ingredients possess a practically uniform typical color for the respective ingredient.

(b) *(C) classification.* If the cucumber pickles possess a fairly uniform typical color, a score of 13 to 15 points may be given. Cucumber pickles that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly uniform typical color" means that the skin of the cucumber ingredient is fairly free from bleached areas; that the skin of not more than 25 percent by weight of the cucumber ingredient may vary markedly from a typical yellow-green to green color; and that in mixed pickles, chow chow pickles and pickle relish all of the pickle ingredients possess a fairly uniform typical color for the respective ingredient.

(c) *(SStd) classification.* Cucumber pickles that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 12 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1692 *Uniformity of size and shape*—(a) *(A) classification.* Cucumber pickles that are practically uniform in size and shape may be given a score of 17 to 20 points. "Practically uniform in size and shape" has the following meanings with respect to the various styles of cucumber pickles:

(1) *Whole pickles.* The pickles may vary moderately in size and shape and the diameter of the largest pickle, measured as aforesaid, does not exceed the diameter of the smallest pickle by more than 50 percent of the diameter of the smallest pickle.

(2) *"Cross cut," "slices" or "sliced" pickles.* The individual unit when cut at right angles to the longitudinal axis is not less than 3/16 inch nor more than 3/8 inch in thickness when measured at the thickest portion and the diameter of the largest unit, measured as aforesaid, is not more than 2 inches in diameter and the largest unit does not exceed the diameter of the smallest unit by more than 50 percent of the diameter of the smallest unit. When the units are cut longitudinally, such units may vary moderately in size and shape and the length of the longest unit is not more than twice the length of the shortest unit. When cut longitudinally with parallel surfaces, the unit is not less than 3/16 inch nor more than 3/8 inch in thickness when measured at the thickest portion.

(3) *Cut pickles.* The weight of the largest unit does not exceed the weight of the smallest unit by more than four times the weight of the smallest unit. An occasional unit which is not representative of the general size of all the units of a respective pickle ingredient is excluded in determining size variation.

(4) *Finely cut or finely chopped pickles.* The pickle ingredients have been finely cut or chopped into units which may vary moderately in size.

(b) *(C) classification.* If the pickles are fairly uniform in size and shape, a score of 13 to 16 points may be given. "Fairly uniform in size and shape" has the following meanings with respect to the various styles of cucumber pickles.

(1) *Whole pickles.* The pickles may vary considerably in size and shape and the diameter of the largest pickle, measured as aforesaid, is not more than twice the diameter of the smallest pickle.

(2) *"Cross cut," "slices" or "sliced" pickles.* The individual unit when cut at right angles to the longitudinal axis is not less than 3/16 inch nor more than 3/8 inch in thickness when measured at the thickest portion and the diameter of the largest unit, measured as aforesaid, is not more than 2 inches in diameter and the largest unit is not more than twice the diameter of the smallest unit. When the units are cut longitudinally, such units may vary considerably in size and shape and the length of the longest unit is not more than twice the length of the shortest unit. When cut longitudinally with parallel surfaces, the unit is not less than 3/16 inch nor more than 3/8 inch in thickness when measured at the thickest portion.

(3) *Cut pickles.* The largest unit weighs not more than twelve times the weight of the smallest unit. An occasional unit which is not representative of the general size of all the units of a respective pickle ingredient is excluded in determining size variation.

(4) *Finely cut or finely chopped pickles.* The pickle ingredients have been finely cut or chopped into units which may vary considerably in size.

(c) *(SStd) classification.* Cucumber pickles that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 12 points and shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule).

§ 52.1693 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from grit, sand, or silt; from attached stems, curved pickles, markedly off-shaped pickles, end cuts, units damaged by mechanical injury, units blemished by brown or black discoloration, by scars, pathological injury or insect injury and units blemished by other means.

(1) "Curved pickles" are whole pickles that are slightly curved or very curved.

(i) "Slightly curved" pickles are pickles that are curved at an angle of not more than 35 degrees, and

(ii) "Very curved" pickles are pickles that are curved at an angle of more than 35 degrees but not more than 60 degrees.

(2) "Markedly off-shaped" pickles are pickles that are curved at more than a 60-degree angle, "nubbins" and other badly crooked or misshapen pickles.

(3) "Grit, sand, or silt" means any particle of earthly material whether in the liquid packing medium or imbedded in the skin or flesh of the pickle.

(4) "Blemished unit" means blemished to such an extent that the appearance or eating quality of the unit is materially affected.

(5) "Seriously blemished" means blemished to such an extent that the appearance or eating quality of the unit is seriously affected.

(6) "Damaged by mechanical injury" means crushed or broken units or units damaged by other means to such an extent that the appearance or eating quality of the unit is seriously affected.

(7) "Stem" means any attached stem longer than ¼ inch.

(8) "End cut" or "end cuts" means any portion of a whole pickle obtained in the preparation of cross cut or sliced pickles possessing only one cut surface.

(b) *(A) classification.* Cucumber pickles that are practically free from defects may be given a score of 26 to 30 points. "Practically free from defects" means that the product contains no grit, sand, or silt that affects the eating quality or appearance of the product, the combined weight of all other defects and defective units does not exceed 25 percent of the total weight of the units, and that:

(1) Not more than 20 percent by count of all the pickles in whole pickles may consist of curved pickles and of such 20 percent not more than ¼ thereof may consist of very curved pickles;

(2) Not more than 5 percent by count of all the pickles in whole pickles may consist of markedly off-shaped pickles;

(3) Not more than 20 percent by count of all the pickles in whole pickles may have attached stems, and of such 20 percent not more than one-half thereof may have attached stems that exceed one-half inch in length.

(4) Not more than 10 percent by count of all the units may be blemished units, and of such 10 percent not more than one-half thereof may consist of seriously blemished units;

(5) Not more than 5 percent by weight of all the units may be end cuts in cross cut or sliced pickles; and

(6) Not more than 10 percent by count of all the units may be damaged by mechanical injury.

(c) *(C) classification.* If the cucumber pickles are fairly free from defects, a score of 22 to 25 points may be given. Cucumber pickles that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the product may contain a trace of grit, sand, or silt that does not materially affect the eating quality or appearance of the product, the combined weight of all other defects and defective units does not exceed 40 percent of the weight of the units, and that:

(1) Not more than 35 percent by count of all the pickles in whole pickles may consist of curved pickles and of such 35 percent not more than three-sevenths thereof may consist of very curved pickles;

(2) Not more than 10 percent by count of all the pickles in whole pickles may consist of markedly off-shaped pickles;

(3) Not more than 35 percent by count of all the pickles in whole pickles may have attached stems and of such 35 percent not more than four-sevenths thereof may have attached stems that exceed one-half inch in length.

(4) Not more than 20 percent by count of all the units may be blemished units and of such 20 percent not more than one-half thereof may consist of seriously blemished units;

(5) Not more than 15 percent by weight of all the units may be end cuts in cross cut or sliced pickles, and

(6) Not more than 25 percent by count of all the units may be damaged by mechanical injury.

(d) *(SStd) classification.* Cucumber pickles that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above U. S. Grade D or Substandard regardless of the total score for the product (this is a limiting rule).

§ 52.1694 *Texture—(a) General.* The factor of texture refers to the firmness, crispness, and the condition of the cucumber pickles.

(1) "Chalky white areas" means opaque chalky white areas exceeding ⅛ of the diameter of the pickle. Very pale green to translucent white areas should not be classified as chalky white.

(b) *(A) classification.* Cucumber pickles that possess a good texture may be given a score of 26 to 30 points. "Good texture" means that the cucumber pickles are firm and crisp for the respective style or type of pack, are practically free from seedy pickles, and that:

(1) Not more than 10 percent by count of all the units in cucumber pickles may be slightly shriveled, soft, or slippery;

(2) Not more than 10 percent by count of all the units in cucumber pickles may be hollow pickles; and

(3) Not more than 20 percent by count of all the units in cucumber pickles may have chalky white areas.

(c) *(C) classification.* If the cucumber pickles possess a fairly good texture, a score of 22 to 25 points may be given. Cucumber pickles that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard regardless of the total score for the product (this is a limiting rule). "Fairly good texture" means that the cucumber pickles are fairly firm and crisp, for the respective style and type of pack, are fairly free from seedy pickles, and that:

(1) Not more than 20 percent by count of all the units in cucumber pickles may be markedly shriveled, soft, or slippery;

(2) Not more than 20 percent by count of all the units in cucumber pickles may be hollow pickles; and

(3) Not more than 20 percent by count of all the units in cucumber pickles may have chalky white areas.

(d) *(SStd) classification.* Cucumber pickles that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1695 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of cucumber pickles, the grade for such lot will be determined by averaging the total scores of all the containers comprising the sample if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all the containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1696 *Score sheet for cucumber pickles.* The following score sheet may be used to summarize the factors determining the various grades:

| | | | |
|---|---|---|---|
| Size and kind of container | | | ..... |
| Container code or marking | | | ..... |
| Label | | | ..... |
| Net weight (in ounces) | | | ..... |
| Vacuum (in inches) | | | ..... |
| Drained weight (in ounces) | | | ..... |
| Style | | | ..... |
| Type | | | ..... |
| Density of syrup (° Baume or ° Brix) | | | ..... |
| Acidity—grams per 100 ml | | | ..... |
| Salt (% NaCl) | | | ..... |
| Size count (if whole) | | | ..... |
| Ingredients (if mixed or chow chow): ....% Cucumbers. ....% Cauliflower. ....% Onions. ....% Peppers. | | | |
| Factors | Score points | | |
| Color | 20 | (A) | 18–20 |
| | | (C) | 15–17 |
| | | (D) | 11–14 |
| Uniformity of size and shape | 20 | (A) | 17–20 |
| | | (C) | 13–16 |
| | | (D) | 10–12 |
| Absence of defects | 30 | (A) | 26–30 |
| | | (C) | 22–25 |
| | | (D) | 16–21 |
| Texture | 30 | (A) | 26–30 |
| | | (C) | 22–25 |
| | | (D) | 16–21 |
| Total score | 100 | | |
| Normal flavor and odor | | | ..... |
| Grade | | | ..... |

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED PINEAPPLE [1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1711 *Product description.* Canned pineapple is prepared from the properly matured fruit of the pineapple plant (Ananas sativus or Ananas comosus) which fruit is washed, peeled, cored, and trimmed; is packed with or without packing media; is packed with or without the addition of sweetening ingredients; and is sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

§ 52.1712 *Styles of canned pineapple.* (a) "Sliced" or "slices" of pineapple consist of whole, practically unbroken slices of pineapple that have been cut approximately at right angles to the vertical axis of the fruit.

(b) "Half sliced" or "half slices" of pineapple are portions of slices of pineapple that are matched in size so that two portions are approximately equivalent to a slice.

(c) "Broken sliced" or "broken slices" of pineapple consist of varying sized portions of slices which have approximately the same measurement along the radial axis. "Radial axis" means the measurement along the radius from the inside arc to the outside arc.

(d) "Tidbits" of pineapple are small, wedge-shaped sections cut from slices or portions of slices of pineapple. The approximate measurements of such sectors are: (1) Length of outside arc, more than ⅜ inch but not more than ¾ inch; (2) thickness, more than 5/16 inch but not more than ½ inch; and (3) length (measured along the radius from the inside arc to the outside arc), more than 1/16 inch but not more than 1¼ inches.

(e) "Salad cuts" of pineapple are wedge-shaped sections cut from slices or portions of slices of pineapple. The approximate measurements of such sectors are: (1) length of outside arc—more than ¾ inch but not more than 2 inches; (2) thickness—more than 5/16 inch but not more than ⅞ inch; and (3) length (measured along the radius from the inside arc to the outside arc)—more than ⅝ inch but not more than 1¼ inches.

(f) "Chunks" of pineapple are large pieces of pineapple which may or may not be uniform in shape and do not exceed 1½ inches in any edge dimension. The approximate measurements of such pieces if wedge-shaped are: (1) length of outside arc—more than ¾ inch; (2) thickness—more than ½ inch; and (3) length (measured along the radius from the inside arc to the outside arc)—more than 1 1/16 inch. Such pieces that are not wedge-shaped may be predominantly of irregular shapes and do not have the appearance of any uniformly cut unit, such as cubes or tidbits.

(g) "Cubes" or "diced" pineapple consist of approximate cube-shaped pieces.

(h) "Vertical cuts" of pineapple are longitudinal sections cut from the prepared cylinder of pineapple.

(i) "Crushed" pineapple is pineapple that has been cut, shredded, or crushed into a comminuted form or into small, irregularly shaped pieces that do not have the appearance of any regularly cut unit. This style includes, but is not limited to, styles commonly called "crushed," "finely cut crushed," "coarse cut crushed," or similar designations, and may include any combinations thereof.

§ 52.1713 *Grades of canned pineapple.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that possesses a good color; that is practically free from defects; that possesses a good character; that possesses a good flavor and odor; and that is of such quality with respect to uniformity of size and shape as to score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; that possesses a fairly good flavor and odor; and that is of such quality with respect to uniformity of size and shape as to score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of half slices and broken slices of canned pineapple that possesses a fairly good color; that is fairly free from defects; that possesses a fairly good character; that possesses a fairly good flavor and odor; and that is of such quality with respect to uniformity of size and shape as to score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is the quality of sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that fails to meet the requirements of U. S. Grade B or U. S. Choice; or is the quality of half slices or broken slices of canned pineapple that fails to meet the requirements of U. S. Grade C or U. S. Standard.

LIQUID MEDIA, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.1714 *Recommended designations of liquid media and Brix measurements.* "Cut-out" requirements for liquid media or packing media are not incorporated in the grades of the finished product since sirup or any other liquid medium or a dry sweetening ingredient, as such, is not a factor of quality for the purpose of these grades.

(a) It is recommended that canned pineapple have the following indicated "cut-out" Brix measurement for the respective designation, which designations include, but are not limited to, the following:

| *Designation for all styles, except "crushed"* | *Brix measurement* |
|---|---|
| Extra heavy sirup | 22° or more, but not more than 35°. |
| Heavy sirup | 18° or more, but less than 22°. |
| Light sirup | 14° or more, but less than 18°. |
| Sweetened extra heavy | 22° or more, but not more than 35°. |
| Sweetened heavy | 18° or more, but less than 22°. |

§ 52.1715 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container of canned pineapple be filled as full as practicable without impairment of quality and that the product and packing medium, if any, occupy not less than 90 percent of the volume of the container.

§ 52.1716 *Recommended minimum drained weight.* The minimum drained weight recommendations for the various styles in Table I, Table II, and Table III of this subpart are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purpose of these grades. The drained weight of canned pineapple is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch, ±3%, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and the pineapple less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

COUNTS AND SIZES

§ 52.1717 *Recommended count and size of slices and half slices.* The recommended minimum number of slices and half slices, together with the recommended approximate thickness and approximate diameter for the respective counts per container, are shown in Table IV for the most common container sizes for these styles.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR SLICES, HALF SLICES, AND BROKEN SLICES

| Container designation | Container size—over-all dimensions | | Slices | Half slices | Broken slices |
|---|---|---|---|---|---|
| | Width | Height | | | |
| | *Inches* | *Inches* | *Ounces* | *Ounces* | *Ounces* |
| 300 x 204 | 3 | 2 1/16 | 4 | ------ | ------ |
| No. 1 flat | 3 7/16 | 2 3/16 | 5 3/4 | ------ | ------ |
| 8 Z tall | 2 13/16 | 3 4/16 | ------ | ------ | ------ |
| 211 cylinder | 2 13/16 | 4 1/16 | ------ | ------ | ------ |

FACTORS OF QUALITY

§ 52.1718 *Ascertaining the grade.* (a) The grade of canned pineapple may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size and shape for the applicable style, absence of defects, and character. The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Uniformity of size and shape | 20 |
| Absence of defects | 30 |
| Character | 30 |
| Total score | 100 |

(b) "Good flavor and odor" means that the canned pineapple possesses a distinct and normal flavor for the variety, is characteristic of properly ripened and properly matured pineapple that has been properly prepared and processed; and is free from objectionable flavors and objectionable odors of any kind.

(c) "Fairly good flavor and odor" means that the canned pineapple may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1719 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.1720 *Color*—(a) *(A) classification.* Sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that possesses a good color may be given a score of 18 to 20 points. "Good color" means that the color of the pineapple units or mass is bright and is characteristic of properly ripened and properly matured pineapple of similar varietal characteristics; and that there may be slight variations in shades of such characteristic color in the units, within each unit, or within the mass, and that white radiating streaks may be present: *Provided*, That such variations do not materially affect the appearance of the product.

(b) *(B) classification.* Sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that possesses a reasonably good color may be given a score of 16 or 17 points. Canned pineapple that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the color of the pineapple units or mass may be slightly dull but is characteristic of properly matured pineapple of similar varietal characteristics; and that there may be marked variations in shades of such characteristic color in the units, within each unit, or within the mass, and that white radiating streaks may be present; *Provided*, That such variations do not seriously affect the appearance of the product.

(c) *(C) classification.* Half slices and broken slices of canned pineapple that possesses a fairly good color may be given a score of 14 or 15 points. Canned pineapple that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the color of the pineapple units may be slightly dull but is characteristic of properly matured pineapple of similar varietal characteristics; and that there may be marked variations in shades of such characteristic color in the units or within each unit, and that white radiating steaks may be present: *Provided*, That such variations do not seriously affect the appearance of the product.

(d) *(SStd) classification.* Sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that for any reason is off color or that fails to meet the requirements of paragraph (b) of this section, and half slices or broken slices of canned pineapple that for any reason is off color or that fails to meet the requirements of paragraph (c) of this section, may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1721 *Uniformity of size and shape*—(a) *General.* The factor of uniformity of size and shape is not based on any detailed requirements and is not scored for the style of crushed pineapple; the other three factors (color, absence of defects, and character) are scored and the total is multiplied by 100 and divided by 80, dropping any fractions to determine the total score for canned crushed pineapple:

(b) *(A) classification.* Sliced, tidbits, salad cuts, chunks, cubes, or vertical cuts of canned pineapple that is practically uniform in size and shape may be given a score of 18 to 20 points. "Practically uniform in size and shape" has the following meanings with respect to the following styles of canned pineapple:

(1) *Sliced.* The diameter of the slice with the longest diameter does not exceed the diameter of the slice with the shortest diameter by more than $\frac{1}{16}$ inch.

(i) The thickness of the slice with the widest thickness at the circumference does not exceed the thickness of the slice with the most narrow thickness at the circumference by more than $\frac{1}{16}$ inch.

(ii) The maximum radial axis of any slice does not exceed the minimum radial axis of the same slice by more than $\frac{1}{8}$ inch. "Radial axis" means the measurement along the radius from the inside arc to the outside arc.

(2) *Tidbits.* Not more than 10 percent by weight of the units may fail to conform to any one or more of the following dimensions:

(i) Length of outside arc—more than $\frac{3}{8}$ inch but not more than $\frac{3}{4}$ inch;

(ii) Thickness—more than $\frac{5}{16}$ inch but not more than $\frac{1}{2}$ inch;

(iii) Length (measured along the radius from the inside arc to the outside arc)—more than $1\frac{1}{16}$ inch but not more than $1\frac{1}{4}$ inches.

(3) *Salad cuts.* Not more than 10 percent by weight of the units may fail to conform to any one or more of the following dimensions:

(i) Length of outside arc—more than $\frac{3}{4}$ inch but not more than 2 inches;

(ii) Thickness—more than $\frac{5}{16}$ inch but not more than $\frac{15}{16}$ inch;

(iii) Length (measured along the radius from the inside arc to the outside arc)—more than $\frac{5}{8}$ inch but not more than $1\frac{1}{4}$ inches.

(4) *Chunks.* (i) If predominantly wedge-shaped or if predominantly of a similar distinct shape, none of the pieces may exceed $1\frac{1}{2}$ inches in any edge dimension and not less than an aggregate of 90 percent by weight of the units consist of pieces which weigh more than $\frac{3}{16}$ of an ounce each and exceed at least one of the following dimensions:

(*a*) Length of outside arc—$\frac{3}{4}$ inch;

(*b*) Thickness—$\frac{1}{2}$ inch;

(*c*) Length (measured along the radius from the inside arc to the outside arc)—$1\frac{1}{16}$ inch;

or (ii) if predominantly of irregular sizes and shapes, none of the pieces may exceed $1\frac{1}{2}$ inches in any edge dimension and not less than 90 percent by weight of the units consist of pieces which weigh more than $\frac{3}{16}$ of an ounce each.

(5) *Cubes.* Not more than 10 percent by weight of the units may consist of pieces which weigh more than $\frac{3}{16}$ of an ounce each, are more than $\frac{3}{4}$ inch in greatest edge dimension, or pass through a $\frac{5}{16}$-inch square opening.

(6) *Vertical cuts.* The units are of substantially equal length and not more than 10 percent by count of the units, or not more than 1 unit in a container of less than 10 units, may be less than $\frac{3}{4}$ inch or more than $1\frac{1}{4}$ inches in the longest dimension edge other than any longitudinal measurement.

(b) *(B) classification.* If the sliced, tidbits, salad cuts, chunks, cubes, or vertical cuts canned pineapple is reasonably uniform in size and shape, a score of 16 or 17 points may be given. "Reasonably uniform in size and shape" has the following meanings with respect to the following styles of canned pineapple:

(1) *Sliced.* The diameter of the slice with the longest diameter does not exceed the diameter of the slice with the shortest diameter by more than $\frac{1}{8}$ inch.

(i) The thickness of the slice with the widest thickness at the circumference does not exceed the thickness of the slice with the most narrow thickness at the circumference by more than $\frac{1}{8}$ inch.

(ii) The maximum radial axis of any slice does not exceed the minimum radial axis of the same slice by more than $\frac{1}{4}$ inch. "Radial axis" means the measurement along the radius from the inside arc to the outside arc.

(iii) The ratio of the weight of the largest slice to the weight of the smallest slice does not exceed 1.33.

(2) *Tidbits.* Not more than 20 percent by weight of the units may fail to conform to any one or more of the following dimensions:

(i) Length of outside arc—more than $\frac{3}{8}$ inch but not more than $\frac{3}{4}$ inch;

(ii) Thickness—more than $\frac{5}{16}$ inch but not more than $\frac{1}{2}$ inch;

(iii) Length (measured along the radius from the inside arc to the outside arc)—more than $1\frac{1}{16}$ inch but not more than $1\frac{1}{4}$ inches.

(3) *Salad cuts.* Not more than 20 percent by weight of the units may fail to conform to any one or more of the following dimensions:

(i) Length of outside arc—more than $\frac{3}{4}$ inch but not more than 2 inches;

(ii) Thickness—more than $\frac{5}{16}$ inch but not more than $\frac{15}{16}$ inch;

(iii) Length (measured along the radius from the inside arc to the outside arc)—more than $\frac{5}{8}$ inch but not more than $1\frac{1}{4}$ inches.

(4) *Chunks.* (i) If predominantly wedge-shaped or if predominantly of a similar distinct shape, none of the pieces may exceed $1\frac{1}{2}$ inches in any edge dimension; not less than 85 percent by weight of the units consist of pieces which weight more than $\frac{3}{16}$ of an ounce each; and not less than 80 percent by weight of the units exceed at least one of the following dimensions:

(*a*) Length of outside arc—$\frac{3}{4}$ inch;

(*b*) Thickness—$\frac{1}{2}$ inch;

(*c*) Length (measured along the radius from the inside arc to the outside arc)—$1\frac{1}{16}$ inch;

or (ii) if predominantly of irregular sizes and shapes, none of the pieces may exceed $1\frac{1}{2}$ inches in any edge dimension and not less than 85 percent by weight of the units consist of pieces which weigh more than $\frac{3}{16}$ of an ounce each.

(5) *Cubes.* Not more than 20 percent by weight of the units may consist of pieces which weigh more than $\frac{3}{16}$ of an ounce each, are more than $\frac{3}{4}$ inch in greatest edge dimension, or pass through a $\frac{5}{16}$-inch square opening.

(6) *Vertical cuts.* The units are of reasonably uniform length; not more than 20 percent by count of the units, or not more than one unit in a container of less than 5 units, may be less than $\frac{3}{4}$ inch or more than $1\frac{1}{4}$ inches in the longest dimension edge other than any longitudinal measurement; and the ratio of the weight of the largest vertical cut to the weight of the smallest vertical cut does not exceed 1.33.

(c) *(C) classification.* If the canned pineapple consists of half slices or broken slices that are fairly uniform in size and shape, a score of 14 or 15 points may be given. "Fairly uniform in size and shape" has the following meaning with respect to, and applies only to, the following styles:

(1) *Half slices.* Not more than an aggregate of 10 percent by count of the units, or not more than 1 unit in a container of less than 10 units, may consist of portions that are smaller or larger than an approximate half slice or may consist of portions that do not have approximately the same measurement at the radial axis but do have approximately the same thickness as contrasted with the measurements of the predominating half slices; and the ratio of the weight of the largest unit to the weight of the smallest approximate half slice does not exceed 1.66. "Radial axis" means the measurement along the radius from the inside arc to the outside arc.

(2) *Broken slices.* Not more than an aggregate of 10 percent by weight of the units may consist of portions that are smaller than one-fourth of a slice, may consist of portions that are larger than three-fourths of a slice, or may consist of portions that do not have approximately the same measurement at the radial axis but do have approximately the same thickness as contrasted with the measurements of the predominating broken slices. "Radial axis" means the measurement along the radius from the inside arc to the outside arc.

(d) *(SStd) classification.* Sliced, tidbits, salad cuts, chunks, cubes, or vertical cuts of canned pineapple that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule).

(e) Half slices or broken slices that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade C or Standard, regardless of the total score for the product (this is a limiting rule).

§ 52.1722 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from units that are crushed or excessively trimmed or split for the applicable style; from units that are blemished or seriously blemished; and from any other defects which detract from the appearance or edibility of the product.

(1) "Crushed" means that a unit in sliced, half sliced, broken sliced, tidbits, salad cuts, chunks, or vertical cuts of canned pineapple has been seriously crushed so that the unit is not of normal shape.

(2) "Excessively trimmed" means that a unit in sliced, half sliced, broken sliced, or vertical cuts of canned pineapple has been so trimmed that it does not retain the apparent original conformation of the prepared unit. "Slight trimming" means that the trimming may be noticeable but does not affect the conformation of the units.

(3) "Split" means that a slice or half slice in sliced or half sliced pineapple is definitely severed from core hole to perimeter or that a vertical cut is completely divided into segments.

(4) "Blemished" means that the unit possesses any blemish (or combination of blemishes) which materially affects the appearance or edibility of the unit and includes, but is not limited to, any fruit eye or portion thereof which on the exposed portion exceeds the area of a circle $\frac{1}{16}$ inch in diameter, brown spots, pieces of shell, bruised portions, and other similar injuries or blemishes.

(5) "Seriously blemished" means that the unit is blemished to the extent that the blemish or blemishes seriously affect the appearance or edibility of the unit and includes, but is not limited to, deep fruit eyes and serious brown spots.

(b) *(A) classification.* Sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that is

practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" means that the product is practically free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition, has the following meanings with respect to the following styles of canned pineapple:

(1) *Sliced.* Not more than 3 units in containers of more than 25 units or not more than 1 unit in containers of 25 units or less may be crushed; an occasional slice may be slightly trimmed but none of the slices are excessively trimmed; not more than 5 percent by count of the slices may be blemished or seriously blemished; and not more than 10 percent by count of the slices may be split in not more than 1 place. One slice in a single container is permitted to be blemished or seriously blemished or split if such slice exceeds the respective allowance of 5 percent or 10 percent by count: *Provided,* That in all containers comprising the sample such blemished or seriously blemished units do not exceed an average of 5 percent by count of the total number of units, and that such split units do not exceed an average of 10 percent by count of the total number of units.

(2) *Tidbits.* Not more than 3 units in containers of less than 150 units or not more than 2 percent by count of the units in containers of 150 or more units may be crushed; and not more than 5 percent by count of all the units may be blemished or seriously blemished but of such 5 percent not more than one-half thereof, or not more than 2½ percent by count of all the units, may be seriously blemished.

(3) *Salad cuts.* Not more than 2 units in containers of less than 100 units or not more than 2 percent by count of the units in containers of 100 or more units may be crushed; and not more than 5 percent by count of all the units may be blemished or seriously blemished but of such 5 percent not more than one-half thereof, or not more than 2½ percent by count of all the units, may be seriously blemished.

(4) *Chunks.* Not more than 3 units in containers of less than 70 units or not more than 5 percent by count of units in containers of 70 or more units may be crushed; and not more than 5 percent by count of all the units may be blemished or seriously blemished but of such 5 percent not more than one-half thereof, or not more than 2½ percent by count of all the units, may be seriously blemished.

(5) *Cubes.* Not more than 2 percent by weight of all the drained units may be blemished or seriously blemished but of such 2 percent not more than one-half thereof, or not more than 1 percent by weight of all the drained units, may be seriously blemished.

(6) *Vertical cuts.* Not more than 1 unit in a container may be crushed; an occasional vertical cut may be slightly trimmed but none of the vertical cuts are excessively trimmed; not more than 5 percent by count of the units may be blemished or seriously blemished; and not more than 10 percent by count of the vertical cuts may be split in not more than 1 place. One vertical cut in a single container is permitted to be blemished or seriously blemished or split if such vertical cut exceeds the respective allowance of 5 percent or 10 percent by count: *Provided,* That in all containers comprising the sample such blemished or seriously blemished units do not exceed an average of 5 percent by count of the total number of units, and that such split units do not exceed an average of 10 percent by count of the total number of units.

(7) *Crushed.* Not more than ½ percent by weight of the drained pineapple may be blemished or seriously blemished. In determining the weight of any blemished material, the weight of the entire piece which is blemished is included and the percentage based on the drained weight of the crushed pineapple.

(c) *(B) classification.* If the sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple is reasonably free from defects, a score of 24 to 26 points may be given. Canned pineapple that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the product is reasonably free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition has the following meanings with respect to the following styles of canned pineapple:

(1) *Sliced.* Not more than 3 units in containers of more than 25 units or not more than 1 unit in containers of 25 units or less may be crushed; the slices may be slightly trimmed but none of the slices are excessively trimmed; not more than 12½ percent by count of the slices may be blemished or seriously blemished; and not more than 25 percent by count of the slices may be split in not more than 2 places per slice. One slice in a single container is permitted to be blemished or seriously blemished and 1 slice is permitted to be split if such slices exceed the respective allowance of 12½ percent by count and 25 percent by count: *Provided,* That in all containers comprising the sample such blemished or seriously blemished units do not exceed an average of 12½ percent by count of the total number of units, and that such split units do not exceed an average of 25 percent by count of the total number of units.

(2) *Tidbits.* Not more than 3 units in containers of less than 150 units or not more than 2 percent by count of the units in containers of 150 or more units may be crushed; and not more than 12½ percent by count of all the units may be blemished or seriously blemished but of such 12½ percent not more than one-half thereof, or not more than 6¼ percent by count of all the units, may be seriously blemished.

(3) *Salad cuts.* Not more than 2 units in containers of less than 100 units or not more than 2 percent by count of the units in containers of 100 or more units may be crushed; and not more than 12½ percent by count of all the units may be blemished or seriously blemished but of such 12½ percent not more than one-half thereof, or not more than 6¼ percent by count of all the units, may be seriously blemished.

(4) *Chunks.* Not more than 3 units in containers of less than 70 units or not more than 5 percent by count of units in containers of 70 or more units may be crushed; and not more than 12½ percent by count of all the units may be blemished or seriously blemished but of such 12½ percent not more than one-half thereof, or not more than 6¼ percent by count of all the units, may be seriously blemished.

(5) *Cubes.* Not more than 4 percent by weight of all the drained units may be blemished or seriously blemished but of such 4 percent not more than one-half thereof, or not more than 2 percent by weight of all the drained units, may be seriously blemished.

(6) *Vertical cuts.* Not more than 1 unit in a container may be crushed; the vertical cuts may be slightly trimmed but none of the vertical cuts are excessively trimmed; not more than 12½ percent by count of the vertical cuts may be blemished or seriously blemished; and not more than 25 percent by count of the vertical cuts may be split in not more than 2 places per cut. One vertical cut in a single container is permitted to be blemished or seriously blemished and 1 vertical cut is permitted to be split if such cuts exceed the respective allowance of 12½ percent by count and 25 percent by count: *Provided,* That in all containers comprising the sample such blemished or seriously blemished units do not exceed an average of 12½ percent by count of the total number of units, and that such split units do not exceed an average of 25 percent by count of the total number of units.

(7) *Crushed.* Not more than ¾ percent by weight of the drained pineapple may be blemished or seriously blemished. In determining the weight of any blemished material, the weight of the entire piece which is blemished is included and the percentage based on the drained weight of the crushed pineapple.

(d) *(C) classification.* If the canned pineapple consists of half slices or broken slices that are fairly free from defects, a score of 21 to 23 points may be given. Canned pineapple that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the product is fairly free from any defects not specifically mentioned that affect the appearance or edibility of the product, and, in addition has the following meanings with respect to, and applies only to, the following styles:

(1) *Half slices.* Not more than 3 units in containers of more than 25 units or not more than 1 unit in containers of 25 units or less may be crushed; the half slices may be trimmed but none of the half slices are excessively trimmed; and not more than 12½ percent by count of the units may be blemished or seriously blemished; and not more than 25 percent by count of the half slices may be split in not more than 1 place per unit. One unit in a single container is permitted to be blemished or seriously blemished and 1 half slice is permitted to be split if such unit and half slice exceed the respective allowance of 12½ percent and 25 percent by count: *Provided,* That in all containers comprising the sample such blemished or seriously blemished units do not exceed an average of 12½ percent by count of the total number of units, and that such split units do not exceed an average of 25 percent by count of the total number of units.

(2) *Broken slices.* Not more than 5 percent by count of the units may be crushed; the broken slices may be trimmed but none of the broken slices are excessively trimmed; and not more than 12½ percent by count of the units may be blemished or seriously blemished.

(e) *(SStd) classification.* Sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that fails to meet the requirements of paragraph (c) of this section and half slices or broken slices that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1723 *Character—(a) General.* The factor of character refers to the degree of ripeness and maturity, the texture of the fruit, and the degree of freedom from core material. Core material shall not be considered unless such material may be definitely identified as hard and characteristic of the center structure of pineapple. In determining the weight of core material, such portions are cut cleanly from the rest of the fruit.

(b) *(A) classification.* Sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that possesses a good character may be given a score of 27 to 30 points. "Good character" has the following meanings with respect to the following styles of canned pineapple:

(1) *Sliced.* The slices are of practically uniform ripeness, are at least reasonably firm with the fruitlets appearing as a compact structure, are reasonably free from porosity, and there may be present not more than 2½ percent by weight of the drained pineapple that is core material.

(2) *Tidbits, salad cuts, cubes, vertical cuts, or crushed.* The units are of practically uniform ripeness, the fruitlets appear as a compact structure, the units are reasonably free from porosity; and there may be present not more than 2½ percent by weight of the drained pineapple that is core material.

(3) *Chunks. The units are of practically uniform ripeness, the fruitlets appear as a compact structure, the units are reasonably free from porosity, and the units are practically free from any core material.*

(c) *(B) classification.* If the sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple possesses a reasonably good character, a score of 24 to 26 points may be given. Canned pineapple that falls into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" has the following meanings with respect to the following styles of canned pineapple:

(1) *Sliced.* The slices are of reasonably uniform ripeness, the fruitlets are reasonably compact in structure, the slices are fairly free from porosity; and there may be present not more than 5 percent by weight of the drained pineapple that is core material.

(2) *Tidbits, salad cuts, cubes, vertical cuts, or crushed.* The units are of reasonably uniform ripeness, the fruitlets are reasonably compact in structure, the units are fairly free from porosity; and there may be present not more than 5 percent by weight of the drained pineapple that is core material.

(3) *Chunks.* The units are of reasonably uniform ripeness, the fruitlets are reasonably compact in structure, the units are fairly free from porosity; and there may be present not more than 2½ percent by weight of the drained pineapple that is core material.

(d) *(C) classification.* Half slices and broken slices of canned pineapple that possesses a fairly good character may be given a score of 21 to 23 points. Canned pineapple that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" has the following meaning with respect to, and applies only to, the following styles:

(1) *Half slices and broken slices.* The units are of reasonably uniform ripeness, the fruitless are reasonably compact in structure, the units are fairly free from porosity; and there may be present not more than 5 percent by weight of the drained pineapple that is core material.

(e) *(SStd) classification.* Sliced, tidbits, salad cuts, chunks, cubes, vertical cuts, or crushed canned pineapple that fails to meet the requirements of paragraph (c) of this section, and half slices or broken slices that fail to meet the requirements of paragraph (d) of this section, may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1724 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned pineapple, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to each limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN PINEAPPLE [1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1741 *Product description.* Frozen pineapple is prepared from the properly ripened fruit of the pineapple plant (Ananas sativus or Ananas comosus); is peeled, cored, trimmed, and washed; may be packed with or without packing media; and is frozen and stored at temperatures necessary for the preservation of the product.

§ 52.1742 *Styles of frozen pineapple—(a) Whole slices.* Frozen whole slices of pineapple consist of whole, practically unbroken slices of pineapple that have been cut, at a right angle to the longitudinal axis, into approximately equal units.

(b) *Half slices.* Frozen half slices of pineapple are such portions of whole slices of pineapple that are so matched in size and thickness that two portions are approximately equivalent to a slice.

(c) *Broken slices.* Frozen broken slices of pineapple consist of portions of slices of pineapple, if such portions are approximately of the same thickness and diameter.

(d) *Crushed.* Frozen crushed pineapple is pineapple that has been cut, shredded, or crushed into fine pieces.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(e) *Tidbits.* Frozen tidbits of pineapple are small, wedge-shaped sections cut from slices or portions of slices of pineapple.

(f) *Chunks.* Frozen chunks of pineapple are pieces of pineapple which do not conform to any of the foregoing styles, which need not be symmetrical nor uniform in size, and which do not exceed 1½ inches in any dimension.

§ 52.1743 *Grades of frozen pineapple.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of whole slices, crushed, tidbits, or chunks that possess a practically uniform, bright, characteristic yellow color in the applicable style; are practically uniform in size and symmetry in the applicable style; are practically free from defects in the applicable style; possess a good character in the applicable style; possess a normal flavor and odor; and score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of whole slices, crushed, tidbits, or chunks that possess a reasonably uniform, good, characteristic yellow color in the applicable style; are reasonably uniform in size and symmetry in the applicable style; are reasonably free from defects in the applicable style; possess a reasonably uniform, reasonably good character in the applicable style; possess a normal flavor and odor; and score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of half slices and broken slices that are fairly uniform in size and symmetry; possess a fairly uniform, fairly good, characteristic yellow color or better color; are fairly free from defects; possess a fairly good character; possess a normal flavor and odor; and score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" or "Substandard" is (1) the quality of whole slices, crushed, tidbits, or chunks that fail to meet the requirements of "U. S. Grade B" or "U. S. Choice" grade; or (2) the quality of half slices or broken slices that fail to meet the requirements of "U. S. Grade C" or "U. S. Standard."

FACTORS OF QUALITY

§ 52.1744 *Ascertaining the grade.* (a) The grade of frozen pineapple is determined immediately after thawing to the extent that the mass or units may be easily separated. The grade of frozen pineapple may be ascertained by considering, in addition to the requirements of the respective grade, the following factors: Color, uniformity of size and symmetry, absence of defects, and character.

(b) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Uniformity of size and symmetry | 20 |
| Absence of defects | 30 |
| Character | 30 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the pineapple is free from objectionable flavors, off flavors, and objectionable odors of any kind.

§ 52.1745 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.1746 *Color*—(a) *(A) classification.* Whole slices, crushed, tidbits, or chunks that possess a practically uniform, bright, characteristic yellow color, may be given a score of 18 to 20 points. "Practically uniform, bright, characteristic yellow color" means that the frozen pineapple has a yellow color typical of frozen pineapple and that there may be some variation of such color in the mass or of the units.

(b) *(B) classification.* Whole slices, crushed, tidbits, or chunks that possess a reasonably uniform, good, characteristic yellow color, may be given a score of 16 or 17 points. Frozen pineapple that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Choice," regardless of the total score for the product (this is a limiting rule). "Reasonably uniform, good, characteristic yellow color" means that the frozen pineapple may have considerable variation of such color in the mass or of the units.

(c) *(C) classification.* Half slices or broken slices that possess a fairly uniform, fairly good, characteristic yellow color or better color may be given a score of 14 or 15 points. Frozen pineapple that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Standard," regardless of the total score for the product (this is a limiting rule). "Fairly uniform, fairly good, characteristic yellow color," means that the individual units of the frozen pineapple may vary markedly from a uniform, typical yellow color and may be slightly dull in color.

(d) *(SStd) classification.* Frozen pineapple that possesses a grayish cast or is definitely dull or off-color for any reason, or that fails to meet the requirements of paragraphs (a), (b), or (c) of this section for the applicable style may be given a score of 0 to 13 points and shall not be graded above "U. S. Grade D" or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1747 *Uniformity of size and symmetry*—(a) *General.* The factor of uniformity of size and symmetry shall not be scored when grading frozen crushed pineapple or frozen chunks of pineapple. The other three factors shall be scored and the total shall be multiplied by 100 and divided by 80, dropping any fractions, to determine the total score.

(b) *(A) classification.* If the frozen pineapple units are practically uniform in size and symmetry, a score of 18 to 20 points may be given. "Practically uniform in size and symmetry" has the following meaning with respect to, and applies only to, the following styles of frozen pineapple:

(1) *Whole slices and tidbits.* All of the units within each style are the same apparent thickness, size, and shape, with not more than a slight deviation in actual dimensions.

(c) *(B) classification.* If the frozen pineapple units are reasonably uniform in size and symmetry, a score of 16 or 17 points may be given. Frozen pineapple that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice," regardless of the total score for the product (this is a limiting rule). "Reasonably uniform in size and symmetry" has the following meaning with respect to, and applies only to, the following styles of frozen pineapple:

(1) *Whole slices and tidbits.* The units within each style may vary in thickness, size, and shape with more than a slight deviation in actual dimensions.

(d) *(C) classification.* If the frozen pineapple units consist of half slices or broken slices, a score of 14 or 15 points may be given. Frozen pineapple that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Standard," regardless of the total score for the product (this is a limiting rule).

§ 52.1748 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from blemished units; from excessively trimmed units; from broken units; and from crushed units. (See Table No. I of this subpart.)

(1) "Blemished units" are units of frozen pineapple with any fruit eye more than 1/32 inch in diameter, deep fruit eyes regardless of area, brown spots, peel, bruise, or other injury.

(2) "Excessively trimmed units" means that the units have been so trimmed that they do not retain their apparent original conformation.

(3) "Broken units" means that whole slices are definitely severed from core hole to perimeter.

(4) "Crushed units," except for crushed style, means that the units have been crushed to the extent that they are not of normal shape.

(b) *(A) classification.* Frozen pineapple that is practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" has the following meaning with respect to, and applies only to, the following styles of frozen pineapple:

(1) *Whole slices.* No units are crushed; no units are excessively trimmed; not more than 5 percent, by count, may be blemished; and not more than 10 percent, by count, may be broken in one place only. One blemished unit and one broken unit are permitted if one unit exceeds the respective allowance of 5 percent and 10 percent by count.

(2) *Tidbits and chunks.* Not more than 5 percent, by count, may be crushed and not more than 5 percent, by count, may be blemished.

(3) *Crushed.* Not more than 1/2 percent by weight, may be blemished units. In determining the weight of blemished material, the weight of the entire blemished piece is included and the percentage is based on the net weight of the pineapple.

(c) *(B) classification.* Frozen pineapple that is reasonably free from defects may be given a score of 24 to 26 points. Frozen pineapple that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice," regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" has the following meaning with respect to, and applies only to, the following styles of frozen pineapple:

(1) *Whole slices.* Not more than 3 percent, by count, may be excessively trimmed; not more than 5 percent, by count, may be crushed; not more than 12½ percent, by count, may be blemished; and not more than 25 percent, by count, may be broken in one place only.

(2) *Tidbits and chunks.* Not more than 5 percent, by count, may be crushed; and not more than 12½ percent, by count, may be blemished.

(3) *Crushed.* Not more than 1 percent, by weight, may be blemished units. In determining the weight of blemished material, the weight of the entire piece is included and the percentage based on the net weight of the frozen pineapple.

(d) *(C) classification.* Frozen pineapple that is fairly free from defects may be given a score of 21 to 23 points. Frozen pineapple that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Standard," regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" has the following meaning with respect to, and applies only to, the following styles of frozen pineapple:

(1) *Half slices and broken slices.* Not more than 5 percent, by count, may be crushed; and not more than 12½ percent, by count, may be blemished. Since half slices and broken slices of frozen pineapple are whole slices broken in more than one place, these styles are scored in this classification and shall not be graded above "U. S. Grade C" or "U. S. Standard," regardless of the total score for the product (this is a limiting rule).

(e) *(SStd) classification.* Whole slices, crushed, tidbits, and chunks of pineapple that fail to meet paragraph (c) of this section; and half slices or broken slices of frozen pineapple that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points and shall not be graded above "U. S. Grade D" or Substandard, regardless of the total score for the product (this is a limiting rule).

(f) The evaluation of the score for the factor of absence of defects may be determined from Table No. I of this subpart which indicates the maximum allowances for each type of defect for the score indicated.

§ 52.1749 *Character*—(a) *General.* The factor of character refers to the degree of ripeness and texture of the fruit.

(b) *(A) classification.* Frozen pineapple that possesses a good character may be given a score of 27 to 30 points. "Good character" has the following meaning with respect to, and applies only to, the following styles of frozen pineapple:

(1) *Whole slices, tidbits, and crushed.* The fruit is of practically uniform ripeness and there may be present not more than 2½ percent, by weight of the pineapple, that is core material or fibrous stock; and, in the case of whole slices and tidbits, the fruit is reasonably firm and the fruitlets appear as a compact structure, reasonably free from porosity.

(2) *Chunks.* The fruit is of practically uniform ripeness and normally has had more of the fibrous portions around the core hole removed than is the case with other styles of pack; the fruit is reasonably firm and the fruitlets appear as a compact structure, reasonably free from porosity.

TABLE NO. I—ALLOWANCES FOR DEFECTS IN FROZEN PINEAPPLE

| Grade | Score points | Whole slices: Crushed units | Whole slices: Excessively trimmed | Whole slices: Blemished units | Whole slices: Broken units | Crushed—Blemished units | Half slices and broken slices: Crushed units | Half slices and broken slices: Blemished units | Tidbits and chunks: Crushed units | Tidbits and chunks: Blemished units |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Maximum allowances | | | | | | | | |
| | | By count | | | | By weight | By count | | | |
| U. S. Grade A or U. S. Fancy. | 30 | None | None | None | 4% | 1% | | | | |
| | 29 | None | None | 3% | 8% | 2% | | | | |
| | 28 | None | None | 4% | 12½% | 3% | | | | |
| | 27 | None | None | 6% | 16% | 4% | | | | |
| U. S. Grade B or U. S. Choice. | 26 | 1% | 6% | 8% | 20% | 5% | | | | |
| | 25 | 3% | 9% | 10% | 24% | 6% | | | | |
| | 24 | 5% | 12½% | 12½% | 26% | 10% | | | | |
| U. S. Grade C or U. S. Standard. | 23 | | | | | | 17% | 6% | | |
| | 22 | | | | | | 33⅓% | 9% | | |
| | 21 | | | | | | 50% | 12½% | | |
| U. S. Grade D or Substandard. | 20 or less | More than allowances permitted for 24 points. | | | | | More than allowances permitted for 21 points. | | More than allowances permitted for 24 points. | |

(2) *Chunks.* The fruit is of reasonably uniform ripeness and normally has had more of the fibrous portions around the core hole removed than is the case with other styles of pack; and the fruitlets are reasonably compact in structure, fairly free from porosity.

(d) *(C) classification.* If the frozen pineapple possesses a fairly good character, a score of 21 to 23 points may be given. Frozen pineapple that falls into this classification shall not be graded above "U. S. Grade C" or "U. S. Standard" regardless of the total score for the product (this is a limiting rule). "Fairly good character" has the following meaning with respect to, and applies only to, the following styles of frozen pineapple:

(1) *Half slices and broken slices.* The texture may be variable and there may be present not more than 5 percent, by weight of the pineapple, that is core material of fibrous stock and the fruitlets may be flaccid and loosely constructed.

(e) *(SStd) classification.* Whole slices, crushed, tidbits, and chunks of pineapple that fail to meet paragraph (c) of this section; and half slices and broken slices that fail to meet the requirements of paragraph (d) of this section, may be given a score of 0 to 20 points and shall not be graded above "U. S. Grade D" or Substandard regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1750 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen pineapple, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of

quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED PINEAPPLE JUICE [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1761 *Product description.* Canned pineapple juice is the undiluted, unconcentrated, unfermented juice obtained from the edible portions of the mature fruit of the pineapple plant (Ananas comosus or Ananas sativus); is prepared by a succession of treatments (including, but not being limited to, crushing, screening, and pressing with or without heat) to extract a part of the liquid and insoluble materials; is packed with or without the addition of sweetening ingredients; is sufficiently processed by heat to assure the preservation of the product in hermetically-sealed containers and is thereupon packed into containers which are thereafter hermetically sealed.

§ 52.1762 *Grades of canned pineapple juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned pineapple juice that possesses a very good color, is practically free from defects, possesses a very good flavor, and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned pineapple juice that possesses a good color, is fairly free from defects, possesses a good flavor, and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned pineapple juice that fails to meet the requirements of U. S. Grade C or U. S. Standard.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

FILL OF CONTAINER

§ 52.1763 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled as full as practicable with pineapple juice and that the product occupy not less than 90 percent of the total capacity of the container.

FACTORS OF QUALITY

§ 52.1764 *Ascertaining the grade.* (a) The grade of canned pineapple juice may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor.

(b) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.1765 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example) "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1766 *Color*—(a) *(A) classification.* Canned pineapple juice that possesses a very good color may be given a score of 17 to 20 points. "Very good color" means that the canned pineapple juice possesses a bright, typical color characteristic of canned pineapple juice made from freshly pressed pineapple juice from properly matured and properly ripened pineapple, and which pineapple juice has been properly processed.

(b) *(C) classification.* If the canned pineapple juice possesses a good color, a score of 14 to 16 points may be given. Canned pineapple juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good color" means that the canned pineapple juice possesses a characteristic color which may be slightly dull or may be light amber but is not off color.

(c) *(SStd) classification.* Canned pineapple juice that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1767 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from specks and other objectionable particles and to the quantity of free and suspended pulp that may be present.

(b) *(A) classification.* Canned pineapple juice that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that the canned pineapple juice does not contain specks or other objectionable particles that affect the appearance or palatability of the juice and that the canned pineapple juice may contain not more than 26 percent free and suspended pulp when determined in accordance with the method outlined in this subpart.

(c) *(C) classification.* If the canned pineapple juice is fairly free from defects, a score of 28 to 33 points may be given. Canned pineapple juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the canned pineapple juice may contain specks or other objectionable particles that do not materially affect the appearance or palatability of the juice and that the canned pineapple juice may contain not more than 30 percent free and suspended pulp when determined in accordance with the method outlined in this subpart.

(d) *(SStd) classification.* Canned pineapple juice that fails to meet the requirements of paragraph (c) of this section, may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1768 *Flavor*—(a) *(A) classification.* Canned pineapple juice that possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means a fine, distinct canned pineapple juice flavor, characteristic of canned pineapple juice made from properly matured and properly ripened pineapple, and which pineapple juice is free from any caramelized flavor and that the canned pineapple juice meets the following requirements:

(1) *Brix.* Not less than 12.0 degrees.

(2) *Brix-acid ratio.* Not less than 12 to 1.

(b) *(C) classification.* If the canned pineapple juice possesses a good flavor, a score of 28 to 33 points may be given. Canned pineapple juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good flavor" means a good, normal canned pineapple juice flavor that may be slightly caramelized but is free from objectionable flavor or off flavor of any kind and that the canned pineapple juice meets the following requirements:

(1) *Brix.* Not less than 10.5 degrees.

(2) *Brix-acid ratio.* Not less than 12 to 1.

(c) *(SStd) classification.* If the canned pineapple juice fails to meet the requirements of paragraph (b) of this section, if the canned pineapple juice has the flavor of fruit not properly matured or not properly ripened, or if the canned pineapple juice is definitely unpalatable, a score of 0 to 27 points may be given. Canned pineapple juice that falls into this classification shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1769 *Explanation of terms and analyses.* (a) "Brix" means the degrees Brix of canned pineapple juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of canned pineapple juice may be determined by any other method which gives equivalent results.

(b) "Free and suspended pulp" is determined by the following method: Graduated centrifuge tubes with a capacity of 50 ml. are filled with juice and placed in a suitable centrifuge. The speed is adjusted, according to the diameter, as indicated in Table No. I and the juice is centrifuged for exactly 3 minutes. As used herein, "diameter" means the over-all distance between the bottoms of opposing centrifuge tubes in operating position. After centrifuging, the milliliter reading at the top of the layer of pulp in the tube is multiplied by 2 to give the percentage of pulp.

TABLE No. I

| *Diameter* | *Approximate revolutions per minute* | *Diameter* | *Approximate revolutions per minute* |
|---|---|---|---|
| 10 inches | 1,609 | 15½ inches | 1,292 |
| 10½ inches | 1,570 | 16 inches | 1,271 |
| 11 inches | 1,534 | 16½ inches | 1,252 |
| 11½ inches | 1,500 | 17 inches | 1,234 |
| 12 inches | 1,468 | 17½ inches | 1,216 |
| 12½ inches | 1,438 | 18 inches | 1,199 |
| 13 inches | 1,410 | 18½ inches | 1,182 |
| 13½ inches | 1,384 | 19 inches | 1,167 |
| 14 inches | 1,359 | 19½ inches | 1,152 |
| 14½ inches | 1,336 | 20 inches | 1,137 |
| 15 inches | 1,313 | | |

(c) "Acid" means grams of acid (calculated as anhydrous citric acid) per 100 ml. of juice in canned pineapple juice determined by titration with standard sodium hydroxide solution using phenolphthalein indicator.

LOT CERTIFICATION TOLERANCES

§ 52.1770 *Tolerances for certification of officially drawn samples.* (a) When officially drawn and which represent a specific lot of canned pineapple juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1771 *Score sheet for canned pineapple juice.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED PLUMS [1]

PRODUCT DESCRIPTION, VARIETIES, STYLES, AND GRADES

§ 52.1781 *Product description.* Canned plums (including prune plums) are the properly ripened fresh fruit of the plum tree (Prunus domestica), are prepared by stemming and washing, are packed in water with or without sweetening ingredients, may be packed with the addition of suitable ingredients for "dietetic pack", and are sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

§ 52.1782 *Varieties of canned plums.* (a) Purple plum groups.

(b) Green gage plum groups.

(c) Yellow egg plum groups.

§ 52.1783 *Styles of canned plums.* (a) "Whole" canned plums are whole, unpeeled, unpitted plums.

(b) "Halved" canned plums are unpeeled, pitted plums, cut or separated longitudinally into approximate halves.

§ 52.1784 *Grades of canned plums.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned plums that possess similar varietal characteristics; that are practically free from defects; that possess a normal flavor and odor; and that are of such quality with respect to color, uniformity of size, and character as to score not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of canned plums that possess similar varietal characteristics; that possess a reasonably good color; that are reasonably free from defects; that possess a normal flavor and odor; and that are of such quality with respect to uniformity of size and character as to score not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of canned plums that possess similar varietal characteristics; that possess a fairly good color; that are fairly uniform in size; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor and odor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "U. S. Grade D" is the quality of canned plums that possess similar varietal characteristics; that possess a fairly good color, that may or may not be fairly uniform in size; that are fairly free from defects except that there is no limit on crushed or broken units; that may or may not possess a fairly good character; and that possess a normal flavor and odor.

(e) "Substandard" is the quality of canned plums that fails to meet the requirements of either U. S. Grade C or U. S. Standard or U. S. Grade D, or both.

LIQUID MEDIA, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.1785 *Recommended designations of liquid media and Brix measurements for canned plums.* "Cut-out" requirements for liquid media in canned plums are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. It is recommended that canned plums have the following "cut-out" Brix measurement for the applicable designation, which designations include, but are not limited to:

| *Designation* | *Brix measurement* |
|---|---|
| "Extra heavy sirup" | 26° or more but not more than 35°. |
| "Heavy sirup" | 21° or more but less than 26°. |
| "Light sirup" | 16° or more but less than 21°. |
| "In water" | Packed in water. |

§ 52.1786 *Recommended fill of container for canned plums.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of canned plums be filled with plums as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the volume of the container.

§ 52.1787 *Recommended minimum drained weight.* The minimum drained weight recommendations for the applicable styles in Table I and Table II of this subpart are not incorporated in the grades of the finished product since

drained weight, as such, is not a factor of quality for the purposes of these grades. The drained weight of canned plums is determined by emptying the contents of the container, turning the pit cavities down in halves, upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch±3%, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and plums less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404×414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR WHOLE CANNED PLUMS

| Range of count of whole plums per container | In any syrup, or in any other liquid medium including declared "dietetic packs" whether or not packed "in water" | | | | | | |
|---|---|---|---|---|---|---|---|
| | Metal containers | | | | | Glass containers | |
| | 8 Z tall (211 x 304) | No. 1 tall (301 x 411) | No. 303 (303 x 406) | No. 2 (307 x 409) | No. 2½ (401 x 411) | No. 303 | No. 2½ |
| | *Ounces* | *Ounces* | *Ounces* | *Ounces* | *Ounces* | *Ounces* | *Ounces* |
| 10 or less | 4¼ | 9 | 9 | 10½ | 15½ | 9 | 15 |
| 11 to 16 | 4¼ | 9 | 9 | 10½ | 13½ | 9 | 15 |
| 17 to 22 | | | | 11 | 16 | | 15½ |
| 23 and over | | | | | 16½ | | 15½ |

| | Whole style, in No. 10 (603 x 700) cans | |
|---|---|---|
| | In any syrup or in any other liquid medium including declared "dietetic packs" whether or not packed "in water" | Other than declared "dietetic packs" packed "in water" |
| Any count | 60 ounces | 65 ounces |

TABLE II—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR HALVED CANNED PLUMS

| Container designation (metal, unless otherwise stated) | Container size (over-all dimensions) | | Any grade in any syrup or other liquid medium |
|---|---|---|---|
| | Width | Height | |
| | *Inches* | *Inches* | *Ounces* |
| 8 Z tall | 2 1/16 | 3 5/16 | 4½ |
| 8 ounce glass | | | 4½ |
| No. 1 tall | 3 1/16 | 4 1/16 | 9½ |
| No. 2½ | 3 3/16 | 4 5/16 | 9½ |
| 303 glass | | | 9½ |
| No. 2 | 3 3/16 | 4 9/16 | 12 |
| No. 2½ | 4 3/16 | 4 13/16 | 16½ |
| No. 2½ glass | | | 16 |
| No. 10 | 6 3/16 | 7 | 63 |

§ 52.1788 *Compliance with recommended drained weights.* Compliance with the recommended drained weights for canned plums is determined by averaging the drained weights from all the containers which are representative of a specific lot and such lot is considered as meeting the recommendations, for the applicable styles, if in:

(a) Whole style:

(1) The average of the drained weights from all of the containers meets the average of the recommended drained weights for the counts from the containers examined;

(2) One-half or more of the containers meet the recommended drained weight for the respective count found; and

(3) The drained weights from the containers which do not meet the recommended drained weight for the count found are within the range of variability for good commercial practice.

(b) Halved style:

(1) The average drained weight from all the containers meets the recommended drained weight;

(2) One-half or more of the containers meet the recommended drained weight; and

(3) The drained weights from the containers which do not meet the recommended drained weight are within the range of variability for good commercial practice.

FACTORS OF QUALITY

§ 52.1789 *Ascertaining the grade.* (a) The grade of canned plums is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Uniformity of size | 20 |
| Absence of defects | 30 |
| Character | 30 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the canned plums are free from objectionable flavors and objectionable odors of any kind.

§ 52.1790 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "18 to 20 points" means 18, 19, or 20 points).

§ 52.1791 *Color*—(a) *General.* The factor of color refers to the color of the background skin and any exposed flesh typical for the varietal group and to the intensity and brightness of such characteristic color. Characteristic mottling on the skin for the varietal group is considered as typical color and not as lacking in uniformity of color.

(b) (*A*) *classification.* Canned plums that possess a good color may be given a score of 18 to 20 points. "Good color" means that the plums possess a practically uniform, bright color typical of well-matured plums of a single varietal group which have been properly processed; that any exposed flesh is reasonably bright; and that not more than 10 percent by count of the units may possess a reasonably good color, including the over-all "dead-brown" color of canned purple plums. To score in this classification canned purple plums shall be surrounded by a practically clear and highly colored purple liquid.

(c) (*B*) *classification.* If the canned plums possess a reasonably good color, a score of 16 or 17 points may be given. "Reasonably good color" means that the plums possess a reasonably uniform, reasonably bright color typical of reasonably well-matured plums of a single varietal group which have been properly processed; that any exposed flesh may be only fairly bright; and that not more than 15 percent by count of the units may possess a fairly good color. To score in this classification canned purple plums shall be surrounded by a reasonably clear and reasonably high-colored liquid.

(d) (*C*) or (*D*) *classification.* If the canned plums possess a fairly good color, a score of 14 or 15 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade C or Standard or U. S Grade D, whichever is applicable, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the plums possess a color typical of at least fairly well-matured plums of a single varietal group which have been properly processed; that such characteristic color may be markedly variable including the over-all "dead-brown" color of canned purple plums but is not off color for any reason.

(e) (*SStd*) *classification.* Canned plums that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1792 *Uniformity of size*—(a) *General.* Any plums of halved style that are not cleanly divided into halves shall be separated into two approximately equal halves before ascertaining uniformity of size.

(b) (*A*) *classification.* Canned plums that are practically uniform in size may be given a score of 18 to 20 points. "Practically uniform in size" means that:

(1) In containers with less than 20 units, the weight of the largest unit does not exceed the weight of the second smallest unit by more than 50 percent, or

(2) In containers with 20 or more units, in 95 percent by count of the units that are most uniform in weight, the weight of the largest unit does not exceed the weight of the smallest unit by more than 50 percent.

(c) (*B*) *classification.* If the canned plums are reasonably uniform in size, a score of 16 or 17 points may be given. "Reasonably uniform in size" means that:

(1) In containers with less than 20 units, the weight of the largest unit does not exceed the weight of the second smallest unit by more than 75 percent, or

(2) In containers with 20 or more units, in 95 percent by count of the units that are most uniform in weight, the weight of the largest unit does not exceed the weight of the smallest unit by more than 75 percent.

(d) (*C*) *classification.* If the canned plums are fairly uniform in size, a score of 14 or 15 points may be given. "Fairly uniform in size" means that:

(1) In containers with less than 20 units, the weight of the largest unit is not more than twice the weight of the second smallest unit, or

(2) In containers with 20 or more units, in 95 percent by count of the units that are most uniform in weight, the weight of the largest unit is not more than twice the weight of the smallest unit.

(e) (*D*) or (*SStd*) *classification.* Canned plums that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, whichever is applicable, regardless of the total score for the product (this is a limiting rule).

§ 52.1793 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material; from crushed or broken units; from pits or loose pits for the applicable style; from damaged and seriously damaged units; and from any other defects which detract from the appearance or edibility of the product.

(1) A "unit", in whole style, means a whole or substantially whole plum and, in halved style, any whole or partially whole plum is separated into two approximately equal halves and each half therefrom is considered a "unit."

(2) "Harmless extraneous material" means any vegetable substance (including, but not limited to, a leaf or stem or significant portions thereof) that is harmless.

(3) "Crushed or broken" means that a unit bears marks of crushing or is otherwise crushed or broken not due to ripeness. In whole style, plums that possess broken skins or that are split to the pit cavity are not considered crushed or broken unless the entire pit cavity is exposed or the unit is mutilated to the extent that it is not intact as a whole or substantially whole plum. In halved style, halves of plums that are slightly split are not considered crushed or broken unless the unit is seriously mutilated.

(4) A "pit" means a whole pit or any portion thereof. In whole style, only "loose pits" are considered as defects. In halved style, pits are considered as defects whether loose or attached to a unit.

(5) "Damaged" means any injury which, singly or in the aggregate on a unit or in a unit (except for internal gummosis), materially affects the appearance of the unit and includes, but is not limited to:

(i) Surface areas blemished by sunburn, scab, or other serious discoloration (exclusive of characteristic mottling) having an aggregate area exceeding that of a circle 3/16 inch in diameter and not extending into the fruit tissue;

(ii) Surface areas blemished by sunburn, scab, or other serious discoloration (exclusive of characteristic mottling) having an aggregate area equivalent of, or less than, that of a circle 3/16 inch in diameter and extending into the fruit tissue so that the flesh is materially discolored or toughened;

(iii) Abnormalities, such as "doubles" and growth cracks, but not "shriveled" areas;

(iv) External gummosis.

(6) "Seriously damaged" means damaged to the extent that the appearance or edibility of the unit is seriously affected.

(b) (*A*) *classification.* Canned plums that are practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" means that the canned plums are practically free from any defects not specifically mentioned that affect the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(1) 1 small stem or 1 small leaf for each 64 ounces of net weight; and no harmless extraneous material;

(2) No crushed or broken units;

(3) 1 loose pit for each 32 ounces of net weight in whole style and no pits in halved style;

(4) A total of 10 percent by count of the units may be damaged and seriously damaged: *Provided*, That not more than 3 percent by count of the units may be seriously damaged. One unit in a single container is permitted to be damaged or one unit in a single container is permitted to be seriously damaged if any of such units exceed the respective allowances of 10 percent and 3 percent by count, provided that in all containers comprising the sample such damaged and seriously damaged units do not exceed an average of 10 percent by count of the total number of units or that such seriously damaged units do not exceed an average of 3 percent by count of the total number of units.

(c) (*B*) *classification.* If the canned plums are reasonably free from defects, a score of 24 to 26 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the canned plums are reasonably free from any defects not specifically mentioned that affect materially the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(1) 1 small stem or 1 small leaf for each 32 ounces of net weight; and no other harmless extraneous material;

(2) 5 percent by count of the units may be crushed or broken;

(3) 1 loose pit for each 16 ounces of net weight in whole style and no pits in halved style; and

(4) A total of 15 percent by count of the units may be damaged and seriously damaged: *Provided*, That not more than 5 percent by count of the units may be seriously damaged. One unit in a single container is permitted to be damaged or one unit in a single container is permitted to be seriously damaged if any of such units exceed the respective allowances of 15 percent and 5 percent by count, provided that in all containers comprising the sample such damaged and seriously damaged units do not exceed an average of 15 percent by count of the total number of units or that such seriously damaged units do not exceed an average of 5 percent by count of the total number of units.

(d) (*C*) *classification.* If the canned plums are fairly free from defects, a score of 21 to 23 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the canned plums are fairly free from any defects not specifically mentioned that affect materially the appearance or edibility of the product and that for the applicable style not more than the following defects or defective units may be present:

(1) 1 small stem or 1 small leaf for each 16 ounces of net weight and 1 piece of other harmless extraneous material for each 96 ounces of net weight;

(2) 10 percent by count of the units may be crushed or broken;

(3) 3 loose pits for each 32 ounces of net weight in whole style and 1 pit for each 32 ounces of net weight in halved plums; and

(4) A total of 20 percent by count of the units may be damaged and seriously damaged: *Provided*, That not more than 10 percent by count of the units may be seriously damaged. One unit in a single container is permitted to be seriously damaged if such unit exceeds 10 percent by count, provided that in all containers comprising the sample such seriously damaged units do not exceed an average of 10 percent by count of the total number of units.

(e) (*D*) *classification.* Canned plums that fail to meet the requirements of paragraph (d) of this section with respect to requirements in subparagraph (2) of said paragraph (or only with respect to crushed or broken units) may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D, regardless of the total score for the product (this is a limiting rule).

(f) (*SStd*) *classification.* Canned plums that fail to meet the requirements of paragraph (d) of this section with respect to requirements other than sub-

paragraph (2) of said paragraph (or other than for crushed and broken units) may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1794 *Character*—(a) *General.* The factor of character refers to the texture and condition of the flesh in relation to ripeness or maturity, to the tenderness and firmness of the canned plums, and to shriveled areas of the skin.

(b) (*A*) *classification.* Canned plums that possess a good character may be given a score of 27 to 30 points. "Good character" means that the units are thick-fleshed, are tender and may be soft but hold their apparent original conformation, and otherwise possess a good texture of both skin and flesh characteristic of canned plums that have been properly processed from well-ripened or well-matured plums; and that not more than a total of 10 percent by count of the canned plums may possess a reasonably good character or may possess shriveled areas that do not materially affect the appearance of the plum.

(c) (*B*) *classification.* If the canned plums possess a reasonably good character, a score of 24 to 26 points may be given. "Reasonably good character" means that the units may be slightly lacking in thickness of flesh, may be variable in texture from soft to slightly firm, and otherwise possess a reasonably good texture of both skin and flesh characteristic of canned plums that have been properly processed from reasonably well-ripened or reasonably well-matured plums; and that not more than a total of 20 percent by count of the canned plums may possess a fairly good character or may possess shriveled areas that do not materially affect the appearance of the plum.

(d) (*C*) *classification.* If the canned plums possess a fairly good character, a score of 21 to 23 points may be given. Canned plums that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the units may be more than slightly lacking in thickness of flesh, possess a fairly good texture of both skin and flesh characteristic of canned plums that have been properly processed from fairly well-ripened or fairly well-matured plums, may be variable in texture from very soft to slightly tough but are not so soft as to show material disintegration, and may possess shriveled areas that materially affect, but do not seriously affect, the appearance of the canned plums.

(e) (*D*) or (*SStd*) *classification.* Canned plums that fail to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points and shall not be graded above U. S. Grade D or Substandard, whichever is applicable, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1795 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned plums, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1796 *Score sheet for canned plums.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED WHITE POTATOES [1]

IDENTITY, STYLES, AND GRADES

§ 52.1811 *Identity.* "Canned white potatoes" means canned potatoes as defined in the definitions and standards of identity for canned vegetables other than those specifically regulated, as amended for canned potatoes (21 CFR 52.990 (c) (3)), issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.1812 *Styles of canned white potatoes.* For the purpose of the grade standards in this subpart, the canned white potatoes are properly peeled prior to canning; "unit" means an individual potato or a portion of a potato; and the various styles of the canned product are as follows:

(a) "Whole" or "whole potatoes" is the style that consists of units that are whole potatoes that are of the approximate conformation of the prepared potatoes.

(b) "Slices," "sliced," or "sliced potatoes" is the style that consists of units that are potato slices of practically uniform thickness.

(c) "Dice," "diced," or "diced potatoes" is the style that consists of units that are approximate cubes.

(d) "Shoestring," "French style," "julienne," "shoestring potatoes," "French-style potatoes," or "julienne potatoes" is the style that consists of units that are potato strips of varying lengths.

(e) "Pieces" is the style that consists of units (including, but not being limited to, "orange cuts" and "quarters") other than those comprising any of the foregoing styles or of a mixture of units comprising any two or more styles.

§ 52.1813 *Grades of canned white potatoes.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned white potatoes that possess similar varietal characteristics; possess a good color; are practically free from defects; possess a good texture; possess a normal flavor and odor; are at least fairly uniform in size and shape; and score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned white potatoes that may or may not possess similar varietal characteristics; possess a fairly good color; are fairly free from defects; possess a fairly good texture; possess a normal flavor and odor; may or may not be fairly uniform in size and shape; and score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned white potatoes that fail to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER AND DRAINED WEIGHTS

§ 52.1814 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of canned white potatoes be filled with white potatoes as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the total capacity of the container.

§ 52.1815 *Recommended minimum drained weight.* The minimum drained weight recommendations in Table No. I of this section are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purposes of these grades. The drained weight of canned white potatoes is determined by emptying the contents of the container upon a circular sieve of proper diameter containing 8 meshes to the inch (0.097-inch square openings) and allowing to drain for 2 minutes. A sieve 8 inches in diameter is used for containers the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can (404 x 414).

TABLE NO. I

[Recommended minimum drained weights for canned white potatoes]

| Container size or designation: | *All styles* |
|---|---|
| No. 2 | 13 ounces |
| No. 2½ | 19 ounces |
| No. 10 | 74 ounces |

SIZES

§ 52.1816 *Sizes of canned whole white potatoes.* The size of a whole potato is determined by its diameter which is the greatest dimension measured at right angles to its greatest cross section length. The designations of the various sizes of such potatoes are shown in Table No. II of this section.

TABLE NO. II

[Sizes of canned whole white potatoes]

| Word designation | Number designation | Diameter (in inches) |
|---|---|---|
| Tiny | Size 1 | 1 inch or less. |
| Small | Size 2 | Over 1 inch to, and including, 1½ inches. |
| Medium | Size 3 | Over 1½ inches. |

FACTORS OF QUALITY

§ 52.1817 *Ascertaining the grade.* (a) The grade of canned white potatoes may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, uniformity of size and shape, absence of defects, and texture.

(b) The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| *Factors* | *Points* |
|---|---|
| Color | 20 |
| Uniformity of size and shape | 20 |
| Absence of defects | 40 |
| Texture | 20 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the product is free from objectionable odors and objectionable flavors of any kind.

§ 52.1818 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1819 *Color*—(a) (*A*) *classification.* Canned white potatoes that possess a good color may be given a score of 17 to 20 points. "Good color" means that the canned white potatoes, exclusive of the units that are blemished by discoloration, are practically free from oxidation and possess a practically uniform, light color typical of canned white potatoes processed from potatoes of similar varietal characteristics.

(b) (*C*) *classification.* If the canned white potatoes possess a fairly good color, a score of 14 to 16 points may be given. Canned white potatoes that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the canned white potatoes, exclusive of units that are blemished by discoloration, possess a fairly uniform color typical of canned white potatoes although the color of the potatoes, whether individually or in combination, may be variable, light, dull, grayish-white, yellow-white, or watery-white (semi-translucent), or indicative of slight oxidation, or slight discoloration but not off-color.

(c) (*SStd*) *classification.* Canned white potatoes that for any reason fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1820 *Uniformity of size and shape*—(a) (*A*) *classification.* Canned white potatoes that are practically uniform in size and shape may be given a score of 17 to 20 points. "Practically uniform in size and shape" has the following meanings with respect to the various styles of canned white potatoes:

(1) *Whole potatoes.* The size of each whole potato is not more than 2 inches in diameter, measured as aforesaid; and the weight of the largest whole potato is not more than three times the weight of the second smallest whole potato.

(2) *Sliced potatoes.* The diameter of any slice is the shortest diameter across the surface of the slice. The individual slice is not more than ¾ inch in thickness when measured at the thickest portion; the size of each slice is not more than 2 inches in diameter, measured as aforesaid; and the diameter of the largest slice is not greater than one and one-half times the diameter of the second smallest slice.

(3) *Diced potatoes.* The units are practically uniform in size and shape; and the aggregate weight of the units which are smaller than one-half of a cube, the units which are larger than a ½-inch cube, and the units which are irregular in shape does not exceed 10 percent of the weight of all units.

(4) *Shoestring potatoes.* The strips of potatoes are practically uniform in thickness and the aggregate weight of all strips less than ½ inch in length does not exceed 10 percent of the weight of all the strips.

(5) *Pieces.* The individual units each weigh not less than ½ ounce nor more than 2 ounces and the weight of the largest unit is not more than twice the weight of the second smallest unit.

(b) (*C*) *classification.* If the canned white potatoes are fairly uniform in size and shape, a score of 14 to 16 points may be given. "Fairly uniform in size and shape" has the following meanings with respect to the various styles of canned white potatoes:

(1) *Whole potatoes.* The size of each whole potato may be more than 2 inches in diameter but not more than 2½ inches in diameter, measured as aforesaid; and the weight of the largest whole potato is not more than four times the weight of the second smallest whole potato.

(2) *Sliced potatoes.* The diameter of any slice is the shortest diameter across the surface of the slice. The individual slice is not more than 1 inch in thickness when measured at the thickest portion; the size of each slice is not more than 2½ inches in diameter, measured as aforesaid; and the diameter of the largest slice is not more than twice the diameter of the second smallest slice.

(3) *Diced potatoes.* The units are fairly uniform in size and shape; and the aggregate weight of the units which are smaller than one-half of a cube, the units which are larger than a ¾-inch cubes, and the units which are irregular in shape does not exceed 25 percent of the weight of all units.

(4) *Shoestring potatoes.* The strips of potatoes are fairly uniform in thickness and the aggregate weight of all strips less than ½ inch in length does not exceed 25 percent of the weight of all the strips.

(5) *Pieces.* The individual units each weigh not less than ¼ ounce nor more than 3 ounces and the weight of the largest unit is not more than four times the weight of the second smallest unit.

(c) (*SStd*) *classification.* Canned white potatoes that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule).

§ 52.1821 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, grit, peel, blemished units, and mechanical damage.

(1) "Harmless extraneous material" means vegetable substances such as weeds, grass, and leaves and any portions thereof that are harmless.

(2) "Grit" means sand, and other rough, hard particles of earthy sediment.

(3) "Blemished" means affected by brown or black surface or internal discoloration, concentrated areas that are otherwise discolored, discolored eyes, unpeeled eyes, hollow heart, scab, or other means when the blemishes, singly or in combination on a unit, materially affect the appearance or eating quality of the unit.

(4) "Seriously blemished" means blemished to such an extent that the appearance or eating quality of the unit is seriously affected.

(5) "Mechanical damage" means moderate trimming or gouges due to the trimming of a whole potato which materially affect the appearance of the whole potato. Slight cuts or slight indentations due to trimming are not considered mechanical damage.

(6) "Serious mechanical damage" means broken units, serious trimming, or

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

deep gouges due to the trimming of a whole potato which seriously affect the appearance of the whole potato and destroy the conformation of the unit.

(b) *(A) classification.* Canned white potatoes that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" has the following meanings with respect to the various styles of canned white potatoes:

(1) *Whole.* No harmless extraneous material or grit is present; not more than ½ square inch, in the aggregate, of peel may be present for each 20 ounces of net weight; and the aggregate weight of potatoes that are blemished or seriously blemished and potatoes that possess mechanical damage or serious mechanical damage does not exceed 20 percent of the weight of all the units, but of such 20 percent not more than one-fourth thereof or one potato, whichever is the greater in weight, may be seriously blemished or possess serious mechanical damage.

(2) *Sliced; pieces.* No harmless extraneous material or grit is present, not more than ½ square inch, in the aggregate, of peel may be present for each 20 ounces of net weight; and the aggregate weight of units that are blemished and units that are seriously blemished does not exceed 10 percent of the weight of all the units, but of such 10 percent not more than one-fourth thereof or one unit, whichever is the greater in weight, may be seriously blemished.

(3) *Diced; shoestring.* No harmless extraneous material or grit is present; not more than ½ square inch, in the aggregate, of peel may be present for each 20 ounces of net weight; and the aggregate weight of units that are blemished and units that are seriously blemished does not exceed 4 percent of the weight of all the units, but of such 4 percent not more than one-fourth thereof may be seriously blemished.

(c) *(C) classification.* If the canned white potatoes are fairly free from defects, a score of 28 to 33 points may be given. Canned white potatoes that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" has the following meanings with respect to the various styles of canned white potatoes.

(1) *Whole.* Not more than 1 small piece of harmless extraneous material for each 20 ounces of net weight may be present; not more than a trace of grit may be present; not more than 1 square inch, in the aggregate, of peel may be present for each 20 ounces of net weight; and the aggregate weight of potatoes that are blemished or seriously blemished, and potatoes that possess mechanical damage, or serious mechanical damage does not exceed 30 percent of the weight of all the units, but of such 30 percent not more than one-third thereof or one potato, whichever is the greater in weight, may be seriously blemished or possess serious mechanical damage.

(2) *Sliced; pieces.* Not more than 1 small piece of harmless extraneous material for each 20 ounces of net weight may be present; not more than a trace of grit may be present; not more than 1 square inch, in the aggregate, of peel may be present for each 20 ounces of net weight; and the aggregate weight of all units that are blemished or seriously blemished does not exceed 15 percent of the weight of all the units, but of such 15 percent not more than one-third thereof or one unit, whichever is the greater in weight, may be seriously blemished.

(3) *Diced; shoestring.* Not more than 1 small piece of harmless extraneous material for each 20 ounces of net weight may be present; not more than a trace of grit may be present; not more than 1 square inch, in the aggregate, of peel may be present for each 20 ounces of net weight; and the aggregate weight of units that are blemished and units that are seriously blemished does not exceed 6 percent of the weight of all the units, but of such 6 percent not more than one-third thereof may be seriously blemished.

(d) *(SStd) classification.* Canned white potatoes that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1822 *Texture—(a) (A) classification.* Canned white potatoes that possess a good texture may be given a score of 17 to 20 points. "Good texture" means that the texture of the potatoes is typical of properly prepared and properly processed potatoes and that the potatoes are firm and possess a fine and even grain and may possess not more than a slight amount of sloughing that does not materially affect the appearance of the product.

(b) *(C) classification.* If the canned white potatoes possess a fairly good texture, a score of 14 to 16 points may be given. Canned white potatoes that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good texture" means that the potatoes may be variable in texture, may be slightly coarse-grained, may be slightly hard, may be slightly soft, or may possess more than a slight amount of sloughing or more than a slight amount of disintegration, provided the amount of sloughing or disintegration does not seriously affect the appearance of the product.

(c) *(SStd) classification.* Canned white potatoes that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1823 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned white potatoes, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range or the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1824 *Score sheet for canned white potatoes.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF PROCESSED RAISINS [1]

PRODUCT DESCRIPTION, TYPES, SIZES, COLORS, AND GRADES

§ 52.1841 *Product description.* Processed raisins are dried grapes of the Vinifera varieties, such as Thompson Seedless (Sultanina), Muscat of Alexandria, Muscatel Gordo Blanco, and Sultana, which have been properly stemmed, capstemmed, and cleaned.

§ 52.1842 *Types (varieties) of processed raisins.* (a) Type I—Thompson Seedless.

(1) Unbleached (natural).
(2) Sulfur Bleached and Golden Bleached.
(3) Soda Dipped.
(b) Type II—Muscat.
(1) Seeded (seeds removed).
(2) Unseeded (loose).
(3) Soda Dipped Unseeded (Valencia).
(c) Type III—Sultana.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act.

§ 52.1843 *Sizes of Thompson Seedless Raisins.* The sizes of Thompson Seedless Raisins are not incorporated in the grades of the finished product since size, as such, is not a factor of quality for the purposes of these grades. The common size designations and measurement requirements applicable thereto include, but are not limited to, the following:

(a) "Select" size raisins means that not less than 35 percent, by weight, but not more than 85 percent, by weight, of all the raisins will pass through round perforations $^{24}/_{64}$ inch in diameter, but not more than 5 percent, by weight, of all the raisins may pass through round perforations $^{20}/_{64}$ inch in diameter.

(b) "Small" (or "Midget") size raisins means that all of the raisins will pass through round perforations $^{24}/_{64}$ inch in diameter and not less than 90 percent, by weight, of all the raisins will pass through round perforations $^{20}/_{64}$ inch in diameter.

(c) "Mixed" size raisins means a mixture which does not meet the requirements of "Select" size.

§ 52.1844 *Colors of Sulfur Bleached and Golden Bleached Thompson Seedless Raisins.* The color of Sulfur Bleached and Golden Bleached Thompson Seedless Raisins is not a factor of quality for the purposes of these grades. The color requirements applicable to the respective color designations are as follows:

(a) "Well-bleached color" (or "Extra Fancy color") means that the raisins are practically uniform in color and may range from yellow or golden to light amber color with a predominating yellow or golden color and that not more than 1 percent, by weight, of all the raisins may be definitely dark berries.

(b) "Reasonably well-bleached color" (or "Fancy color") means that the raisins are reasonably uniform in color and may range from yellow or golden or greenish yellow to light amber wherein the predominating color may be greenish yellow or light amber and that not more than 3 percent, by weight, of all the raisins may be definitely dark berries.

(c) "Fairly well-bleached color" (or "Extra Choice color") means that the raisins are fairly uniform in color and may range from yellow or greenish yellow to amber or light greenish amber and that not more than 6 percent, by weight, of all the raisins may be definitely dark berries.

(d) "Bleached color" (or "Choice color") means that the raisins may be generally dark amber or dark greenish amber; that not more than 15 percent, by weight, of all the raisins may be definitely dark berries in Sulfur Bleached; that not more than 20 percent, by weight, of all the raisins may be definitely dark berries in Golden Bleached; and that the color may also lack uniformity.

(e) "Definitely dark berries" means raisins which are definitely darker than dark amber and characteristic of naturally "raisined" grapes.

§ 52.1845 *Grades of Thompson Seedless Raisins.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of Thompson Seedless Raisins that possess similar varietal characteristics; that in Unbleached and Soda Dipped raisins possess a good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements (see Table I of this section):

(1) Not more than 1 piece of stem per 16 ounces of raisins may be present;

(2) Not more than 15 capstems per 16 ounces of raisins may be present;

(3) Not more than 1 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 2 percent, by weight, of raisins may be damaged;

(5) Not more than 5 percent by weight, of raisins may be visibly sugared; and

(6) Not more than 3 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 1 percent, by weight, of raisins may be affected by decay.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of Thompson Seedless Raisins that possess similar varietal characteristics; that in Unbleached and Soda Dipped raisins possess a good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements (see Table I of this section):

(1) Not more than 2 pieces of stem per 16 ounces of raisins may be present;

(2) Not more than 25 capstems per 16 ounces of raisins may be present;

(3) Not more than 2 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 3 percent, by weight, of raisins may be damaged;

TABLE I—MAXIMUMS ALLOWABLE FOR DEFECTS IN TYPE I, THOMPSON SEEDLESS RAISINS

| Defects | U. S. Grade A or U. S. Fancy | U. S. Grade B or U. S. Choice | U. S. Grade C or U. S. Standard | Substandard |
|---|---|---|---|---|
| | Maximum count (per 16 ounces) | | | |
| Pieces of stem | 1 | 2 | 3 | |
| Capstems | 15 | 25 | 35 | No limit. |
| | Maximum (by weight) (percent) | | | |
| Poorly developed, blowovers | 1 | 2 | 3 | No limit. |
| Damaged | 2 | 3 | 5 | Do. |
| Visibly sugared | 5 | 10 | 15 | Do. |
| Mold, decay, fermentation, insect infestation, unbleached dirt, or other foreign material. | 3 | 4 | 5 | 5. |
| | but not more than | | | |
| Decay | 1 | 1 | 2 | |

(5) Not more than 10 percent, by weight, of raisins may be visibly sugared; and

(6) Not more than 4 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 1 percent, by weight, of raisins may be affected by decay.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of Thompson Seedless Raisins that possess similar varietal characteristics; that in Unbleached and Soda Dipped raisins possess a fairly good typical color; that possess a fairly good flavor; that show development characteristic of raisins prepared from fairly well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements (see Table I of this section):

(1) Not more than 3 pieces of stem per 16 ounces of raisins may be present;

(2) Not more than 35 capstems per 16 ounces of raisins may be present;

(3) Not more than 3 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 5 percent, by weight, of raisins may be damaged;

(5) Not more than 15 percent, by weight, of raisins may be visibly sugared; and

(6) Not more than 5 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 2 percent, by weight, of raisins may be affected by decay.

(d) "Substandard" is the quality of Thompson Seedless Raisins that fail to meet the requirements (see Table I of this section) of U. S. Grade C or U. S. Standard: *Provided*, That:

(1) Not more than 5 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material.

§ 52.1846 *Sizes of Muscat Raisins.* The sizes of Muscat Raisins are not incorporated in the grades of the finished product since size, as such, is not a factor of quality for the purposes of these grades. The common size designations and measurement requirements appli-

cable thereto include, but are not limited to, the following:

(a) *Seeded.* (1) "Select" size raisins means that not less than 30 percent, by weight, of all the raisins will not pass through round perforations $34/64$ inch in diameter; and the balance will pass through round perforations $34/64$ inch in diameter but not more than 5 percent, by weight, of all the raisins may pass through round perforations $32/64$ inch in diameter.

(2) "Small" (or "Midget") size raisins means that all of the raisins will pass through round perforations $34/64$ inch in diameter and not less than 90 percent, by weight, of all the raisins will pass through round perforations $32/64$ inch in diameter.

(3) "Mixed" size raisins means a mixture of sizes that do not meet the requirements of "Select" size.

(b) *Unseeded.* (1) "4 Crown" means raisins that will not pass through round perforations $42/64$ inch in diameter.

(2) "3 Crown" means raisins that will pass through round perforations $42/64$ inch in diameter but will not pass through round perforations $34/64$ inch in diameter.

(3) "2 Crown" means raisins that will pass through round perforations $34/64$ inch in diameter but will not pass through round perforations $24/64$ inch in diameter.

(4) "1 Crown" means raisins that will pass through round perforations $24/64$ inch in diameter.

§ 52.1847 *Grades of Muscat Raisins.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of Muscat Raisins that possess similar varietal characteristics; that possess a good typical color with not more than 10 percent, by weight, of raisins that may be dark reddish-brown berries in Soda Dipped Unseeded (Valencia) raisins; that possess a good characteristic flavor; that show development characteristic of raisins prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture, except that Seeded Muscats may contain not more than 19 percent, by weight, of moisture; and that meet the following additional requirements (see Table II of this section):

(1) Not more than 1 piece of stem per 16 ounces of raisins may be present;

(2) Not more than 10 capstems per 16 ounces of raisins may be present;

(3) Not more than 12 seeds per 16 ounces of raisins in Muscat Seeded Raisins may be present;

(4) Not more than 1 percent, by weight, of raisins may be poorly developed, blowovers;

(5) Not more than 3 percent, by weight, of raisins may be damaged;

(6) Not more than 5 percent, by weight, of raisins may be visibly sugared; and

(7) Not more than 3 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 1 percent, by weight, of raisins may be affected by decay.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of Muscat Raisins that possess similar varietal characteristics; that possess a reasonably good typical color with not more than 15 percent, by weight, of raisins that may be dark reddish-brown berries in Soda Dipped Unseeded (Valencia) raisins; that possess a good characteristic flavor; that show development characteristic of raisins prepared from reasonably well-matured grapes; that contain not more than 18 percent, by weight, of moisture, except that Seeded Muscats may contain not more than 19 percent, by weight, of moisture; and that meet the following additional requirements (see Table II of this section):

(1) Not more than 2 stems per 16 ounces of raisins may be present;

(2) Not more than 15 capstems per 16 ounces of raisins may be present;

(3) Not more than 15 seeds per 16 ounces of raisins in Muscat Seeded Raisins may be present;

(4) Not more than 2 percent, by weight, of raisins may be poorly developed, blowovers;

(5) Not more than 4 percent, by weight, of raisins may be damaged;

(6) Not more than 10 percent, by weight, of raisins may be visibly sugared; and

(7) Not more than 4 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 1 percent, by weight, of raisins may be affected by decay.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of Muscat Raisins that possess similar varietal characteristics; that possess a fairly good typical color with not more than 20 percent, by weight, of raisins that may be dark reddish-brown berries in Soda Dipped Unseeded (Valencia) raisins; that possess a fairly good flavor; that show development characteristic of raisins prepared from fairly well-matured grapes; that contain not more than 18 percent, by weight, of moisture, except that Seeded Muscats may contain not more than 19 percent, by weight, of moisture; and that meet the following additional requirements (see Table II of this section):

(1) Not more than 3 stems per 16 ounces of raisins may be present;

(2) Not more than 20 capstems per 16 ounces of raisins may be present;

(3) Not more than 20 seeds per 16 ounces of raisins in Muscat Seeded Raisins may be present;

(4) Not more than 3 percent, by weight, of raisins may be poorly developed, blowovers;

(5) Not more than 5 percent, by weight, of raisins may be damaged;

(6) Not more than 15 percent, by weight, of raisins may be visibly sugared; and

(7) Not more than 5 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 2 percent, by weight, of raisins may be affected by decay.

TABLE II—MAXIMUMS ALLOWABLE FOR DEFECTS IN MUSCAT RAISINS

| Defects | U. S. Grade A or U. S. Fancy | U. S. Grade B or U. S. Choice | U. S. Grade C or U. S. Standard | Substandard |
|---|---|---|---|---|
| | Maximum count (per 16 ounces) | | | |
| Pieces of stem | 1 | 2 | 3 | |
| Capstems | 10 | 15 | 20 | No limit. |
| Seeds (seeded type) | 12 | 15 | 20 | Do. |
| | Maximum (by weight) (percent) | | | |
| Poorly developed, blowovers | 1 | 2 | 3 | No limit. |
| Damaged | 3 | 4 | 5 | Do. |
| Visibly sugared | 5 | 10 | 15 | Do. |
| Mold, decay, fermentation, insect infestation, imbedded dirt, or other foreign material. | 3 | 4 | 5 | 5. |
| | but not more than | | | |
| Decay | 1 | 1 | 2 | |

(d) "Substandard" is the quality of Muscat Raisins that fail to meet the requirements (see Table II of this section) of U. S. Grade C or U. S. Standard: *Provided*, That:

(1) Not more than 5 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material.

§ 52.1848 *Sizes of Sultana Raisins.* Size designations are not applicable to Sultana Raisins.

§ 52.1849 *Grades of Sultana Raisins.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of Sultana Raisins that possess similar varietal characteristics; that possess a good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements (see Table III of this section):

(1) Not more than 1 stem per 16 ounces of raisins may be present;

(2) Not more than 25 capstems per 16 ounces of raisins may be present;

(3) Not more than 1 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 2 percent, by weight, of raisins may be damaged;

(5) Not more than 5 percent, by weight, of raisins may be visibly sugared; and

(6) Not more than 3 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 1 percent, by weight, of raisins may be affected by decay.

TABLE III—MAXIMUMS ALLOWABLE FOR DEFECTS IN SULTANA RAISINS

| Defects | U. S. Grade A or U. S. Fancy | U. S. Grade B or U. S. Choice | U. S. Grade C or U. S. Standard | Substandard |
|---|---|---|---|---|
| | Maximum count (per 16 ounces) | | | |
| Pieces of stem | 1 | 2 | 3 | |
| Capstems | 25 | 45 | 65 | No limit. |
| | Maximum (by weight) (percent) | | | |
| Poorly developed, blowovers | 1 | 2 | 3 | No limit. |
| Damaged | 2 | 3 | 5 | Do. |
| Visibly sugared | 5 | 10 | 15 | Do. |
| Mold, decay, fermentation, insect infestation, imbedded dirt, or other foreign material. | 3 | 4 | 5 | 5. |
| | but not more than | | | |
| Decay | 1 | 1 | 2 | |

(b) "U. S. Grade B" or "U. S. Choice" is the quality of Sultana Raisins that possess similar varietal characteristics; that possess a reasonably good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from reasonably well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements (see Table III of this section):

(1) Not more than 2 pieces of stem per 16 ounces of raisins may be present;

(2) Not more than 45 capstems per 16 ounces of raisins may be present;

(3) Not more than 3 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 5 percent, by weight, of raisins may be damaged;

(5) Not more than 15 percent, by weight, of raisins may be visibly sugared; and

(6) Not more than 5 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material: *Provided*, That:

(i) Not more than 2 percent, by weight, may be affected by decay.

(d) "Substandard" is the quality of Sultana Raisins that fail to meet the requirements (see Table III of this section) of U. S. Grade C or U. S. Standard: *Provided*, That:

(1) Not more than 5 percent, by weight, of raisins may be affected by mold, decay, fermentation, insect infestation (no live insects are permitted), imbedded dirt, or other foreign material.

EXPLANATIONS

§ 52.1850 *Explanation of terms.* (a) "Capstems" means small woody stems exceeding $1/8$ inch in length which attach the raisins to the branches of the bunch.

(b) A "piece of stem" means a portion of the branch or main stem.

(c) "Seeds" refers to the whole, fully developed seeds which have not been removed during the processing of Muscat Seeded Raisins.

(d) "Poorly developed, blowovers" refers to berries that are immature, contain practically no flesh, are very light in weight, and have very coarse wrinkles.

(e) "Damaged" raisins means raisins affected by insect injury or injury from sunburn, scars, mechanical or other means which seriously affects the appearance, edibility, keeping quality, or shipping quality of the raisins. In Muscat Seeded Raisins, mechanical injury resulting from normal seeding operations is not considered damage.

(f) "Visibly sugared" means the accumulation of crystallized fruit sugars in the flesh of the raisin or on the surface which is readily apparent.

(g) "Mold" means mold filaments or spores (often characterized by a condition wherein the skin of the raisin appears to have been dissolved, leaving a slimy or sticky appearance, and often resulting in a positive reaction when submerged in a 3-percent hydrogen peroxide solution).

(h) "Affected by insect infestation" means that the raisins show the presence of insects, insect fragments, or excreta. No live insects are permitted.

SCORE SHEET

## SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN RASPBERRIES [1]

### PRODUCT DESCRIPTION, TYPES, AND GRADES

§ 52.1871 *Product description.* Frozen raspberries are prepared from the properly ripened fresh fruit of the plant (Genus rubus); are stemmed and cleaned; may be packed with or without packing media; and are frozen and stored at temperatures necessary for the preservation of the product.

§ 52.1872 *Types (colors) of frozen raspberries.* (a) "Red" or "red raspberries" are red or reddish purple in color.

(b) "Black" or "black raspberries" are black in color.

§ 52.1873 *Grades of frozen raspberries (not for manufacturing).* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen raspberries that possess similar varietal characteristics; possess a bright, practically uniform, typical color; are practically free from defects; possess a good character; possess a normal flavor and odor; and score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen raspberries that possess similar varietal characteristics; possess a reasonably bright, reasonably uniform, typical color; are reasonably free from defects; possess a reasonably good character; possess a normal flavor and odor; and score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S Grade D" or "Substandard" is the quality of frozen raspberries that fail to meet the requirements of "U. S. Grade B" or "U. S. Choice."

§ 52.1874 *Grades of frozen raspberries for manufacturing.* (a) "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" is the quality of frozen raspberries that possess similar varietal characteristics; that possess a bright, practically uniform, typical color; that are practically free from defects for the purposes of manufacturing; that possess a good character for the purposes of manufacturing; and that possess a normal flavor and odor.

(b) "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" is the quality of frozen raspberries that possess similar varietal characteristics; that possess a reasonably bright, reasonably uniform, typical color; that are reasonably free from defects for the purposes of manufacturing; that possess a reasonably good character for the purposes of manufacturing; and that possess a normal flavor and odor.

(c) "U. S. Grade D for Manufacturing" or "Substandard for Manufacturing" is the quality of frozen raspberries that fail to meet the requirements of "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing."

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

### FACTORS OF QUALITY

§ 52.1875 *Ascertaining the score and grade for frozen raspberries (not for manufacturing).* (a) The grade of frozen raspberries is determined immediately after thawing to the extent that the units may be separated easily. The score and grade of frozen raspberries may be ascertained by considering, in addition to the requirements of the respective grade, the following factors: Color, absence of defects, and character.

(b) The relative importance of each factor has been expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Color | 40 |
| Absence of defects | 40 |
| Character | 20 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the raspberries are free from objectionable flavors off flavors, and objectionable odors of any kind.

§ 52.1876 *Ascertaining the score of each factor for frozen raspberries (not for manufacturing).* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "34 to 40 points" means 34, 35, 36, 37, 38, 39, or 40 points).

§ 52.1877 *Color*—(a) *(A) classification.* Frozen raspberries that possess a bright, practically uniform, typical color may be given a score of 34 to 40 points. "Bright, practically uniform, typical color" means that the raspberries possess a bright and good characteristic color; that not more than 5 percent, by weight, of the raspberries vary markedly from the intensity and luster of the characteristic color of well-ripened raspberries; and that none of the raspberries possess a grey cast or darkening characteristic of oxidation or over-maturity.

(b) *(B) classification.* If the frozen raspberries possess a reasonably bright, reasonably uniform, typical color, a score of 28 to 33 points may be given. Frozen raspberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably bright, reasonably uniform, typical color" means that the raspberries possess a reasonably bright, reasonably good characteristic color; that not more than 10 percent, by weight, of the raspberries vary markedly from the intensity and luster of the characteristic color of well-ripened raspberries; and that the raspberries may possess a slight grey cast or slight darkening characteristic of oxidation or over-maturity.

(c) *(SStd) classification.* Frozen raspberries that are definitely dull or off-color or that fail to meet the requirements of paragraph (b) of this section, may be given a score of 0 to 27 points and shall not be graded above U. S Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

(d) *Evaluation of score points.* The evaluation of the score points for the factor of color may be determined from Table No. I of this section which indicates the score range in the respective grades and the maximum allowances for frozen raspberries that vary markedly from the intensity and luster of the characteristic color of well-ripened raspberries.

TABLE No. I

| Grade | Score points | Typical color | Marked variation from color of well-ripened raspberries |
|---|---|---|---|
| | | | Maximum (by weight) percent |
| U. S. Grade A or U. S. Fancy | 40, 39, 38, 37, 36, 35, 34 | Bright, good characteristic color; none may possess a grey cast or darkening (oxidation or overmaturity). | None, ½, 1, 2, 3, 4, 5 |
| U. S. Grade B or U. S. Choice | 33, 32, 31, 30, 29, 28 | Reasonably bright, reasonably good; may possess slight grey cast or slight darkening (oxidation or overmaturity). | 6, 7, 8, 9, 10, 11 |
| U. S. Grade D or Substandard | 27 or less | More than the allowances permitted for 28 points. | |

§ 52.1878 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, caps and portions thereof, sepal-like bracts and portions thereof, stems, undeveloped raspberries, and damaged raspberries.

(1) "Harmless extraneous material" means vegetable substances such as weeds, grass, and leaves and any portions thereof that are harmless.

(2) A "cap" means a loose or attached full cap or a portion of a cap to which at least one sepal-like bract or portion thereof is attached. A "stem" that is attached to the cap is considered a separate defect.

(3) A "stem" means a stem, either loose or attached, that is longer than ¼ inch.

(4) An "undeveloped raspberry" means a raspberry or a portion of a raspberry that is shriveled or in which more than one-fourth of the raspberry possesses hard or undeveloped drupelets or that possesses deformed areas which materially affect either the appearance or the edibility of the product.

(5) A "damaged raspberry" means a raspberry or a portion of a raspberry that is damaged by bruises or by pathological, insect, or other injury or is damaged by other means which materially affect either the appearance or the edibility of the product. "Damage" includes any surface blemish or blemishes on a raspberry which in the aggregate exceed that of a circle ¼ inch in diameter or any noticeable blemish, regardless of area, that extends into the fruit tissue. Minute, insignificant injuries are not considered as damage.

(6) "Area" means the aggregate surface covered by the material stated when such material or portions thereof are placed in a contiguous position with no intervening spaces.

(b) *(A) classification.* Frozen raspberries that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present for each 16 ounces of net weight an area of not more than ¼ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; and not more than 2 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and that there may be present not more than a total of 5 percent, by weight, of raspberries that are undeveloped raspberries and damaged raspberries.

(c) *(B) classification.* If the frozen raspberries are reasonably free from defects, a score of 28 to 33 points may be given. Frozen raspberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present for each 16 ounces of net weight an area of not more than ½ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; and not more than 4 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and that there may be present not more than a total of 10 percent, by weight, of raspberries that may be undeveloped raspberries and damaged raspberries.

(d) *(SStd) classification.* Frozen raspberries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

(e) *Evaluation of score points.* The evaluation of the score points for the factor of absence of defects may be determined from Table No. II which indicates the maximum allowance for each class of defects for the score indicated.

§ 52.1879 *Character*—(a) *General.* The factor of character refers to the texture and degree of maturity and degree of disintegration as evidenced by crushed raspberries.

(1) A "crushed" raspberry is a raspberry in which more than 50 percent of the drupelets are crushed, broken, or detached, or if the normal shape of the raspberry is otherwise seriously affected or destroyed.

(b) *(A) classification.* Frozen raspberries that possess a good character may be given a score of 17 to 20 points. "Good character" means that the raspberries are mature, well-developed, and practically intact to the extent that not more than 5 percent, by weight, of the raspberries may be slightly immature or slightly over-mature; that the raspberries are fleshy and tender; that the raspberries and accompanying liquor, if any, are practically free from detached seed cells; that not more than 10 percent, by weight, of red raspberries may be crushed; and that not more than 5 percent, by weight, of black raspberries may be crushed.

(c) *(B) classification.* If the frozen raspberries have a reasonably good character, a score of 14 to 16 points may be given. Frozen raspberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the raspberries are reasonably mature, reasonably well-developed, and reasonably intact to the extent that not more than 10 percent, by weight, of the raspberries may be slightly immature or slightly over-mature; that the raspberries are reasonably fleshy and reasonably tender; that the raspberries and accompanying liquor, if any, are reasonably free from detached seed cells; that not more than 20 percent, by weight, of red raspberries may be crushed; and that not more than 15 percent, by weight, of black raspberries may be crushed.

(d) *(SStd) classification.* Frozen raspberries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

(e) *Evaluation of score points.* The evaluation of the score points for the factor of character may be determined from Table No. III of this section which indicates the general requirements for texture and intactness, and the maximum allowances for variation in maturity and for crushed raspberries for the score indicated.

TABLE No. II—ALLOWANCE FOR DEFECTS

| Grade | Score points | Harmless extraneous material (leaves, etc.), caps, sepal-like bracts and portions thereof | Harmless extraneous material (weeds, grass) and stems (including stems over ½ inch) | | Undeveloped and damaged raspberries |
|---|---|---|---|---|---|
| | | Maximum | | | |
| | | Per 16 ounces of net weight | | | By weight |
| | | | Stems | Harmless material | |
| | | | Total | Over ½" | |
| | | | | | Percent |
| U. S. Grade A or U. S. Fancy | 40 | None | None | None | None |
| | 39 | ⅛ square inch | 1 | None | ½ |
| | 38 | ⅛ square inch | 1 | None | 1 |
| | 37 | ⅛ square inch | 1 | None or 1 piece | 2 |
| | 36 | ¼ square inch | 2 | 1 or 1 piece | 3 |
| | 35 | ¼ square inch | 2 | 1 or 1 piece | 4 |
| | 34 | ¼ square inch | 2 | 1 or 1 piece | 5 |
| U. S. Grade B or U. S. Choice | 33 | ⅛ square inch | 3 | 1 or 1 piece | 5½ |
| | 32 | ⅛ square inch | 3 | 1 or 1 piece | 6 |
| | 31 | ⅛ square inch | 3 | 1 or 1 piece | 7 |
| | 30 | ½ square inch | 4 | 1 or 1 piece | 8 |
| | 29 | ½ square inch | 4 | 1 or 1 piece | 9 |
| | 28 | ½ square inch | 4 | 1 or 1 piece | 10 |
| U. S. Grade D or Substandard | 27 or less | More than the allowances permitted for 28 points | | | |

TABLE No. III—CHARACTER

| Grade | Score points | General description of texture and intactness | Slightly immature and slightly overmature | Crushed | |
|---|---|---|---|---|---|
| | | | | Red raspberries | Black raspberries |
| | | | Maximum (by weight) | | |
| | | | Percent | Percent | Percent |
| U. S. Grade A or U. S. Fancy | 20 | Mature, well-developed, practically intact, fleshy and tender, practically free from seed cells. | 2 | 4 | 2 |
| | 19 | | 3 | 6 | 3 |
| | 18 | | 4 | 8 | 4 |
| | 17 | | 5 | 10 | 5 |
| U. S. Grade B or U. S. Choice | 16 | Reasonably mature, reasonably well-developed, reasonably intact, reasonably fleshy and tender, reasonably free from seed cells. | 7 | 12 | 9 |
| | 15 | | 9 | 16 | 12 |
| | 14 | | 10 | 20 | 15 |
| U. S. Grade D or Substandard | 13 or less | More than the allowances permitted for 14 score points. | | | |

§ 52.1880 *Determination of the grades of frozen raspberries for manufacturing.* (a) The grade of frozen raspberries for manufacturing is determined immediately after thawing a sample to the extent that the units may be separated easily. The grade of frozen raspberries for manufacturing is ascertained by considering the following factors, and for which no scoring system is provided:

Color, absence of defects, and character.

(b) "Normal flavor and odor" means that the raspberries are free from objectionable flavors, off flavors, and objectionable odors of any kind.

§ 52.1831 *Ascertaining the rating of each factor for frozen raspberries for manufacturing.* (See Table No. IV, § 52.1834, which is a brief summary of requirements for grades of frozen raspberries for manufacturing).

§ 52.1832 *Color*—(a) *(A) classification.* "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" requires that the frozen raspberries shall possess a bright, practically uniform, typical color. "Bright, practically uniform, typical color" means that the raspberries possess a bright and good characteristic color; that not more than 5 percent, by weight, of the raspberries vary markedly from the intensity and luster of the characteristic color of well-ripened raspberries; and that none of the raspberries possess a grey cast or darkening characteristic of oxidation or over-maturity.

(b) *(B) classification.* "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" requires that the frozen raspberries shall possess a reasonably bright, reasonably uniform typical color. "Reasonably bright, reasonably uniform, typical color" means that the raspberries possess a reasonably bright, reasonably good characteristic color; that not more than 10 percent, by weight, of the raspberries vary markedly from the intensity and luster of the characteristic color of well-ripened raspberries; and that the raspberries may possess a slight grey cast or slight darkening characteristic of oxidation or over-maturity.

(c) *(SStd) classification.* Frozen raspberries for manufacturing that fail to meet the requirements of paragraph (b) of this section for the factor of color shall be considered U. S. Grade D for Manufacturing or Substandard for Manufacturing.

§ 52.1833 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, caps and portions thereof, sepal-like bracts and portions thereof, stems, undeveloped raspberries, and damaged raspberries.

(1) "Harmless extraneous material" means vegetable substances such as weeds, grass, and leaves and any portions thereof that are harmless.

(2) A "cap" means a loose or attached full cap or a portion of a cap to which at least one sepal-like bract or portion thereof is attached. A "stem" that is attached to the cap is considered a separate defect.

(3) A "stem" means a stem, either loose or attached, that is longer than $\frac{1}{4}$ inch.

(4) An "undeveloped raspberry" means a raspberry or a portion of a raspberry that is shriveled or in which more than one-fourth of the raspberry possesses hard undeveloped drupelets or that possesses deformed areas which materially affect either the appearance or the edibility of the product.

(5) A "damaged raspberry" means a raspberry or a portion of a raspberry that is damaged by bruises or pathological, insect, or other injury or is damaged by other means which materially affect either the appearance or the edibility of the product. "Damage" includes any surface blemish or blemishes on a raspberry which in the aggregate exceed that of a circle $\frac{1}{4}$ inch in diameter or any noticeable blemish, regardless of area, that extends into the fruit tissue. Minute, insignificant injuries are not considered as damage.

(6) "Area" means the aggregate surface covered by the material stated when such material or portions thereof are placed in a contiguous position with no intervening spaces.

(b) *(A) classification.* "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" requires that the frozen raspberries shall be practically free from defects for the purposes of manufacturing. "Practically free from defects for the purposes of manufacturing" means that there may be present for each 16 ounces of net weight an area of not more than $\frac{1}{4}$ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; and not more than 2 stems, including not more than 1 stem which may exceed $\frac{1}{2}$ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and that there may be present not more than a total of 10 percent, by weight, of raspberries that are undeveloped raspberries and damaged raspberries.

(c) *(B) classification.* "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" requires that the frozen raspberries shall be reasonably free from defects for the purposes of manufacturing. "Reasonably free from defects for the purposes of manufacturing" means that there may be present for each 16 ounces of net weight an area of not more than $\frac{1}{2}$ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; and not more than 4 stems, including not more than 1 stem which may exceed $\frac{1}{2}$ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and that there may be present not more than a total of 20 percent, by weight, of raspberries that are undeveloped raspberries and damaged raspberries.

(d) *(SStd) classification.* Frozen raspberries for manufacturing that fail to meet the requirements of paragraph (c) of this section for the factor of absence of defects shall be considered U. S. Grade D for Manufacturing or Substandard for Manufacturing.

§ 52.1834 *Character*—(a) *General.* The factor of character refers to the texture and degree of maturity and degree of disintegration as evidenced by crushed raspberries.

(1) A "crushed" raspberry is a raspberry in which more than 50 percent of the druplets are crushed, broken, or detached, or if the normal shape of the raspberry is otherwise seriously affected or destroyed.

TABLE NO. IV—BRIEF SUMMARY OF REQUIREMENTS FOR GRADES OF FROZEN RASPBERRIES FOR MANUFACTURING

| Grades | Color | |
|---|---|---|
| | Typical color | Maximum variation from color of well-ripened raspberries |
| | | *Maximum (by weight) (percent)* |
| U. S. Grade A for manufacturing or U. S. Fancy for manufacturing. | Bright, good characteristic color; none may possess a grey cast or darkening (oxidation or overmaturity). | 5 |
| U. S. Grade B for manufacturing or U. S. Choice for manufacturing. | Reasonably bright, reasonably good; may possess a slight grey cast or slight darkening (oxidation or overmaturity). | 10 |

| Grades | Absence of defects | | |
|---|---|---|---|
| | Harmless extraneous material (leaves, etc.), caps, sepal-like bracts and portions thereof | Harmless extraneous material (weeds, grass) and stems (including stems over ½ inch) | Undeveloped and damaged raspberries |
| | Maximum | | |
| | Per 16 ounces of net weight | | By weight |
| | | | *Percent* |
| U. S. Grade A for manufacturing or U. S. Fancy for manufacturing. | ¼ square inch | 2 stems, including 1 stem that may exceed ½ inch, or 1 piece harmless material. | 10 |
| U. S. Grade B for manufacturing or U. S. Choice for manufacturing. | ½ square inch | 4 stems, including 1 stem that may exceed ½ inch, or 1 piece harmless material. | 20 |

TABLE NO. IV—BRIEF SUMMARY OF REQUIREMENTS FOR GRADES OF FROZEN RASPBERRIES FOR MANUFACTURING—Continued

| Grades | Character | | |
|---|---|---|---|
| | General description of texture and intactness | Slightly immature and slightly overmature | Crushed raspberries |
| | | Maximum (by weight) (percent) | |
| U. S. Grade A for manufacturing or U. S. Fancy for manufacturing. | Good character for purposes of manufacturing: reasonably mature, reasonably well-developed, reasonably intact, reasonably fleshy and reasonably tender, reasonably free from seed cells. | 10 | 25 |
| U. S. Grade B for manufacturing or U. S. Choice for manufacturing. | Reasonably good character for purposes of manufacturing: fairly mature, fairly well-developed, fairly intact, fairly fleshy and fairly tender, fairly free from seed cells. | 15 | 50 |

(b) *(A) classification.* "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" requires that the frozen raspberries shall possess a good character for the purposes of manufacturing. "Good character for the purposes of manufacturing" means that the raspberries are reasonably mature, reasonably well-developed, and reasonably intact to the extent that not more than 10 percent, by weight, of the raspberries may be slightly immature or slightly over-mature; that the raspberries are reasonably fleshy and reasonably tender; that the raspberries and accompanying liquor, if any, are reasonably free from detached seed cells; and that not more than 25 percent, by weight, of the raspberries may be crushed.

(c) *(B) classification.* "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" requires that the frozen raspberries shall possess a reasonably good character for the purposes of manufacturing. "Reasonably good character for the purposes of manufacturing" means that the raspberries are fairly mature, fairly well-developed, and fairly intact to the extent that not more than 15 percent, by weight, of the raspberries may be slightly immature or slightly over-mature; that the raspberries are fairly fleshy and fairly tender; that the raspberries and accompanying liquor, if any, are fairly free from detached seed cells; that not more than 50 percent, by weight, of the raspberries may be crushed.

(d) *(SStd) classification.* Frozen raspberries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D for Manufacturing or Substandard for Manufacturing.

LOT CERTIFICATION TOLERANCES

§ 52.1835 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen raspberries, the grade for such lot will be determined by averaging the total scores of all containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1836 *Score sheet for frozen raspberries (not for manufacturing).*

Size and kind of container .....
Container mark or identification .....
Label (style of pack; Ratio of fruit to sugar, etc., if shown) .....
Type (color), if known .....

| Factors | Score points | | |
|---|---|---|---|
| Color | 40 | (A) | 34-40 |
| | | (B) | 28-33 |
| | | (D) | 10-27 |
| Absence of defects | 40 | (A) | 34-40 |
| | | (B) | 28-33 |
| | | (D) | 10-27 |
| Character | 20 | (A) | 17-20 |
| | | (B) | 14-16 |
| | | (D) | 10-13 |
| Total score | 100 | | |

Normal flavor and odor .....
Grade .....

[1] Indicates limiting rule.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED SPINACH

IDENTITY AND GRADES

§ 52.1901 *Identity.* "Canned spinach" means canned spinach as defined in the definitions and standards of identity for canned vegetables (21 CFR 52.990), issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.1902 *Grades of canned spinach.*[3] (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned spinach that possesses a good color, possesses a good character, a normal flavor and odor, is practically free from defects, and scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned spinach that possesses a fairly good color, possesses a fairly good character, a normal flavor and odor, is fairly free from defects, and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned spinach that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER AND DRAINED WEIGHTS

§ 52.1903 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container be filled with spinach as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the volume of the container.

§ 52.1904 *Recommended drained weight.* (a) The drained weight recommendations in Table No. I of this section are not incorporated in the grades of the finished products, since drained weight, as such, is not a factor of quality for the purpose of these grades.

(b) The drained weight of canned spinach is determined by emptying the contents of the container upon a No. 8 sieve of proper diameter and allowing to drain for two minutes. A sieve 8 inches in diameter is used for the No. $2\frac{1}{2}$ size can (401 x 411) and for containers of equal or smaller sizes; and a sieve 12 inches in diameter is used for containers larger than the No. $2\frac{1}{2}$ size can.

TABLE NO. I—RECOMMENDED MINIMUM DRAINED WEIGHTS (IN OUNCES) OF SPINACH

| Container size or designation: | *Drained weight* |
|---|---|
| 8 Z Tall | 5¼ |
| No. 1 (Picnic) | 7 |
| No. 1 Tall | 10½ |
| No. 303 | 10¾ |
| No. 2 | 13 |
| No. 2½ | 19 |
| No. 10 | 60 |
| No. 303 jar | 11¼ |
| No. 2½ jar | 18¼ |

FACTORS OF QUALITY

§ 52.1905 *Ascertaining the grade.* (a) The grade of canned spinach is ascertained by considering in conjunction with the requirements of the respective grade, the respective ratings of the factors of color, absence of defects, and character.

(b) The relative importance of each factor is expressed numerically on a scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | *Points* |
|---|---|
| Color | 30 |
| Absence of defects | 40 |
| Character | 30 |
| Total score | 100 |

[2] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[3] These grades have been so drafted that they may be used in grading other greens such as canned turnip, mustard, and beet greens, and canned kale. In grading these products, however, the typical characteristics of the vegetable shall be considered.

(c) "Normal flavor and normal odor" means that the product is free from objectionable odors and objectionable flavors of any kind.

§ 52.1906 *Ascertaining the rating for each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "26 to 30 points" means 26, 27, 28, 29, or 30 points).

§ 52.1907 *Color*—(a) *(A) classification.* Canned spinach that possesses a good color may be given a score of 26 to 30 points. "Good color" means that the color is the typical green color of young and tender canned spinach and that there is not more than a slight variation in green color.

(b) *(C) classification.* If the canned spinach possesses a fairly good color, a score of 22 to 25 points may be given. Canned spinach that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the canned spinach possesses a fairly typical green color that may be variable or slightly dull, but not to the extent that the appearance of the product is seriously affected.

(c) *(SStd) classification.* Canned spinach that is definitely off color for any reason or that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 21 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1908 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from grit, sand, or silt, seed heads, grass and weeds, crowns of root stubs, root stubs, and major and minor damage. Minute insignificant injuries shall not be considered as damage. The evaluation of the score points for the factor of absence of defects may be determined from Table No. II of this section which prescribes the maximum score which may be allowed for specified defects.

(1) "Grit, sand, or silt" means any particles of earthy material.

(2) "Major damage" means any yellow, brown, or other discoloration which covers an aggregate area of not less than 1 square inch on one surface of any leaf, portion of leaf, stem, or portion of stem, or any pathological damage, or insect injury affecting any leaf, portion of a leaf, stem, or portion of a stem.

(3) "Minor damage" means any yellow, brown, or other discoloration which covers an aggregate area of less than 1 square inch on one surface of any leaf, portion of a leaf, stem, or portion of a stem.

TABLE No. II—DEFECTS

| Range of score points | Score points | Grit, sand, or silt | Total number of root stubs—per 60 ounces drained weight | Damage: Total | Damage: Total | Total number of seed heads | Grass and weeds | Total number of crowns of roots |
|---|---|---|---|---|---|---|---|---|
| | | Per 13 ounces drained weight | | | | | | |
| | | | | Major and minor | Major | | Aggregate length | Noticeably detract from appearance of product |
| | | | | | | | *Inches* | *Inches* |
| 33–40 | 40 | None | None | None | None | None | None | None |
| | 39 | None | None | 1–2 | 1 | None | 1 | None |
| | 38 | None | 1 | 3 | 2 | 1 | 2 | 1 |
| | 37 | None | 1 | 4 | 2 | 1 | 3 | 1 |
| | 36 | None | 2 | 5 | 3 | 1 | 4 | 2 |
| | 35 | None | 2 | 6 | 3 | 2 | 5–6 | 2 |
| | 34 | None | 3 | 7 | 4 | 2 | 7–8 | 3 |
| | 33 | None | 3 | 8 | 4 | 2 | 9–10 | 3 |
| 26–32 | 32 | Trace | 4 | 9–10 | 5 | 3 | 11 | 4 |
| | 31 | Trace | 4 | 9–10 | 5 | 3 | 12 | 4 |
| | 30 | Trace | 5 | 11–12 | 6 | 3 | 13 | 5 |
| | 29 | Trace | 5 | 11–12 | 6 | 3 | 14 | 6 |
| | 28 | Trace | 5 | 13–14 | 7 | 4 | 15–16 | 7 |
| | 27 | Trace | 6 | 13–14 | 7 | 4 | 17–18 | 8 |
| | 26 | Trace | 6 | 15–16 | 8 | 4 | 19–20 | 9 |
| 0–41 | 25 or less | More than the allowances permitted for 26 score points | | | | | | |

(b) *(A) classification.* Canned spinach that is practically free from defects may be given a score of 33 to 40 points. "Practically free from defects" means that the product contains no grit, sand, or silt that affects the eating quality or appearance of the spinach; that for each 60 ounces of drained weight there may be present not more than 3 root stubs; and that for each 13 ounces of drained weight there may be present:

(1) Not more than 2 tender crowns which have been cut from root stubs with leaf clusters attached;

(2) Major and minor damage affecting not more than 8 leaves or stems or portions of leaves or stems, including major damage affecting not more than 4 leaves or stems or portions of leaves and stems;

(3) Not more than 2 seed heads; and

(4) Grass or weeds aggregating not more than 10 inches in length of which not more than 3 inches may be coarse grass or weeds and none of the coarse grass or weeds may be more than $\frac{3}{16}$ inch in width measured at the widest point transversely to the long axis.

(c) *(C) classification.* If the canned spinach is fairly free from defects, a score of 26 to 32 points may be given. Canned spinach that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the product may contain a trace of grit, sand, or silt that does not seriously affect the eating quality or appearance of the spinach; that for each 60 ounces of drained weight there may be present not more than 6 root stubs; and that for each 13 ounces of drained weight there may be present:

(1) Not more than 4 tender crowns which have been cut from root stubs with leaf clusters attached;

(2) Major and minor damage affecting not more than 16 leaves or stems or portions of leaves or stems, including major damage affecting not more than 8 leaves or stems or portions of leaves or stem

(3) Not more than 4 seed heads; and

(4) Grass or weeds aggregating not more than 20 inches in length of which not more than 9 inches may be coarse grass or weeds and none of the coarse grass or weeds may be more than $\frac{3}{16}$ inch in width measured at the widest point transversely to the long axis.

(d) *(SStd) classification.* Canned spinach that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 25 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1909 *Character*—(a) *General.* The factor of character refers to the condition and structural characteristics of the spinach leaves and stems or portions of leaves and stems. The degree of freedom from coarse or tough leaves and stems or coarse or tough portions of leaves and stems, the tenderness of the spinach, and the degree of ragedness, disintegration, or (except with respect to chopped spinach) shredding of leaves and stems are considered under this factor.

(b) *(A) classification.* Canned spinach that possesses a good character may be scored 26 to 30 points. "Good character" means that the spinach is tender and is practically free from coarse or tough leaves and stems or coarse or tough portions of leaves and stems and that the appearance of the product is not materially affected by ragged, disintegrated or shredded leaves or stems or portions of leaves or stems.

(c) *(C) classification.* If the canned spinach possesses a fairly good character, a score of 22 to 25 points may be given. Canned spinach that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the spinach may be fairly tender, and that the appearance of the product is not seriously affected by ragged, disintegrated, or shredded leaves or stems or portions of leaves or stems.

(d) *(SStd) classification.* Canned spinach that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 21 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1910 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned spinach, the grade for such lot will be determined by averaging the scores of the containers comprising the sample, if:

(1) Not more than one-sixth of the containers comprising the sample fail to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers in the lot meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act, and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.1911 *Score sheet for canned spinach.*

| | |
|---|---|
| Size and kind of container | |
| Container code or marking | |
| Label | |
| Net weight (ounces) | |
| Vacuum (inches) | |
| Drained weight (ounces) | |

| Factors | Score points | | |
|---|---|---|---|

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN SPINACH [1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1921 *Product description.* Frozen spinach is the product prepared from the whole or cut, clean, sound, and succulent leaves and stems of fresh spinach (Spinacea oleracea) by sorting, trimming, washing, and blanching such leaves and stems, which is then frozen and maintained at temperatures necessary for the preservation of the product.

§ 52.1922 *Styles of frozen spinach.* (a) "Whole" or "whole leaf" spinach is the style of frozen spinach that consists substantially of the leaf and adjoining portion of the leaf.

(b) "Cut" or "chopped" is the style of frozen spinach that consists of the leaf and adjoining portion of the leaf which has been cut or chopped into small pieces.

§ 52.1923 *Grades of frozen spinach.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen spinach that possesses a good flavor and odor, that possesses a good color, that possesses a good character, that is practically free from defects, and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen spinach that possesses a fairly good flavor and odor, that possesses a reasonably good color, that possesses a reasonably good character, that is reasonably free from defects, and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen spinach that fails to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.1924 *Ascertaining the grade.* (a) The grade of frozen spinach may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings of the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Absence of defects | 60 |
| Character | 20 |
| Total score | 100 |

(c) The score for the factors of color, absence of defects, and character is determined immediately after thawing to the extent that the product is substantially free from ice crystals and can be handled as individual units. A representative sample of the product is cooked for examination with respect to flavor and odor.

(d) "Good flavor and odor" means that the product, after cooking, has a good characteristic, normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Reasonably good flavor and odor" means that the product after cooking may be lacking in good flavor and odor, but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1925 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1926 *Color*—(a) *(A) classification.* Frozen spinach that possesses a good color may be given a score of 17 to 20 points. Good color means that the frozen spinach possesses a practically uniform bright characteristic green color.

(b) *(B) classification.* If the frozen spinach possesses a reasonably good color, a score of 14 to 16 points may be given. Frozen spinach that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the frozen spinach possesses a reasonably uniform characteristic green color and may be variable in color but not to the extent that the appearance of the frozen product is materially affected.

(c) *(SStd) classification.* Frozen spinach that is definitely off color for any reason, or that fails to meet the requirements of paragraph (b) of this section, may be given a score of 0 to 13 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

§ 52.1927 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from grit, sand, or silt, seed heads, grass and weeds, crowns of root stubs, root stubs, and major and minor damage.

(1) "Grit, sand, or silt" means any particle of earthy material.

(2) "Minor damage" means damage by any yellow, brown, or other discoloration which covers an aggregate area of less than 1 square inch on one surface of any leaf, portion of a leaf, stem, or portion of a stem (except minute insignificant injuries which shall not be considered as minor damage), or damage affecting any leaf, portion of a leaf, stem, or portion of a stem, to the extent that the appearance or eating quality of the unit is materially affected regardless of the area.

(3) "Major damage" means damage by any yellow, brown, or other discoloration which covers an aggregate area of 1 square inch or more on one surface of any leaf, portion of a leaf, stem, or portion of a stem, or any insect injury or other damage affecting any leaf, portion of a leaf, stem, or portion of a stem to the extent that the appearance or eating quality of the unit is seriously affected regardless of area.

(b) *(A) classification.* Frozen spinach that is practically free from defects may be given a score of 51 to 60 points. "Practically free from defects" has the following meanings with respect to the following styles of frozen spinach:

(1) *Whole or whole leaf.* No grit, sand, or silt may be present that affects the appearance or eating quality of the frozen spinach, and for each 48 ounces of the product there may be present not more than one root stub, and for each 16 ounces of the product there may be present:

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(i) Not more than 2 tender crowns of roots with leaf clusters attached;

(ii) Major and minor damage affecting not more than 8 leaves and stems or portions of leaves and stems, including major damage affecting not more than 4 leaves and stems or portions of leaves and stems;

(iii) Not more than 2 seed heads; and

(iv) Grass and weeds aggregating not more than 10 inches in length of which not more than 3 inches may be grass and weeds which detract materially from the appearance of the product.

(2) *Cut or chopped.* No grit, sand, or silt may be present that affects the appearance or eating quality of the frozen spinach; minor damage, major damage, seed heads, grass, weeds, crowns of root stubs, and root stubs, or pieces thereof, may be present that do not materially affect the appearance or eating quality of the product.

(c) (*B*) *classification.* If the frozen spinach is reasonably free from defects a score of 42 to 50 points may be given. Frozen spinach that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" has the following meanings with respect to the following styles of frozen spinach:

(1) *Whole or whole leaf.* A trace of grit, sand, or silt may be present that does not materially affect the appearance or eating quality of the frozen spinach; for each 48 ounces of the product there may be present not more than 3 root stubs and for each 16 ounces of the product there may be present:

(i) Not more than 4 tender crowns of roots with leaf clusters attached;

(ii) Major and minor damage affecting not more than 16 leaves and stems, including major damage affecting not more than 8 leaves and stems or portions of leaves and stems;

(iii) Not more than 4 seed heads; and

(iv) Grass and weeds aggregating not more than 15 inches in length of which not more than 6 inches may be grass and weeds which detract materially from the appearance of the product.

(2) *Cut or chopped.* A trace of grit, sand, or silt may be present that does not materially affect the appearance or eating quality of the frozen spinach; minor damage, major damage, seed heads, grass, weeds, crowns of root stubs, and root stubs, or pieces thereof, may be present that do not seriously affect the appearance or eating quality of the product.

(d) (*SStd*) *classification.* Frozen spinach that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 41 points and shall not be graded above substandard regardless of the total score for the product (this is a limiting rule).

§ 52.1928 *Character*—(a) *General.* The factor of character refers to the tenderness and condition of the spinach leaves and stems or portions of leaves and stems. The degree of freedom from coarse or tough leaves and stems or coarse or tough portions of leaves and stems, and the degree to which the appearance may be affected by ragged and torn leaves and stems or ragged and torn portions of leaves and stems, are considered under this factor.

(b) (*A*) *classification.* Frozen spinach that possess a good character may be scored 17 to 20 points. "Good character" means that the spinach is tender and practically free from coarse or tough leaves and stems or coarse or tough portions of leaves and stems and the appearance of the product is not materially affected by ragged and torn leaves and stems or ragged and torn portions of leaves and stems.

(c) (*B*) *classification.* If the frozen spinach possesses a reasonably good character a score of 14 to 16 points may be given. Frozen spinach that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the spinach may possess a few coarse or tough leaves and stems or coarse or tough portions of leaves and stems, and the appearance of the product may be materially but not seriously affected by shredded, ragged, or disintegrated leaves and stems or portions of leaves and stems.

(d) (*SStd*) *classification.* Frozen spinach that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1929 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen spinach, the grade for such lot will be determined by averaging the total score of all containers, if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample fall more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN COOKED SQUASH[1]

PRODUCT DESCRIPTION AND GRADES

§ 52.1941 *Product description.* Frozen cooked squash is the clean, sound, properly matured product made from varieties of fall or late type squash which have been properly prepared by washing, cutting, cleaning, steaming, reducing to a pulp and removing seed, and fiber. The product is then frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.1942 *Grades of frozen cooked squash.* (a) "U. S. Grade A or "U. S. Fancy" is the quality of frozen cooked squash that possesses a good consistency; that possesses a good color; that possesses a good finish; that is practically free from defects; that possesses a good flavor and odor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this section.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen cooked squash that possesses a reasonably good consistency; that possesses a reasonably good color; that possesses a reasonably good finish; that is reasonably free from defects; that possesses a fairly good flavor and odor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(c) "Substandard" is the quality of frozen cooked squash that fails to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.1943 *Ascertaining the grade.* (a) The grade of frozen cooked squash may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of consistency, color, finish, and absence of defects.

(b) The relative importance of each scoring factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | Points |
|---|---|
| Consistency | 30 |
| Color | 20 |
| Finish | 20 |
| Absence of defects | 30 |
| Total score | 100 |

(c) The scores for the factors of consistency, color, finish, and absence of defects are determined after the frozen cooked squash is heated in a double boiler, or in a covered pan until thoroughly warmed and completely free from ice crystals. The warmed product is then stirred to blend all separated liquid into a uniform mixture. The requirements for flavor and odor are also ascertained on the warmed product.

(d) "Good flavor and odor" means that the product after heating, has a good, characteristic normal flavor and odor and is free from objectionable flavors, and objectional odors of any kind.

(e) "Reasonably good flavor and odor" means that the product, after heating, may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1944 *Ascertaining the ratings for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1945 *Consistency*—(a) (*A*) *classification.* Frozen cooked squash that possesses a good consistency may be given a score of 26 to 30 points. "Good consistency" means that the warmed mixed squash, after emptying from a container to a dry flat surface, forms a well-mounded mass, and that at the end of two minutes after emptying on such surface there is not more than a slight separation of free liquor.

(b) (*B*) *classification.* If the frozen cooked squash possesses a reasonably good consistency, a score of 21 to 25 points may be given. Frozen squash that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good consistency" means that the warmed mixed squash after emptying from the container to a dry flat surface, may be reasonably stiff, but not excessively stiff; forms a moderately mounded mass, and that at the end of two minutes, after emptying on such surface, there may be a moderate, but not excessive separation of free liquor.

(c) (*SStd*) *classification.* Frozen cooked squash that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 20 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1946 *Color*—(a) (*A*) *classification.* Frozen cooked squash that possesses a good color may be given a score of 17 to 20 points. "Good color" means that the color of the warmed mixed squash possesses a practically uniform, bright, typical color; and is free from discoloration due to oxidation, or other causes.

(b) (*B*) *classification.* If the frozen cooked squash possesses a reasonably good color, a score of 14 to 16 points may be given. Frozen squash that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the color of the warmed cooked squash possesses a reasonably uniform, reasonably bright, typical color, and the color may be variable or slightly dull but is not off-color.

(c) (*SStd*) *classification.* Frozen cooked squash that is off-color for any reason or fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1948 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from sand, grit, or silt, pieces of seed, fiber, and from dark or off-colored particles.

(1) "Grit, sand, or silt" means any particle of earthy material.

(b) (*A*) *classification.* Frozen cooked squash that is practically free from defects may be given a score of 25 to 30 points. "Practically free from defects" means that no grit, sand, or silt may be present that affects the appearance or eating quality of the frozen cooked squash, and that the number, size and color of the other aforesaid defects present individually or collectively do not more than slightly affect the appearance or eating quality of the product.

(c) (*B*) *classification.* Frozen cooked squash that is reasonably free from defects may be given a score of 21 to 24 points. Frozen squash that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means a trace of grit, sand, or silt may be present that does not materially affect the appearance or eating quality of the frozen cooked squash, and that any of the other aforesaid defects present individually or collectively may be noticeable but are not so large, so numerous, or of such contrasting color as to seriously affect the appearance or eating quality of the product.

(d) (*SStd*) *classification.* Frozen cooked squash which fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 20 points and shall not be graded above substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1949 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen cooked squash, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than four points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN SQUASH (SUMMER TYPE)[1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.1961 *Product description.* "Frozen squash" is the fresh, sound, immature product from the squash (summer type) plant hereinafter called frozen squash, which has been properly prepared and properly blanched, and is then frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.1962 *Styles of frozen squash.* (a) Sliced.

(b) Cut.

§ 52.1963 *Grades of frozen summer squash.* (a) "U. S. Grade A" or U. S. Fancy" is the quality of frozen squash that possesses similar varietal characteristics; that possesses a good flavor and odor; that possesses a good color; that is practically free from defects; that possesses a good character; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen squash that possesses similar varietal characteristics; that possesses a reasonably good flavor and odor; that possesses a reasonably good color; that is reasonably free from defects; that possesses a reasonably good character; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen squash that fails to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.1964 *Ascertaining the grade.* (a) The grade of frozen squash may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each scoring factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) The scores for the factors of color, absence of defects, and character are determined immediately after thawing so that the product is sufficiently free from ice crystals to permit proper handling as individual units, and a representative sample of the product is cooked to ascertain tenderness of the frozen squash before final evaluation of the score for character. Flavor and odor are also ascertained on the cooked product.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(d) "Good flavor and odor" means that the product after cooking has a good, characteristic normal flavor and ordor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Reasonably good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.1965 *Ascertaining the ratings for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.1966 *Color*—(a) *(A) classification.* Frozen squash that possesses a good color may be given a score of 17 to 20 points. "Good color" means that the color of the squash is bright and typical of young and tender squash of similar varietal characteristics which has been properly processed.

(b) *(B) classification.* If the frozen squash possesses a reasonably good color, a score of 14 to 16 points may be given. Frozen squash that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the color of the squash is typical of reasonably young and tender squash of similar varietal characteristics which has been properly processed.

(c) *(SStd) classification.* Frozen squash that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1967 *Absence of defects.*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous vegetable material, sand, grit, or silt, poorly cut units, units damaged by mechanical injury, and units damaged by discoloration, scars, insect injury, or damaged by other means.

(1) "Unit" means a whole squash or a portion of a squash.

(2) "Damaged unit" means any unit damaged by discoloration, scars, insect injury, or by any other means except damaged by mechanical injury to the extent that the appearance or eating quality of the product is materially affected.

(3) "Seriously damaged" means damaged to the extent that the appearance or eating quality of the unit is seriously affected.

(4) "Harmless extraneous vegetable material" means leaves, detached stems or portions thereof, or other similar vegetable material.

(5) "Poorly cut" means units with attached stems or stem material, very ragged units, or pieces of less than ½ slice in sliced style squash.

(6) "Damaged by mechanical injury" means broken or mashed to such an extent that the appearance or eating quality of the unit is seriously affected.

(7) "Sand, grit, or silt" means any particle of earthy material.

(b) *(A) classification.* Frozen squash that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that the product contains no grit, sand, or silt that affects the eating quality or appearance of the frozen squash; that for each 12 ounces of units there may be present not more than one piece of harmless extraneous vegetable material. The combined weight of all other defects and defective units must not exceed 8 percent of the weight of the units. *Provided,* That

(1) Not more than 4 percent, by weight, is of damaged units and of such 4 percent, not more than one-fourth thereof or 1 percent, by weight, of all the units consist of units that are seriously damaged; or

(2) Not more than 6 percent, by weight, is of poorly cut units, or of units damaged by mechanical injury, or any combination thereof of not more than 6 percent, by weight.

(c) *(B) classification.* If the frozen squash is reasonably free from defects, a score of 28 to 33 points may be given. Frozen squash that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the product may contain a trace of sand, grit, or silt that does not materially affect the eating quality or appearance of the frozen squash; that for each 12 ounces of units there may be present not more than two pieces of harmless extraneous vegetable material. The combined weight of all other defects and defective units must not exceed 12 percent of the weight of the units: *Provided,* That

(1) Not more than 8 percent, by weight, is of damaged units and of such 8 percent, not more than one-fourth thereof or 2 percent, by weight, of all the units consist of units that are seriously damaged.

(2) Not more than 10 percent, by weight, is of poorly cut units, or of units damaged by mechanical injury, or any combination thereof of not more than 10 percent, by weight.

(d) *(SStd) classification.* Frozen squash that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.1968 *Character*—(a) *General.* The factor of character refers to the fleshy texture, the tenderness, and the degree of development of the seeds.

(b) *(A) classification.* Frozen squash that possesses a good character may be given a score of 34 to 40 points. "Good character" means that the units are practically intact, are fleshy and tender, that the seeds are in the immature stage, and that not more than 5 percent, by weight of the units may be of reasonably good character.

(c) *(B) classification.* If the frozen squash possesses a reasonably good character, a score of 28 to 33 points may be given. Frozen squash that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the units may show slight disintegration, may have lost to a considerable extent their fleshy texture, may be reasonably tender, and that the seeds may have passed the immature stage of maturity, but are not hard and that not more than 10 percent, by weight, of the units fails to meet the requirements for reasonably good character.

(d) *(SStd) classification.* Frozen squash that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.1969 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen squash, the grade for such lot will be determined by averaging the total score for all containers, if:

(1) Not more than one-sixth of the containers comprising the sample fails to meet all the requirements of the grade indicated by the average of such total scores, and with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN STRAWBERRIES[1]

PRODUCT DESCRIPTION, STYLES, SIZES, AND GRADES

§ 52.1981 *Product description.* Frozen strawberries are prepared from the properly ripened fresh fruit of the strawberry plant (Fragaria virginiana); are stemmed, washed, and sorted; may be packed with or without packing media; and are frozen and stored at temperatures necessary for the preservation of the product.

§ 52.1982 *Styles of frozen strawberries.* (a) "Whole" or "whole strawberries."

(b) "Sliced" or "sliced strawberries."

§ 52.1983 *Sizes of whole strawberries.* Except with respect to "U. S. Grade A" or "U. S. Fancy" grade (not for manufacturing), the size of whole strawberries is not incorporated in the grades of the finished product since size, as such, is not a factor of quality for the purpose of these grades. When used in connection with the following sizes of whole strawberries, the term "diameter" means the greatest dimension measured at right angles to a straight line running from the stem to the apex:

(a) *Small size.* Whole strawberries that measure less than ⅝ inch in diameter.

(b) *Medium size.* Whole strawberries that measure ⅝ inch to 1 inch, inclusive, in diameter.

(c) *Large size.* Whole strawberries that measure more than 1 inch in diameter.

§ 52.1984 *Grades of frozen strawberries (not for manufacturing).* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen strawberries that possess similar varietal characteristics; possess a bright, practically uniform, typical color; are practically free from defects; possess a good character; possess a normal flavor and odor; and score not less than 85 points when scored in accordance with the scoring system outlined in this subpart. In addition to the foregoing requirements, whole strawberries of this grade may contain not more than 5 percent, by count, of whole strawberries that are small size, i. e., less than ⅝ inch in diameter.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen strawberries that possess similar varietal characteristics; possess a reasonably bright, reasonably uniform, typical color; are reasonably free from defects; possess a reasonably good character; possess a normal flavor and odor; and score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of frozen strawberries that fail to meet the requirements of "U. S. Grade B" or "U. S. Choice."

§ 52.1985 *Grades of frozen strawberries for manufacturing.* (a) "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" is the quality of frozen strawberries that possess similar varietal characteristics; that are of any size; that possess a bright, practically uniform, typical color; that are practically free from defects; that possess a good character for the purposes of manufacturing; and that possess a normal flavor and odor.

(b) "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" is the quality of frozen strawberries that possess similar varietal characteristics; that are of any size; that possess a reasonably bright, reasonably uniform, typical color; that are reasonably free from defects; that possess a reasonably good character for the purposes of manufacturing; and that possess a normal flavor and odor.

(c) "U. S. Grade D for Manufacturing" or "Substandard for Manufacturing" is the quality of frozen strawberries that fail to meet the requirements of "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing."

FACTORS OF QUALITY

§ 52.1986 *Ascertaining the score and grade for frozen strawberries (not for manufacturing).* (a) The grade of frozen strawberries is determined immediately after thawing to the extent that the units may be separated easily. The score and grade of frozen strawberries may be ascertained by considering, in addition to the requirements of the respective grade, the following factors: Color, absence of defects, and character.

(b) The relative importance of each factor has been expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Color | 40 |
| Absence of defects | 40 |
| Character | 20 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the strawberries are free from objectionable flavors, off flavors, and objectionable odors of any kind.

§ 52.1987 *Ascertaining the score of each factor for frozen strawberries (not for manufacturing).* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "34 to 40 points" means 34, 35, 36, 37, 38, 39, or 40 points).

§ 52.1988 *Color*—(a) *General.* "Well colored" means that not less than four-fifths, in the aggregate, of the surface of the whole strawberry is the red or pink color characteristic of strawberries of similar varieties, and that the surface (including cut surfaces) of the sliced strawberry is the typical color, characteristic of well-ripened strawberries of similar varieties.

(b) *(A) classification.* Frozen strawberries that possess a bright, practically uniform, typical color may be given a score of 34 to 40 points. "Bright, practically uniform, typical color" means

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

that the whole and sliced strawberries possess a bright and good characteristic red or pink color, reasonably free from a slightly dull, slightly grey, or slightly reddish-brown cast; and that there may be present not more than 5 percent, by count, of the whole strawberries that are not well colored and not more than 5 percent, by weight, of the sliced strawberries that are not well colored.

(c) *(B) classification.* If the frozen strawberries possess a reasonably bright, reasonably uniform, typical color, a score of 28 to 33 points may be given. Frozen strawberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably bright, reasonably uniform, typical color" means that the whole and sliced strawberries possess a reasonably good characteristic red or pink color that may possess a slightly dull, slightly grey, or slightly reddish-brown cast; and that there may be present not more than 10 percent, by count, of the whole strawberries that are not well colored and not more than 10 percent, by weight, of the sliced strawberries that are not well colored.

(d) *(SStd) classification.* Frozen strawberries that are definitely dull or off-color or that fail to meet the requirements of paragraph (c) of this section, may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

(e) The evaluation of the score points for the factor of color may be determined from Table No. I of this subpart which indicates the score range in the respective grades and which denotes the typical color in frozen strawberries and the maximum allowance for frozen strawberries that are not well colored for the score indicated.

§ 52.1989 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, caps and portions thereof, sepal-like bracts and portions thereof, stems, short stems, undeveloped strawberries, and damaged strawberries.

(1) "Harmless extraneous material" means vegetable substances such as weeds, grass, and leaves and any portions thereof that are harmless.

(2) A "cap" means a loose or attached full cap or a portion of a cap to which at least one sepal-like bract or portion thereof is attached. A "short stem" that is attached to a cap is considered a part of the cap. A "stem" that is attached to the cap is considered a separate defect.

(3) A "stem" means a stem, either loose or attached, that is longer than ⅛ inch.

(4) A "short stem" means a stem that is ⅛ inch or less in length and which may include the center portion of a cap to which no sepal-like bract or portion thereof is attached.

(5) An "undeveloped strawberry" means a strawberry or a portion of a strawberry that possesses a hard, seedy, or deformed end or that possesses deformed areas which materially affect either the appearance or the edibility of the product.

(6) A "damaged strawberry" means a strawberry or a portion of a strawberry that is damaged by bruises or by pathological, insect, or other injury or is damaged by other means which materially affect either the appearance or the edibility of the product. Minute, insignificant injuries are not considered as damage.

(7) "Area" means the aggregate surface covered by the material stated when such material or portions thereof are placed in a contiguous position with no intervening spaces.

(b) *(A) classification.* Frozen strawberries that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" has the following meanings with respect to the following styles of frozen strawberries:

(1) *Whole.* There may be present for each 16 ounces of net weight an area of not more than ¼ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 2 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 16 short stems; and there may be present not more than a total of 5 percent, by weight, of whole strawberries that are undeveloped strawberries and of whole strawberries that are damaged strawberries.

TABLE NO. I—ALLOWANCES FOR COLOR

| Grade | Score points | Whole and sliced, typical color | Whole, practically free from defects, not well colored | |
|---|---|---|---|---|
| | | | Maximum | |
| | | | By count (percent) | By weight (percent) |
| U. S. Grade A or U. S. Fancy | 40<br>39<br>38<br>37<br>36<br>35<br>34<br>33 | Bright and good characteristic red or pink color; reasonably free from a slightly dull, slightly grey, or slightly reddish-brown cast. | 1<br>2<br>3<br>4<br>5<br>6 | 1<br>2<br>3<br>4<br>5<br>5 |
| U. S. Grade B or U. S. Choice | 32<br>31<br>30<br>29<br>28 | Reasonably good characteristic red or pink color, may possess a slightly dull, slightly grey, or slightly reddish-brown cast. | 7<br>8<br>9<br>10<br>10 | 6<br>7<br>8<br>9<br>10 |
| U. S. Grade D or Substandard | 27 or less | More than the allowances permitted for 28 points | | |

(2) *Sliced.* There may be present for each 16 ounces of net weight an area of not more than ¼ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 16 short stems; and there may be present not more than a total of 2½ percent, by weight, of sliced strawberries that are undeveloped units of strawberries and of sliced strawberries that are damaged units of strawberries.

(c) *(B) classification.* If the frozen strawberries are reasonably free from defects, a score of 28 to 33 points may be given. Frozen strawberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" has the following meanings with respect to the following styles of frozen strawberries:

(1) *Whole.* There may be present for each 16 ounces of net weight an area of not more than ½ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 4 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 32 short stems; and there may be present not more than a total of 10 percent, by weight, of whole strawberries that are undeveloped strawberries and of whole strawberries that are damaged strawberries.

(2) *Sliced.* There may be present for each 16 ounces of net weight an area of not more than ½ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 4 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 32 short stems; and there may be present not more than a total of 10 percent, by weight, of whole strawberries that are undeveloped strawberries and of whole strawberries that are damaged strawberries.

(d) *(SStd) classification.* Frozen strawberries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

(e) *Evaluation of score points.* The evaluation of the score points for the factor of absence of defects may be determined from Table No. II of this subpart which indicates the maximum allowances for each class of defects for the score indicated.

§ 52.1990 *Character*—(a) *General.* The factor of character refers to the texture and degree of disintegration or the degree of wholeness as evidenced by crushed or partial strawberries and mushy strawberries.

(1) A "crushed or partial strawberry" is a strawberry that has been excessively trimmed or has become disintegrated so that the portion remaining intact is less than one-half of the apparent whole strawberry.

(2) "Mushy strawberries" are strawberries that are so soft that they are a pulpy mass.

(b) *(A) classification.* Frozen strawberries that possess a good character may be given a score of 17 to 20 points. "Good character" means that the strawberries are fleshy, reasonably firm, and practically intact and that:

(1) Not more than 10 percent, by weight, of whole strawberries may be crushed or partial strawberries and mushy strawberries; and

(2) Not more than 20 percent, by weight, of sliced strawberries may be mushy strawberries.

TABLE NO. II—ALLOWANCES FOR DEFECTS

| Grade | Score points | Whole and sliced | | | | | | | | Sliced, underdeveloped and damaged units of strawberries |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Harmless extraneous material (leaves, etc.), caps, sepal-like bracts and portions thereof | Per 16 ounces of net weight | | | | | | By weight | |
| | | | Stems | | Harmless material | Short stems | | | | |
| | | | Total | Over ½" | | | | | | |
| | | Maximum | | | | | | | | |
| | | | | | | | | | Percent | Percent |
| U. S. Grade A or U. S. Fancy | 40 | None | None | None | None | None | | 3 | None | ¼ |
| | 39 | ¼ square inch | 1 | None | None | None | | 4 | ¼ | ½ |
| | 38 | ¼ square inch | 1 | None | None | 5 | | 5 | ½ | 1 |
| | 37 | ¼ square inch | 2 | None | None | 10 | | 6 | 1 | 1½ |
| | 36 | ¼ square inch | 2 | 1 or | 1 piece | 12 | | 7 | 1½ | 2 |
| | 35 | ¼ square inch | 2 | 1 or | 1 piece | 14 | | 8 | 2 | 2½ |
| | 34 | ¼ square inch | 3 | 1 or | 1 piece | 16 | | 9 | 2½ | 3 |
| | 33 | ⅜ square inch | 3 | 1 or | 1 piece | 20 | | 10 | 3 | 3½ |
| | 32 | ⅜ square inch | 3 | 1 or | 1 piece | 24 | | 11 | 3½ | 4 |
| | 31 | ⅜ square inch | 3 | 1 or | 1 piece | 28 | | 12 | 4 | 4½ |
| U. S. Grade B or U. S. Choice | 30 | ⅜ square inch | 4 | 1 or | 1 piece | 30 | | 13 | 4½ | 5 |
| | 29 | ½ square inch | 4 | 1 or | 1 piece | | | | | |
| | 28 | ½ square inch | 4 | 1 or | 1 piece | 32 | | | 5 | 10 |
| U. S. Grade D or Substandard | 27 or less | More than the allowances permitted for 28 points | | | | | | | | |

(c) *(B) classification.* If the frozen strawberries have a reasonably good character, a score of 14 to 16 points may be given. Frozen strawberries that fall into this classification shall not be graded above U. S. Grade B or U. S. Choice, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the strawberries are reasonably fleshy, fairly firm, and reasonably intact and that:

(1) Not more than 20 percent, by weight, of whole strawberries may be crushed or partial strawberries and mushy strawberries; and

(2) Not more than 30 percent, by weight, of sliced strawberries may be mushy strawberries.

(d) *(SStd) classification.* Frozen strawberries that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

TABLE NO. III—CHARACTER

| Grade | Score points | Texture | Whole, crushed, partial, and mushy | Sliced, mushy |
|---|---|---|---|---|
| | | | Maximum (by weight) | |
| | | | Percent | Percent |
| U. S. Grade A or U. S. Fancy | 20<br>19<br>18 | Fleshy, reasonably firm, practically intact | None<br>3<br>6 | 5<br>10<br>15 |
| U. S. Grade B or U. S. Choice | 17<br>16<br>15 | Reasonably fleshy, fairly firm, reasonably intact | 10<br>13<br>20 | 20<br>25<br>30 |
| U. S. Grade D or Substandard | 13 or less | More than the allowances permitted for 14 score points. | | |

§ 52.1994 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous material, caps and portions thereof, sepal-like bract and portions thereof, stems, short stems, undeveloped strawberries, and damaged strawberries.

(1) "Harmless extraneous material" means vegetable substances such as weeds, grass, and leaves and any portions thereof that are harmless.

(2) A "cap" means a loose or attached full cap or a portion of a cap to which at least one sepal-like bract or portion thereof is attached. A "short stem" that is attached to a cap is considered a part of the cap. A "stem" that is attached to the cap is considered a separate defect.

(3) A "stem" means a stem, either loose or attached, that is longer than ⅛ inch.

(4) A "short stem" means a stem that is ⅛ inch or less in length and which may include the center portion of a cap to which no sepal-like bract or portion thereof is attached.

(5) An "undeveloped strawberry" means a strawberry or a portion of a strawberry that possesses a hard, seedy, or deformed end or that possesses deformed areas which materially affect either the appearance or the edibility of the product.

(6) A "damaged strawberry" means a strawberry or a portion of a strawberry that is damaged by bruises or by pathological, insect, or other injury or is damaged by other means which materially affect either the appearance or the edibility of the product. Minute, insignificant injuries are not considered as damage.

(7) "Area" means the aggregate surface covered by the material stated when such material or portions thereof are placed in a contiguous position with no intervening spaces.

(b) (*A*) *classification.* "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" requires that the frozen strawberries shall be practically free from defects. "Practically free from defects" has the following meaning with respect to the following styles of frozen strawberries:

(1) *Whole.* There may be present for each 16 ounces of net weight an area of not more than ¼ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 2 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 16 short stems; and there may be present not more than a total of 5 percent, by weight, of whole strawberries that are undeveloped strawberries and of whole strawberries that are damaged strawberries.

(2) *Sliced.* There may be present for each 16 ounces of net weight an area of not more than ½ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 4 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 32 short stems; and there may be present not more than a total of 10 percent, by weight, of whole strawberries that are undeveloped strawberries and of whole strawberries that are damaged strawberries.

(c) (*B*) *classification.* "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" requires that the frozen strawberries shall be reasonably free from defects. "Reasonably free from defects" has the following meaning with respect to the following styles of frozen strawberries:

(1) *Whole.* There may be present for each 16 ounces of net weight an area of not more than ½ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 4 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 32 short stems; and there may be present not more than a total of 10 percent, by weight, of whole strawberries that are undeveloped strawberries and of whole strawberries that are damaged strawberries.

(2) *Sliced.* There may be present for each 16 ounces of net weight an area of not more than ½ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 2 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and not more than 16 short stems; and there may be present not more than a total of 2½ percent, by weight, of sliced strawberries that are undeveloped units of strawberries and of sliced strawberries that are damaged units of strawberries.

(c) (*B*) *classification.* "U. S. Grade B for Manufacturing" or "U. S. Choice for Manufacturing" requires that the frozen strawberries shall be reasonably free from defects. "Reasonably free from defects" has the following meaning with respect to the following styles of frozen strawberries:

(1) *Whole.* There may be present for each 16 ounces of net weight an area of not more than ¼ square inch comprising harmless extraneous material (such as leaves and portions thereof), caps and portions thereof, and loose sepal-like bracts and portions thereof; not more than 2 stems, including not more than 1 stem which may exceed ½ inch in length, or 1 piece of harmless extraneous material that is not measurable by area (such as weeds and blades of grass); and there may be present not more than a total of 5 percent, by weight, of whole strawberries that are undeveloped strawberries and of whole strawberries that are damaged strawberries.

TABLE NO. IV—BRIEF SUMMARY OF REQUIREMENTS FOR GRADES OF FROZEN STRAWBERRIES FOR MANUFACTURING

| Grades | Color | | |
|---|---|---|---|
| | Whole and sliced, typical color | Whole, not well colored, maximum (by count) | Sliced, not well colored, maximum (by weight) |
| | | *Percent* | *Percent* |
| U. S. Grade A for manufacturing or U. S. Fancy for manufacturing. | Bright and good characteristic red or pink color, reasonably free from a slightly dull, slightly grey, or slightly reddish-brown cast. | 5 | 5 |
| U. S. Grade B for manufacturing or U. S. Choice for manufacturing. | Reasonably good characteristic red or pink color that may possess a slightly dull, slightly grey, or slightly reddish-brown cast. | 10 | 10 |

seed of varieties of lima beans, vegetable soybeans, or fresh immature pods of green beans or wax beans. The ingredients are mixed and properly drained and then frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product. When soybeans or green beans or wax beans are used, the product is designated as "frozen soybean succotash" or "frozen green bean (or wax bean) succotash," as the case may be.

§ 52.2012 *Kind, type, and style of ingredients.* (a) Corn, sweet, whole kernel:

(1) White.
(2) Golden (yellow).

(b) Lima beans:

(1) Thin-seeded.
(2) Thick-seeded.
(3) Thick-seeded baby potato.

(c) Soybeans, vegetable.

(d) Green beans or wax beans, Cut or Short Cut style.

§ 52.2013 *Proportion of ingredients.* It is recommended that frozen succotash consist of a mixture of the vegetable ingredients in the following proportions:

| | Proportions by weight (percent) | |
|---|---|---|
| | Not more than— | Not less than— |
| Corn, white or golden | 75 | 50 |
| Lima beans, fresh | 50 | 25 |
| Soybeans, vegetable | 50 | 25 |
| Green or wax beans | 50 | 25 |

§ 52.2014 *Grades of frozen succotash.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen succotash in which each vegetable possesses similar varietal characteristics; possesses a good flavor and odor; is tender; possesses a good color; is practically free from defects; and that for those factors which are scored in accordance with the scoring system outlined in this subpart the total score is not less than 90 points: *Provided*, That the frozen succotash may be reasonably tender and possess a reasonably good color if the total score is not less than 90 points.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen succotash in which each vegetable possesses similar varietal characteristics;

TABLE NO. IV—BRIEF SUMMARY OF REQUIREMENTS FOR GRADES OF FROZEN STRAWBERRIES FOR MANUFACTURING

| Grades | Absence of defects | | | | | Character | | |
|---|---|---|---|---|---|---|---|---|
| | Whole and sliced | | | Whole, undeveloped and damaged units of strawberries | Sliced, undeveloped and damaged units of strawberries | Whole, crushed, partial, and mushy, maximum (by weight) | Slices, mushy, maximum (by weight) | |
| | Harmless extraneous material (leaves, etc.), caps, sepal-like bracts and portions thereof. | Harmless extraneous material (weeds, grass) and stems (including stems over ½ inch) | Short stems | | | | | |
| | Maximum | | | | | | | |
| | Per 16 ounces of net weight | | | By weight | By weight | | | |
| | | | | *Percent* | *Percent* | *Percent* | *Percent* | |
| U. S. Grade A for manufacturing or U. S. Fancy for manufacturing. | ¼ square inch | 2 stems, including 1 stem that may exceed ½ inch, or 1 piece harmless material. | 16 | 5 | 2½ | 15 | 25 | |
| U. S. Grade B for manufacturing or U. S. Choice for manufacturing. | ½ square inch | 4 stems, including 1 stem that may exceed ½ inch, or 1 piece harmless material. | 32 | 10 | 5 | 25 | 40 | |

| Grades | Character |
|---|---|
| U. S. Grade A for manufacturing or U. S. Fancy for manufacturing. | Good character for purposes of manufacturing; reasonably fleshy, fairly firm, reasonably intact. |
| U. S. Grade B for manufacturing or U. S. Choice for manufacturing. | Reasonably good character for purposes of manufacturing; fairly fleshy and fairly intact. |

(d) (*SStd*) *classification.* Frozen strawberries for manufacturing that fail to meet the requirements of paragraph (c) of this section for the factor of absence of defects shall be considered U. S. Grade D for Manufacturing or Substandard for Manufacturing.

§ 52.1995 *Character*—(a) *General.* The factor of character refers to the texture and degree of disintegration or the degree of wholeness as evidenced by crushed or partial strawberries and mushy strawberries.

(1) A "crushed or partial strawberry" is a strawberry that has been excessively trimmed or has become disintegrated so that the portion remaining intact is less than one-half of the apparent whole strawberry.

(2) "Mushy strawberries" are strawberries that are so soft that they are a pulpy mass.

(b) (*A*) *classification.* "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" requires that the frozen strawberries shall possess a good character for the purposes of manufacturing. "Good character for the purposes of manufacturing" means that the strawberries are reasonably fleshy, fairly firm, and reasonably intact and that:

(1) Not more than 15 percent, by weight, of whole strawberries may be crushed or partial strawberries and mushy strawberries; and

(2) Not more than 25 percent, by weight, of sliced strawberries may be mushy strawberries.

(c) (*B*) *classification.* "U. S Grade B for Manufacturing" or "U. S. Choice for Manufacturing" requires that the frozen strawberries shall possess a reasonably good character for the purposes of manufacturing. "Reasonably good character for the purposes of manufacturing" means that the strawberries are fairly fleshy and fairly intact and that:

(1) Not more than 25 percent, by weight, of whole strawberries may be crushed or partial strawberries and mushy strawberries; and

(2) Not more than 40 percent, by weight, of sliced strawberries may be mushy strawberries.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN SUCCOTASH[1]

PRODUCT DESCRIPTION, INGREDIENTS, AND GRADES

§ 52.2011 *Product description.* Frozen succotash means the frozen product prepared from fresh, clean, sound, succulent kernels of sweet corn and the immature

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(d) (*SStd*) *classification.* Frozen strawberries for manufacturing that fail to meet the requirements of paragraph (c) of this section for the factor of character shall be considered U. S. Grade D for Manufacturing or Substandard for Manufacturing.

LOT CERTIFICATION TOLERANCES

§ 52.1996 *Tolerance for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen strawberries, the grade for such lot will be determined by averaging the total scores of all containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, must be within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE AND WORK SHEETS

§ 52.1997 *Score sheet for frozen strawberries (not for manufacturing).*

| | |
|---|---|
| Size and kind of container | |
| Container mark or identification | |
| Label (Style of Pack; Ratio of fruit to sugar, etc., if shown) | |
| Net weight | |
| Style | |
| Size | |

possesses a good flavor and odor; is reasonably tender; possesses a reasonably good color; is reasonably free from defects; and that scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of frozen succotash in which each vegetable possesses similar varietal characteristics; possesses a fairly good flavor and odor; is fairly tender; possesses a fairly good color; is fairly free from defects; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(d) "Substandard" is the quality of frozen succotash that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FACTORS OF QUALITY

§ 52.2015 *Ascertaining the grade.* (a) The grade of frozen succotash is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and tenderness.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given each such factor is:

| Factors: | Points |
|---|---|
| Color | 30 |
| Absence of defects | 30 |
| Tenderness | 40 |
| Total score | 100 |

(c) The scores for the factors of color, absence of defects, and tenderness (with respect to each individual vegetable prior to cooking) are determined immediately after thawing to the extent that the product is substantially free from ice crystals and can be handled as individual units. A representative sample is cooked to determine the tenderness of the vegetable ingredients collectively and to ascertain the flavor and odor of the product.

(d) "Good flavor and odor" means that the product, after cooking, has a good, characteristic, normal flavor and odor and is free from objectionable flavor and objectionable odors of any kind.

(e) "Fairly good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.2016 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "27 to 30 points" means 27, 28, 29, or 30 points).

§ 52.2017 *Color*—(a) *General.* The factor of color refers to the overall appearance of the product and to the general brightness of the vegetables.

(1) "Green" with respect to lima beans means that the color of not less than 50 percent of the surface area of the individual lima bean (with skins on) possesses as much or more green color than plate 18, J–3, as illustrated in Maerz and Paul's Dictionary of Color.[1]

(2) "White" with respect to lima beans means that more than 50 percent of the surface area of the individual lima bean (with skins on) possesses less green color than Plate 18, E–1, as illustrated in Maerz and Paul's Dictionary of Color.[1]

(b) (*A*) *Classification.* Frozen succotash that possesses a good color may be given a score of 27 to 30 points. "Good color" means that the vegetables are bright and possess a color typical of young and tender vegetables that have been properly prepared and properly processed and that the frozen whole kernel (or whole grain) corn is practically free from "off-colored" kernels. In addition, the lima beans shall meet the following color requirements:

(1) Not less than 93 percent, by count, of the lima beans are green and not more than 7 percent, by count, may be lighter in color: *Provided*, That not more than 1 percent, by count, of all the lima beans are white, or

(2) Not less than 97 percent, by count, of the lima beans are green and not more than 3 percent, by count, may be lighter in color or white beans.

(c) (*B*) *classification.* If the frozen succotash possesses a reasonably good color, a score of 24 to 26 points may be given "Reasonably good color" means that the vegetables are reasonably bright and possess a color typical of reasonably young and reasonably tender vegetables that have been properly prepared and properly processed and that the frozen whole kernel (or whole grain) corn is reasonably free from "off-colored" kernels. In addition, the lima beans shall meet the following color requirements:

(1) Not less than 65 percent, by count, of the lima beans are green and not more than 35 percent, by count, may be lighter in color or white beans.

(d) (*C*) *classification.* Frozen succotash that possesses a fairly good color may be given a score of 21 to 23 points. Frozen succotash that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the vegetables possess a color that may be dull but not to the extent that the appearance is materially affected and the whole kernel) or whole grain) corn in the frozen succotash is fairly free from "off-variety" kernels. In addition, the lima beans shall meet the following color requirements:

(1) Less than 65 percent, by count, of the lima beans are green and all of the lima beans may be white.

(e) (*SStd*) *classification.* If the frozen succotash fails to meet the requirements of paragraph (d) of this section, a score of 0 to 20 points may be given. Frozen succotash that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

[1] First Edition.

§ 52.2018 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from extraneous vegetable matter, damaged units, seriously damaged units, and from any other defects.

(1) "Extraneous vegetable matter" means pieces of pod, leaves, stems, pieces of cob, husk, and other similar vegetable matter, other than silk, that is normally removed in proper preparation of the vegetables for processing.

(2) "Damaged" means damaged by discoloration, pathological injury, insect injury, or damaged by other means to the extent that the appearance or eating quality is materially affected.

(3) "Seriously damaged" means damaged by discoloration, pathological injury, insect injury, or damaged by other means to the extent that the appearance or eating quality is seriously affected and includes but is not limited to "shriveled" lima beans that are materially wrinkled and are not of normal plumpness and "sprouted" lima beans that show an external shoot protruding beyond the cotyledon or skin.

(4) "Other defects" means any defect not specifically mentioned that affects the appearance or eating quality of the product and includes but is not limited to the following:

(i) *Lima beans.* Broken beans, loose cotyledons, loose skins, and any portion thereof.

(ii) *Corn.* Crushed kernels, ragged kernels, loose skins, and dark and objectionable silk more than $\frac{1}{2}$ inch in length.

(iii) *Soybeans.* Broken soybeans, loose cotyledons, loose skins, or any portion thereof.

(iv) *Green (or wax) beans.* Ragged cut units, split units, and small pieces of pod.

(b) (*A*) *classification.* Frozen succotash that is practically free from defects may be given a score of 27 to 30 points. "Practically free from defects" means that the aforesaid defects, individually or collectively, do not more than slightly affect the appearance or eating quality of the product. The following allowances provide a guide for scoring frozen succotash that is practically free from defects. For each 10 ounces of frozen succotash there may be present, 1 piece, or pieces, of extraneous vegetable matter, such as pieces of pod, husk, leaves, and stems having an aggregate area of not more than $\frac{3}{8}$ square inch ($\frac{1}{2}$ inch x $\frac{3}{4}$ inch) on one surface of the piece, or pieces; and $\frac{1}{4}$ cubic centimeter of pieces of cob.

(c) (*B*) *classification.* If the frozen succotash is reasonably free from defects, a score of 24 to 26 points may be given. Frozen succotash that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that the aforesaid defects, individually or collectively, do not materially affect the appearance or eating quality of the product. The following allowances provide a guide for scoring frozen succotash that is reasonably free from defects. For each 10 ounces of frozen succotash there may be present: 1 piece, or pieces, of extraneous vegetable matter, such as pieces of pod, husk, leaves, and stems having an aggregate area of not more than $\frac{3}{8}$ square inch ($\frac{1}{2}$ inch x $\frac{3}{4}$ inch) on one surface of the piece, or pieces; and $\frac{1}{2}$ cubic centimeter of pieces of cob.

(d) (*C*) *classification.* Frozen succotash that is fairly free from defects may be given a score of 21 to 23 points. Frozen succotash that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects means that the aforesaid defects, individually or collectively, do not seriously affect the appearance or eating quality of the product. The following allowances provide a guide for scoring frozen succotash that is fairly free from defects. For each 10 ounces of frozen succotash there may be present: 1 piece, or pieces, of extraneous vegetable matter, such as pieces of pod, husk, leaves, and stems having an aggregate area of not more than $\frac{3}{4}$ square inch ($\frac{1}{2}$ inch x $1\frac{1}{2}$ inch) on one surface of the piece, or pieces; and 1 cubic centimeter of pieces of cob.

(e) (*SStd*) *classification.* Frozen succotash that fails to meet the requirements of paragraph (d) of this section may be given a score of 0 to 20 points. Frozen succotash that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2019 *Tenderness*—(a) (*A*) *classification* Frozen succotash consisting of vegetables that are tender may be given a score of 36 to 40 points. "Tender" means that the vegetables in the frozen succotash, after cooking, are tender and, prior to cooking, meet the following additional requirements:

(1) *Corn, whole kernel (or whole grain).* The kernels are in the milk or early cream stage of maturity.

(2) *Lima beans.* The lima beans are young and tender.

(3) *Soybeans.* The soybeans are young and tender.

(4) *Green beans (or wax beans).* The green beans (or wax beans) are full-fleshed for the variety, and the seeds are in the early stage of maturity.

(b) (*B*) *classification.* If the frozen succotash consists of vegetables that are reasonably tender, a score of 32 to 35 points may be given. "Reasonably tender" means that the vegetables in the frozen succotash, after cooking, are reasonably tender, and, prior to cooking, meet the following additional requirements:

(1) *Corn, whole kernel.* The kernels are in the cream stage of maturity.

(2) *Lima beans.* The lima beans are reasonably young and reasonably tender.

(3) *Soybeans.* The soybeans are reasonably young and reasonably tender.

(4) *Green beans (or wax beans).* The green beans (or wax beans) may have lost their fleshy texture to some extent and the seeds may have passed the early stage of maturity and have not reached the late stage of maturity.

(c) (*C*) *classification.* Frozen succotash consisting of vegetables that are fairly tender may be given a score of 28 to 31 points. Frozen succotash that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly tender" means that the vegetables in the frozen succotash, after cooking, are fairly tender, and, prior to cooking, meet the following additional requirements:

(1) *Corn, whole kernel.* The kernels are in the early dough or dough stage of maturity.

(2) *Lima beans.* The lima beans may be nearly mature.

(3) *Soybeans.* The soybeans may be nearly mature.

(4) *Green beans (or wax beans).* The green beans (or wax beans) may have lost to a considerable extent their fleshy structure and the seeds may be well developed and nearly mature.

(d) (*SStd*) *classification.* Frozen succotash in which the vegetables fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points. Frozen succotash that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2020 *Method for determining proportion of ingredients.* (a) The proportion of ingredients is determined on the thawed succotash in the following manner:

(1) Separate each of the vegetables from all of the containers in the sample.

(2) Composite each of the vegetables thus separated and weigh.

(3) Add the weights of the composited vegetables to obtain the total weight of vegetables in the sample.

(4) Divide the total weight of vegetables by the weight of each of the composited vegetables in the sample and multiply by 100. The result shall be considered to be the percent of the total weight of vegetables in the sample or the proportion of the vegetable ingredient.

LOT CERTIFICATION TOLERANCES

§ 52.2021 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represents a specific lot of frozen succotash the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule must be within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.2022 *Score sheet for frozen succotash.*

| | | | |

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED SWEETPOTATOES [1]

IDENTITY, COLORS, STYLES, TYPES, AND GRADES

§ 52.2041 *Identity.* Canned sweetpotatoes means canned sweetpotatoes as defined in the definitions and standards of identity for canned vegetables (21 CFR 52.990), issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.2042 *Colors of canned sweetpotatoes.* (a) Yellow.

(b) Golden.

§ 52.2043 *Styles of canned sweetpotatoes.* (a) "Whole" or "whole sweetpotatoes" means canned sweetpotatoes that retain the approximate original conformation of the prepared sweetpotatoes.

(b) "Pieces" or "pieces of sweetpotatoes" means canned sweetpotatoes that consist of cut units (including, but not being limited to, sweetpotatoes that are halved longitudinally) or broken units.

(c) "Mashed" or "mashed sweetpotatoes" means canned sweetpotatoes that are wholly comminuted or crushed.

(d) Any combination of two or more of the following styles constitutes a style: Whole, pieces, or mashed.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 52.2044 *Types of packs of canned sweetpotatoes.* In addition to styles, canned sweetpotatoes are usually processed as any one of the following types of packs:

(a) In a liquid packing medium.

(b) "Vacuum-pack (without packing media)."

(c) "Solid-pack" (or "dry-pack").

§ 52.2045 *Grades of canned sweetpotatoes.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned sweetpotatoes that possess a good color; that are practically uniform in shape and size or possess good consistency, as applicable; that are practically free from defects; that possess a good character; that possess a normal flavor and odor; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned sweetpotatoes that possess a fairly good color; that are fairly free from defects; that possess a fairly good character; that possess a normal flavor and odor; and that are of such quality with respect to shape and size or consistency as to score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned sweetpotatoes that fail to meet the requirements of "U. S. Grade C" or "U. S. Standard."

LIQUID MEDIA, FILL OF CONTAINER, AND DRAINED WEIGHTS

§ 52.2046 *Recommended designations of liquid media and Brix measurement.* "Cut-out" requirements for liquid media are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. It is recommended that sweetpotatoes packed in sirup have the following indicated "cut-out" Brix measurement for the respective sirup designation, as applicable, and which designations are included in, but are not limited to, the following for canned sweetpotatoes in a liquid packing medium:

| *Designation* | *Brix measurement* |
|---|---|
| Extra heavy sirup | 30° or more. |
| Heavy sirup | 25° or more, but less than 30°. |
| Light sirup | 18° or more, but less than 25°. |
| In water | packed in water. |

§ 52.2047 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled as full as practicable with sweetpotatoes and that the product and packing medium, if any, occupy not less than 90 percent of the volume of the container.

§ 52.2048 *Recommended minimum drained weight.* (a) The minimum drained weight recommendations in Table I of this section are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purposes of these grades.

(b) The drained weight recommendations in Table I of this section are not applicable to canned sweetpotatoes packed as "vacuum-pack (without packing media)" or as "solid-pack" (or "dry-pack").

(c) The drained weight of canned sweetpotatoes is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch±3%, square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and the sweetpotatoes less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalent of No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS OF SWEETPOTATOES IN A LIQUID PACKING MEDIUM

| Container size or designation: | *Drained weight ounces* |
|---|---|
| No. 2 | 14 |
| No. 2½ | 19 |
| No. 3 vacuum or squat (404 x 307) | 15 |
| No. 10 | 72 |

FACTORS OF QUALITY

§ 52.2049 *Ascertaining the grade.* (a) The grade of canned sweetpotatoes may be ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, shape and size or consistency, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Shape and size or consistency | 20 |
| Absence of defects | 40 |
| Character | 20 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the product is free from objectionable odors and objectionable flavors of any kind.

§ 52.2050 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.2051 *Color*—(a) *(A) classification.* Canned sweetpotatoes that possess a good color may be given a score of 17 to 20 points. "Good color" means a reasonably bright characteristic color (either yellow or golden) and that there may be reasonable variations of such characteristic color in the units, in each unit, or in the mass.

(b) *(C) classification.* If the canned sweetpotatoes possess a fairly good color, a score of 14 to 16 points may be given. Canned sweetpotatoes that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the color may be variable in the units, in each unit, or in the mass and that the color may be slightly dull but is not offcolor.

(c) *(SStd) classification.* Canned sweetpotatoes that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2052 *Shape and size or consistency*—(a) *(A) classification.* Whole and pieces (whether packed singly or in combination) packed in a liquid packing medium or as "vacuumpack (without packing media)" that are practically uniform in shape and size may be given a score of 17 to 20 points; and canned sweetpotatoes packed as "solid-pack" (or "dry-pack") that possess a good consistency may be given a score of 17 to 20 points. "Practically uniform in shape and size" and "good consistency" have the following meanings with respect to the following styles and types of packs of canned sweetpotatoes:

(1) *Whole and pieces (whether packed singly or in combination) in a liquid packing medium or "vacuum-pack (without packing media)."* "Practically uniform in shape and size" means that the units of a single style may vary moderately in shape and that the weight of the largest unit, irrespective of style, is not more than three times the weight of the second smallest unit, irrespective of style.

(2) *Whole, pieces, and mashed (whether packed singly or in combination) packed as "solid-pack" (or "dry-pack").* "Good consistency" means that the sweetpotatoes possess a stiff consistency which may show a slight separation of free liquid.

(b) *(C) Classification.* If whole and pieces (whether packed singly or in combination) packed in a liquid packing medium or as "vacuum-pack (without packing media)" are fairly uniform in shape and size, a score of 14 to 16 points may be given; or if the canned sweetpotatoes packed as "solid-pack" (or "dry-pack") possess a fairly good consistency, a score of 14 to 16 points may be given. Canned sweetpotatoes that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly uniform in shape and size" and "fairly good consistency" have the following meanings with respect to the following styles and types of packs of canned sweetpotatoes:

(1) *Whole and pieces (whether packed singly or in combination) in a liquid packing medium or "vacuum-pack (without packing media)."* "Fairly uniform in shape and size" means that the units of a single style may vary considerably in shape and that the weight of the largest unit, irrespective of style, is not more than four times the weight of the second smallest unit, irrespective of style.

(2) *Whole, pieces, and mashed (whether packed singly or in combination) packed as "solid-pack" (or "dry-pack").* "Fairly good consistency" means that the sweetpotatoes possess a thick consistency but may not be free flowing.

(c) *(SStd) Classification.* Canned sweetpotatoes that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule).

§ 52.2053 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from particles of peel, secondary rootlets, untrimmed fibrous ends, discolored areas, or from other defects.

(b) *(A) Classification.* Canned sweetpotatoes that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that the product contains not more than a slight amount of particles of peel, secondary rootlets, untrimmed fibrous ends, discolored areas, or other defects which do not affect materially the appearance or the edibility of the product.

(c) *(C) Classification.* If the canned sweetpotatoes are fairly free from defects, a score of 28 to 33 points may be given. Canned sweetpotatoes that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the particles of peel, secondary rootlets, untrimmed fibrous ends, discolored areas, or other defects may be definitely noticeable but are not so prominent as to affect seriously the appearance or the edibility of the product.

(d) *(SStd) Classification.* Canned sweetpotatoes that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2054 *Character*—(a) *General.* The factor of character refers to the texture and condition of the flesh, the degree of freedom from tough or coarse fibers, the tenderness of the canned sweetpotatoes, and the tendency of sweetpotatoes packed in a liquid packing medium or as "vacuum-pack (without packing media)" to retain their apparent original conformation and size without disintegration.

(b) *(A) classification.* Canned sweetpotatoes that possess a good character may be given a score of 17 to 20 points. "Good character" has the following meanings with respect to the following styles and types of packs of canned sweetpotatoes:

(1) *Whole and pieces (whether packed singly or in combination) in a liquid packing medium or "vacuum-pack (without packing media)."* "Good character" means that the units possess a uniformly smooth texture, are practically free from tough or coarse fibers, and may be soft to firm but hold their apparent original conformation and size without material distintegration.

(2) *Whole, pieces, and mashed packed as "solid-pack" (or "dry-pack").* "Good character" means that any units present possess a uniformly smooth texture, are practically free from tough or coarse fibers, and may be soft to firm and that any mashed sweetpotatoes present possess a uniformly smooth texture, practically free from tough or coarse fibers.

(3) *Mashed.* "Good character" means that the mass possesses a uniformly smooth texture and is free from tough or coarse fibers.

(c) *(C) classification.* If the canned sweetpotatoes possess a fairly good character, a score of 14 to 16 points may be given. Canned sweetpotatoes that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" has the following meanings with respect to the following styles and types of packs of canned sweetpotatoes:

(1) *Whole and pieces (whether packed singly or in combination) in a liquid packing medium or "vacuum-pack (without packing media)."* "Fairly good character" means that the units possess a fairly uniform texture, may possess a few tough or coarse fibers, may be variable in tenderness but are not tough, may be very soft to very firm, and may possess slight or partial disintegration of the units.

(2) *Whole, pieces, and mashed packed as "solid-pack" (or "dry-pack").* "Fairly good character" means that any units present possess a fairly uniform texture, may possess a few tough or coarse fibers, may be variable in tenderness but are not tough, and may be very soft to very firm and that any mashed sweetpotatoes present possess a fairly uniform texture, may be coarse but are practically free from lumps, and may possess a few tough or coarse fibers.

(3) *Mashed.* "Fairly good character" means that the mass possesses a fairly uniform texture, may be coarse but is free from lumps, and that not more than a few tough or coarse fibers may be present.

(d) *(SStd) classification.* Canned sweetpotatoes that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

TOLERANCES

§ 52.2055 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned sweetpotatoes, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.2056 *Score sheet for canned sweetpotatoes.*

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED TANGERINE JUICE[1]

PRODUCT DESCRIPTION AND GRADES

§ 52.2071 *Product description.* Canned tangerine juice is the undiluted, unconcentrated, unfermented juice obtained from mature fresh fruit of the Mandarin orange (Citrus reticulata) which fruit has been properly washed; is packed with or without the addition of sweetening ingredients; is sufficiently processed by heat to assure preservation of the product; and is packed in containers which are hermetically sealed.

§ 52.2072 *Grades of canned tangerine juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned tangerine juice that shows no coagulation; that possesses a very good color; is practically free from defects; possesses a very good flavor; and scores not less than 85

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned tangerine juice that may show slight coagulation; that possesses a good color; is fairly free from defects; possesses a good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "U. S. Grade D" or "Substandard" is the quality of canned tangerine juice that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER

§ 52.2073 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that the container be filled as full as practicable with tangerine juice and that the product occupy not less than 90 percent of the total capacity of the container.

FACTORS OF QUALITY

§ 52.2074 *Ascertaining the grade.* The grade of canned tangerine juice may be ascertained by considering in addition to the foregoing requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor. The relative importance of each factor is expressed numerically on the scale of 100. The maximum number of points that may be given for each factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.2075 *Ascertaining the rating of each factor.* The essential variations within each factor are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points.

§ 52.2076 *Color*—(a) *(A) classification.* Canned tangerine juice that possesses a very good color may be given a score of 17 to 20 points. "Very good color" means that the tangerine juice possesses a bright yellow to yellow-orange color typical of freshly extracted juice and is free from browning due to scorching, oxidation, caramelization, or other causes.

(b) *(C) classification.* If the canned tangerine juice possesses a good color, a score of 14 to 16 points may be given. Canned tangerine juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good color" means that the tangerine juice possesses a typical yellow to yellow-orange color that may be slightly amber or show evidence of slight browning, but is not off-color.

(c) *(SStd) classification.* Canned tangerine juice that for any reason fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2077 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from free and suspended pulp, recoverable oil, seeds or seed particles, or other defects.

(1) "Free and suspended pulp" means particles of membrane, core, skin, and other similar extraneous material in canned tangerine juice.

(b) *(A) classification.* Canned tangerine juice that is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that the juice may contain not more than 7 percent free and suspended pulp and that there may be present not more than 0.020 percent by volume of recoverable oil; and does not contain seeds or seed particles or other defects that more than slightly affect the appearance of the product.

(c) *(C) classification.* If the canned tangerine juice is fairly free from defects, a score of 28 to 33 points may be given. Canned tangerine juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that the juice may contain not more than 10 percent free and suspended pulp and that there may be present not more than 0.030 percent by volume of recoverable oil; and does not contain seeds or seed particles or other defects that materially affect the appearance of the product.

(d) *(SStd) classification.* If the canned tangerine juice fails to meet the requirements of paragraph (c) of this section, a score of 0 to 27 points may be given. Canned tangerine juice that falls into this classification shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2078 *Flavor*—(a) *(A) classification.* (1) Canned tangerine juice that possesses a very good flavor may be given a score of 34 to 40 points. "Very good flavor" means a fine, distinct canned tangerine juice flavor which is free from traces of scorching, caramelization, oxidation, or terpene; is free from off flavors of any kind; and meets the following requirements:

(i) Brix—Not less than 10.5 degrees.

(ii) Acid—Not less than 0.70 gram nor more than 1.40 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 10 to 1 nor more than 18 to 1.

(2) Canned tangerine juice is considered "sweet" if the juice possesses a very good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 0.70 gram nor more than 1.40 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 11 to 1 nor more than 18 to 1, provided that when the Brix is 16 degrees or more, the Brix-acid ratio may be less than 11 to 1.

(b) *(C) classification.* (1) If the canned tangerine juice possesses a good flavor, a score of 28 to 33 points may be given. Canned tangerine juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Good flavor" means a good, normal canned tangerine juice flavor which may have a slightly caramelized or slightly oxidized flavor but is free from off flavors of any kind and meets the following requirements:

(i) Brix—Not less than 10.0 degrees.

(ii) Acid—Not less than 0.55 gram nor more than 1.60 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 9 to 1.

(2) Canned tangerine juice is considered "sweet" if the juice possesses a good flavor and falls within the range of the following requirements:

(i) Brix—Not less than 12.5 degrees.

(ii) Acid—Not less than 0.65 gram nor more than 1.60 grams (calculated as anhydrous citric acid) per 100 ml. of juice.

(iii) Brix-acid ratio—Not less than 11 to 1, provided that when the Brix of the juice is 16 degrees or more the Brix-acid ratio may be less than 11 to 1.

(c) *(SStd) classification.* Canned tangerine juice that fails to meet the requirements of paragraph (b) of this section, is off flavor, or is unpalatable for any reason may be given a score of 0 to 27 points and shall not be graded above U. S. Grade D or Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.2079 *Definitions of terms.* (a) "Brix" means the degrees Brix of canned tangerine juice when tested with a Brix hydrometer calibrated at 20 degrees C (68 degrees F.) If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of canned tangerine juice may be determined by any other method which gives equivalent results.

(b) "Acid" means grams of acid (calculated as anhydrous citric acid) per 100 ml. of juice in canned tangerine juice determined by titration with standard sodium hydroxide solution using phenolphthalein indicator.

§ 52.2080 *Explanation of analyses.* (a) Free and suspended pulp is determined by the following method:

(1) Graduated centrifuge tubes with a capacity of 50 ml. are filled with canned tangerine juice and placed in a suitable centrifuge. The speed is adjusted according to diameter, as indicated in Table No. I, and the juice is centrifuged for exactly 10 minutes. As used in this section, "diameter" means the over-all distance between the bottoms of opposing centrifuge tubes in operating position. After centrifuging, the milliliter reading at the top of the layer of pulp in the tube is multiplied by 2 to give the percentage of pulp.

TABLE No. I

| Diameter | Approximate revolutions per minute | Diameter | Approximate revolutions per minute |
|---|---|---|---|
| 10 inches | 1,609 | 15½ inches | 1,292 |
| 10½ inches | 1,570 | 16 inches | 1,271 |
| 11 inches | 1,534 | 16½ inches | 1,252 |
| 11½ inches | 1,500 | 17 inches | 1,234 |
| 12 inches | 1,468 | 17½ inches | 1,216 |
| 12½ inches | 1,438 | 18 inches | 1,199 |
| 13 inches | 1,410 | 18½ inches | 1,182 |
| 13½ inches | 1,384 | 19 inches | 1,167 |
| 14 inches | 1,359 | 19½ inches | 1,152 |
| 14½ inches | 1,336 | 20 inches | 1,137 |
| 15 inches | 1,313 | | |

(b) Recoverable oil is determined by the following method:

(1) Equipment. Oil separatory trap similar to either of those illustrated in Figure 1 and Figure 2.[2]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) Procedure. Exactly 2 liters of juice are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from bottom to top, and bring the juice to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute. By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(3) The number of milliliters of oil recovered divided by 20 equals the percent by volume of recoverable oil.

LOT CERTIFICATION TOLERANCES

§ 52.2081 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned tangerine juice, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

[2] Filed with the Division of the Federal Register as part of the original document.

## SUBPART—UNITED STATES STANDARDS FOR GRADES OF TOMATO CATSUP [1]

IDENTITY AND GRADES

§ 52.2101 *Identity.* Tomato catsup means the product as defined in the standard of identity for catsup, ketchup, catchup (21 CFR 53.10) issued pursuant to the Federal Food, Drug, and Cosmetic Act.

§ 52.2102 *Grades of tomato catsup.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of tomato catsup that possesses a good color; that possesses a good consistency; that is practically free from defects; that possesses a good flavor; that possesses a good finish; that has a total solids content of not less than 33 percent, by weight; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of tomato catsup that possesses a good color; that possesses a good consistency; that is practically free from defects; that possesses a good flavor; that possesses a good finish; that has a total solids content of not less than 29 percent, by weight; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart: *Provided*, That the tomato catsup may score not less than 18 points for the factor of consistency if the total score is not less than 85 points.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of tomato catsup that possesses a fairly good color; that possesses a fairly good consistency; that is fairly free from defects; that possesses a good finish; that possesses a fairly good flavor; that has a total solids content of not less than 25 percent, by weight; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(d) "Substandard" is the quality of tomato catsup that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER

§ 52.2103 *Recommended fill of container for tomato catsup.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of tomato catsup be filled as full as practicable without impairment of quality and that the product occupy not less than 90 percent of the capacity of the container.

FACTORS OF QUALITY

§ 52.2104 *Ascertaining the grade.* (a) The grade of tomato catsup is ascertained by considering in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, consistency, absence of defects, and flavor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 25 |
| Consistency | 25 |
| Absence of defects | 25 |
| Flavor | 25 |
| Total score | 100 |

§ 52.2105 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive for example, 17 to 20 points means 17, 18, 19 or 20 points).

§ 52.2106 *Color*—(a) *General.* The amount of red in the tomato catsup is determined by comparing the color of the product with that produced by spinning a combination of the following Munsell color discs:

Disc 1—Red (5R 2.6/13) (glossy finish).
Disc 2—Yellow (2.5YR 5/12) (glossy finish).
Disc 3—Black (N1) (glossy finish).
Disc 4—Gray (N4) (mat finish).

(b) *(A) and (B) classification.* Tomato catsup that possesses a good color may be given a score of 21 to 25 points. "Good color" means that the color is typical of tomato catsup made from well ripened red tomatoes and which has been properly prepared and properly processed. Such color contains as much or more red than that produced by spinning the specified Munsell color discs in the following combinations: 65 percent of the area of Disc 1; 21 percent of the area of Disc 2; 14 percent of the area of either Disc 3 or Disc 4, or 7 percent of the area of Disc 3 and 7 percent of the area of Disc 4 whichever most nearly matches the reflectance of the tomato catsup. To receive a score in this classification, tomato catsup, when packed in glass, shall show no discoloration in the "neck" of the bottle.

(c) *(C) classification.* If the tomato catsup possesses a fairly good color, a

score of 17 to 20 points may be given. Tomato catsup that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the color is typical of tomato catsup and contains as much or more red than that produced by spinning the specified Munsell color discs in the following combinations: 53 percent of the area of Disc 1; 28 percent of the area of Disc 2; 19 percent of the area of either Disc 3 or Disc 4, or 9½ percent of the area of Disc 3 and 9½ percent of the area of Disc 4 whichever most nearly matches the reflectance of the tomato catsup.

(d) *(SStd) classification.* Tomato catsup that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 16 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2107 *Consistency*—(a) *General.* The factor of consistency refers to the viscosity of the product and the tendency to hold its liquid portion in suspension.

(b) *(A) and (B) classification.* Tomato catsup that possesses a good consistency may be given a score of 22 to 25 points. "Good consistency" means that the tomato catsup shows not more than a slight separation of free liquid when poured on a flat grading tray; is not excessively stiff; and flows not more than 9 centimeters in 30 seconds at 20 degrees Centigrade in the Bostwick consistometer.

(c) *(C) classification.* If the tomato catsup possesses a fairly good consistency, a score of 18 to 21 points may be given. Tomato catsup that falls into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good consistency" means that the tomato catsup may show a noticeable, but not excessive, separation of free liquid when poured on a flat grading tray; is not excessively stiff; and flows not more than 14 centimeters in 30 seconds at 20 degrees Centigrade in the Bostwick consistometer.

(d) *(SStd) classification.* Tomato catsup that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 17 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2108 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from defects such as: dark specks or scale-like particles, seeds, particles of seed, tomato peel, core material, or other similar substances. This factor is evaluated by observing a layer of the product on a smooth white, flat surface. Such layer is prepared by drawing a scraper with a clearance of 3/32 inch high by 7 inches long rapidly through the product in two horizontal planes so as to form an approximate square.

(b) *(A) and (B) classification.* Tomato catsup that is practically free from defects may be given a score of 21 to 25 points. "Practically free from defects" means that any defects present do not more than slightly affect the appearance or eating quality of the product.

(c) *(C) classification.* If the tomato catsup is fairly free from defects, a score of 18 to 20 points may be given. Tomato catsup that falls into this classification shall not be scored above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that any defects present may be noticeable but are not so large, so numerous, or of such contrasting color as to seriously affect the appearance or eating quality of the product.

(d) *(SStd) classification.* Tomato catsup that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 17 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2109 *Flavor*—(a) *(A) and (B) classification.* Tomato catsup that possesses a good flavor may be given a score of 21 to 25 points. "Good flavor" means a good, distinct flavor characteristic of good quality ingredients. Such flavor is free from scorching or any objectionable flavor of any kind.

(b) *(C) classification.* If the tomato catsup possesses only a fairly good flavor, a score of 17 to 20 points may be given. Tomato catsup that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means a flavor characteristic of the ingredients in which there may be slight traces of undesirable flavor such as scorched, bitter, or astringent, but is free from objectionable or off flavor of any kind.

(c) *(SStd) classification.* Tomato catsup that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 16 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

DEFINITIONS

§ 52.2110 *Definitions of terms used in these standards.* (a) "Total solids" in tomato catsup for the purposes of these standards is the refractometric sucrose value of the filtrate determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions to which value is added 1 percent.

(b) "Good finish" means that the product has a uniform, smooth texture.

LOT CERTIFICATION TOLERANCES

§ 52.2111 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of tomato catsup, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule must be within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN MIXED VEGETABLES[1]

PRODUCT DESCRIPTION, KINDS, STYLES, PROPORTIONS, AND GRADES

§ 52.2131 *Product description.* Frozen mixed vegetables consist of three or more succulent vegetables, properly prepared and properly blanched; may contain vegetables (such as, small pieces of sweet red peppers or sweet green peppers) added as garnish; and are frozen and maintained at temperatures necessary for the preservation of the product.

§ 52.2132 *Kinds and styles of basic vegetables.* It is recommended that frozen mixed vegetables, other than small pieces of vegetables added as garnish, consist of the following kinds and styles of vegetables as basic vegetables:

(a) Beans, green or wax: Cut style, predominantly of ½ inch to 1½ inch cuts;

(b) Beans, lima: Any single varietal type;

(c) Carrots: Diced style, predominantly of ⅜ inch to ½ inch cubes;

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(d) Corn, sweet: Golden (or Yellow) in whole kernel style;

(e) Peas: Early type or sweet type.

§ 52.2133 *Proportions of ingredients.* It is recommended that frozen mixed vegetables consist of three, four, or five basic vegetables in the following proportions:

(a) *Three vegetables.* A mixture of three basic vegetables in which any one vegetable is not more than 40 percent by weight of all the frozen mixed vegetables.

(b) *Four vegetables.* A mixture of four basic vegetables in which none of the vegetables is less than 8 percent by weight nor more than 35 percent by weight of all the frozen mixed vegetables.

(c) *Five vegetables.* A mixture of five basic vegetables in which none of the vegetables is less than 8 percent by weight nor more than 30 percent by weight of all the frozen mixed vegetables.

§ 52.2134 *Grades of frozen mixed vegetables.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen mixed vegetables in which each basic vegetable possesses similar varietal characteristics; in which all vegetables possess a good color, are practically free from defects, possess a good character, possess a good flavor and odor; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Extra Standard" is the quality of frozen mixed vegetables in which each basic vegetable possesses similar varietal characteristics; in which all vegetables possess a reasonably good color, are reasonably free from defects, possess a reasonably good character, possess a fairly good flavor and odor; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen mixed vegetables that fail to meet the requirements of U. S. Grade B or U. S. Extra Standard.

FACTORS OF QUALITY

§ 52.2135 *Ascertaining the grade.* (a) The grade of frozen mixed vegetables is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and character.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Character | 40 |
| Total score | 100 |

(c) The scores for the factors of color, absence of defects, and character (with respect to each individual vegetable prior to cooking) are determined immediately after thawing so that the product is sufficiently free from ice crystals to permit proper handling as individual units; and representative samples of the product are cooked to ascertain tenderness of the frozen mixed vegetables, collectively, before final evaluation of the score for character. Flavor and odor are also ascertained on the cooked product.

(d) "Good flavor and odor" means that the product and each basic vegetable after cooking has a good, characteristic normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Fairly good flavor and odor" means that the product after cooking may be lacking in good flavor and odor but is free from objectionable flavors and objectionable odors of any kind.

§ 52.2136 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.2137 *Color*—(a) *General.* The factor of color refers to the general brightness of all the combined vegetables.

(b) *(A) classification.* Frozen mixed vegetables which possess a good color may be given a score of 17 to 20 points. "Good color" means that the combined basic vegetables as a mass are bright and characteristic of reasonably young or reasonably tender mixed vegetables that have been properly prepared and properly processed; that any pieces of vegetable material used for garnish are reasonably bright; and that none of the individual vegetables are off color for any reason.

(c) *(B) classification.* If the frozen mixed vegetables possess a reasonably good color, a score of 14 to 16 points may be given. Frozen mixed vegetables that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means that the combined basic vegetables as a mass are reasonably bright and characteristic of fairly young or fairly tender mixed vegetables that have been properly prepared and properly processed; that any pieces of vegetable material used for garnish may be only fairly bright but are not off color for any reason; and that none of the individual vegetables are off color for any reason.

(d) *(SStd) classification.* If the frozen mixed vegetables fail to meet the requirements of paragraph (c) of this section, a score of 0 to 13 points may be given. Frozen mixed vegetables that fall into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2138 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous vegetable materials, slightly damaged units moderately damaged units, seriously damaged units, and any other defects which detract from the appearance or edibility of the product.

(1) "Harmless extraneous vegetable material" means any vegetable substance other than from any of the basic vegetables or garnish and any portions of the basic vegetables which are normally removed in preparation for processing. Such materials include, but are not limited to, "Small pieces" and "large pieces" as follows:

(i) A "small piece of harmless extraneous vegetable material" is any piece or unit of such material similar in shape and the equivalent in size or smaller than 3/16 square inch of leafy material or loose pieces of pods from peas or lima beans, tough or woody stems of any size other than unstemmed units of green or wax beans, ¼-inch cube of corn cob material, ½ square inch of corn husk, and ⅜-inch diameter thistle buds;

(ii) A "large piece of harmless extraneous vegetable material" is any piece or unit of such material similar in shape and larger in size than the equivalent of an applicable kind of "small piece of harmless extraneous vegetable material."

(2) "Slightly damaged unit" means any unit of the basic vegetable or garnish that is affected by slight blemishes, slight discoloration, or similar injury that are noticeable but do not materially affect the appearance or edibility of the unit, and includes, but is not limited to, light discoloration of the hilum of lima beans or other light discoloration of the skin which does not penetrate into the cotyledon of lima beans.

(3) "Moderately damaged unit" means any unit of a basic vegetable or garnish that is affected by blemishes, discoloration, or any other similar injury that materially affects the appearance or edibility of the unit and has the following specific meanings for the respective vegetables:

(i) *Beans, green or wax.* Any unit blemished by scars, by pathological injury, by insect injury, or by other means which in the aggregate exceeds the area of a circle ⅛ inch in diameter.

(ii) *Beans, lima.* A bean or portion thereof that is spotted or otherwise definitely discolored or that is blemished by pathological injury, by insect injury, or by other means other than light discoloration.

(iii) *Carrots.* Any unit possessing an unpeeled area greater than the area of a circle ⅛ inch in diameter; and any unit blemished by internal or external discoloration, by sunburn or green color, by pathological injury, by insect injury, or by other means.

(iv) *Corn.* Any kernel or portion thereof that possesses serious brown or black discoloration.

(v) *Peas.* Any spotted pea or any off-colored pea (such as brown, gray, cream, or yellow-white) that is abnormally defective and that definitely lacks any tinge of green color.

(vi) *Garnish.* Any piece blemished by discoloration, by pathological injury, by insect injury, or by other means which in the aggregate exceeds the area of a circle ⅛ inch in diameter.

(4) "Seriously damaged unit" means any unit of the basic vegetable or garnish, other than damaged corn kernels, that is damaged to the extent that the appearance and edibility of the unit is seriously affected and includes, but is not limited to, "shriveled" lima beans that are materially wrinkled and not of nor-

mal plumpness; "sprouted" lima beans that show an external shoot protruding beyond the cotyledon or skin; and any unit with brown or very black or very dark spots and serious insect injury regardless of the area affected.

(5) "Other defects" means any defects not specifically mentioned that affect the appearance or edibility of the product, and includes, but are not limited to the following:

(i) *Beans, green or wax.* Loose seeds and portions thereof; and pod sections with very ragged edges that are partially cut or split into two parts, or that are markedly shorter or longer than the predominating lengths of the cut units;

(ii) *Beans, lima.* Mashed beans, broken beans, loose cotyledons, loose skins, and any portions thereof;

(iii) *Carrots.* Crushed, broken, cracked, or irregularly shaped units; units with excessively frayed edges and surfaces; and units markedly smaller than one-half the volume of, or markedly larger than, the predominating size of cubes;

(iv) *Corn.* Crushed kernels, ragged kernels, loose skins, and dark and objectionable pieces of silk more than ½ inch in length; and

(v) *Peas.* Mashed peas, broken peas, loose cotyledons, loose skins, and any portions thereof.

(b) *(A) classification.* Frozen mixed vegetables that are practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present no more than the following defects within the limits stated:

(1) No large pieces of harmless extraneous vegetable material; but 1 small piece of harmless extraneous vegetable material for each 16 ounces net weight, or for each package if the package is less than 16 ounces, of frozen mixed vegetables: *Provided,* That the combined weight of all the harmless extraneous material is not more than ½ of 1 percent, by weight, of the frozen mixed vegetables;

(2) 2 moderately damaged units for each 3 ounces of frozen mixed vegetables and 1 seriously damaged unit for each 4 ounces of frozen mixed vegetables: *Provided,* That slightly damaged, moderately damaged, and seriously damaged units, either singly or in combination, do not materially affect the appearance or edibility of the frozen mixed vegetables; and

(3) Other defects, individually or collectively, do not materially affect the appearance of the frozen mixed vegetables.

(c) *(B) classification.* If the frozen mixed vegetables are reasonably free from defects, a score of 28 to 33 points may be given. Frozen mixed vegetables that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present no more than the following defects within the limits stated:

(1) 1 large piece of harmless extraneous vegetable material and 2 small pieces of harmless extraneous vegetable material for each 16 ounces net weight, or for each package if the package is less than 16 ounces, of frozen mixed vegetables: *Provided,* That the combined weight of all the harmless extraneous material is not more than ½ of 1 percent, by weight, of the frozen mixed vegetables;

(2) 4 moderately damaged units for each 3 ounces of frozen mixed vegetables and 1 seriously damaged unit for each 2 ounces of frozen mixed vegetables: *Provided,* That slightly damaged, moderately damaged, and seriously damaged units, either singly or in combination, do not seriously affect the appearance or edibility of the frozen mixed vegetables; and

(3) Other defects, individually or collectively, do not seriously affect the appearance of the frozen mixed vegetables.

(d) *(SStd) classification.* If the frozen mixed vegetables fail to meet the requirements of paragraph (c) of this section, a score of 0 to 27 points may be given. Frozen mixed vegetables that fall into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2139 *Character — (a) General.* The factor of character refers to the texture, the maturity, and the degree of development of the pods and seeds in green beans or wax beans; the tenderness of lima beans; the tenderness and the degree of freedom from stringy or coarse fibers in carrots; the tenderness and maturity or starchiness of the corn; the tenderness or maturity of the peas; and to the tenderness of the combined frozen mixed vegetables after cooking.

(b) *(A) classification.* Frozen mixed vegetables which collectively and individually possess a good character may be given a score of 34 to 40 points. "Good character" means that the combined vegetables after cooking are tender and that the individual vegetables prior to cooking meet the following requirements:

(1) *Beans, green or wax.* The bean pods are full-fleshed and tender, the seeds are in the earlier stages of maturity, and both the bean pods and seeds are the equivalent of frozen green beans or wax beans that would score not less than 36 points for the factor of "Texture and Maturity" as outlined in the "United States Standards for Grades of Frozen Snap Beans."

(2) *Beans, lima.* The lima beans, except for an occasional bean that may be white, are tender.

(3) *Carrots.* The units are tender and are the equivalent of frozen diced carrots that would score not less than 26 points for the factor of "Texture" as outlined in the "United States Standards for Grades of Frozen Diced Carrots."

(4) *Corn.* The kernels are at least in the cream stage of maturity, have at least a reasonably tender texture, and are the equivalent of frozen whole-grain corn that would score not less than 43 points for the factor of "Tenderness and Maturity" as outlined in the "United States Standards for Grades of Frozen Whole Kernel (or Whole Grain) Corn."

(5) *Peas.* The peas are at least reasonably tender and are the equivalent of frozen peas that would score not less than 34 points for the factor of "Tenderness and Maturity" as outlined in the "United States Standards for Grades of Frozen Peas."

(c) *(B) classification.* If the frozen mixed vegetables, collectively and individually, possess a reasonably good character, a score of 28 to 33 points may be given. Frozen mixed vegetables that fall into this classification shall not be graded above U. S. Grade B or U. S. Extra Standard, regardless of the total score for the product (this is a limiting rule). "Reasonably good character" means that the combined vegetables after cooking are reasonably tender and practically free from tough fibers and that the individual vegetables prior to cooking meet the following requirements:

(1) *Beans, green or wax.* The bean pods are at least fairly tender and are the equivalent of frozen green beans or wax beans that would score not less than 30 points for the factor of "Texture and Maturity" as outlined in the "United States Standards for Grades of Frozen Snap Beans."

(2) *Beans, lima.* The lima beans are at least fairly tender and not more than 10 percent by count of all the lima beans may be white.

(3) *Carrots.* The units are at least reasonably tender and are the equivalent of frozen diced carrots that would score not less than 24 points for the factor of "Texture" as outlined in the "United States Standards for Grades of Frozen Diced Carrots."

(4) *Corn.* The kernels are at least fairly tender and are the equivalent of frozen whole-grain corn that would score not less than 38 points for the factor of "Tenderness and Maturity" as outlined in the "United States Standards for Grades of Frozen Whole Kernel (or Whole Grain) Corn."

(5) *Peas.* The peas are at least fairly tender and are the equivalent of frozen peas that would score not less than 30 points for the factor of "Tenderness and Maturity" as outlined in the "United States Standards for Grades of Frozen Peas."

(d) *(SStd) classification.* If the frozen mixed vegetables, collectively or individually, fail to meet the requirements of paragraph (c) of this section, a score of 0 to 27 points may be given. Frozen mixed vegetables that fall into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.2140 *Explanation of terms and analyses.* (a) The "proportion of ingredients" are determined on the thawed vegetables by the following procedure:

(1) Separate and assemble from all the containers in the sample each of the basic vegetables;

(2) Weigh each basic vegetable thus composited to obtain the "aggregate weight" of each basic vegetable from all the containers in the sample;

(3) Add the aggregate weights of all the basic vegetables to obtain the "grand total weight" of all the basic vegetables from all containers in the sample; and then

(4) Calculate the percentage of each basic vegetable in the sample by dividing the "aggregate weight" of each basic vegetable by the "grand total weight" of all the basic vegetables.

LOT CERTIFICATION TOLERANCES

§ 52.2141 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen mixed vegetables, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if:

(1) Not more than one-sixth of such containers fails to meet all the requirements of the grade indicated by the average of such total scores, and, with respect to such containers which fail to meet the requirements of the indicated grade by reason of a limiting rule, the average score of all containers in the sample for the factor, subject to such limiting rule, is within the range for the grade indicated;

(2) None of the containers comprising the sample falls more than 4 points below the minimum score for the grade indicated by the average of the total scores; and

(3) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED APPLES[1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.2161 *Product description.* Canned apples is the product prepared from sound, fresh apples of proper maturity and proper ripeness, which fruit is packed with or without any of the following ingredients: Water, salt, spices, nutritive sweetening ingredients, and any other ingredients permissible under the provision of the Federal Food, Drug and Cosmetic Act, and is sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

§ 52.2162 *Styles of canned apples.* "Sliced" means canned apples consisting of segments of apples cut longitudinally and radially from the core axis.

§ 52.2163 *Grades of canned apples.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned apples that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a good color; that are practically uniform in size; that are practically free from defects; that possess a good character; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart: *Provided,* That the canned apples may be fairly uniform in size, if the total score is not less than 85 points.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned apples that possess similar varietal characteristics; that possess a normal flavor and odor; that possess a fairly good color; that are fairly uniform in size; that are fairly free from defects; that possess a fairly good character; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of canned apples that fail to meet the requirements of "U. S. Grade C" or "U. S. Standard."

FILL OF CONTAINER AND DRAINED WEIGHTS

§ 52.2164 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled with apples as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the volume of the container.

§ 52.2165 *Recommended minimum drained weights.* (a) Minimum drained weight recommendations for canned apples shown in Table I of this paragraph are not incorporated in the grades of the finished product since drained weight, as such, is not a factor of quality for the purposes of these grades. The drained weight of canned apples is determined by emptying the contents of the container upon a United States Standard No. 8 circular sieve of proper diameter containing 8 meshes to the inch (0.0937-inch, ±3% square openings) so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and the apples less the weight of the dry sieve. A sieve of 8 inches in diameter is used for No. 3 size cans (404 x 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the No. 3 size can.

TABLE I—RECOMMENDED MINIMUM DRAINED WEIGHTS

| Can size | Can dimensions (inches) | | Drained Weight (ounces) |
|---|---|---|---|
| | Diameter | Height | |
| No. 1 | 3 | 4 | 14 |
| No. 2 | 3 | 4 | 18 |
| No. 3 | 4 | 4 1/16 | 26 |
| No. 10 | 6 | 7 | 96 |

(b) Compliance with the recommended drained weights for canned apples is determined by averaging the drained weights from all the containers which are representative of a specific lot and such lot is considered as meeting the recommendation if:

(1) The average drained weight from all the containers meets the recommended drained weight;

(2) One half—or more of the containers meet the recommended drained weight; and

(3) The drained weights from the containers which do not meet the recommended drained weights are within the range of variability for good commercial practice.

FACTORS OF QUALITY

§ 52.2166 *Ascertaining the grade.* (a) The grade of canned apples is ascertained by considering the requirements with respect to varietal characteristics, flavor, and odor, which are not scored and the factors of color, uniformity of size, absence of defects, and character which are scored.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Uniformity of size | 20 |
| Absence of defects | 20 |
| Character | 40 |
| Total score | 100 |

(c) "Normal flavor and odor" means that the product is free from objectionable flavors and objectionable odors of any kind.

§ 52.2167 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for such factors and expressed numerically. The numerical range within each factor which is scored is inclusive (for ex-

[1] The requirement of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

ample "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.2168 *Color*—(a) *(A) classification.* Canned apples that possess a good color may be given a score of 17 to 20 points. "Good color" means that the slices, internally and externally, possess a reasonably uniform bright color, characteristic of apples of similar varieties.

(b) *(C) classification.* If the canned apples possess a fairly good color, a score of 14 to 16 points may be given. Canned apples that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the slices possess a color characteristic of apples of similar varieties; may vary noticeably in color; may possess a slight, but not markedly, brown, pink, or grey cast; and are practically free from internal discoloration.

(c) *(SStd) classification.* Canned apples that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2169 *Uniformity of size*—(a) *General.* The factor of uniformity of size refers to the degree of wholeness and to the uniformity of thickness of the slices.

(1) "Practically whole slice" means that the individual slice may be cut or broken but at least three-fourths of the apparent original slice remains.

(b) *(A) classification.* Canned apples that are practically uniform in size may be given a score of 17 to 20 points. "Practically uniform in size" means that at least 90 percent of the drained weight of the product consists of whole or practically whole slices of $1^1/_4$ inches in length or longer; and that of the 90 percent of the drained weight of the product consisting of units of the most uniform thickness, the thickness of the slices does not vary more than $^1/_4$ inch.

(c) *(C) classification.* Canned apples that are fairly uniform in size may be given a score of 14 to 16 points. "Fairly uniform in size" means that at least 75 percent of the drained weight of the product consists of whole or practically whole slices of $1^1/_4$ inches in length or longer.

(d) *(SStd) classification.* Canned apples that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2170 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from harmless extraneous matter, from damaged or seriously damaged slices, and from carpel tissue.

(1) "Harmless extraneous matter" means any vegetable substance (including, but not being limited to, a leaf, stem, or portions thereof, cores and portions of cores, and seeds) that is harmless.

(2) "Damaged unit" means any unit possessing green peel that exceeds in the aggregate an area of a circle $^1/_2$ inch in diameter, or red peel that exceeds in the aggregate an area of a circle $^1/_4$ inch in diameter, light brown bruise that exceeds the area of a circle $^1/_2$ inch in diameter or which is more than $^1/_4$ inch deep, and any unit in which the appearance or eating quality is materially affected by blossom end material, dark brown bruise or other internal or external discoloration, pathological injury, insect injury, or by any other means.

(3) "Seriously damaged unit" means any unit damaged to such an extent that the appearance or eating quality is seriously affected.

(4) "Practically free from carpel tissue" means that for each 16 ounces of the product, the carpel tissue present does not exceed in the aggregate an area equal to $^3/_4$ square inch.

(5) "Fairly free from carpel tissue" means that for each 16 ounces of the product the carpel tissue present does not exceed an area equal to $1^1/_2$ square inches.

(b) *(A) classification.* Canned apples that are practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that extraneous matter may be present that does not materially affect the appearance or eating quality of the product; that the product is practically free from carpel tissue; and that not more than a total of 5 percent, by weight, of the units may be damaged of which not more than 1 percent, by weight, of all the units may be seriously damaged: *Provided*, That extraneous matter, damaged and seriously damaged units, singly or in combination, do not materially affect the appearance or eating quality of the product.

(c) *(C) classification.* Canned apples that are fairly free from defects may be given a score of 14 to 16 points. Canned apples that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that extraneous matter may be present that does not seriously affect the appearance or eating quality of the product; that the product is fairly free from carpel tissue; and that not more than a total of 15 percent, by weight, of the units may be damaged of which not more than 3 percent, by weight, of all the units may be seriously damaged: *Provided*, That extraneous matter, damaged and seriously damaged units, singly or in combination, do not seriously affect the appearance or eating quality of the product.

(d) *(SStd) classification.* Canned apples that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2171 *Character*—(a) *General.* The factor of character refers to the texture of the slices and to the tendency to retain their conformation without material softening or disintegration.

(1) "Mushy apples" means slices or portions thereof that are a pulpy mass and of a consistency approximating applesauce.

(b) *(A) classification.* Canned apples that possess a good character may be given a score of 34 to 40 points. "Good character" means that the slices possess a reasonably tender texture, and that not more than 5 percent of the drained weight of the product consists of mushy apples.

(c) *(C) classification.* Canned apples that possess a fairly good character may be given a score of 28 to 33 points. Canned apples that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the slices may be variable in texture, with not more than 15 percent of the drained weight of the product consisting of slices that are markedly hard, markedly soft, or mushy.

(d) *(SStd) classification.* Canned apples that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.2172 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned apples, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

[illegible] limiting rule.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CHILI SAUCE[1]

PRODUCT DESCRIPTION AND GRADES

§ 52.2191 *Product description.* Chili sauce is the product prepared from mature, clean, sound, tomatoes of the red or reddish varieties which are peeled and chopped or crushed, or all (or a portion) of the tomatoes may be chopped, crushed, or macerated and the peelings screened out in a manner so that at least a substantial portion of the seed remains in the product, to which are added salt, spices, vinegar, nutritive sweetening ingredients, and to which may be added vegetable flavoring ingredients such as chopped onion, chopped green or red pepper, chopped green tomatoes, chopped celery, and sweet pickle relish in such quantities as will not materially alter the appearance of the product with respect to the predominance of the tomato ingredient, and any other ingredients permissible under the provisions of the Federal Food, Drug, and Cosmetic Act. The chili sauce is processed in accordance with good commercial practice; is packed in hermetically sealed containers; and is sufficiently processed by heat, before or after sealing, to assure preservation of the product. The refractive index of the filtrate of the chili sauce at 20 degrees C. is not less than 1.3784.

§ 52.2192 *Grades of chili sauce.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of chili sauce that possesses a good color; that possesses a good consistency; that possesses a good character; that is practically free from defects; that possesses a good flavor; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart: *Provided*, That the chili sauce may score not less than 14 points on the factor of character if the total score is not less than 85 points.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of chili sauce that possesses a fairly good color; that possesses a fairly good consistency; that possesses a fairly good character; that is fairly free from defects; that possesses a fairly good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of chili sauce that fails to meet the requirements of "U. S. Grade C" or "U. S. Standard."

FILL OF CONTAINER

§ 52.2193 *Recommended fill of container for chili sauce.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of chili sauce be filled as full as practicable without impairment of quality and that the product occupy not less than 90 percent of the capacity of the container.

FACTORS OF QUALITY

§ 52.2194 *Ascertaining the grade.* (a) The grade of the chili sauce is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, consistency, character, absence of defects, and flavor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given for each such factor is:

| Factors: | Points |
|---|---|
| Color | 20 |
| Consistency | 20 |
| Character | 20 |
| Absence of defects | 20 |
| Flavor | 20 |
| Total score | 100 |

§ 52.2195 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, and 20 points).

§ 52.2196 *Color*—(a) *(A) classification.* Chili sauce that possesses a good color may be given a score of 17 to 20 points. "Good color" means that the color of the chili sauce is bright; the color of the tomato ingredient is predominant and characteristic of properly prepared, well ripened, properly processed tomatoes; and that the added seasoning ingredients do not materially detract from the appearance of the product.

(b) *(C) classification.* If the chili sauce possesses a fairly good color, a score of 14 to 16 points may be given. Chili sauce that scores in this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the color of the chili sauce may be slightly dull but not off color; the color of the tomato ingredient is characteristic of properly prepared, fairly well ripened, properly processed tomatoes; and that the added seasoning ingredients do not seriously detract from the appearance of the product.

(c) *(SStd) classification.* Chili sauce that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2197 *Consistency*—(a) *(A) classification.* Chili sauce that possesses a good consistency may be given a score of 17 to 20 points. "Good consistency" means that the chili sauce is heavy bodied and when emptied from the container to a flat surface forms a moderately mounded mass and shows not more than a slight separation of free liquid at the edges of the mass.

(b) *(C) classification.* If the chili sauce possesses only a fairly good consistency a score of 14 to 16 points may be given. Chili sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good consistency" means that the chili sauce, when emptied from the container to a flat surface, may tend to level itself, or may show a moderate separation of free liquid at the edges of the mass, but is not excessively stiff or excessively liquid.

(c) *(SStd) classification.* Chili sauce that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2198 *Character*—(a) *General.* The factor of character refers to the degree of disintegration of the tomatoes and the tenderness and texture of the onion, celery, pickle relish, or other similar ingredients.

(b) *(A) classification.* Chili sauce that possesses a good character may be given a score of 17 to 20 points. "Good character" means that the product does not have a finely comminuted appearance and that the onion, celery, pickle relish, and other similar ingredients are tender, reasonably firm, or crisp in texture.

(c) *(C) classification.* If the chili sauce possesses a fairly good character a score of 14 to 16 points may be given. "Fairly good character" means that the product may be finely comminuted and that the other vegetable ingredients may be only fairly tender.

(d) *(SStd) classification.* Chili sauce that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2199 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from dark specks or scale-like particles, discolored seeds or pieces of abnormally discolored ingredients, tomato peel, and other defects.

(b) *(A) classification.* Chili sauce that is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that any defects present do not more than slightly affect the appearance or eating quality of the product.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(c) *(C) classification.* If the chili sauce is fairly free from defects, a score of 14 to 16 points may be given. Chili sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that any defects present may be noticeable but are not so large, so numerous, or so prominent as to seriously affect the appearance or eating quality of the product.

(d) *(SStd) classification.* Chili sauce that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2200 *Flavor*—(a) *(A) classification.* Chili sauce that possesses a good flavor may be given a score of 17 to 20 points. "Good flavor" means a good distinct flavor characteristic of chili sauce properly prepared from good quality ingredients. Such flavor is free from scorching or any objectionable flavor of any kind.

(b) *(C) classification.* If the chili sauce possesses a fairly good flavor, a score of 14 to 16 points may be given. Chili sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means that the product may be lacking in good characteristic flavor, but is free from objectionable or off-flavors of any kind.

(c) *(SStd) classification.* Chili sauce that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.2201 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of chili sauce the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CONCENTRATED ORANGE JUICE FOR MANUFACTURING [1]

PRODUCT DESCRIPTION AND GRADES

§ 52.2221 *Product description.* Concentrated orange juice for manufacturing is the concentrated product obtained from sound, mature fruit of the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines. The fruit is prepared by sorting and by washing prior to extraction of the juice and the extracted juice is concentrated. The concentrated orange juice is processed in accordance with good commercial practice; and may or may not require processing by heat or subsequent refrigeration to assure preservation of the product but is not the product which is considered "frozen concentrated orange juice." The finished product does not contain any additives except that cold-pressed oil to standardize flavor and chemical preservatives permissible under provisions of the Federal Food, Drug, and Cosmetic Act may have been added.

(a) The Brix value of the finished concentrate shall be not less nor more than the following for the respective dilution factor of canned concentrated orange juice for manufacturing:

| Dilution factor | Brix value of the finished concentrate | |
|---|---|---|
| | Minimum Brix value | Maximum Brix value |
| | *Degrees* | *Degrees* |
| 1 plus 3 | 41.8 | 44.0 |
| 1 plus 4 | 50.0 | 53.0 |
| 1 plus 5 | 57.8 | 61.2 |
| 1 plus 6 | 65.2 | No limit |

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act or with applicable State laws and regulations.

(b) Concentrated orange juice for manufacturing of other dilution factors between "1 plus 3" to "1 plus 6" or more than "1 plus 6" shall result in a Brix (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.7 degrees.

§ 52.2222 *Grades of concentrated orange juice for manufacturing.* (a) "U. S. Grade A for Manufacturing" or "U. S. Fancy for Manufacturing" is the quality of concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses a reasonably good color; is practically free from defects; possesses a reasonably good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this section.

(b) "U. S. Grade C for Manufacturing" or "U. S. Standard for Manufacturing" is the quality of concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses a fairly good color; is fairly free from defects; possesses a fairly good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(c) "Substandard for Manufacturing" is the quality of concentrated orange juice that fails to meet the requirements of U. S. Grade C for Manufacturing or U. S. Standard for Manufacturing.

FILL OF CONTAINER

§ 52.2223 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled with concentrated orange juice as full as practicable without impairment of quality.

FACTORS OF QUALITY

§ 52.2224 *Ascertaining the grade.* The grade of concentrated orange juice for manufacturing is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | Points |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.2225 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.2226 *Color*—(a) *(A–Mfg) classification.* Concentrated orange juice of which the reconstituted juice possesses a reasonably good color may be given a score of 17 to 20 points. "Reasonably good color" means that the color is a reasonably good yellow to yellow-orange color typical of properly processed and properly concentrated orange juice and is reasonably free from browning due to scorching, oxidation, caramelization, or other causes.

(b) *(C–Mfg) classification.* If the reconstituted juice possesses a fairly good color, a score of 14 to 16 points may be given. Concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C for Manufacturing or U. S. Standard for Manufacturing, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the orange juice may be slightly amber or very light in color and may show evidence of slight browning but is not off-color.

(c) *(SStd–Mfg) classification.* Concentrated orange juice that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard for Manufacturing, regardless of the total score for the product (this is a limiting rule).

§ 52.2227 *Absence of defects*—(a) *General.* The factor of absence of defects refers to the degree of freedom from seeds and portions thereof, from excessive juice cells, from pulp, and from other defects.

(b) "Pulp" means particles of membrane, core, and peel.

(c) *(A–Mfg) classification.* Concentrated orange juice of which the reconstituted juice is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present:

(1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding 1/8 inch in diameter, provided such seeds or portions thereof do not materially affect the appearance or drinking quality of the juice;

(2) Juice cells and pulp that do not materially affect the appearance or drinking quality of the juice; and

(3) Other defects that are not more than slightly objectionable.

(d) *(SStd–Mfg) classification.* Concentrated orange juice that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard for Manufacturing, regardless of the total score for the product (this is a limiting rule).

§ 52.2228 *Flavor*—(a) *(A–Mfg) classification.* Concentrated orange juice of which the reconstituted juice possesses a reasonably good flavor may be given a score of 34 to 40 points. "Reasonably good flavor" means that the flavor is typical of reconstituted concentrated orange juice from properly processed and concentrated orange juice; that the flavor may range from high acidity to low acidity; is practically free from traces of scorching, caramelization, oxidation, or terpene; and is free from off-flavors of any kind. To score not less than 34 points the concentrated orange juice shall meet the following requirement: The ratio of the Brix value to acid is not less than 8 to 1 nor more than 18 to 1.

(b) *(C–Mfg) classification.* If the reconstituted juice possesses a fairly good flavor, a score of 28 to 33 points may be given. Concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C for Manufacturing or U. S. Standard for Manufacturing, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means a normal flavor for reconstituted concentrated orange juice; and that the flavor may range from high acidity to low acidity, may have a slightly caramelized or slightly oxidized flavor or may possess traces of terpene but is free from off-flavors of any kind. To score not less than 28 points concentrated orange juice shall meet the following requirement: the ratio of the Brix value to acid is not less than 8 to 1 nor more than 21 to 1.

(c) *(SStd–Mfg) classification.* If the concentrated orange juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 27 points may be given. Concentrated orange juice that falls into this classification shall not be graded above Substandard for Manufacturing, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.2229 *Explanation of terms and analyses.* (a) "Reconstituted juice" means the product obtained by mixing thoroughly one part by volume of the canned concentrated orange juice with a stated volume of water. For example, a dilution factor of "1 plus 6" means that to one part by volume of concentrated orange juice 6 parts by volume of water are added to produce a reconstituted juice. Distilled water is used in reconstituting the product for testing flavor.

(b) "Reconstitution as declared" means any defined reconstitution, such as in labeling: For example, "this can (46 oz.) made up to 10 quarts" means a "1 plus 5.95" concentrate.

(c) "Reconstitutes properly" means that the reconstituted juice shows no material separation of colloidal or suspended matter after standing four (4) hours at a temperature of not less than 68 degrees Fahrenheit in a clear glass tube or cylinder (such as a 50 ml. graduated cylinder).

(d) "Acid" means the percent by weight of acid (calculated as anhydrous citric acid) in concentrated orange juice and is determined by titration with standard sodium hydroxide solution using phenolphthalein as indicator.

(e) "Brix value" of the concentrate is the refractometric sucrose value determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions and to which the applicable correction for acid is added. (See Table I for corrections.)

TABLE I—CORRECTIONS FOR OBTAINING BRIX VALUES

| Citric acid, anhydrous, percent by weight | Correction to be added to refractometric sucrose value to obtain Brix value | Citric acid, anhydrous, percent by weight | Correction to be added to refractometric sucrose value to obtain Brix value |
|---|---|---|---|
| 0.0 | 0.00 | 1.6 | 0.70 |
| 0.1 | .00 | 1.7 | .74 |
| 0.2 | .00 | 1.8 | .78 |
| 0.3 | .00 | 1.9 | .81 |
| 0.4 | .01 | 2.0 | .85 |
| 0.5 | .02 | 2.1 | .89 |
| 0.6 | .03 | 2.2 | .93 |
| 0.7 | .04 | 2.3 | .97 |

[1] See "Refractometric Determination of Soluble Solids in Citrus Juices," by J. W. Sale and W. E. Ruether, Journal of the Association of Official Agricultural Chemists, vol. 31, p. 347, Aug. 15, 1948.

(f) The "Brix" of reconstituted juice, as applicable, means the degree Brix of the properly reconstituted juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in the Official Methods of Analysis of the Association of Official Agricultural Chemists. The degrees Brix of the reconstituted juice may be determined by any other method which gives equivalent results.

LOT CERTIFICATION TOLERANCES

§ 52.2230 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of concentrated orange juice for manufacturing the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal

Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED CONCENTRATED ORANGE JUICE [1]

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.2251 *Product description.* Canned concentrated orange juice is the concentrated product obtained from sound, mature fruit of the sweet orange group (Citrus sinensis) and Mandarin group (Citrus reticulata), except tangerines. The fruit is prepared by sorting and by washing prior to extraction of the juice; the extracted juice is concentrated; and single strength orange juice extracted from sorted and washed fruit may or may not be admixed to the concentrate. The canned concentrated orange juice is processed in accordance with good commercial practice and is sufficiently processed by heat to assure preservation of the product in hermetically sealed containers.

§ 52.2252 *Styles of canned concentrated orange juice—(a) Style I, without sweetening ingredient added.* (1) The Brix value of the finished concentrate shall be not less nor more than the following for the respective dilution factor of canned concentrated orange juice:

| Dilution factor | Brix value of the finished concentrate | |
|---|---|---|
| | Minimum Brix value | Maximum Brix value |
| | *Degrees* | *Degrees* |
| 1 plus 1 | 29.5 | 34.9 |
| 1 plus 2 | 32.4 | 34.1 |
| 1 plus 3 | 41.7 | 44.0 |
| 1 plus 4 | 50.0 | 53.0 |
| 1 plus 5 | 57.8 | 61.2 |
| 1 plus 6 | 65.2 | 68.8 |

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act or with applicable State laws and regulations.

| Dilution factor | Brix value of the finished concentrate exclusive of added sweetening ingredients | Brix value of the finished concentrate including added sweetening ingredients | |
|---|---|---|---|
| | Minimum Brix value | Minimum Brix value | Maximum Brix value |
| | *Degrees* | *Degrees* | *Degrees* |
| 1 plus 1 | 21.6 | 29.5 | 34.9 |
| 1 plus 2 | 30.1 | 32.4 | 34.1 |
| 1 plus 3 | 40.0 | 42.0 | 44.0 |
| 1 plus 4 | 48.1 | 50.0 | 53.0 |
| 1 plus 5 | 56.8 | 58.4 | 61.2 |
| 1 plus 6 | 64.0 | 65.2 | 68.8 |

(2) Canned concentrated orange juice of any other dilution factors between "1 plus 1" to less than "1 plus 6," shall result in a Brix (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.7 degrees.

(b) *Style II, with sweetening ingredient added.* (1) The Brix value of the finished concentrate exclusive of added sweetening ingredient and the Brix value of the finished concentrate including added sweetening ingredient shall be not less nor more than the following, as applicable, for the respective dilution factor of canned concentrated orange juice:

(2) Canned concentrated orange juice of any other dilution factors between "1 plus 1" to less than "1 plus 6" shall have had a Brix exclusive of any added sweetening ingredient (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.3 degrees; and the finished canned concentrated orange juice shall result in a Brix including any added sweetening ingredient (upon reconstitution as prescribed by the processor or as prescribed by the label on the container, if labeled) of not less than 11.9 degrees nor more than 14.2 degrees.

§ 52.2253 *Grades of canned concentrated orange juice.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of canned concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses an appearance reasonably characteristic of fresh orange juice; possesses a good color; is practically free from defects; possesses a good flavor; and scores not less than 85 points when scored in accordance with the scoring system outlined in this section.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of canned concentrated orange juice which reconstitutes properly and of which the reconstituted juice possesses a fairly good color; is fairly free from defects; possesses a fairly good flavor; and scores not less than 70 points when scored in accordance with the scoring system outlined in this section.

(c) "Substandard" is the quality of canned concentrated orange juice that fails to meet the requirements of U. S. Grade C or U. S. Standard.

FILL OF CONTAINER

§ 52.2254 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container be filled with concentrated orange juice as full as practicable without impairment of quality.

FACTORS OF QUALITY

§ 52.2255 *Ascertaining the grade.* The grade of canned concentrated orange juice is ascertained by considering, in conjunction with the requirements of the respective grade, the respective ratings for the factors of color, absence of defects, and flavor. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

| Factors: | *Points* |
|---|---|
| Color | 20 |
| Absence of defects | 40 |
| Flavor | 40 |
| Total score | 100 |

§ 52.2256 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.2257 *Color—(a) (A) classification.* Canned concentrated orange juice of which the reconstituted juice possesses a good color may be given a score of 17 to 20 points. "Good color" means that the color is a good yellow to yellow-orange color typical of properly processed orange juice and is free from browning due to scorching, oxidation, caramelization, or other causes.

(b) *(C) classification.* If the reconstituted juice possesses a fairly good color, a score of 14 to 16 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the orange juice may be slightly amber or very light in color and may show evidence of slight browning, but is not off-color.

(c) *(SStd) classification.* Canned concentrated orange juice that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2258 *Absence of defects—(a) General.* The factor of absence of defects refers to the degree of freedom from seeds and portions thereof, from excessive juice cells, from pulp, from recoverable oil, and from other defects.

(1) "Pulp" means particles of membrane, core and peel.

(b) *(A) classification.* Canned concentrated orange juice of which the reconstituted juice is practically free from defects may be given a score of 34 to 40 points. "Practically free from defects" means that there may be present:

(1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding $\frac{1}{8}$ inch in diameter, provided such seeds or portions thereof do not materially affect the appearance or drinking quality of the juice;

(2) Juice cells and pulp that do not materially affect the appearance or drinking quality of the juice; and

(3) Other defects that are not more than slightly objectionable. To score in this classification the canned concentrated orange juice shall contain at least a trace of recoverable oil but not more than 0.0024 milliliter per degree Brix value per 100 grams of the concentrate.

(c) *(C) classification.* If the reconstituted juice is fairly free from defects, a score of 28 to 33 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that there may be present:

(1) Small seeds or portions thereof that are of such size that they could pass through round perforations not exceeding $\frac{1}{8}$ inch in diameter, provided such seeds or portions thereof do not seriously affect the appearance or drinking quality of the juice;

(2) Juice cells and pulp that do not seriously affect the appearance or drinking quality of the juice; and

(3) Other defects that are not materially objectionable. To score in this classification the canned concentrated orange juice may contain recoverable oil of not more than 0.003 milliliter per degree Brix value per 100 grams of the concentrate.

(d) *(SStd) classification.* Canned concentrated orange juice that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 27 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2259 *Flavor—(a) (A) classification.* Canned concentrated orange juice of which the reconstituted juice possesses a good flavor may be given a score of 34 to 40 points. "Good flavor" means that the flavor is a distinct orange juice flavor typical of reconstituted orange juice from properly processed and concentrated orange juice; is free from traces of scorching, caramelization, oxidation, or terpene; and is free from off-flavors of any kind. To score not less than 34 points the canned concentrated orange juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of the Brix value to acid is not less than 11.5 to 1 nor more than 18 to 1.

(2) *Style II, with sweetening ingredient added.* The ratio of the Brix value to acid is not less than 12 to 1 nor more than 15 to 1.

(b) *(C) classification.* If the reconstituted juice possesses a fairly good flavor, a score of 28 to 33 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means that the flavor is a normal flavor for reconstituted canned concentrated orange juice and may have a slightly caramelized or slightly oxidized flavor but is free from off-flavors of any kind. To score not less than 28 points canned concentrated orange juice shall meet the following requirements for the respective style:

(1) *Style I, without sweetening ingredient added.* The ratio of Brix value to acid is not less than 9.5 to 1 nor more than 20 to 1.

(2) *Style II, with sweetening ingredient added.* The ratio of Brix value to acid is not less than 10 to 1 nor more than 15 to 1.

(c) *(SStd) classification.* If the canned concentrated orange juice fails to meet the requirements of paragraph (b) of this section, a score of 0 to 27 points may be given. Canned concentrated orange juice that falls into this classification shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.2260 *Explanation of terms and analyses.* (a) "Reconstituted juice" means the product obtained by mixing thoroughly one part by volume of the canned concentrated orange juice with a stated volume of water. For example, a dilution factor of "1 plus 3" means that to 1 part by volume of canned concentrated orange juice 3 parts by volume of water are added to produce a reconstituted juice. Distilled water is used in reconstituting the product for testing flavor.

(b) "Reconstitution as declared" means any defined reconstitution, such as in labeling: for example, "6 fluid ounces—makes 1 quart" means a "1 plus 4.33" concentrate.

(c) "Reconstitutes properly" means that the reconstituted juice shows no material separation of colloidal or suspended matter after standing four (4) hours at a temperature of not less than 68 degrees Fahrenheit in a clear glass tube or cylinder (such as a 50 ml. graduated cylinder).

(d) "Acid" means the percent by weight of acid (calculated as anhydrous citric acid) in canned concentrated orange juice and is determined by titration with standard sodium hydroxide solution using phenolphthalein as indicator.

(e) "Brix value" of the concentrate is the refractometricsucrose value determined in accordance with the International Scale of Refractive Indices of Sucrose Solutions and to which the applicable correction for acid is added. (See Table I for corrections.)

TABLE I—CORRECTIONS FOR OBTAINING BRIX VALUE [1]

| Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value | Citric acid, anhydrous (percent by weight) | Correction to be added to refractometer sucrose value to obtain degree Brix value |
|---|---|---|---|
| 2.0 | 0.39 | 4.6 | 0.70 |
| 2.2 | .43 | 4.8 | .74 |
| 2.4 | .47 | 5.0 | .78 |
| 2.6 | .51 | 5.2 | .80 |
| 2.8 | .54 | 5.4 | .83 |
| 3.0 | .58 | 5.6 | .86 |
| 3.2 | .62 | 5.8 | .90 |
| 3.4 | .66 | 6.0 | .97 |

[1] Source: "Refractometric Determination of Soluble Solids in Citrus Juices," by J. W. Stevens and W. L. Baier, from the Analytical Edition of Industrial and Engineering Chemistry, vol. II, p. 147, Aug. 15, 1939.

(f) The "Brix" of reconstituted juice, as applicable, means the degrees Brix of the properly reconstituted juice when tested with a Brix hydrometer calibrated at 20 degrees C. (68 degrees F.). If used in testing juice at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in the Official Methods of Analysis of the Association of Official Agricultural Chemists. The degrees Brix of the reconstituted juice may be determined by any other method which gives equivalent results.

(g) "Recoverable oil" is determined by the following method:

(1) *Equipment.* Oil separatory trap similar to either of those illustrated in Figure 1 [1] or Figure 2.[2]

Gas burner or hotplate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(2) *Procedure.* (i) Exactly 400 grams of the concentrate mixed with water to approximately two liters are placed in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from the bottom to top, and bring the solution to a boil. Boiling is continued for one hour at the rate of approximately 50 drops per minute.

(ii) By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered.

(iii) The number of milliliters of oil recovered divided by 4 equals the volume of recoverable oil per 100 grams of concentrate. To determine compliance with minimum or maximum allowances, as applicable, for recoverable oil, the volume of recoverable oil per 100 grams of concentrate divided by the Brix value of the concentrate equals the volume of recoverable oil per degree Brix value per 100 grams of concentrate.

LOT CERTIFICATION TOLERANCES

§ 52.2261 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of canned concentrated orange

[1] Filed as part of original document.

juice the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to those factors which are scored:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample; and

(5) All containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

## Chapter IV—Federal Crop Insurance Corporation, Department of Agriculture

PART 420—MULTIPLE CROP INSURANCE

SUBPART—REGULATIONS FOR THE 1950 AND SUCCEEDING CROP YEARS

DISCONTINUANCE OF PUBLICATION OF RIDERS

The publication in the Code of Federal Regulations of multiple crop insurance riders for the counties designated below is hereby discontinued due to the fact that multiple crop insurance is no longer offered in these counties:

Section 420.51-1 Butler County, Alabama (15 F. R. 2622; 16 F. R. 4829; 17 F. R. 3265).

Section 420.51-2 Henry County, Alabama (16 F. R. 4831; 17 F. R. 3266).

Section 420.51-3 Blount County, Alabama (17 F. R. 3267).

Section 420.53-2 White County, Arkansas (16 F. R. 4833, 12114, 12765).

Section 420.58-1 Jefferson County, Florida (16 F. R. 4834; 17 F. R. 3268).

Section 420.59-2 Jenkins County, Georgia (15 F. R. 2627; 16 F. R. 4837; 17 F. R. 3270).

Section 420.59-3 Emanuel County, Georgia (15 F. R. 2628; 16 F. R. 4838; 17 F. R. 3271).

Section 420.59-5 Mitchell County, Georgia (16 F. R. 4840; 17 F. R. 3272).

Section 420.59-6 Sumter County, Georgia (16 F. R. 4841, 12123).

Section 420.62-2 Spencer County, Indiana (15 F. R. 2632, 9282; 16 F. R. 12128; 17 F. R. 11270).

Section 420.66-3 Acadia Parish, Louisiana (16 F. R. 4854; 17 F. R. 3284).

Section 420.68-1 Talbot County, Maryland (14 F. R. 7329; 15 F. R. 9290; 16 F. R. 12139).

Section 420.72-1 Panola County, Mississippi (15 F. R. 2650; 16 F. R. 4863; 17 F. R. 3294).

Section 420.72-2 Alcorn County, Mississippi (16 F. R. 4865; 17 F. R. 3295).

Section 420.81-1 Perquimans County, North Carolina (15 F. R. 2651; 16 F. R. 4867; 17 F. R. 3297, 3671).

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U. S. C. 1506, 1516)

[SEAL] C. S. LAIDLAW, *Manager, Federal Crop Insurance Corporation.*

## Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1953-54 FISCAL YEAR

On November 13, 1953, notice of proposed rule making was published in the FEDERAL REGISTER (18 F. R. 7195) regarding the expenses and rate of assessment for the 1953-54 fiscal year under Marketing Agreement No. 117, and Order No. 14 (18 F. R. 5638) regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which were submitted by the Navel Orange Administrative Committee (established pursuant to the marketing agreement and order), it is hereby found and determined that:

§ 914.201 *Expenses and rate of assessment for the 1953-54 fiscal year.* (a) The expenses necessary to be incurred by the Navel Orange Administrative Committee, established pursuant to the provisions of the aforesaid marketing agreement and order, for its maintenance and functioning during the period October 1, 1953, through October 31, 1954, will amount to $151,937.50; and the rate of assessment to be paid by each handler who first handles oranges shall be one and one-quarter cents ($0.0125) per box of oranges handled by such handler as the first handler thereof during the 1953-54 fiscal year. Such rate of assessment is hereby fixed as each such handler's pro rata share of the aforesaid expenses.

It is hereby further found that it is impracticable and contrary to the public interest to postpone the effective time of this section until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that (1) in accordance with the provisions of said marketing agreement and order, the rate of assessment is applicable to all fresh oranges handled during the aforesaid fiscal year; (2) shipments of Navel oranges are now being made; (3) the provisions of this section do not impose any obligation on a handler until such handler handles Navel oranges; and (4) it is essential that the specification of the assessment rate be issued immediately so that the aforesaid assessments may be collected and thereby enable the Navel Orange Administrative Committee to perform its duties and functions in accordance with said marketing agreement and order.

As used in this section, "handle," "handler," "oranges," "fiscal year" and "box" shall have the same meaning as is given to each such term in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 4th day of December 1953.

[SEAL] TRUE D. MORSE, *Acting Secretary of Agriculture.*

[F. R. Doc. 53-10264; Filed, Dec. 8, 1953; 8:48 a. m.]

# TITLE 14—CIVIL AVIATION

## Chapter I—Civil Aeronautics Board

### Subchapter B—Economic Regulations

[Reg. No. ER-193]

PART 298—CLASSIFICATION AND EXEMPTION OF AIR TAXI OPERATORS

ELIMINATION OF PROHIBITION AGAINST USING WORDS "AIRWAYS", "AIRLINES" OR "AIRLINE" IN NAMES

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 3d day of December 1953.

At the present time § 298.2 (a) (3) of the Economic Regulations prohibits air taxi operators, in the absence of special approval by the Board, from using business names containing the words "airline", "airlines" or "airways", or indicating by name or otherwise that they are "airline", "airlines" or "airways". This section was adopted by the Board in order to give the public some means of distinguishing between the typical airline services offered by carriers holding certificates of public convenience and necessity, and those offered by air taxi operators conducted pursuant to the blanket exemption of Title IV of the Civil Aeronautics Act contained in Part 298. It was thought that the size of the aircraft used by the carriers would not in itself be a sufficient distinction, since certain of the local-service operators and other certificated air carriers utilized small aircraft at the time the air taxi operator regulation was promulgated. Although Part 298 has been in effect now for twenty months, the Board has received no complaints which indicate that members of the traveling public are confusing the services offered by air taxi operators with those offered by certificated air carriers. This is true despite the fact that a substantial number of air taxi operators are currently using such names by the air taxi operators (14 CFR Part 298) effective December 3, 1953, as follows:

By striking subparagraph (3) of § 298.2 (a).

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply sec. 416, 52 Stat. 1004; 49 U. S. C. 496)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

[F. R. Doc. 53-10266; Filed, Dec. 8, 1953; 8:48 a. m.]

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 51]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LOW FREQUENCY INSTRUMENT APPROACH PROCEDURE

Ceilings and visibilities are in feet above airport elevation. Radius distances are in statute miles unless otherwise indicated. Editorial changes are in bold face. Alternate missed approach procedures are published in the procedure section when available. Minimum altitudes over specified routes or fixes shall be those established for en route operation in the particular area as set forth below. Minimum altitudes over facilities shall correspond with those established for en route operation over the facility unless otherwise specified.

| City and State | Airport name and location | Radio aid and its frequency | Class of service | Ceiling and visibility minimums: Type aircraft: Condition | Type aircraft: 75 m.p.h. or less | Type aircraft: More than 75 m.p.h. | Procedure turn (—) side of course | Maximum authorized altitude | Minimum obstruction clearance altitude | Distance from airport to facility | Procedure |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | | | If clear of contact not actual U/S and is not authorized landing minimums after passing facility within distance specified, or if landing not accomplished |

4. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GCA STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnet C. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. From initial contact with GCA to final authorized landing minimums, the instructions of the GCA controller are mandatory except when (A) visual reference with ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

| City and State; airport name, elevation, effective date | Radar terminal area maneuvering altitudes by sectors and limiting distances | Ceiling and visibility minimums | | | | | | Except when the ground controller may direct otherwise prior to final approach, a missed approach procedure shall be executed as prescribed below when (a) communication on final approach is lost for more than 5 seconds, (b) directed by ground controller; (c) visual reference is not established upon descent to the authorized landing minimums; or (d) landing is not accomplished |

## PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LOW FREQUENCY RANGE PROCEDURES

When an LFR instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

| City and State; airport name, elevation; class of facility; frequency; identification; procedure No. | Initial approach to facility | | | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance (mi.) facility to airport | Ceiling and visibility minimums | | | If visual contact not established at authorized landing minimums after passing facility within distance specified below, or if landing not accomplished |
|---|---|---|---|---|---|---|---|---|---|---|
| | From— | Course and distance | Minimum altitude (ft.) | | | | Condition | Type aircraft | | |
| | | | | | | | | 75 m. p. h. or less | More than 75 m. p. h. | |
| LANSING, MICH.<br>Capital City Airport, 858'<br>SBMRAZ DTV<br>296 kc, LAN<br>Procedure No. 1<br>Effective date: October 14, 1953 | | | | N side E course:<br>101 outbound.<br>281 inbound.<br>2,000' within 25 miles. | 2,100 | 287—2.0 | T-dn<br>C-dn<br>S-dn<br>C-dn<br>A-dn | 300-1<br>800-1<br>800-1<br>NA<br>800-2 | 300-1<br>800-1, 5<br>800-1<br>NA<br>800-2 | Within 2.0 miles, climb to 2,200' on W course. |

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

[ 7 CFR Part 925 ]

[Docket No. AO 226 A3]

MILK IN THE PUGET SOUND, WASHINGTON, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO THE ORDER, AS AMENDED, REGULATING HANDLING

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders (7 CFR Part 900.1 et seq.), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to proposed amendments to the tentative marketing agreement and the order, as amended, regulating the handling of milk in the Puget Sound, Washington, marketing area, to be effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

Interested parties may file exceptions to this recommended decision with the Hearing Clerk, Room 1353, South Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 15th day after its publication in the FEDERAL REGISTER.

A public hearing was called by the Production and Marketing Administration, United States Department of Agriculture, following a request of the United Dairymen's Association, and was held August 10–11, 1953. The major issues presented on the record of the hearing and covered by this decision relate to:

1. The application of producer bases and to the rule governing transfers of such bases.
2. Modification of the definition of "handler" to include bargaining cooperatives which do not operate plants.
3. Revision of location adjustments applicable to Class I milk and deliveries of base milk.
4. A proposed expansion of the "marketing area," as defined in the order.
5. Revision of the method of computing the price differential for butterfat in Class I milk.
6. Modification of the provisions under which milk is moved between plants by transfer and diversion.
7. The proposed use of price estimates as the basis of settlement with producers for milk.
8. Revision of the application of the location adjustment on certain Class II milk in District No. 1 of the marketing area.
9. Revision of the method of computing, for classification and pricing purposes, the volume of condensed skim milk, nonfat dry milk solids, or other products condensed from skim milk utilized in Class I milk products.
10. Revision of the definition of "producer-handler."
11. Clarification of the location adjustment on certain Class II milk as to its application to milk used in the manufacture of various types of cheese.
12. Review of the provisions which require payments on "other source milk" used by handlers as Class I milk at a rate equal to the difference between the Class I and Class II prices.
13. Clarification of the provisions under which marketing service deductions are made from payments due producers.
14. Several proposed changes in other provisions for the purpose of clarification and to improve administrative procedures.

A decision, based upon the August 10–11, 1953 hearing, which provided modified conditions under which producer milk might be moved from fluid milk plants or country plants to other fluid milk plants or country plants for manufacturing purposes during the balance of 1953, was issued September 10, 1953. An amendment containing the provision decided upon therein was made effective on October 1. Such decision indicated the propriety of further review of the order provisions covering interplant transfers in light of the conclusions reached on other issues of the hearing. Accordingly, certain revisions of language in the transfer provisions, as discussed below, have been made to insure that, over the longer term, milk may be moved into manufacturing channels in an orderly manner, when it is not needed for Class I milk products.

*Findings and conclusions.* The following findings and conclusions on the issues decided herein are hereby made upon the basis of the record of the hearing:

(1) The provisions relating to producer bases should be revised as to the number of months during the year bases are applied in distributing to producers the proceeds from the sale of milk; the provisions relating to transfers of base between producers should not be changed.

For six months of the year the total returns realized by producers from the sale of milk in both classifications are distributed to the individual producers by means of a "base and excess" plan of payment. For a certain quantity of milk, computed as the average of his deliveries during the preceding August-December period, the producer receives a "base price" for each month that bases are in effect, and for additional deliveries he receives the "excess price," which usually is equivalent to the Class II price. For other months, when individual producer bases are not used in connection with the distribution of producer returns, each producer receives a single blended, or weighted average, price (adjusted for location and butterfat variation) for all milk delivered. The latter period includes those months of the year (August-December) known as the "open period" when the deliveries made by each producer determine the quantity of milk on which he will be paid the base price for six months during the following year.

Use of the base and excess plan of payment in all months of the year was proposed. In support of this proposal producer proponents contended that the effect of the current provisions is to return to the producer who has even production an increased base price in relation to the Class I price as the flush production season approaches and a decreased price in relation to the Class I price during the short production months. Thus, producers who make the effort necessary to achieve a level production pattern receive, in effect, a "diluted" price for fall production. Proponents argue that the order should

assure the producer who has evened out his annual production curve that he will not receive a lower price in relation to the Class I price in the season of historically short production than the price he received for his base milk in the preceding season of flush production. If this is not accomplished a production pattern for the market in close alignment with the relatively even sales pattern of Class I milk will be difficult to attain.

Since the base and excess plan of payment returns to the producer of an even supply the highest possible price provided by the order for a percentage of his milk deliveries greater than that of the uneven producer for the months bases are in effect, proponents contended further that additional incentive to even production will result if such plan of payment is employed throughout the year rather than for a six months' period. It was testified that individual ability on the part of the producer is basic to the attainment of an even production pattern for the market, and that greater progress toward this objective will be made if the returns to the producer who has achieved even production are not materially reduced in the fall months in relation to those of the uneven producer. It was stated that the plan proposed should promote further production adjustments on a seasonal basis without at the same time restricting the total amount of milk produced for the market annually. It was testified that even though he is "on base," a producer who is attempting to level out production will produce as much milk as possible during the base-making months in the fall in order to establish a base which will include the largest possible percentage of any seasonal increase in his production the following spring and summer. In this way the producer insures himself the maximum return for his milk throughout the next year. Under the proposal new producers would be permitted to share in the total market proceeds at the base price for the month in varying amounts up to 80 percent of their deliveries, the highest percentages applying in those months when the market supply of producer milk normally is smallest. Although under such a provision a new producer coming into the market in the fall would receive a somewhat lesser return in relation to those of other producers during his first months of entry, proponents argue that this result is justified to prevent undue gain to such a producer at the expense of the tried producer who has achieved a relatively even production curve. Proponents do not suggest any change in either the method of computing bases or the base-making period (August through December) now specified in the order, except to extend to the additional months the plan would be in effect the schedule of monthly percentages applied to the deliveries of any new producer in computing the amount of his base milk for the particular month.

The base and excess plan of payment was adopted in the original Puget Sound order as a means of inducing additional milk production in the fall and winter relative to spring and summer levels. By providing returns directly related to the ability of the producer to deliver additional milk in the fall and winter as compared with deliveries in the other seasons, a production pattern more nearly fitted to the Class I sales pattern has been encouraged. Further seasonal shifts in deliveries would assist in relieving problems involving the disposition of reserve milk supplies in the flush production months and would provide greater assurance of adequate milk supplies at reasonable price levels in other months.

As previously stated, the present order provides for a "base-making period" of five months out of each year. During this period all producers deliver on precisely the same price terms while establishing bases to be effective in six months of the following year. Since the statute does not bar the application of the base and excess plan of payment in months other than those to which it now applies, the important consideration concerning its extension to the entire year is whether there would be a strong tendency for producers to restrict total market supplies. The plan adopted provides that each producer will continue to make a new "base" each year computed from his deliveries of both base milk and excess milk in the base-making months and, if he chooses, the producer may relinquish his base once during the year and be paid on the same terms as a new producer until revised bases for regular producers become effective on the basis of August-December deliveries. This privilege is accorded to producers under the present order and should be extended to the added months the plan will be in effect. This should enable those producers who so desire to increase the level of their milk deliveries substantially in the fall months. However, a producer who so elects to relinquish base should receive a base, to become effective the following February 1, in the manner of other producers who did not relinquish base. Under these circumstances, and since the total returns to all producers are not being reduced in relation to the returns to be realized from the production of factory milk, it does not appear that undue restriction on deliveries by regular producers should result from application of the plan throughout the year.

In establishing percentages for determining the bases of new producers under a 12-month plan, particular consideration has been given to seasonal levels of deliveries for the market as a whole. The seasonal levels of production in relation to the need for Class I milk indicates that the percentages of new producer deliveries to be priced as base milk should be relatively high in the fall and winter months to encourage the delivery of milk by new producers in such months and to minimize the incentive to enter the market during months when supplies are seasonally large. The following percentages of deliveries for the additional months the plan will be in effect should accomplish this without, at the same time, unduly reducing returns to regular producers: August, 75; September through December, 90; January, 80; and February, 75. The record indicates that the percentages currently established by the order with respect to new producer deliveries for the months of March through July are satisfactory and do not require revision. In view of the foregoing it is concluded that the base and excess plan of payment should be made effective for all months of the year.

Proponents further contended that unnecessary and inequitable hardships sometimes occur from the fact that the order does not permit the producer to transfer an earned base with the sale or lease of the herd to a producer who continues to produce milk on the same farm. It was indicated that the value inherent in the establishment of an even production pattern is lost to the producer who conveys his herd to another producer if the latter is required to begin his operations on the same farm as a new producer. It was contended in support of the proposal that a herd so obtained and kept normally would continue to produce for a period of several months following the transfer in close alignment with the production pattern already established by the transferor.

The proposal presented was discussed by three witnesses appearing on behalf of producer organizations. It appears from the testimony that there is divergence of opinion among producer representatives as to the opportunities to transfer base which should be afforded by the order. One witness indicated that any producer should be permitted to move his base with the herd when the herd moves to another farm, and further that bases should be subject to sale without limitation. Another would limit transfers of bases to those cases in which death or ill health would force the sale of the farm and herd and would not otherwise permit their sale. The principal witness for the proposal, however, presented the view that on transfer of base the herd should be maintained on the same farm for the proposal, however, presented the proposal) following conveyance, and that it was not proposed that the base should follow the herd off the farm without rather strict limitation. From the latter testimony it appears that the original intent of the proposal was not to permit the unlimited purchase and sale of bases without reference to the disposition of the herd and farm.

A plan which would permit the ready transfer of base with a herd immediately raises the question of what constitutes a "herd." This appears to be an indeterminate factor in the proposal and as such raises serious complications from an administrative viewpoint. The purchase and sale of base as such was not pursued in detail and further comment thereon is not necessary at this time. However, the producer's own ability, as a farm manager, to produce even supplies of milk invariably has been an important underlying consideration to the establishment of base in all areas where base plans have been employed. It has been considered so significant in relation to the other factors involved in milk production that in the past the individual producer in the Pudget Sound area has been required to establish a separate base for each farm operated (§ 925.61

(e)). Any relaxation of the order regarding transfers would run counter to this consideration, and it is not clear in the record why less importance should now be attached to such factor. In view of the divergency of concepts concerning the transfer of bases offered for the record, it is concluded that the present base rules should be left unchanged pending further consideration of the problem by producers.

(2) The definition of "handler" should not be revised to include a cooperative association not operating a fluid milk plant or country plant for purposes other than those described in § 925.15 (b).

A proposal was made at the hearing by producer groups to designate as a handler any bargaining-type cooperative with respect to milk of its members caused to be delivered to fluid milk plants or country plants of proprietary handlers and to require payment by the latter to the cooperative for the class utilization value of such milk. This would establish the cooperative as the medium between the market administrator and the plant operator through which monthly reports of base and excess milk receipts are filed with the market administrator and certain handler obligations to the producer-settlement and administrative assessment funds are paid. The proposal also contained a corollary provision under which any such cooperative would be allowed to reduce a required payment to the producer-settlement fund by any amount by which the proprietary handler defaults in making payment to the cooperative for milk purchased at the class prices. The proposal submitted is similar in principle to one offered for consideration by producer representatives at the original promulgation hearing and at the amendment hearing held in March 1952. Under present order provisions producer-settlement fund payments are made by the proprietary handler to the market administrator and the bargaining cooperative collects from the handler at the base and excess prices for milk marketed in behalf of producers.

Proponents stated in support that the reporting of base and excess quantities of milk under the present system of reporting is unnecessarily cumbersome. The milk of an individual producer frequently is caused to be delivered by a bargaining cooperative to several different plants during the course of the monthly pay period. This requires the coordination of information regarding the individaul producer's deliveries of milk by the cooperative, and an exchange of information regarding such deliveries with the handlers involved before the payment obligations of the latter to the association and to the market administrator can be computed. In order that those handlers who receive milk from certain individual producers during only part of a month may know the extent of their obligation to such producers and also the amount of their net obligation to, or credit from, the producer-settlement fund, it is necessary for the bargaining cooperative marketing milk on behalf of producers to furnish the handler with the base and excess quantities of milk the latter received from each such producer during the month. When a particular producer's milk is sent by his cooperative to more than one plant during the month it is necessary for each handler involved to report to the cooperative the total amount of milk received and, in turn, for the cooperative to compile the total quantity of milk received during the month at all plants from such producer, than to compute his base and excess quantities, and finally to advise each of the handlers concerned of the amounts of base and excess milk for which he must pay the cooperative on behalf of such producer. During any given month the milk of several hundred individual producers may be sent to more than one plant. This exchange of information is necessitated by the fact that a bargaining cooperative which markets milk for its members controls the hauling of such milk and in many instances is the only practical source of information relative to the total monthly deliveries of an individual producer. The problem has been intensified largely by the expansion of the farm tank system of hauling under which the milk of two or more producers may be commingled in a farm tank truck and the handler receiving milk from the truck cannot identify the producer source of the milk delivered to him. It is the contention of proponents that if the bargaining cooperative is designated the first handler of the milk, the above exchange of information can be eliminated with a saving in bookkeeping to the cooperatives and handlers concerned. Under the proposed plan the market administrator would receive information on the base and excess deliveries of such producers from the bargaining cooperative directly, and a report of his total milk receipts and utilization from each handler buying from such a cooperative. The proprietary handler would continue, of course, to report the receipts of base and excess milk from producers not members of a cooperative and to make minimum payments to the latter producers at the base and excess prices.

It is obvious from the present record that the proponent bargaining cooperatives and the handlers to whom they sell have a problem involving an exchange of information regarding the deliveries of base milk and excess milk of a substantial number of producers. The remedy proposed would create, however, certain other problems of more serious proportions. At present each handler (including any cooperative which operates a plant) is responsible for remitting to the market administrator all monies due producers other than his own as the result of the market equalization of producer returns through the producer-settlement fund. If the handler fails to pay the producer-settlement fund he immediately makes his assets subject to enforcement action. Under the proposal each proprietary handler purchasing from a bargaining-type cooperative would be required to pay the cooperative for such milk at the class prices on the basis of its utilization by the handler. On the other hand, the proposal would place responsibility on the cooperative to make payment to the producer-settlement fund only to the extent that it had been able to collect from the handler.

The proposed plan would require the market administrator to look to the bargaining cooperative for payments to the pool on milk marketed through the cooperative. The real incidence of responsibility for payment would remain, however, with the proprietary handler who actually received and utilized the milk. Under these circumstances the market administrator's ability to enforce payments due the producer-settlement fund would be impaired since the plan relieves a proprietory handler from responsibility to the market administrator concerning such payments. For example, any disagreement between a handler and a bargaining cooperative concerning the adequacy of payment to the cooperative could cause a delay in payment to the pool. In other instances the market administrator might determine that a proprietary handler owes money to the pool and such handler would disagree. In the latter situation the market administrator would be forced to rely for payment upon an agreement between the handler and his cooperative supplier that an obligation existed. If in the opinion of the cooperative involved the handler had fulfilled his obligation, the market administrator would have no recourse to enforce a payment he determined is due producers. It should be noted here that monies owed to the producer-settlement fund by a handler buying from a bargaining cooperative under the plan are not monies owing to producers affiliated with such cooperative, but rather represent monies belonging to other producers, including many not affiliated with any of the proponent associations. Action by the market administrator to insure full payment for milk could be rendered difficult if not impossible under the above conditions. Such procedure could open the way for underpayments which could have serious effect upon producer returns and undermine the essential provisions of the order which establish minimum uniform prices to all handlers.

The producer-settlement fund, or "pool", is a sensitive device for distributing the proceeds to farmers for milk produced. It cannot operate to promote the objectives of the order unless equalization payments are made promptly when due. Any failure to so pay monies due the pool represents a serious obstruction to the maintenance of orderly marketing conditions for producers since orderly marketing requires assurance that all producers receive full and prompt payment for their milk. If a condition of uncertainty as to responsibility for pool payments were to exist, the order could not operate effectively to maintain orderly marketing conditions and all producers, including those marketing through the proponent associations, would lose the principal advantages the regulation affords.

Secondarily, the record also discloses certain other administrative complications which would be created. The amount of milk delivered by producers to be accounted for on the basis of inter-handler transfers would be increased substantially. This would necessitate a more complicated set of rules to govern such movements, involving a specific plan for assigning classification according to sources whenever, as frequently happens, a handler receives milk from more than one cooperative (either bargaining or plant operating) and perhaps also from independent producers. The allocation of classified milk to its source may be made either by arbitrary assignment by the market administrator or by proration. Assignment of classification by the market administrator would involve arbitrary choice as to which source would receive credit for the largest amount of milk utilized in Class I. Although this would place a difficult burden upon the market administrator, the proposal offers no guide in this connection. If the proration method of assigning classification is used, the basis for making original assignments would be relatively simple. However, it would follow logically from such a plan that audit adjustment should be prorated also. Such procedure undoubtedly would increase the number of billings necessary to settlement since each handler, including any bargaining cooperative, who furnished any milk to another handler would be involved in settlement of any audit adjustment based on the latter handler's utilization of milk. At present settlement for such adjustments is made directly with the market administrator. Under any plan of allocation, the market administrator would have to adopt a reporting device to advise a bargaining cooperative of the manner in which the milk of its members was used by the proprietary handler in order that the cooperative could ascertain its obligation to the producer-settlement fund with respect to such milk. When a bargaining cooperative causes member milk to be delivered to several proprietary handlers the procedure of advising the cooperative of the use of milk would have to be repeated for each plant. Similarly, reports not now made to the cooperative relative to audit adjustments would be necessary also. It is noted further that proponents state emphatically that the handler operating the plant where milk purchased from such a cooperative is received should continue to be entitled to the shrinkage allowance associated with Class II milk. In the present order, sales between handlers may be made as either Class I milk or Class II milk under a relatively simple system of transfers. There is no necessity under such plan for dividing the transferred quantity into Class I milk and Class II shrinkage in order to determine the obligation of the transferee handler to his supplier. If the modified shrinkage provision were not adopted, however, those handlers who purchase milk through a bargaining cooperative would be denied the shrinkage allowance in Class II milk as compared with those why buy from an operating cooperative or from independent producers since it would not be possible to determine shrinkage for a handler not operating a plant. In combination these complications appear to offset, from the standpoint of the mechanics of an effective and efficiently managed regulation working in the interest of orderly marketing for all producers, the advantages if would bring to the particular cooperatives and handlers affected by the reporting problem submitted.

It is concluded from the above that enforcement procedure would be made unduly complicated in relation to the benefits to be realized. It is concluded also that while the proposal could simplify the reporting procedures for certain coperatives and handlers, the total amount of paper work necessary on a market-wide basis would not be lessened and conceivably might be increased. Therefore, the proposal should not be adopted under present circumstances.

(3) Current provisions for price adjustments, based on the location of the regulated plant, should be revised by (a) designating a new district within the marketing area to be known as "District No. 4" and (b) establishing a location adjustment of 20 cents per hundredweight applicable to the prices of Class I milk and base milk at plants in such district.

At present, District 2 of the marketing area is comprised of Skagit and Whatcom Counties. Producer associations proposed that Skagit County be removed from such district and be established separately as "District No. 4." This redesignation would be made for the purpose of applying a location adjustment for plants located in Skagit County different from that applicable at plants in the remainder of District 2. A 40 cent per hundredweight location adjustment was adopted for District 2 effective December 1, 1952, and no revision of the adjustment is contemplated for Whatcom County. In the new district the adjustment would be reduced to 20 cents per hundredweight. The 40 cent adjustment in effect for District 3 and the 50 cent adjustment for certain locations outside the marketing area would not be revised under the proposal.

Proponents stated that present location adjustments are based on a system of handling and transporting milk under which milk is delivered from farm to country plant in cans and then is weighed, tested, precooled and assembled in large quantities at the plant prior to shipment in "over-the-road" tank trucks to District 1 plants. This method of handling is still dominant in Lewis, Pacific and Whatcom Counties and on the Olympic Peninsula, but regulated plants located in Skagit County are being by-passed by farm hauling routes which now bring milk directly from farms in the latter county to fluid milk plants within District 1. The rapid growth of the farm tank method of transporting milk, which has made possible this extension of direct delivery farm routes from District 1 plants, also has brought about a reduction of approximately 20 cents per hundredweight in the cost of moving milk in substantial amounts from Skagit County farms to Seattle plants. It has become practical, from a cost standpoint, for farm tankers which carry the equivalent of 250–300 cans of milk to deliver milk directly to city plants in Seattle, or to other cities in District 1, from Skagit County farms, and for even smaller loads picked up at the farms to be reloaded directly to larger tank trucks for over-the-road movement, eliminating in many instances the need for country plant handling. It was testified also that the shipment of milk in farm tanks to District 1 directly from farms located in Whatcom County has not proved economical as yet. Although milk is picked up by farm tanks at many Whatcom County farms for delivery to plants within the county, the distance between such county and Seattle still warrants the assembly of sizable loads at country plants to gain the advantage of the lowest possible over-the-road hauling cost.

The marketing of milk received from producers at plants located outside District 1 requires the performance of more costly services than does the marketing of milk received from producers whose farms are in District 1. The purpose of the location adjustments is to reflect the additional costs of these services to the outlying producers as compared to the near-in producers. At the time of the hearing in March 1952, most milk in the outlying districts was received at country plants prior to shipment to District 1. The total value of services performed on milk received from producers in District 2, as shown by the record, was about 63.5 cents per hundredweight, including country plant transportation 28.5 cents; country plant handling 10 cents; and country plant to District 1 plant transportation 25 cents. The cost of performing services on milk received from producers in District 1 was 22.7 cents. The additional cost of performing services on milk received in District 2 was about 40.8 cents per hundredweight (63.5 cents less 22.7 cents), and a location allowance for District 2 was established at 40 cents per hundredweight as a reasonable measure of the cost of the additional services on milk received in District 2. For the same reasons a like allowance was established for District 3.

The present record indicates that the bulk of inspected milk originating in Skagit County is marketed through the producer association in such county. To a large extent the milk shipped from such county for utilization in District 1 is now being transported in farm tank trucks whereas the milk received from farms in cans is being utilized locally within the county. Within District 1, the can delivery system appears to remain dominant. However, a shift in recent months of more than 21 percent of the producers in this district to the farm tank system would indicate some reduction in delivery costs within such district since the last revision of the location adjustments. With the growth of the farm tank system of delivery an active competition for milk supplies has developed between operators of farm tank pick-up routes which extend into Skagit County from District 1 plants and the Skagit County association. Milk is being hauled from Skagit County farms to Seattle on farm tank pick-up routes at a cost to the producer ranging from 37 to 39 cents per hundredweight. The growth of the farm tank system also has reduced the

cost of moving milk from farms to the

milk, and (b) the extent of the Class I

credited in the pool with having paid

should not be used as the basis for han-

cost of moving milk from farms to the Burlington plant of the Skagit County association so that milk now can be delivered from farms to the plant, reloaded and shipped to Seattle in over-the-road tank trucks at a total cost of approximately 38 cents per hundredweight as compared with the 63.5 cents per hundredweight computed from the record of the hearing held in March 1952 as the then prevailing value of the hauling and handling service to producers in such district. Even on the assumption that the average delivery cost from farm to plant in District 1 has not changed, the difference in the value of services to the producers in Skagit County in marketing their milk and the value of such services to District 1 producers has been reduced from 40.8 cents to an amount ranging from 14.3 to 17 cents per hundredweight depending on the delivery system used.

When milk is moved to District 1 from an outlying district by the farm tank method, without first being received in a plant in the outlying district, the location adjustment fixed by the order for such district does not apply because that particular milk is regarded as a direct shipment to the District 1 plant. If the location adjustment for milk received in a plant in the outlying district is set at a figure substantially higher than the actual cost of moving milk to District 1 from a similar location by the alternative farm tank method, the returns to the producers whose milk is received at the outlying plant are reduced in relation to those of other producers, with farms similarly located, who are on the farm tank delivery system. If continued this condition would cause the producers receiving lower returns to shift to the farm tank system of necessity. The proposed reduction in the location adjustment on the uniform price for base milk in Skagit County from 40 to 20 cents per hundredweight producers reasonably reflects the current costs of moving milk in substantial quantities to District 1 plants from Skagit County as compared with the costs of similar service to District 1 producers and will remove price disadvantage with respect to producer milk received at Skagit County plants as compared with other milk which originates in the county and is moved to District 1 on a direct-shipped basis. Such reduction should be made in order to assure continuance of the service which the presence of plant facilities in such county still affords numerous producers whose milk is used locally. In view of the above, the location adjustment to handlers for milk received in Skagit County plants and disposed of locally as Class I milk also should be reduced from 40 to 20 cents per hundredweight.

(4) The definition of "marketing area" should not be revised.

It was proposed also at the hearing that the counties of Kitsap and Mason (which include the city of Bremerton) and certain adjacent territory on the Olympic Peninsula be included within District No. 1 of the marketing area. Proponents testified in support that (a) such counties do not produce enough milk locally to meet requirements, and economically and geographically are an integral part of the sales area for the milk of those producers shipping to regulated plants, (b) if the populous and rapidly growing Kitsap-Mason area is to have sufficient milk, it must rely on producers and handlers now covered by the order, (c) some of the seasonal reserve of milk produced on the Olympic Peninsula is utilized in regulated plants at the expense of the pool, (d) producers and handlers in such counties should contribute to the maintenance of stable conditions for the entire Puget Sound area by bearing their proportionate share of the seasonal surplus for the entire marketing area, and to the cost of administration of the order, and (e) local processors of milk in Kitsap and Mason Counties have a competitive advantage in such counties over handlers operating out of the present marketing area resulting in the creation of trade barriers for the benefit of local handlers and producers.

The factual circumstances regarding the production and marketing of milk in the Kitsap-Mason area are not substantially different in relation to the entire Puget Sound area than was the case at the time of the hearing in March 1952 (see decision of the Secretary dated November 13, 1952, official notice of which is taken). About 95 percent of the Grade A milk produced on the Kitsap-Mason Peninsula is marketed by a local producer's association which operates fluid milk distribution facilities in Bremerton. Nearly all milk produced in such counties is utilized locally and none is distributed in fluid form to outlets located within the presently defined marketing area or provides an appreciable source of supply for any regulated plant. During most months the local supply is insufficient to meet all the fluid milk requirements of such counties. This deficit at times is substantial, depending largely on the needs of the Navy Yard. The local cooperative association purchases supplemental milk supplies covered by the order from a producer cooperative during some months of the year and in the flush production season disposes of a portion of the seasonal excess of locally produced milk to the same producer group. Monthly prices paid dairy farmers by the local cooperative association have been closely in line with (sometimes equivalent to) the respective Class I prices for District 1 of the marketing area.

In connection with problems of milk distribution reference is made in the record to the fluctuating purchases of fluid milk by the Navy Yard at Bremerton which buys on contract following bids by interested parties. Proponents, however, did not complain of competitive disadvantage as to this sizable outlet for fluid milk. It appears that contracts for such business are held as frequently by regulated handlers as by the local, unregulated distributors. As a practical matter any local distributor, including the local cooperative, who holds the successful bid for such business must purchase from regulated handlers the milk needed to cover such sales in view of the deficit production locally and does not have price advantage over handlers under regulation with respect to this business.

The competitive situation for regulated handlers who distribute fluid milk on the Kitsap-Mason Peninsula does not appear to be substantially different than it was prior to regulation and no hardship to any handler is revealed by the record. No specific example of current competitive disadvantage with local handlers caused by the existence of the order was presented by the proponent company. Proponent's contention appears to be that if the marketing area is not expanded some competitive disadvantage may result in the future. The type of situation presented follows a pattern which may be expected at the edge of any area made subject to regulation. It does not appear that the proposed expansion of the marketing area is necessary to prevent undue hardship on any regulated handler. Also, it was not demonstrated that an orderly market for the producers whose milk is already under the order is dependent upon the inclusion of the Kitsap-Mason Peninsula. The representative of the Kitsap-Mason cooperative testified that the maintenance of orderly marketing conditions for local dairy farmers does not require an order at this time.

The scope of the marketing area is related to the particular problems involved. Since a milk marketing order is a type of regulation requiring specific boundaries for the area to be covered, some competition between regulated handlers and others hardly can be avoided at points outside the regulated area. A regulated handler who distributes outside the regulated area so established incurs voluntarily whatever risks are involved in doing business in competition with persons unregulated. In the absence of compelling reason to extend the marketing area for the purpose of estabishing or maintaining orderly marketing conditions either inside or outside the presently defined marketing area, it is concluded that the counties of Kitsap and Mason and their environs should not be included in the marketing area.

(5) The butterfat differential applicable to Class I milk should be revised.

Producers requested a reduction in the butterfat differential on Class I milk from 1.25 to 1.2 times the price per pound of 92-score butter on the San Francisco market.

The average butterfat test of producer milk delivered from farms continues to exceed the average butterfat test of Class I milk disposed of by handlers even though some reduction in the butterfat differential was made as the result of an amendatory hearing on order provisions held in March 1952. The reduction in the butterfat differential made effective as a result of the March 1952 hearing appears to have encouraged a better balance between the total quantity of butterfat produced and that sold in Class I milk. However, additional encouragement in this direction appears appropriate in view of the amount of butterfat produced in relation to (a) the quantity of solids not fat in producer milk, and (b) the extent of the Class I outlets for butterfat.

Handlers pointed out in opposition that the proposal would increase the Class I price since the actual test of Class I milk customarily has been lower than the "standard test" of 4.0 percent on which the announced Class I price is based and a smaller differential would be subtracted from the Class I price at the 4.0 percent test in arriving at the price at actual test. Using August prices in illustration it may be noted that the August 1953 Class I price for 4.0 percent milk was $5.261 and at actual test (3.861 percent) was $5.145. Under the proposal the August Class I price at test would have been $5.150. The difference between the proposed Class I price and the actual Class I price for such month is 0.5 of a cent per hundredweight (or one one-hundredth of a cent per quart). It is felt that such a change should not be viewed as a significant change in the Class I price level on a market-wide basis.

In view of the foregoing, it is concluded that the proposal should be adopted.

(6) The provisions relating to the diversion of producer milk to nonpool plants should be modified; the provisions under which milk is classified when transferred from fluid milk plants or country plants to other fluid milk plants or country plants should be revised.

The present definition of "producer milk" provides that a handler may divert to a nonpool plant, on his account, any milk purchased from producers. It is provided further that when such milk is diverted it shall be deemed to have been received at the plant from which it was diverted. It was proposed by the cooperative associations testifying at the hearing that producer milk diversions from any fluid milk plant or country plant to any nonpool plant located in a district different from that in which the diverting plant is located be restricted to the milk of those producers whose milk was received at such fluid milk plant or country plant on at least 17 to 20 days during the month of diversion, with the one exception that if such delivery requirements is met in the month of March, diversions might be made without such restriction in the immediately following months of April, May and June.

The evidence indicates that under present order language it is possible for handlers to assign producers to a particular regulated plant and then to divert a portion of, or all, the milk of such producers to a nonpool plant in another district where, by virtue of the location adjustment provisions, a different price level prevails under the order. In the absence of some minimum standard of delivery performance in connection with deliveries from farms to the District 1 plant, milk could be "diverted" which never was intended to be utilized to fulfill District 1 requirements and with respect to which no transportation cost to such district was incurred. For accounting and payment purposes such milk would be regarded as a receipt at a District 1 plant, where no location adjustment is deductible, and the handler would be credited in the pool with having paid producers the full District 1 minimum price, although the milk actually was received and utilized in another district where a lower minimum price obtains. Thus, it would be possible under present language for a handler to draw from the pool sufficient money to pay the producer of such milk a minimum price higher than that applicable under the order for the area where such milk actually was received by the handler.

Provision for the diversion of milk from regulated to unregulated plants without forcing the producers involved to lose their status as producers was adopted in the original order primarily to minimize the hauling necessary to move milk into manufacturing channels when the regulated plant lacked adequate manufacturing facilities to handle reserve milk supplies. Since location adjustments are necessary to reflect reasonable returns to the entire group of producers based on the value of the services required in moving milk to the principal markets covered by the order, diversion on the basis described in the preceding paragraph would jeopardize the proper distribution of such returns. Such adjustments are considered a basic part of the pricing structure for the supply area for the reasons set forth in this and in prior decisions on the Puget Sound order and should not be undermined by improper "diversions" of milk. It is concluded, therefore, that diversions to nonpool plants during any given month should be restricted, when more than one price area is involved, to milk delivered by the producer(s) whose individual shipments of milk have been received at the diverting plant on at least 20 days during such month, except that if this delivery requirement is met for the month of March, no such delivery requirement should be applicable to the producer's milk in the succeeding flush production months of April, May and June. If such requirements are not met, the dairy farmer whose milk is received at such fluid milk plant or country plant on at least 17 to 20 days during the month of diversion, with the one exception that if such delivery requirements is met in the month of March, diversions might be made without such restriction in the immediately following months of April, May and June.

In a decision of the Secretary dated September 10, 1953, official notice of which is taken, consideration was given to a revision of the conditions under which milk might be moved between regulated plants for manufacturing use. It was concluded in such decision that certain revisions of the transfer provisions should be made for a temporary period, pending further review in connection with the issues discussed in the present decision. An amendment to the order making such changes operative for the balance of 1953 was made effective October 1, 1953. After further consideration in connection with the other issues decided herein, it is now concluded, for the reasons set forth in the September 10 decision, that such changes will have continuing applicability beyond the end of 1953 and therefore should be readopted, with minor changes in language, for an indefinite period.

(7) Uniform prices for base milk and excess milk estimated by the market administrator on or before the 5th day of each month for the preceding month should not be used as the basis for handler payments to producers.

Producers proposed that handlers be required to make settlement with producers for milk on the basis of uniform prices for base and excess milk to be estimated by the market administrator on or before the 5th day of each month for the preceding month. In the event of variance between the estimated prices and the prices subsequently computed from the handlers' monthly reports of receipt and utilization, such variance would be taken into account by an adjustment to the prices computed for the next following month. At present the uniform prices for base and excess milk are computed and announced by the 13th day of each month for the preceding month.

Proponents contended that a hardship is incurred by the producer associations under procedure followed in making collections for milk since they find it necessary (a) to make two separate estimates of base and excess prices in billing customers on the 5th and 20th of the month for milk delivered during the half month immediately preceding such respective dates, and (b) to make a third, or final, billing involving adjustments of the prior billings on the basis of the base and excess prices announced by the market administrator. It was stated that if a price estimate by the market administrator could be used as grounds for settlement the third billing could be eliminated with a resulting saving under such collection procedure.

In adopting a payment plan of this kind it would be necessary, in the interest of establishing a basis for reasonably accurate estimates, to outline in the order the guides, or standards, by which such estimates would be made. The record indicates that to have an adequate basis for estimating the market administrator would need preliminary data concerning milk delivered by producers as base and excess milk and the uses of such milk by handlers. The testimony, however, does not indicate a means by which the market administrator could be supplied with such information without a requirement on handlers to file additional reports preliminary to their regular monthly reports. Proponents stated that the advantages to be gained by the cooperatives under the proposed provisions would not warrant additional handler reporting requirements. It perhaps is noteworthy here that as the result of the hearing held in March 1952, it was concluded in the decision of the Secretary issued November 13, 1952, that the date by which handlers are required to file regular monthly data on receipts and utilization should be set back from the 6th to the 8th day following the end of the month in which the milk was delivered in order to give cooperatives and handlers sufficient time to organize such data, particularly that relating to base and excess milk deliveries, for filing with the market administrator. Although the subject proposal has appeal the incurrence of a preliminary report by handlers would appear infeasible in the circumstances outlined. It is concluded that the proposed provision concerning payments for milk on the

basis of price estimates should not be adopted at this time.

tion and classification should be the same regardless of the form in which the milk

basis of price estimates should not be adopted at this time.

(8) The location adjustment applicable to milk utilized for certain Class II milk products in District 1 should not be eliminated with respect to milk received in Thurston County for such uses.

The present order provides for a location adjustment of 25 cents per hundredweight (a) to be charged handlers on milk originating in District 1 of the marketing area and used in specified Class II milk products, principally sweetened condensed milk, ice cream, cottage cheese and aerated cream, and (b) to be distributed to producers on milk delivered to plants in such district over and above deliveries of base milk. It was proposed that the 25 cent adjustment to handlers be eliminated with respect to milk received in Thurston County (District 1) for the designated Class II uses.

The proponent of the elimination of the Class II location adjustment for Thurston County milk is the operator of a manufacturing plant which engages primarily in the processing of milk for ice cream, sweetened condensed milk and butter but is not under order regulation. During the summer months milk is received at such plant from a regulated plant. Such milk customarily is manufactured into ice cream or sweetened condensed milk and in this circumstance the selling handler is accountable to the pool at the Class II price, adjusted by the location differential of 25 cents on Class II milk in District 1. The price which proponent pays the selling handler for the milk is arrived at by negotiation between the two parties. Proponent contends that the selling handler suffers hardship under the location adjustment provision, and that because of other provisions of the order it is not feasible for him to ship his excess supplies to any other manufacturing outlet.

Data in the record relating to the production and disposition of milk originating on farms located in District 1 of the marketing area indicate that in almost every month there is a deficit of production in such district to cover both the Class I utilization and the uses of Class II milk in such district to which the 25 cent location adjustment applies. The movement of substantial quantities of milk from Districts 2 and 3 to District 1 is necessary to fulfill the sum of such requirements even though the total production of milk throughout the milkshed has increased since the location adjustment on Class II milk was adopted in 1952. When milk is shipped into District 1 from plants in other districts for the Class II uses referred to, the handling and transportation charges applicable in connection therewith exceed the said location adjustment of 25 cents. When ungraded milk is purchased from farms within District 1 for such Class II uses, the effective pay prices to farmers usually are higher than the manufacturing price level for Districts 2 and 3 by more than 25 cents per hundredweight. It is to be noted also that the revised provisions adopted by this decision for the transfer of milk between regulated plants, and between regulated and unregulated plants, will facilitate the disposition by handlers of reserve supplies in District 1 to manufacturing outlets, including outlets located in the other districts. It appears from the evidence that this will make it possible for the selling handler referred to above to select from a wider choice of outlets, including some where the milk may be utilized in ways which will exempt it from the location adjustment.

Since District 1 is a deficit producing area the cost of transporting producer milk for the necessary market uses and reserves should be reflected in the relative returns to producers in the respective districts. There was no proposal to change the rate of adjustment now in effect. It is concluded that the location adjustment is reasonable and should not be changed at this time.

(9) The provisions under which the total quantity of milk in each class is computed should be revised.

The present order is silent as to whether nonfat milk solids received by a handler and utilized to fortify skim milk or skim milk drinks in Class I should be computed on the basis of the actual volume of such solids used or on the volume of their fluid skim milk equivalent. By administrative interpretation the actual quantity of nonfat solids added has been the basis of determining volume for classification purposes in connection with such fortified products. Although the record indicates that reconstituted skim milk or milk drinks are not being sold in the marketing area at present, the accounting practice to be followed in the event such items are introduced is related to the problem at hand and the conclusions reached apply equally to the classification of products made from reconstituted skim milk. There appears to be no contention concerning the propriety of classifying both fortified and reconstituted fluid products as Class I milk. The question at issue relates only to the method of computing the volume of skim milk included in such products to which the payment required by § 925.70 (a) (6) applies. It was proposed that the order might be clarified in this respect through revision of the definition of "other source milk." However, it appears more appropriate, from a drafting standpoint, to include more specific language covering the problem in the provisions under which the market administrator is required to compute the total amounts of skim milk and butterfat in each class.

When the butterfat content of any Class I product is increased by the handler above the basic test of 4.0 percent, the added butterfat from producer milk is priced on the basis of the butterfat differential at the same rate as the butterfat represented by the basic butterfat test, but no basis was presented on the hearing record whereby it would be possible or feasible to adjust the Class I price applicable to the skim milk component of a Class I milk product on the basis of a precise determination of its solids-not-fat content. Nevertheless, to provide equal costs per hundredweight to handlers for producer milk in accordance with its use and to prevent jeopardy to producer returns from Class I milk, a price adjustment should be made in the case of sales in such class in the form of products from which part of, or all, the original water has been removed and not replaced.

The record discloses that nonfat dry milk solids utilized to fortify Class I milk products are required to come from Grade A milk and are paid for on the basis of the Class II price if derived from milk covered by the order or at price for manufacturing milk, closely in line with the Class II price, if derived from milk processed at a non-regulated plant. The additional solids utilized increase the value and salability of the end product. In the absence of evidence to the contrary, it must be assumed that the value of each pound of nonfat milk solids utilized by addition to, or as, a Class I product has a value to the handler the same as every other pound contained therein. Neither the form in which, nor the source from which, such solids are obtained alters their value to the handler for this purpose and they may not be distinguished on the basis of cost of production, need for regular supplies, sanitary requirements, seasonality of production, or value to consumers. Since the Class I price provisions are designed to encourage producers to deliver an adequate and dependable supply of milk in all seasons, the returns to producers for one portion of Class I milk should not be reduced below the level of the remaining portion disposed of in such class. The effect of computing the value of the added nonfat solids on actual weight rather than on a skim milk equivalent basis, in a Class I product, is to alter the accounting method for such solids as compared with an equivalent quantity of such solids contained in skim milk in fluid form which is utilized in the same product, in another Class I product, or in Class II milk. The actual weight basis of accounting for the added solids used in fortified skim milk (Class I) has the effect, from a pricing standpoint, of retaining in Class II milk a portion of the producer milk utilized in the production of such Class I product even though it represents the only end use resulting from the producer milk involved. This is equivalent to granting the handler a price reduction with respect to a portion of his Class I milk.

Producer and handler representatives testifying at the hearing recognized the logic of the "skim milk equivalent" basis of accounting in the event nonfat milk solids are used at some future date to produce reconstituted milk or milk drinks as a means of preventing price differences among handlers and to preserve the integrity of Class I pricing. The relative effects of solids used in fortified skim milk and in reconstituted skim milk on handlers' costs and on the total returns to producers from Class I milk are, however, merely effects of degree. There are no distinguishing differences in the end products or as to the necessary supplies of producer milk which substantiate a separate method of accounting for the extra solids used in fortifying a Class I milk product. It is concluded that the relationship between other source milk and producer milk now provided in the order with respect to allocation and classification should be the same regardless of the form in which the milk solids are obtained for use in Class I, i. e., receipts of other source concentrated skim milk products, including condensed skim milk or nonfat dry milk solids, should be considered as equivalent in volume to the skim milk in fluid form which would be required in the production of such products.

(10) The definition of "producer-handler" should not be changed.

A proposal was made to review the definition of producer-handler to determine whether persons in this category should be regulated more completely by the order. It was pointed out in this connection that by permitting a producer-handler to purchase milk from other producer-handlers or from uninspected sources the present order may enable him to gain competitive advantage over regular handlers. It was suggested on the record that consideration might be given to the regulation of producer-handlers in the same manner as other handlers and to include their milk in the pool as producer milk, or, in the alternative, to apply a charge at the difference between the Class I and Class II prices on any milk received and used as Class I milk by the producer-handler other than the sum of his own farm production and any amounts received from regulated plants.

Producer-handlers who do not purchase milk from other producers were granted exemption from the pricing and payment provisions of the original Puget Sound order, and have continued to be exempt. Such persons are required, however, to make reports of their receipts and uses of milk and milk products at frequent intervals as requested by the market administrator. It was concluded in the original decision on the order that full regulation of producer-handlers would not assist materially in achieving the objectives of the regulation.

The present record does not disclose a marketing problem caused by the purchase of "other source milk" by producer-handlers. The testimony indicates that no producer-handler is handling other source milk at the present time. If he purchases and sells milk in the marketing area which has been obtained from uninspected farms, the producer-handler takes the risk of violating applicable health regulations. There appears to be no apparent danger that producer-handlers will expand operations to the disadvantage of regulated handlers on the basis of such milk. If a producer-handler purchases milk from a handler under the order the milk is accounted for to the pool at the Class I price. If he receives milk from another producer-handler for resale he does not increase the total quantity of milk to which exemption has been granted. The latter type of purchase has been only occasional and no instances of competitive disadvantage to handlers resulting therefrom were cited.

To consider a producer-handler as a handler for any month in which he purchases milk from another producer-handler would add administrative complications and increased reporting requirements which do not appear justified by the evidence. To go further at this time and consider producer-handlers as producers with respect to their own farm production of milk also would present administrative problems out of line with any expected benefits to either handlers or other producers supplying the market. It is concluded that any change in the present status of producer-handlers under the regulation should await further developments which indicate that practices on their part are causing disturbance to the orderly marketing of milk by producers generally.

(11) The Class II location adjustment provision should be made more specific concerning its application to milk used in the several varieties of cheese processed from producer milk.

Cheddar cheese is a Class II milk product not subject to the Class II location adjustment for District 1 plants. In view of the manufacture and sale of other types of hard molded cheese made from producer milk it has been necessary for the market administrator to interpret the location adjustment provisions as to its application to milk utilized in several varieties of cheese. The term "cheddar cheese" in such provision has been deemed to include other hard molded cheeses, such as Colby and Monterey Jack, on the basis that they might be described as "cheddar-type." It was proposed at the hearing that such interpretation be reviewed to determine whether the order should be clarified concerning the application of location adjustments to milk utilized in various types of cheese.

The record indicates that no dissatisfaction has occurred with respect to past interpretation of order provisions in this respect and that such interpretation represented the proper basis for application of the adjustments. The primary question at hand is the method to be used, as a matter of clarity, to describe adequately the kinds of hard molded cheese which should be exempt from the location adjustment on Class II milk. It appears that this can be done satisfactorily by stating that the exemption covers all cheeses except the following, to which the location adjustment does apply: "Baker's cheese", "pot cheese", "cottage cheese (including creamed cottage cheese)", "cream cheese", and "neufchatel cheese." Such named cheeses should be subject to the location adjustment even though sold with ingredients added such as shredded vegetables, chives, etc., or under trade names which do not refer to their cheese content. It is concluded that the language adopted will clarify the location adjustment provision and make it possible for the market administrator to determine precisely how much milk made into various cheeses is exempt from the adjustment without the necessity for a broad interpretation of language.

(12) The rate of payment provided by § 925.70 of the order as to "other source milk" classified as Class I milk should be continued without change.

The order now provides (§§ 925.8 and 925.9) for the designation of "fluid milk plants" and "country plants". The purpose of these designations is to indicate the sources of milk which are fully regulated under the order. Sections 925.45 and 925.70 (a) (6) provide for the integration into the regulatory plan of milk other than that which is fully regulated (i. e. "other source milk"). The former section provides for the allocation, in the classification system, of other source milk while the latter section provides for certain payments to be made into the producer-settlement fund on other source milk which is in excess of that allocated to Class II milk.

The provisions for designating the sources of fully regulated milk and the integration into the regulatory plan of other source milk should be continued in the order unchanged.

At the hearing, a review of the experience with the provisions on plant definitions and the payments on other source milk was made. This review was carried out because it seemed desirable to test the operations of these provisions which were incorporated in the order when it was originally formulated in the light of experience gained during the actual operation of the regulatory program in this market.

All of the Grade A milk produced for consumption in fluid form in the State of Washington is subject to uniform state-wide sanitary standards administered by the State government. As a consequence of this uniform code of sanitary requirements, milk produced under the code anywhere in the State of Washington, is eligible from a sanitation standpoint for sale in the Puget Sound marketing area. Although all Grade A milk produced in the State is eligible for sale in the marketing area, the fact is, of course, that all of the milk so produced does not in fact constitute the regular and normal supply of milk for the regulated marketing area. For this reason, it is necessary to develop standards which distinguish that Grade A milk which is in fact the normal and regular supply for the Puget Sound area from that Grade A milk which is not a part of the regular and normal supply, so that regulation by the order may be imposed fully on that milk which is the regular and normal supply for the area while with respect to that milk which is not a part of such supply, the regulation may be applied only to the extent necessary to integrate the other source milk into the regulatory scheme. Since the sanitation standards for Grade A milk are uniform throughout the State, it is not possible to identify the regular and normal supply for this marketing area on the basis of distinctive sanitation requirements.

Neither is the shipment of milk to the marketing area for Class I utilization a practical basis for identifying the milk which should be fully regulated under the order. If any small, incidental, or accidental shipment of milk into the marketing area were to bring all of the milk at the plant from whence such shipment was made under total regulation, great hardship could be caused to the operator of such plant and to the farmers delivering milk to such an operator. Because of the uniformity of

health requirements throughout the State, small quantities of milk are, in fact, disposed of in the regulated marketing area as Class I from plants which are not normal or regular sources of supply for the marketing area. Moreover, the operators of the plants from which such shipments arise may not wish to bring their plants under total regulation. There are many situations in which plant operators may find it economical or desirable to make shipments of small quantities of milk to the marketing area and in which it is neither necessary nor desirable in terms of effective regulation to bring the operators of such plants fully under the regulation. For instance, a plant which is associated with a market outside of the Puget Sound area may find it advantageous to ship milk to a plant regulated by the order in order to have such milk converted into manufactured dairy products. It is quite possible, however, through misunderstanding, or from errors of estimating the utilization of milk, for milk which was intended for utilization in Class II products to be assigned a Class I classification. If through such accident or misunderstanding a plant were placed completely under regulation, considerable hardship, unnecessary to effective regulation, might result. For this reason, it is not practical nor desirable to place a plant totally under regulation merely because a small quantity of milk shipped by it to the market finds it way into a Class I utilization.

The Puget Sound order provides for a market-wide pool. Under this pooling plan, handlers whose proportion of utilization in Class I is greater than the market as a whole make payments into an equalization fund and those handlers whose proportion of utilization in Class I is less than the average for the market receive payments out of the equalization fund. This method of payments into and out of the equalization fund is the essential mechanism for providing uniformity of payments to farmers irrespective of the handler to whom they deliver their milk and provision for equalized payments to farmers is necessary to the maintenance of stable and orderly marketing conditions in the Puget Sound area.

Because handlers with less than the market average proportion of milk in Class I may draw payments out of the producer-settlement, or equalization, fund there is an advantage to any plant operator who has less than the market-wide average proportion of milk in Class I to place himself under regulation in order to obtain these payments and, thereby, make it possible for him to pay the uniform price established under the order to his producers. The smaller the plant operator's proportion in Class I, the greater is the advantage of regulation to him. Under these circumstances, plants which are engaged primarily in the manufacture of milk into dairy products, rather than as suppliers of Class I milk to the marketing area, will attempt to place their plants under regulation for the sole purpose of obtaining payments out of the equalization fund. The result of this, however, will be to reduce the returns to those farmers whose milk actually constitutes the regular source of supply of Class I milk for the marketing area.

It is necessary for the reasons stated, therefore, that that milk which in fact constitutes the regular and normal sources of supply for the marketing area be distinguished from other milk which might enter the marketing area. Sections 925.8 and 925.9 of the order are designed to identify the regular and normal sources of supply for the Puget Sound marketing area. These sections provide that regulated plants shall be of two kinds. First is the "fluid milk plant", and it is defined as a plant located within the marketing area from which certain Class I items are disposed of in the marketing area. Second is a "country plant", from which Grade A milk, in specified percentages, is supplied to a fluid milk plant. Under the definition of country plant, any plant no matter where located may bring itself under regulation by performing in the manner required, and any plant may relieve itself of regulation when it no longer operates in a way that brings it within the scope of these two sections of the order. Under these circumstances, the decision as to whether a plant will be fully regulated under the order or will not be subject to regulation is determined by the decision of the plant operator himself.

Since the order provides for the identification of that milk which is subject to total regulation under the order, the possibility remains that some milk (i. e., other source milk) will be disposed of in the marketing area as Class I which is not subject to total regulation. In fact since the effective date of the order, minor quantities of other source milk have been disposed of in each month as Class I milk in the marketing area either by delivery to a regulated plant or by sale by the outside plant operator directly to stores or to other consumption outlets such as hotels, restaurants, or homes. During that period of 1951 when the order was effective, other source milk in Class I averaged in the neighborhood of 175,000 pounds per month. The amount of other source milk used as Class I has declined steadily however, and in the first six months of 1953 it averaged less than 50,000 pounds per month; although in June the figure was over 114,000 pounds. This other source milk was subject to the compensation payments provided for in § 925.70 (a) (6).

The payments on other source milk provided by this section should be continued without change. The provision requires that on all other source milk classified as Class I, a payment shall be made into the equalization fund at a rate equal to the difference between the Class I price and the Class II price. Payments at this rate are necessary to maintain the integrity of the pricing and pooling provisions of the order.

Essentially all of the other source milk utilized as Class I in the marketing area has been of Grade A quality and, therefore, similar in quailty to that regularly disposed of in the marketing area for Class I. It was produced as part of a supply intended primarily to meet the demand for milk for fluid consumption (or the equivalent of Class I milk uses under the order) in some area in the State of Washington other than the area regulated by this order but it was not used for such purposes in the area for which it was produced. It was, instead, milk which became surplus to the needs for milk for fluid disposition in the area for which it was produced. If the plant operator had not found a sale for such milk within the regulated marketing area, it would have been necessary for him to convert the milk into a manufactured milk product. The most likely surplus disposition of this other source milk would have been as butter and nonfat dry milk solids.

Its value, therefore, to the plant operator was a surplus milk value. The Class II price for milk under the Puget Sound order is based on the value of milk when it is converted into butter and nonfat dry milk solids and this is the price which regulated handlers are required to pay for milk when they convert it into these two products. The Class II price, therefore, represents an accurate and fair representation of the value to the receiving plant operator of surplus milk which is disposed of as other source milk for Class I purposes in the marketing area.

If unregulated plant operators were allowed to dispose of surplus milk for Class I purposes in the regulated marketing area without some compensating, or neutralizing provision in the order, it is clear that the disposition of such milk, because of its price advantage relative to fully regulated milk, would displace the fully regulated milk in Class I uses in the marketing area. The plan of Congress, as contemplated under the Agricultural Marketing Agreement Act of 1937, of returning minimum uniform prices to the producers for the regulated marketing area, would be defeated. Moreover, inefficiencies in the marketing of milk would be encouraged, for the regulated market would obtain its Class I milk not from the regular and normal sources of supply for the market but from other sources of supply generated solely as a result of the price advantage created for unregulated milk by the regulation itself. Providing for some method of compensating for, or neutralizing the effect of, the advantage created for unregulated milk therefore is an essential and necessary provision of this order. Since the value for Class I milk in a regulated market is established at the level of the Class I price provided for in the order and since the true value of other source milk when disposed of in the marketing area is the Class II value, a payment computed as the difference between the Class I price and the Class II price will remove the advantage which other source milk would have when disposed of for Class I purposes in the marketing area. For this reason, the present payments required under § 925.70 (a) (6) should be continued unchanged.

Cross-questioning at the hearing raised the question of whether a payment computed as the difference between the Class I price and price actually paid by a handler for other source milk of Grade A quality would not be an adequate means of removing the advantage which inheres in the Class I use of such other source milk. Under the circumstances which prevail in the Puget Sound marketing area, a handler normally would come into possession of this type of other source milk by purchasing it from an unregulated milk plant. The milk which such a handler receives under these circumstances is at a different stage in the marketing process than is the milk which is priced under the order. Order prices apply to milk as received at the first plant from individual farmers. The price paid by a handler for other source milk applies to milk which has already been received at the first plant, weighed, tested, cooled and placed in a transportation conveyance. Obviously, the handler generally will pay more for other source milk under this condition than he would for milk received directly from farmers, for the plant operator who first receives the milk from farmers must necessarily obtain a markup if he is to be recompensed for the services which he has performed on the milk. In some situations, the purchase of other source milk might be made from a plant operated by the same company as the regulated plant. Thus, the transaction would be primarily a matter of bookkeeping within the same company and it would be advantageous to the company if the price for the milk were to be stated as the Class I price. For by this means, all compensatory payments into the equalization fund would be avoided. Even between plants controlled by different companies, the advantage of showing that the price at which the milk was exchanged was at least as high as the Class I price would give great impetus to the effectuation of paper transactions showing a price at least equal to the Class I price while undisclosed payments were made in order to avoid the imposition of the compensatory payments into the equalization fund. Under these circumstances, it would be impractical from an administrative standpoint to provide for a payment the actual amount of which would be within the control of parties to the transaction. It is essential instead that the payment be computed on an objective basis and that it be equal for all handlers for similar transactions. The present method of computing the payments conforms with these requirements and the alternative methods raised in discussion fail to do so.

The evidence in the record also touched upon the possibility of providing for payments based on the difference between the price paid by the first receiver to farmers and the Class I price. It is clearly shown however that this method would be impractical also. The payment plans which are used by unregulated operators include such varying practices as paying uniform prices on a straight utilization basis, paying on a base and excess plan, paying irregular and nonuniform premiums, absorbing transportation charges, and paying on a variety of butterfat and location differentials. This wide variety of payment plans would render impossible an accurate ascertainment of the actual prices paid to farmers by the first receiver. But what is equally as important, as shown above, is that the price actually paid to farmers does not determine the true value of other source milk disposed of in the marketing area. The true value for such milk, irrespective of the price paid for it to farmers, is the Class II value because other source milk disposed of in a marketing area is in fact the surplus of milk produced primarily for sale in an area outside of the regulated marketing area. Hence, although other suggestions for computing the rate of the compensatory charge have administrative and other difficulties inherent in them in the final analysis even if they were administratively feasible, they would not be fully effective in removing the advantage which attaches to other source milk when it is used as Class I milk in the regulated marketing area. Only the difference between the Class I price and the Class II price accurately reflects this advantage and consequently only this rate will be fully effective in dealing with the problem of integrating other source milk (when used as Class I) into the regulatory plan.

It may be noted also that other source milk not of Grade A quality as well as that of Grade A quality is received and handled in a number of plants subject to the regulation. Although from the standpoint of health standards it is not legal to use such milk for Class I uses except under emergency dispensation granted by the applicable health authorities, the possibility remains that this grade of milk may find its way at times into fluid, or Class I, products. If this occurs the same rate of payment should apply to such milk since its value is established by a lack of eligibility on a Grade A standard, for regular use as Class I milk. This characteristic stamps it the equivalent, from a use standpoint, as surplus Grade A milk, and for the same general grounds as are set forth above with respect to the payment applicable to other source milk of Grade A quality, a similar payment should apply.

(13) The marketing service provision should be modified.

Certain language should be added to the provision which deals with the designated marketing services to be performed by the market administrator for producers who are not members of a qualified cooperative association performing such services. At present the order provision requires interpretation as to the incidence of responsibility for marketing services in the case of a cooperative which performs some but not all of the specified services. It is concluded that proper application of the statute requires a cooperative association, otherwise qualified, to perfom not a portion, but all, of the specified services in order to qualify under the provision and to make unnecessary the performance of the services by the market administrator on behalf of producer members of such cooperative. The addition of the language adopted should clarify the order in this respect.

(14) Certain revisions of order language should be made for administrative purposes.

The reference to producer shrinkage in § 925.44 (b) (1) of the order should be revised to refer to the portion of such shrinkage which is classified as Class II milk under § 925.41 (b) (4). This will result in more precise language but will not change the administrative application of the present provisions. For similar reasons, a revision of language is appropriate in § 925.70 (a) relating to the computation of the value of milk for each handler. Such provision will be clarified if reference is made to the fact that the computation provided for therein should be made separately for each plant operated by the handler.

In the amendments effective December 1, 1952 a provision was added to divide any "overage" in the handler's plant on a prorata basis between producer milk and other source milk. Prior to that date all overage had been allocated to producer milk and had been charged for at the applicable class price. The amendment eliminated the charge on the portion allocated to other source milk. Section 925.70 (a) (6) provides that if a handler uses other source milk in Class I he must pay the difference between the Class I and Class II prices on the amount so used. In the event any overage is allocated to other source milk and is classified as Class I milk, it is not clear that § 925.70 (a) (6) applies to the overage as well as to any other source milk subject to such provision. The addition of a reference to overage will clarify the application of the provision.

The December 1, 1952, amendments also provided that skim milk or butterfat transferred from a fluid milk plant or country plant located in District 1 or in the counties of Kitsap and Mason to another fluid milk plant or country plant similarly located should be allocated to Class II milk after assigning thereto any other source milk at the latter plant. In view of the necessity in recent months for handlers to make transfers and diversions of producer milk originating in District 1 to plants located in present District 2, it is appropriate to revise the applicable transfer provisions to indicate the classification procedure to be followed in the event of such movements. The necessity for a clarification of language arises because of the fact that at District 1 plants a location adjustment applies to milk used for certain products included in Class II milk whereas no location adjustment is applicable at District 2 plants. When an inter-district transfer is made the use assignment of the milk transferred determines whether the location adjustment should apply. The provision adopted should permit such transfers to take place without penalty to the handlers involved.

The section of the order under which monthly reports of receipts and utilization of milk are required of handlers should be made more specific to affirm the administrative practice of requiring the handler to submit separate reports for each of his plants rather than a combined report for all plants. Proper administration of the order necessitates a breakdown of information on the re-

ceipts and uses of milk plant by plant where a handler operates more than one plant covered by the regulation. It is concluded that the language adopted will clarify the reporting provisions.

No objections to these administrative charges were raised at the hearing and it is concluded that the appropriate language changes should be made.

*Rulings on briefs.* Briefs were filed on behalf of a substantial number of producers and for certain handlers who would be subject to the proposed marketing agreement and to the order, as amended, and as hereby proposed to be further amended. The briefs contained suggested findings of fact, conclusions, and arguments with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein, the requests to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the findings and conclusions in this recommended decision.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Recommended marketing agreement and order, as amended.* The order, as amended, and as proposed below to be further amended, is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. A revised marketing agreement is not included in this recommended decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as proposed to be amended as follows:

1. Delete the last two sentences in § 925.6 *Definition of "marketing area"* and substitute therefor the following: "'District No. 1' of the marketing area shall include that part of the marketing area lying within the counties of King, Pierce, Snohomish, Thurston, and Grays Harbor. 'District No. 2' of the marketing area shall include that part of the marketing area lying within Whatcom County. 'District No. 3' of the marketing area shall include that part of the marketing area lying within the counties of Lewis and Pacific, and 'District No. 4' of the marketing area shall include that part of the marketing area lying within Skagit County."

2. Delete § 925.13 and substitute therefor the following:

§ 925.13 *Producer milk.* "Producer milk" or "milk received from producers" means milk qualified as described in § 925.12 and either received directly from a farm at a fluid milk plant or country plant or caused to be diverted by a handler for his account from such a plant to a nonpool plant: *Provided*, That if any of the following conditions is met, milk so diverted shall be deemed to have been received by the diverting handler at the plant from which is was diverted:

(a) The milk was diverted either to a nonpool plant not located in the marketing area or to a nonpool plant located in the same district of the marketing area as the plant from which the diversion was made; or

(b) The diversion was a type not referred to in paragraph (a) of this section and the milk involved was produced by a producer from whom milk was received on not less than 20 days during the same month at the plant from which the diversion was made, except that if such 20-day delivery requirement is met for the month of March of any year it need not be met for the next following April, May or June.

3. Delete § 925.18 and substitute therefor the following:

§ 925.18 *Base milk.* "Base milk" means milk delivered by a producer during the month which is not in excess of (a) his daily base computed pursuant to § 925.60 (a) multiplied by the number of days of delivery in such month, or (b) his base computed pursuant to § 925.60 (b): *Provided*, That with respect to any producer on "every-other-day" delivery to a fluid milk plant or country plant, the days of non-delivery shall be considered as days of delivery for the purposes of this section and of § 925.60 (a).

4. Delete the language of § 925.30 preceding paragraph (a) of such section and substitute therefor the following:

§ 925.30 *Monthly reports of receipts and utilization.* On or before the 8th day of each month and in the detail and on forms prescribed by the market administrator, each person who is a handler pursuant to § 925.15 (a), except a producer-handler, shall submit to the market administrator a separate report for each of such handler's fluid milk plants, country plants, and plants where milk or milk products subject to payments required under § 925.70 (b) were handled, and each cooperative association which is a handler pursuant to § 925.15 (b) shall submit to the market administrator a report with respect to milk diverted on its account, containing the following information for the preceding month:

5. Delete § 925.44 and substitute therefor the following:

§ 925.44 *Interplant movements.* Skim milk and butterfat moved as any of the items specified in § 925.41 (a) (1) from a fluid milk plant or country plant to another plant either by transfer or by diversion under conditions of the proviso in § 925.13 shall be assigned (separately) to each class, in the following manner:

(a) From a country plant or fluid milk plant to a fluid milk plant: As Class I milk to the extent Class I milk is available at the transferee plant, subject to the following provisions:

(1) In the event the quantity transferred exceeds the total of receipts from producers and other handlers at the transferor plant, such excess shall be assigned last to the Class I available at the transferee plant;

(2) If more than one transferor plant is involved, the available Class I milk shall be assigned to the transferor plants in the following order:

(i) To fluid milk plants located in District No. 1;

(ii) To country plants located in District No. 1 or in the counties of Kitsap and Mason;

(iii) To country plants and fluid milk plants located in District No. 4; and

(iv) To country plants and fluid milk plants not located in District No. 1, District No. 4, or in the counties of Kitsap and Mason.

(3) If Class I milk is not available in amounts equal to the sum of the quantities to be assigned pursuant to subparagraph (2) of this paragraph, the transferee handler may designate, within each of the four categories of plants listed in such subparagraph, the plant to which the available Class I milk shall be assigned;

(4) If at a fluid milk plant any receipts of skim milk or butterfat from any fluid milk plant(s) or country plant(s) located in District No. 1 or in the counties of Kitsap or Mason are assigned to Class II milk, they shall be allocated to the uses stated in § 925.54 (a) (1) insofar as such uses are available at the transferee plant after allocating to such uses the other source milk at such plant; and

(5) Notwithstanding the prior provisions of this paragraph, any such skim milk and butterfat caused to be moved in bulk by a handler during any month from any fluid milk plant or country plant either by transfer or without being received therein to a fluid milk plant in which facilities are maintained and used during the same month to receive milk or milk products required by applicable health authority regulations to be kept physically separate from milk qualified as described in § 925.12 shall be deemed to have been transferred by such handler to a country plant and shall be classified in accordance with the provisions of paragraph (b) of this section.

(b) From a country plant or fluid milk plant to a country plant: As Class II milk subject to the following conditions:

(1) The skim milk or butterfat so assigned to Class II milk shall be limited to the amount thereof remaining in Class II milk in the transferee plant after the subtraction pursuant to § 925.45 (b) (2) of other source milk at such plant and after the subtraction of producer shrinkage classified as Class II milk pursuant to § 925.41 (b) (4), and any additional amounts of such skim milk or butterfat shall be assigned to Class I milk;

(2) If more than one transferor plant is involved, the available Class II milk shall be assigned to the transferor plants in the following order:

(i) To country plants and fluid milk plants not located in District No. 1, District No. 4, or in the counties of Kitsap and Mason;

(ii) To country plants and fluid milk plants located in District No. 4;

(iii) To country plants located in District No. 1 or in the counties of Kitsap and Mason; and

(iv) To fluid milk plants located in District No. 1.

(3) If Class II milk is not available in amounts equal to the sum of the quantities to be assigned pursuant to subparagraph (2) of this paragraph, the transferee handler may designate, within each of the four categories of plants listed in such subparagraph, the plant to which the available Class II milk shall be assigned;

(4) If at a country plant any receipts of skim milk or butterfat from any fluid milk plant(s) or country plant(s) located in District No. 1 or in the counties of Kitsap and Mason are assigned to Class II milk they shall be allocated to the uses stated in § 925.54 (a) (1) insofar as such uses are available at the transferee plant after allocating to such uses the other source milk at such plant; and

(5) Notwithstanding the prior provisions of this paragraph, any such skim milk and butterfat caused to be moved in bulk by a handler during any month from any fluid milk plant or country plant without being received therein to a country plant in which facilities are maintained and used during the same month to receive milk or milk products required by applicable health authority regulations to be kept physically separate from milk qualified as described in § 925.12 shall be deemed to have been transferred by such handler to a country plant and shall be classified in accordance with the provisions of this paragraph.

(c) From a country plant or fluid milk plant to a nonpool plant:

(1) As Class I milk if the transfer is to a nonpool plant located outside the marketing area or to the plant of a producer-handler, except as provided for in subparagraph (2) of this paragraph.

(2) As Class II milk if the transfer is to a nonpool plant located in the marketing area or within any of the counties of Clallam, Jefferson, Grays Harbor, Island, Kitsap and Mason, in the State of Washington, which is not engaged in the distribution of milk for consumption in fluid form: *Provided*, That if such nonpool plant disposes of skim milk or butterfat in any of the forms specified in § 925.41 (a) (1) to any other nonpool plant distributing milk in fluid form which is not located in the marketing area, such disposition up to the quantity of producer milk transferred to the first nonpool plant shall be classified as Class I milk: *Provided further*, That if the preceding proviso does not apply the transferred quantity shall be allocated to uses other than those covered by § 925.54 (a) (1) to the extent that such other Class II milk uses are available at such nonpool plant: *And provided also*, That if the market administrator is not permitted to audit the records of such nonpool plant for the purpose of use verification, the entire transfer shall be classified as Class I milk.

6. Delete § 925.45 (a) and substitute therefor the following:

(a) Correct for mathematical and for other obvious errors the monthly report submitted by such handler and compute the total pounds of skim milk and butterfat in each class: *Provided*, That when nonfat milk solids derived from nonfat dry milk solids, condensed skim milk, or any other product condensed from skim milk, are utilized by such handler either (1) to fortify (or as an additive to) fluid milk, flavored milk, skim milk or any other milk product, or (2) for disposition in reconstituted form as skim milk or a milk drink, the total pounds of skim milk computed for the appropriate class of use shall reflect a volume equivalent to the skim milk used to produce such nonfat milk solids;

7. Delete in § 925.52 (a) the figure "1.25" and substitute therefor the figure "1.2."

8. Delete § 925.53 and substitute therefor the following:

§ 925.53 *Location adjustments to handlers on Class I milk.* In computing the value of each handler's milk pursuant to § 925.70 the following location adjustments shall be credited with respect to each hundredweight of skim milk and butterfat, respectively, received and classified as Class I milk: 50 cents at any plant located in Clallam County or Jefferson County; 20 cents at any plant located in District No. 4; and 40 cents at any other plant not located in District No. 1 or in the counties of Kitsap and Mason.

9. Delete § 925.54 (a) and substitute therefor the following:

(a) Compute the sum (in pounds) of: (1) The total utilization at such plant (including any disposition of skim milk and butterfat from such plant for similar uses at nonpool plants) of skim milk and butterfat, respectively, in evaporated milk in hermetically sealed cans, butter, nonfat dry milk solids, powdered whole milk, all cheeses except "baker's," "pot," cottage, cream and neufchatel, and shrinkage allowable as Class II milk pursuant to § 925.41 (b) (4) and (5), and (2) the total quantity of skim milk and butterfat transferred to other fluid milk plants and country plants located in District No. 1 or in the counties of Kitsap and Mason and allocated to the uses specified in subparagraph (1) of this paragraph (as provided in § 925.44 (a) (4) and (b) (4);

10. Delete § 925.60 (a) and (b) and substitute therefor the following:

(a) The daily base of each producer whose milk was received by a handler(s) on not less than one hundred twenty (120) days during the months of August through December, inclusive, shall be an amount computed by dividing such producer's total pounds of milk delivered in such five-month period by the number of days from the date of his first delivery to the end of such five-month period. The base so computed, which shall be recomputed each year, shall become effective on the first day of February next following and shall remain in effect through the month of January of the next succeeding year.

(b) Any producer who is not eligible to receive a base computed pursuant to paragraph (a) of this section, shall have, beginning with February 1954, a monthly base computed by multiplying his deliveries to a handler(s) during the month by the appropriate monthly percentage in the following table:

| | | | |
|---|---|---|---|
| January | 80 | July | 55 |
| February | 75 | August | 75 |
| March | 65 | September | 90 |
| April | 55 | October | 90 |
| May | 45 | November | 90 |
| June | 50 | December | 90 |

11. Delete § 925.61 and substitute therefor the following:

§ 925.61 *Base rules.* The following rules shall be observed in determination of bases:

(a) A base may be transferred upon written notice to the market administrator on or before the last day of the month of transfer, but under the following circumstances only:

(1) Upon the death, retirement or entry into military service of a producer, the entire base may be transferred to a member (or members) of his immediate family who continues to supply producer milk from the same farm; or

(2) If a base is held jointly and such joint holding is terminated the entire base may be transferred as a unit to one of the joint holders or to a new joint holding in which at least one of the original joint holders is a participant.

(b) A producer who ceases deliveries to a fluid milk plant or country plant for more than 45 days shall lose his base if computed pursuant to § 925.60 (a) and if he resumes deliveries to such a plant he shall be paid on a base determined pursuant to § 925.60 (b) until he can establish a new base under § 925.60 (a) to begin the next February 1.

(c) By notifying the market administrator in writing on or before the 15th day of any month, a producer holding a base established pursuant to § 925.60 (a) may relinquish such base by cancellation, and effective from the first day of the month in which notice is received by the market administrator until the next February 1 such producer's base shall be computed in the manner provided by § 925.60 (b).

(d) As soon as bases computed by the market administrator are allotted, notice of the amount of each producer's base shall be given by the market administra-

tor to the handler receiving such producer's milk and to the cooperative association of which the producer is a member. Each handler, following receipt of such notice, shall promptly post in a conspicuous place at each of his plants a list or lists showing the base of each producer whose milk is received at such plant.

(e) If a producer operates more than one farm he shall establish a separate base with respect to producer milk delivered from each such farm.

(f) Only producers as defined in § 925.12 may establish or earn a base pursuant to the provisions of § 925.60, and only one base shall be allotted with respect to milk produced by one or more persons where the land, buildings, and equipment used are jointly owned or operated.

12. Delete that portion of § 925.70 (a) prior to subparagraph (1) of such paragraph and substitute therefor the following:

(a) Except as provided in paragraph (b) of this section, the total value of milk received during any month at each plant by each handler, including a cooperative association, shall be a sum of money computed by the market administrator as follows:

13. Delete § 925.70 (a) (6) and (b) and substitute therefor the following:

(6) Add, with respect to other source milk (including overage allocated to other source milk) received at each fluid milk plant and country plant of such handler in excess of the total volume of his Class II milk (except allowable shrinkage) at such plant, an amount computed by multiplying the hundredweight of such other source milk by the difference between the Class I milk and Class II milk prices adjusted, respectively, by the butterfat differentials provided in § 925.52 (based on the butterfat test of such other source milk), and in the case of a fluid milk plant or country plant not located in District No. 1, or in the counties of Kitsap or Mason, such difference shall be reduced as follows: 20 cents at any such plant located in District No. 4; 50 cents at any such plant located in Clallam County or Jefferson County; and 40 cents at any other plant not located in District No. 1 or in the counties of Kitsap or Mason.

(b) The value of milk of each handler at any plant where only other source milk was received and from which, during the month, some other source milk was disposed of within the marketing area as Class I milk pursuant to § 925.41 (a) (1) shall be a sum of money computed by the market administrator by multiplying the hundredweight of such other source milk so disposed of by the difference between the Class I milk and Class II milk prices adjusted, respectively, by the butterfat differentials provided in § 925.52 (based on butterfat test of such other source milk), and, in the event disposition within the marketing area was only within Districts Nos. 2, 3, or 4, such difference shall be reduced by 40 cents, 40 cents, and 20 cents per hundredweight, respectively.

14. Delete § 925.80 (b) and substitute therefor the following:

(b) On or before the 17th day after the end of each month each handler shall pay to each cooperative association which operates a fluid milk plant or country plant, for skim milk and butterfat received from such cooperative association during such month, an amount of money computed by multiplying the total pounds of such skim milk and butterfat in each class (pursuant to § 925.41) by the class price taking into account any location adjustment, as provided by § 925.53 and 925.54, applicable at the plant at which payment for such skim milk and butterfat is required under the provisions of § 925.70.

15. Delete § 925.81 and substitute therefor the following:

§ 925.81 *Location adjustments to producers.* In making payments to producers pursuant to § 925.80 (a) (1) the following adjustments for location are applicable:

(a) Deductions may be made per hundredweight of base milk received from producers, as follows: 50 cents at any plant located in Clallam County or Jefferson County; 20 cents at any plant located in District No. 4; and 40 cents at any other plant not located in District No. 1 or in the counties of Kitsap and Mason.

(b) 25 cents per hundredweight shall be added to the uniform price for excess milk received from producers at plants located in District No. 1 or in the counties of Kitsap and Mason.

16. Delete § 925.87 (a) and substitute therefor the following:

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than with respect to milk of such handler's own production) pursuant to § 925.80 (a), shall make a deduction of 5 cents per hundredweight of milk, or such amount not exceeding 5 cents per hundredweight as the Secretary may prescribe, with respect to the following:

(1) All milk received from producers at a plant not operated by a cooperative association;

(2) All milk received at a plant operated by a cooperative association from producers who are not members of such association; and

(3) All milk received at a plant operated by a cooperative association(s) from producers who are members thereof but for whom any of the services set forth below in this paragraph is not being performed by such association(s), as determined by the market administrator.

Such deduction shall be paid by the handler to the market administrator on or before the 15th day after the end of the month. Such moneys shall be expended by the market administrator for the verification of weights, sampling, and testing of milk received from producers and in providing for market information to producers; such services to be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

Filed at Washington, D. C., this 3d day of December 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator.*

## [ 7 CFR Part 953 ]

LEMONS GROWN IN STATES OF CALIFORNIA AND ARIZONA

EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1953-54 FISCAL YEAR

Consideration is being given to the following proposals submitted by the Lemon Administrative Committee, established pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 18 F. R. 6767), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended, as the agency to administer the terms and provisions thereof: (1) That the Secretary of Agriculture find that expenses not to exceed $119,364.00 will be necessarily incurred during the fiscal year ending October 31, 1954, for the maintenance and functioning of the committee established under the aforesaid amended marketing agreement and order, and (2) that the Secretary of Agriculture fix, as the pro rata share of such expenses which each handler who first handles lemons shall pay in accordance with the aforesaid amended marketing agreement and order during the aforesaid fiscal year, the rate of assessment at $0.015 per packed box of lemons, or an equivalent quantity of lemons, handled by him as the first handler thereof during said fiscal year.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same with the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Room 2077, South Building, Washington 25, D. C., not later than the close of business on the 10th day after the publication of this notice in the FEDERAL REGISTER. All documents should be filed in quadruplicate.

Terms used herein shall have the same meaning as when used in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued this 3d day of December 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

## DEPARTMENT OF LABOR

### Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214), and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.168, as amended June 2, 1952, 17 F. R. 3818).

Biflex Johnston, Inc., Calhoun Street, Johnston, S. C., effective 11-25-53 to 11-24-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (foundation garments).

Cluett, Peabody & Co., Inc., Bremen, Ga., effective 11-27-53 to 11-26-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (dress shirts).

Finesilver Manufacturing Co., 816 Camaron Street, San Antonio, Tex., effective 11-27-53 to 11-26-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (work pants, dungarees, and shirts).

Forest City Manufacturing Co., Collinsville, Ill., effective 12-5-53 to 12-4-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (dresses).

Hickerson & Co., Inc., Brainerd, Minn., effective 12-10-53 to 12-9-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' work and sport clothing).

Jinright Manufacturing Co., Coleman, Tex., effective 12-3-53 to 12-2-54; 10 learners for normal labor turnover purposes (ladies' and children's jeans, shirts, etc.).

Luzerne Outerwear Manufacturing Corp., 87-93 North Canal Street, Shickshinny, Pa., effective 11-27-53 to 11-26-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (sport jackets).

Regina Manufacturing Co., 44 Carey Avenue, Wilkes-Barre, Pa., effective 12-1-53 to 11-30-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (corsets and brassieres).

The Shirtmaster Co., Inc., Abbeville, S. C., effective 12-7-53 to 12-6-54; 10 percent of the total number of factory production workers for normal labor turnover purposes (sport shirts).

York Manufacturing Co., York, Ala., effective 11-23-53 to 5-22-54; 30 learners for expansion purposes (shorts and longies).

Glove Industry Learner Regulations (29 CFR 522.220 to 522.231, as amended July 13, 1953, 18 F. R. 3292).

Boss Manufacturing Co., Gregory and Harrington Streets, Cisco, Tex., effective 11-24-53 to 11-23-54; 10 learners for normal labor turnover purposes (work gloves) (replacement certificate).

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952, 16 F. R. 12866).

Union Underwear Co., Inc., Frankfort, Ky., effective 12-11-53 to 12-10-54; 5 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' shorts).

Shoe Industry Learner Regulations (29 CFR 522.250 to 522.260, as amended March 17, 1952, 17 F. R. 1500).

Manistee Shoe Manufacturing Co., 50 Filer Street, Manistee, Mich., effective 11-27-53 to 11-26-54; 10 percent of the number of productive factory workers in the plant for normal labor turnover purposes.

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

Cardinal Industries, Berlin, Wis., effective 11-27-53 to 5-26-54; 5 learners for normal labor turnover purposes (learners may not be engaged at subminimum wage rates in the production of loafer sox); sewing machine operators, 240 hours at 65 cents per hour (carpenter aprons).

Fabriko Inc., Green Lake, Wis., effective 11-27-53 to 5-26-54; 7 learners for normal labor turnover purposes (learners at subminimum wage rates are not authorized in the production of loafer sox); sewing machine operators, 240 hours at 65 cents per hour (aprons, bowl covers, etc.).

The following special learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning period and the learner wage rates are indicated, respectively.

Rosanne Optical Manufacturing Co., Inc., Hato Rey, P. R., effective 11-23-53 to 3-22-54; 15 learners; any factory production operation involved in the manufacture of optical frames made from plastic material, 200 hours at 35 cents per hour (optical frames).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER, pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 30th day of November 1953.

MILTON BROOKE,
*Authorized Representative of the Administrator.*

## CIVIL AERONAUTICS BOARD

[Docket No. 6078]

AIR AMERICA, INC. ET AL.; ENFORCEMENT PROCEEDING

NOTICE OF POSTPONEMENT OF HEARING

In the matter of a complaint against Air America, Inc. and certain allegedly associated companies, including Air America Agency Corporation, Air America Agency, Inc., Airline Reservations, Inc. (New York), Airline Reservations, Inc. (Illinois), and Airline Tickets, Inc., filed by American Airlines, Inc., and charging aforesaid respondents, together and severally, with violations of section 411 of the Civil Aeronautics Act of 1938, as amended, and with violations of § 291.1 (a) of the Board's Economic Regulations.

Notice is hereby given that a public hearing in the above-entitled proceeding

originally assigned to be held on October 12, 1953, and later re-assigned for December 8, 1953, is hereby postponed until January 5, 1954, at 10:00 a. m., e. s. t., in Room E-210, Temporary Building No. 5, Seventeenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Edward T. Stodola.

Without limiting the scope of the issues presented by the complaint filed by American Airlines, Inc., particular attention will be given to the question whether the respondents, or any of them, are in violation of section 411 of the act and § 291.1 (a) of the Board's Economic Regulations and whether the Board shall exercise its powers under sections 205 (a), 411, 1002 (b) and 1002 (c) of the act and order the respondents, or any of them, to cease and desist from activities and practices which have allegedly resulted in violations of said section 411 of the act and said § 291.1 (a) of the Board's Economic Regulations.

Notice is hereby further given that any person other than parties of record desiring to be heard in this proceeding must file with the Board on or before January 5, 1954, a statement setting forth the issues of fact or law raised by this proceeding which he desires to controvert.

For further details of the issues involved in this proceeding, all interested parties are referred to the complaint and other documents on file under Docket No. 6078 in the docket section of the Civil Aeronautics Board.

Dated at Washington, D. C., December 4, 1953.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3159]

DUVAL SULPHUR & POTASH CO. AND UNITED GAS CORP.

NOTICE OF PROPOSED ISSUANCE OF COMMON STOCK DIVIDEND BY SUBSIDIARY AND ACQUISITION OF ITS PRO-RATA SHARES BY PARENT COMPANY

DECEMBER 2, 1953.

Notice is hereby given that Duval Sulphur & Potash Company ("Duval"), a non-utility subsidiary of United Gas Corporation ("United") which in turn is a public-utility subsidiary of Electric Bond and Share Company, a registered holding company, and United have filed a joint application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act"). Applicants have designated sections 6 (b), 9 and 10 of the act as applicable to the proposed transactions, which are summarized as follows:

The authorized Capital Stock of Duval consists of 1,000,000 shares, no par value, of which 875,000 shares are issued and outstanding. United owns 653,724 shares (74.71 percent) of Duval's outstanding Capital Stock, the balance thereof being held by the public generally. In addition to its regular cash dividend, Duval proposes the payment of a stock dividend to the holders of its Capital Stock. On November 19, 1953, the Board of Directors of Duval, subject to obtaining appropriate authorization under the act, declared a dividend on Duval's Capital Stock, no par value, at the rate of one share of Duval's Capital Stock for each seven shares of such stock held. The record date and payment date for such dividend are December 10, 1953 and December 31, 1953, respectively. No fractional shares of Capital Stock will be issued. Dividend Scrip Certificates representing fractional shares of Capital Stock of Duval will be delivered which may be combined with other Dividend Scrip Certificates representing in the aggregate one or more full shares of Capital Stock of Duval and may be exchanged for such share or shares during a period which expires on December 31, 1954.

Prior to the close of business on December 31, 1954, Manufacturers Trust Company, 45 Beaver Street, New York 15, New York, Transfer and Dividend Disbursing Agent for Duval, will act as the agent of holders of Dividend Scrip Certificates who may desire (a) to purchase additional Dividend Scrip Certificates so that their holdings will aggregate one full share of Capital Stock of Duval, or (b) to sell their Dividend Scrip Certificates. Such purchases and sales will be based on market prices for full shares on the American Stock Exchange. Dividend Scrip Certificate holders will not be charged for such services. As soon as practicable after December 31, 1954, all shares of Capital Stock represented by Dividend Scrip Certificates then outstanding will be sold, and holders of Dividend Scrip Certificates will, until December 31, 1955, be entitled to surrender said certificates for their pro rata share of the cash net proceeds of such sale. After December 31, 1955, Dividend Scrip Certificates will be void.

Dividend Scrip Certificates do not confer upon the holder any voting or other rights of a stockholder, nor shall any of the shares of Capital Stock represented by Dividend Scrip Certificates be voted.

In connection with the payment of the stock dividend, the Board of Directors fixed the amount to be transferred from "Earned Surplus" (which at September 30, 1953, was $7,116,422.59) to "Capital Stock" on Duval's books at $26.75 for each share of additional Capital Stock to be issued (being the closing price on November 18, 1953, for Duval's Capital Stock on the American Stock Exchange, to which such stock is admitted to unlisted trading privileges), or a total of $3,343,750 for the entire 125,000 shares to be issued.

In connection with the transactions proposed, United will be entitled to receive 93,389 shares and a Dividend Scrip Certificate entitling it to receive one-seventh of a share of Duval's Capital Stock. United's investment in Duval is carried on its books at $4,679,352. Upon consummation, the transaction will be reflected by an increase in the number of shares of Capital Stock of Duval owned by United from 653,724 shares to 747,113 shares with no change in the dollar investment, except to the extent that the dollar investment would be increased by the cost of United's exercise of its privilege to purchase additional Dividend Scrip Certificates sufficient to aggregate one full share of the Capital Stock of Duval.

Notice is further given that any interested person may, not later than December 17, 1953 at 5:30 p. m., e. s. t., request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date said application, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[File Nos. 54-164, 59-14]

INTERNATIONAL HYDRO-ELECTRIC SYSTEM

ORDER GRANTING RECITALS

DECEMBER 3, 1953.

The Commission having heretofore ordered the liquidation of International Hydro-Electric System ("IHES"), a registered holding company, pursuant to section 11 (b) (2) of the Public Utility Holding Company Act of 1935 ("act"); and

The United States District Court for the District of Massachusetts ("Court") having taken jurisdiction over said holding company pursuant to section 11 (d) of the act for the purpose of enforcing said order, and having appointed Bartholomew A. Brickley as trustee ("Trustee") to hold and administer the assets of said holding company pending its liquidation; and

The Trustee having notified the Commission pursuant to Rule U-44 (c) of the rules and regulations under the act that he proposes to sell under competitive conditions, prior to December 31, 1953, certain of the portfolio securities of IHES, to wit, 125,000 common shares of New England Electric System, as a part of his liquidation program; and the Court by order entered November 30, 1953 having authorized such sale, reserving jurisdiction to pass upon the bid price before consummation of the sale; and the Commission having notified the Trustee that no declaration is required to be filed with the Commission with respect to this matter; and

The Trustee having requested that the Commission enter an order containing appropriate recitals pursuant to Supplement R and section 1808 (f) of the Internal Revenue Code with respect to the sale of said securities, and the Commission deeming it appropriate that such request be granted:

*It is ordered and recited*, That the sale of 125,000 common shares, $1.00 par value, of New England Electric System now held by International Hydro-Electric System is necessary or appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935, all in accordance with the meaning and requirements of the Internal Revenue Code and section 1808 (f) and Supplement R thereof.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[File No. 70-3148]

NARRAGANSETT ELECTRIC CO. AND NEW ENGLAND ELECTRIC SYSTEM

ORDER AUTHORIZING ISSUANCE AND SALE OF COMMON STOCK BY SUBSIDIARY TO PARENT COMPANY

DECEMBER 3, 1953.

New England Electric System ("NEES"), a registered holding company, and the Narragansett Electric Company ("Narragansett"), a subsidiary of NEES, having filed a joint application with this Commission, pursuant to sections 6 (a) (2), 6 (b) and 7 (c) of the Public Utility Holding Company Act of 1935 ("the act"), and Rules U-42 (b) (2) and U-50 thereunder with respect to the following proposed transactions:

Under a contract dated October 27, 1953, Narragansett proposes, prior to April 1, 1954, to issue and sell to NEES, the holder of all of its outstanding $50 par value common stock, 100,000 additional shares of such stock at the price of $50 per share. It is indicated that such sale is proposed in order to provide Narragansett with new money required to finance, in part, its 1954 construction program. The proceeds derived from the sale of the common stock will be applied by Narragansett to the payment of its then outstanding short-term note indebtedness and any balance will be used for construction or to reimburse its treasury therefor.

The issue and sale of the common stock has been approved by the Public Utility Administrator, Department of Business Regulation of the State of Rhode Island in which State Narragansett is organized and doing business.

The expenses to be incurred in connection with said transactions are estimated at $12,500 for Narragansett and $300 for NEES. Such expenses include $2,000 to be paid by Narragansett and $300 by NEES for services rendered at cost by New England Power Service Company, an affiliated service company.

Applicants request that the Commission's order be made effective upon issuance.

Due notice having been given of the filing of the joint application, and a hearing not having been requested or ordered by the Commission; and the Commission finding that the applicable provisions of the act and the rules promulgated thereunder are satisfied and that no adverse findings are necessary; and deeming it appropriate in the public interest and in the interest of investors and consumers that said joint application be granted forthwith, without the imposition of terms and conditions other than those prescribed in Rule U-24:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of the act, that said joint application be granted forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[F. R. Doc. 53-10245; Filed, Dec. 8, 1953; 8:46 a. m.]

[File No. 70-3149]

NARRAGANSETT ELECTRIC CO.

ORDER AUTHORIZING SALE OF PREFERRED STOCK AT COMPETITIVE BIDDING

DECEMBER 3, 1953.

The Narragansett Electric Company ("Narragansett"), a subsidiary of New England Electric System ("NEES"), a registered holding company, having filed an application-declaration with this Commission, pursuant to sections 6 (a) (2), 6 (b) and 7 (e) of the Public Utility Holding Company Act of 1935 ("the act"), and Rules U-42 (b) (2) and U-50 thereunder with respect to the following proposed transactions:

Narragansett presently has outstanding 180,000 shares of Cumulative Preferred Stock, 4½ percent Series ($50 par value) and proposes to issue and sell 150,000 shares of a new series of Preferred Stock of the par value of $50 per share. Narragansett also proposes to amend its charter and to incorporate therein certain provisions for the protection of the preferred stockholders which provisions will entitle such stockholders to certain rights and privileges, with respect to, among other things, the issuance of additional securities, dividends and voting power. The proposed sale of preferred stock will be pursuant to the competitive bidding requirements of Rule U-50. The dividend rate (which shall be expressed in a multiple of 0.03 of 1 percent and not in excess of 6 percent) and the price, exclusive of accrued dividends, to be paid to Narragansett (which shall be not less than $50 and shall not exceed $51.375 per share) will be determined by competitive bidding. Bids will be received up to 12 noon on a date, not less than ten days nor more than thirty days after the date of the invitation for bids, which the company shall fix by giving notice at least forty-two hours in advance to each prospective bidder.

The proceeds from the proposed sale of preferred stock (exclusive of accrued dividends and the expenses of issuance) are to be applied to the payment of short-term note indebtedness presently outstanding in the aggregate of $6,250,000 and, according to the application-declaration may be outstanding in the aggregate amount of $7,450,000 at the time the preferred stock is sold, and the balance, if any, of the proceeds will be used to pay for capitalizable expenditures or to reimburse the treasury therefor.

The proposed issue and sale of preferred stock has been approved by the Public Utility Administrator, Department of Business Regulation of the State of Rhode Island.

Due notice having been given of the filing of the application-declaration, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and the interest of investors and consumers that said application-declaration, as amended, be granted and permitted to become effective:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of said act, that said application-declaration, as amended, be and hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 and subject to the further condition that the proposed sale of preferred stock shall not be consummated until the result of competitive bidding with respect thereto shall have been made a matter of record in this proceeding and a further order shall

have been entered by this Commission in the light of the record so completed, which order may contain such further terms and conditions as may then be deemed appropriate.

*It is further ordered*, That jurisdiction be, and hereby is, reserved over the payment of all fees and expenses incurred or to be incurred in connection with the proposed transactions.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

[File No. 70-3158]

WHEELING ELECTRIC CO.

NOTICE REGARDING PROPOSED ISSUE AND SALE OF SHORT-TERM NOTES

DECEMBER 3, 1953.

Notice is hereby given that Wheeling Electric Company ("Wheeling"), a public utility subsidiary of American Gas and Electric Company, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act"), and has designated sections 6 and 7 thereof as applicable to the proposed transaction which is summarized as follows:

The proposed transactions cover the establishment of a line of credit with a banking institution and the proposed borrowing under such line of credit of an amount not to exceed $1,000,000 outstanding at any one time, from time to time, prior to December 31, 1954, from such banking institution and the issuance and delivery of Notes evidencing such borrowings by Wheeling.

The Notes to be issued by Wheeling in evidence of such borrowings will be dated as of the date of such borrowings in each case and will in no event mature in more than 270 days after the date of issuance.

Of the $1,000,000 proposed to be borrowed, Wheeling has already borrowed $400,000 from the said banking institution and has issued its note in evidence thereof. This borrowing, in the amount of $400,000, was made on October 6, 1953, and was exempted from the provisions of section 6 (a) by the first sentence of section 6 (b) of the act.

It is expected that the next borrowing, in the amount of $100,000 will be made on or about January 1, 1954. The note evidencing such borrowing of $100,000 will bear interest from the date thereof at the then current prime credit rate which is currently 3¼ percent per annum.

Subsequent borrowings will be made from time to time prior to December 31, 1954 in amounts depending upon Wheeling's cash requirements and not to exceed $1,000,000 outstanding at any one time under the said line of credit. Such subsequent borrowings will bear interest from the respective dates thereof at the then current prime credit rate.

Wheeling may prepay the notes from time to time, in whole or in part, without premium.

No finders' fees or commissions are to be paid by Wheeling in connection with the proposed transactions, and it is estimated that miscellaneous expenses to be incurred by Wheeling will not exceed the nominal amount of $250.

Notice is further given that any interested person may, not later than December 21, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request and the issues of fact or law, if any, raised by the said declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after that date, said declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transaction as provided in Rule U-20 (a) and Rule U-100 thereof. All interested persons are referred to said declaration which is on file in the offices of the Commission for a statement of the transaction therein proposed.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

[File No. 70-3160]

UNITED GAS CORP. AND UNION PRODUCING CO.

NOTICE REGARDING LOAN BY PARENT COMPANY TO SUBSIDIARY

DECEMBER 3, 1953.

United Gas Corporation ("United"), a public-utility subsidiary of Electric Bond and Share Company, a registered holding company, and its non-utility subsidiary, Union Producing Company ("Union"), have filed a joint application with this Commission pursuant to the provisions of the Public Utility Holding Company Act of 1935 ("act"), particularly sections 6 (b), 9, and 10 thereof with respect to transactions proposed therein which are summarized as follows:

United proposes to lend to Union, its wholly owned subsidiary, and the latter proposes to borrow from United, not to exceed an aggregate amount of $2,000,000 during a period following the date of the entry of the Commission's order herein to the end of 1954 in such installments and at such times as funds may be required and requested from United. The proceeds from the loan will be used by Union to increase its working capital.

The proposed loan will be evidenced by unsecured promissory notes issued by Union to United or order, from time to time, payable on or before six years from the date of issue of such notes, bearing interest at the rate of 5 percent per annum, payable semi-annually on July 1 and January 1 of each year.

Union has presently issued and outstanding $15,000,000 principal amount of its promissory notes consisting of $7,000,000 principal amount of 3 percent Notes, $4,000,000 principal amount of 4 percent Notes, and $4,000,000 principal amount of 5 percent Notes, all such notes being payable on or before six (6) years from dates of issue. All of said notes are owned by United, and $12,000,000 principal amount of such notes are pledged with the Guaranty Trust Company of New York, the Corporate Trustee, under United's Mortgage and Deed of Trust, dated as of October 1, 1944, in favor of Guaranty Trust Company of New York and Henry A. Theis (Herbert E. Twyeffort, Successor Trustee), Trustees, as supplemented. The additional promissory notes of Union to be acquired from time to time by United in connection with the transactions proposed herein will, upon acquisition by United be pledged with the Corporate Trustee under its Mortgage and Deed of Trust.

Notice is further given that any interested person may, not later than December 18, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request and the issues of fact or law, if any, raised by the said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after December 18, 1953, said application as filed or as amended may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transaction as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

## UNITED STATES TARIFF COMMISSION

[Investigation 31]

ALSIKE CLOVER SEED

NOTICE OF INVESTIGATION

Upon application filed November 23, 1953, by W. W. Thompson, Klamath Falls, Oregon, and others, the United States Tariff Commission, on the 2d day of December 1953, instituted an investigation under section 7 of the Trade Agreements Extension Act of 1951, as amended, and section 332 of the Tariff Act of 1930, to determine whether alsike clover seed provided for in paragraph 763 of the Tariff Act of 1930, and on which a concession was granted under the General Agreement on Tariffs and Trade, is, as a result in whole or in part of the customs treatment reflecting such concession, being imported into the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

*Inspection of application.* The application filed in this case is available for public inspection at the office of the secretary, United States Tariff Commission, Eighth and E Streets NW., Washington, D. C., and in the New York office of the Tariff Commission, located in Room 437 of the Custom House, where it may be read and copied by persons interested.

I certify that the above investigation was instituted by the Tariff Commission on the 2d day of December 1953.

Issued: December 3, 1953.

[SEAL] DONN N. BENT, *Secretary.*

[F. R. Doc. 53-10250; Filed, Dec. 8, 1953; 8:47 a. m.]

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28721]

BILLETS, BLOOMS, INGOTS, FROM ILLINOIS, NEW YORK, AND OHIO TO ORLANDO, FLA.

APPLICATION FOR RELIEF

DECEMBER 3, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to schedules listed below.

Commodities involved: Billets, blooms, ingots, slabs and bars, iron or steel, carloads.

From: Chicago and Sterling, Ill., Buffalo, N. Y., Canton, Cleveland, Massillon and Youngstown, Ohio.

To: Orlando, Fla.

Grounds for relief: Competition with rail carriers, circuity, and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: H. R. Hinsch, Alternate Agent, I. C. C. No. 4510, supp. 33; C. W. Boin, Agent I. C. C. No. A-968, supp. 23; R. G. Raasch Agent, I. C. C. No. 784, supp. 6.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-10227; Filed, Dec. 7, 1953; 8:48 a. m.]

[4th Sec. Application 28724]

PULPBOARD OR FIBREBOARD FROM GROVETON, N. H., TO BIRMINGHAM AND MOBILE, ALA., MEMPHIS, TENN., AND NEW ORLEANS AND BOGALUSA, LA.

APPLICATION FOR RELIEF

DECEMBER 4, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The St. Louis-San Francisco Railway Company for itself and on behalf of carriers parties to Agent C. W. Boin's tariff I. C. C. No. A-899.

Commodities involved: Pulpboard or fibreboard, carload.

From: Groveton, N. H.

To: Birmingham and Mobile, Ala., Memphis, Tenn., New Orleans and Bogalusa, La.

Grounds for relief: Competition with rail carriers, circuitous routes, and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

TRANSPORTATION OF HAY, FEED AND LIVESTOCK IN CERTAIN DISASTER AREAS AT REDUCED RATES

EXTENSION OF EXPIRATION DATES

In the matter of relief under section 22 of the Interstate Commerce Act.

Upon consideration of a request by the Acting Secretary of Agriculture dated December 2, 1953, to extend the expiration date of these orders:

*It is ordered*, That the orders previously entered herein, be, and they are hereby, amended to extend the expiration date from December 31, 1953, to and including June 30, 1954.

*It is further ordered*, That notice to the affected railroads and the general public shall be given by depositing copies of these orders in the office of the Secretary of the Commission and by filing copies with the Director, Division of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, N. Y., the Chairman of the Southern Freight Association, Atlanta, Georgia, the Chairman of the Executive Committee, Western Traffic Association, Chicago, Illinois, the Traffic Vice-President of the Association of American Railroads, Washington, D. C., and to the President of the American Short Line Railroad Association, Washington, D. C.

Dated at Washington, D. C., this 3d day of December 1953.

By the Commission, Commissioner Alldredge.

[Drouth Order 51]

TRANSPORTATION OF HAY AND FEED TO UTAH AND WYOMING

REDUCED RATES

In the matter of relief under section 22 of the Interstate Commerce Act.

It appearing, that by reason of a prolonged drouth existing in the States of Utah and Wyoming, the Acting Secretary of Agriculture by letter dated December 2, 1953, has requested the Commission to enter an order under section 22 of the Interstate Commerce Act authorizing railroads subject to the Commission's jurisdiction to transport hay and feed to Utah and Wyoming at reduced rates:

*It is ordered*, That carriers by railroad participating in the transportation of hay and feed to Utah and Wyoming be, and they are hereby, authorized under section 22 of the Interstate Commerce Act, to establish and maintain to and including June 30, 1954, reduced rates for such transportation, the rates to be published and filed in the manner prescribed in section 6 of the Interstate Commerce Act except that they may be made effective one day after publication and filing instead of thirty.

*It is further ordered*, That the class of persons entitled to such reduced rates is hereby defined as persons designated as being in distress and in need of relief by the United States Department of Agriculture or by such State agents or agencies as may in turn be designated by the United States Department of Agriculture to assist in relieving the distress caused by the drouth.

*It is further ordered*, That during the period in which any reduced rates authorized by this order are effective the carriers may, not withstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one or more of the factors of such aggregate-of-intermediate rates is a reduced rate established under the authority of this order.

*And it is further ordered*, That any tariffs or tariff provisions published under the authority of this order shall explicitly so state, making reference to this order by number and dated.

*And it is further ordered*, That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the office of the Secretary of the Commission and by filing a copy with the Director, Division of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, N. Y., the Chairman of the Southern Freight Association, Atlanta, Georgia, the Chairman of the Executive Committee, Western Traffic Association, Chicago, Illinois, the Traffic Vice President of the Association of American Railroads, Washington, D. C., and to the President of the American Short Line Railroad Association, Washington, D. C.

Dated at Washington, D. C., this 3d day of December 1953.

By the Commission, Commissioner Alldredge.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

VOLUME 18 NUMBER 240

*Washington, Thursday, December 10, 1953*

## TITLE 7—AGRICULTURE

### Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

[Amdt. 1]

PART 722—COTTON

APPORTIONMENT OF STATE ACREAGE ALLOTMENT AMONG COUNTIES

*Basis and purpose.* The purpose of this amendment is to establish the county acreage allotments for the 1954 crop of extra long staple cotton pursuant to sections 344 (e) and 347 (c) of the Agricultural Adjustment Act of 1938, as amended. Notice of the proposed establishment of such allotments was given on November 13, 1953 (18 F. R. 7196), pursuant to section 4 of the Administrative Procedure Act (5 U. S. C. 1003).

Farmers engaged in the production of extra long staple cotton in 1953 will determine in a referendum to be held on December 15, 1953, whether marketing quotas will be in effect on the 1954 crop of such cotton. In order that county acreage allotments may be apportioned to farms and notices of individual farm acreage allotments mailed, insofar as practicable, so as to be received by farmers prior to the referendum, as required by section 362 of the Agricultural Adjustment Act of 1938, as amended, it is essential that this amendment be made effective as soon as possible. Accordingly, it is hereby determined and found that compliance with the 30-day effective date requirements of section 4 of the Administrative Procedure Act is impracticable and contrary to the public interest, and the county acreage allotments contained herein shall be effective upon filing of this document with the Director, Division of the Federal Register.

Section 722.1116 (e) of the Marketing Quota Regulations Relating to Apportionment of the National Acreage Allotment for the 1954 Crop of Extra Long Staple Cotton to States, Counties, and Farms (18 F. R. 7883), is amended to read as follows:

§ 722.1116 *Apportionment of State acreage allotment among counties*—

* * *

(e) *County acreage allotment.* The county acreage allotment shall be the sum of (1) the computed county acreage allotment determined under paragraph (b) of this section and (2) the acreages from the State acreage reserve which are added to the computed county acreage allotment under subparagraphs (1) and (2) of paragraph (c) of this section. The county acreage allotment for each county is set out below. The amounts of the acreages set aside and reserved by each county committee pursuant to § 722.1117 (a) and (b) are available for inspection by any interested person at the office of the county committee. Also, available for inspection at the office of the county committee are the data pertaining to the establishment of administrative areas in accordance with paragraph (f) of this section.

## TITLE 14—CIVIL AVIATION

### Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 67]

PART 608—DANGER AREAS

FORT DIX, NEW JERSEY; ALTERATION

The danger area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required. Part 608 is amended as follows:

In § 608.38, the Fort Dix, New Jersey, area ("D-25"), published on July 16, 1949, in 14 F. R. 4293, and amended on January 8, 1952, in 17 F. R. 191, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 40°02'45" N., long. 74°25'50" W.; SSE. to lat. 39°58'45" N., long. 74°24'45" W.; SSW. to lat. 39°56'00" N., long. 74°26'20" W.; NW. to lat. 39°57'20" N., long. 74°27'40" W.; westerly along a road to lat. 39°57'20" N., long. 74°33'30" W.; due N. to lat. 40°02'45" N.; due E. to lat. 40°02'45" N., long. 74°25'50" W., point of beginning."

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on December 8, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-10268; Filed, Dec. 8, 1953; 1:12 p. m.]

## TITLE 15—COMMERCE AND FOREIGN TRADE

AMENDMENTS OF CERTAIN PARTS AND CHAPTERS

In order to conform the codification of Title 15 of the Code of Federal Regulations to the present organizational pattern of the Department of Commerce, that title is amended in the following respects:

1. In Subtitle A—Office of the Secretary of Commerce, a new Part 3 is added as follows:

PART 3—APPEALS PROCEDURES

CROSS REFERENCE: For the appeals procedures followed by the Appeals Board for the Department of Commerce (established August 18, 1953, 18 F. R. 5125), see Parts 382 and 383 of this title, RP 1 and Reg. 5 under Chapter VI of Title 32A, and § 401.9, Chapter IV of Title 44.

2. The headnote of Chapter III is amended to read "Bureau of Foreign Commerce, Department of Commerce".

3. Subchapter A—Office of Business Economics of Chapter III is redesignated Chapter VIII—Office of Business Economics, Department of Commerce of this title, and Parts 301, 302, 305, and 323 are redesignated Parts 801, 802, 805, and 823.

4. Subchapter B—Office of Industry and Commerce of Chapter III is revoked.

5. The headnote of Subchapter C of Chapter III is deleted. All references to the Office of International Trade appearing in Parts 360–399 of this chapter should read "Bureau of Foreign Commerce."

6. A new headnote "Subchapter A—Miscellaneous Regulations" is inserted preceding Part 360, and the headnote "Export Regulations" which precedes Part 370 is redesignated "Subchapter B—Export Regulations" and is transferred to precede Part 368.

7. Chapter VI—Office of Technical Services, Department of Commerce is redesignated Chapter VI—Business and Defense Services Administration, Department of Commerce. The reference in § 601.2 to the Office of Technical Services should read "Business and Defense Services Administration." For regulations of Business and Defense Services Administration under the Defense Production Act of 1950, as amended, see Title 32A, Chapter VI.

[SEAL] SINCLAIR WEEKS,
*Secretary of Commerce.*

[F. R. Doc. 53-10293; Filed, Dec. 9, 1953; 8:51 a. m.]

## TITLE 16—COMMERCIAL PRACTICES

### Chapter I—Federal Trade Commission

[Docket 6116]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

SUNSET APPLIANCE STORES, INC., ET AL.

Subpart—*Advertising falsely or misleadingly:* § 3.35 *Condition of goods;* § 3.200 *Sample, offer or order conformance:* § 3.260 *Terms and conditions;* § 3.275 *Undertakings, in general.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 3.2060 *Sample, offer or order conformance;* § 3.2080 *Terms and conditions;* § 3.2090 *Undertakings, in general.* In connection with the offering for sale, sale or distribution in commerce, of television sets or other merchandise, representing, directly or by implication: (1) That any product is offered for sale when such offer is not a bona fide offer to sell the product so offered; (2) offering for sale or demonstration any television set or other appliance unless such set or appliance is in stock or otherwise available to customers under the conditions stated in such offer and at such price as may be designated therein; (3) that air conditioners, television sets or other electric appliances will be demonstrated in the homes of prospective purchasers or will be demonstrated without charge or obligation, contrary to the fact; that (4) that air conditioners, television sets or other electric appliances are completely or thoroughly reconditioned or rebuilt or are in perfect working order when such is not the fact; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Sunset Appliance Stores, Inc., et al., Long Island, N. Y., Docket 6116, November 10, 1953]

*In the Matter of Sunset Appliance Stores, Inc., a Corporation; and Joseph Rudnick and Morris Sobel (Erroneously Named as Lawrence Sobol), Individually and as Officers of Sunset Appliance Stores, Inc., a Corporation*

This proceeding was instituted by complaint which charged respondents with the use of unfair and deceptive acts and practices and unfair methods of competition in violation of the provisions of the Federal Trade Commission Act.

It was disposed of, as announced by the Commission's "Notice", dated November 13, 1953, through the consent settlement procedure provided in Rule V of the Commission's rules of practice as follows:

The consent settlement tendered by the parties in this proceeding, a copy of which is served herewith, was accepted

by the Commission on November 10, 1953 and ordered entered of record as the Commission's findings as to the facts, conclusion, and order in disposition of this proceeding.

Said order to cease and desist, thus entered of record, following the findings as to the facts and conclusion, reads as follows:

*It is ordered*, That the respondents, Sunset Appliance Stores, Inc., a corporation, and its officers, and Joseph Rudnick and Morris Sobel, individually, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of television sets or other merchandise, do forthwith cease and desist from representing, directly or by implication:

1. That any product is offered for sale when such offer is not a bona fide offer to sell the product so offered.

2. Offering for sale or demonstration any television set or other appliance unless such set or appliance is in stock or otherwise available to customers under the conditions stated in such offer and at such price as may be designated therein.

3. That air conditioners, television sets or other electric appliances will be demonstrated in the homes of prospective purchasers or will be demonstrated without charge or obligation, contrary to the fact.

4. That air conditioners, television sets or other electric appliances are completely or thoroughly reconditioned or rebuilt or are in perfect working order when such is not the fact.

*It is further ordered*, That respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

The foregoing consent settlement is hereby accepted by the Federal Trade Commission and ordered entered of record on this 10th day of November, 1953.

Issued: November 13, 1953.

By direction of the Commission.

[SEAL] ALEX. AKERMAN, JR., *Secretary.*

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter I—Home Loan Bank Board, Housing and Home Finance Agency

#### Subchapter C—Federal Savings and Loan System

[No. 6573]

PART 149—POWERS OF CONSERVATOR AND CONDUCT OF CONSERVATORSHIPS

AUTHORITY OF OFFICERS

DECEMBER 7, 1953.

Resolved that, pursuant to § 108.11 of the general regulations of the Home Loan Bank Board (24 CFR 108.11) and § 142.1 of the rules and regulations for the Federal Savings and Loan System (24 CFR 142.1), the first sentence of § 149.11 of the rules and regulations for the Federal Savings and Loan System (24 CFR 149.11) is hereby amended, effective December 10, 1953, by substituting a comma for the period at the end thereof and adding the following: "or any person or persons from time to time designated by the Home Loan Bank Board."

Resolved further that, as this amendment relates to matters of organization procedure, notice and public procedure thereon are found unnecessary and, as it is necessary that this power be exercised forthwith in the benefit of the public, deferment of the effective date of this amendment is not required.

(Sec. 5, 48 Stat. 132 as amended; 12 U. S. C. and Sup. 1464)

By the Home Loan Bank Board.

[SEAL] J. FRANCIS MOORE, *Secretary.*

[F. R. Doc. 53-10294; Filed, Dec. 9, 1953, 8:51 a. m.]

7.1107 Addressee not actual owner.
7.1108 Information to be furnished in ordinary course.
7.1109 Beneficiaries of a domestic estate or trust.

AUTHORITY: §§ 7.1100 to 7.1109 issued under 53 Stat. 32, 467, 26 U. S. C. 62, 3791.

§ 7.1100 *Introductory.* (a) The income tax convention between the United States and Belgium, signed October 28, 1948, as modified and supplemented by the supplementary convention between such Governments, signed September 9, 1952, and proclaimed by the President of the United States on September 23, 1953, referred to in this subpart as the convention, provides in part as follows, effective with respect to income derived in taxable years begining on or after January 1, 1953:

ARTICLE I

(1) The taxes which are the subject of the present Convention are:

(a) In the case of the United States: The Federal income taxes.

(b) In the case of Belgium: The income taxes, the national crisis tax, and the personal complementary tax, including all additions to these taxes.

(2) The present Convention shall apply also to any other taxes of a substantially similar character imposed by either Contracting State subsequently to the date of signature of the present Convention or by the government of any territory to which the present Convention is extended under Article XXII.

(3) In the event of appreciable changes in the fiscal laws of either of the Contracting States the competent authorities of the Contracting States will consult together.

ARTICLE II

(1) In the present Convention, unless the context otherwise requires:

(a) The term "United States" means the United States of America, and when used in a geographical sense means the States, the Territories of Alaska and of Hawaii, and the District of Columbia.

(b) The term "Belgium" when used in a geographical sense means the Kingdom of Belgium in Europe.

(c) The term "United States enterprise" means an industrial or commercial enterprise or undertaking carried on in the United States by a citizen or resident of the United States or by a corporation or other juridical person created or organized in the United States or under the laws of the United States or of any State or Territory of the United States.

(d) The term "Belgium enterprise" means an industrial or commercial enterprise or undertaking caried on in Belgium by a citizen or resident of Belgium or by a corporation or other juridical person created or organized in Belgium or under the laws of Belgium.

(e) The terms "enterprise of one of the Contracting States" and "enterprise of the other Contracting State" mean a United States enterprise or a Belgium enterprise, as the context requires.

(f) The term "permanent establishment" when used with respect to an enterprise of one of the Contracting States means a branch, factory, mine, oil well, plantation, workshop, warehouse, installation, or other fixed place of business, but does not include an agency unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of such enterprise or has control over a stock of merhandise from which he regularly fills orders on behalf of such enterprise. An enterprise of one of the Contracting States shall not be deemed to have a permanent establishment in the other Contracting State merely because it carries on business dealings in such other Contracting State through a bona fide commission agent or broker acting in the ordinary course of his business as such. When a corporation of one Contracting State has a subsidiary corporation which is a corporation created or organized in the other Contracting State or which is engaged in trade or business in such other Contracting State, such subsidiary corporation shall not, merely because of that fact, be deemed to be a permanent establishment of its parent corporation.

(g) The term "industrial and commercial profits" shall not include the following:

(i) Income from real property.

(ii) Income from mortgages, from public funds, securities (including mortgage bonds), loans, deposits, and current accounts;

(iii) Dividends and other income from shares in a corporation;

(iv) Rentals or royalties arising from leasing personal property or from any interest in such property, including rentals or royalties for the use of, or for the privilege of using, patents, copyrights, secret processes and formulae, good will, trade marks, trade brands, franchises, and other like property;

(v) Profit or loss from the sale or exchange of capital assets;

(vi) Compensation for labor or personal services.

Subject to the provisions of the present Convention, the income referred to in sub-

[1] Filed as part of the original document.

paragraphs (1) to (vi) shall be taxed separately or together with industrial and commercial profits in accordance with the laws of the Contracting States.

(h) The term "competent authority" or "competent authorities" means, in the case of the United States, the Commissioner of Internal Revenue or his duly authorized representative; and in the case of Belgium, the Directeur General de l'Administration des Contributions Directes or his duly authorized representative; and, in the case of any territory to which the present Convention is extended under Article XXII, the competent authority for the administration in such territory of the taxes to which the present Convention applies.

(2) In the application of the provision of the present Convention by either of the Contracting States, any term which is not otherwise defined shall, unless the context otherwise requires, have the meaning which that term has under the laws of such Contracting State relating to the taxes which are the subject of the present Convention.

* * * * *

ARTICLE VI

Income of whatever nature derived from real property shall be taxable only in the Contracting State in which the real property is situated. This Article does not apply to income derived from mortgages or bonds secured by real property.

* * * * *

ARTICLE VIII

(1) The rate of United States tax on dividends derived from sources within the United States by a resident or corporation or other entity of Belgium not having a permanent establishment within the United States shall not exceed 15 percent.

(2) Belgium shall not impose on dividends derived from sources within Belgium by a resident or corporation or other entity of the United States not having a permanent establishment within Belgium any tax in the nature of a personal complementary tax or surtax thereon, or any tax similar to that withheld at the source on dividends under United States law in the case of nonresident aliens and foreign corporations.

ARTICLE VIIIA

The rate of tax imposed by each of the Contracting States upon interest (on bonds, notes, debentures, or on any other form of indebtedness) derived from sources within such State by a resident or corporation or other entity of the other State not having a permanent establishment within the former State shall not exceed 15 percent.

ARTICLE IX

(1) Rentals or royalties from real property or in respect of the operation of mines, quarries, or other natural resources shall be taxable only in the Contracting State in which such property, mines, quarries, or other natural resources are situated. A resident of Belgium, or a corporation or other juridical person created or organized in Belgium deriving such rentals or royalties from sources within the United States may elect for any taxable year to be subject to United States tax as if such resident, corporation, or entity were engaged in trade or business within the United States through a permanent establishment therein in such taxable year.

(2) Royalties derived from within one of the Contracting States by a resident or by a corporation or other entity of the other Contracting State as consideration for the right to use copyrights, patents, secret processes and formulae, trade marks and other analogous rights shall be exempt from taxation in the former State, provided such resident, corporation, or other entity does not have a permanent establishment there. The term "royalties" as used in this paragraph shall be deemed to include rentals in respect of motion picture films.

ARTICLE X

* * * * *

(2) Private pensions and annuities derived from within one of the Contracting States and paid to individuals residing in the other Contracting State shall be exempt from taxation in the former State.

(3) The term "pensions" as used in this Article means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

(4) The term "annuities" as used in this Article means a stated sum payable periodically at stated times, under an obligation to make the payments in consideration of money paid.

* * * * *

ARTICLE XV

(1) The competent authorities of the Contracting States shall exchange such information (being information available under the respective taxation laws of the Contracting States) as is necessary for carrying out the provisions of the present Convention or for the prevention of fraud or the administration of statutory provisions and regulations against legal avoidance in relation to the taxes which are the subject of the present Convention.

(2) Documents and information contained therein, transmitted under the provisions of the present Convention by one of the Contracting States to the other Contracting State shall not be published, revealed or disclosed to any person except to the extent permitted under the laws of the latter State with respect to similar documents or information.

* * * * *

ARTICLE XVII

Each of the Contracting States shall collect taxes, which are the subject of this Convention, imposed by the other Contracting State (as though such tax were a tax imposed by the former State) as will ensure that the exemption, or reduced rate of tax, as the case may be, granted under the present Convention by such other State shall not be enjoyed by persons not entitled to such benefits.

ARTICLE XVIII

(1) In no case shall the provisions of Articles XV, XVI, and XVII be construed so as to impose upon either of the Contracting States the obligation

(a) to carry out administrative measures at variance with the regulations and practice of either Contracting State, or

(b) to supply information or particulars which are not procurable under its own legislation or that of the State making the application.

(2) The State to which application is made for information or assistance shall comply as soon as possible with the request addressed to it. Nevertheless, such State may refuse to comply with the request for reasons of public policy or if compliance would involve violation of a business, industrial or trade secret. In such case it shall inform, as soon as possible, the State making the application.

* * * * *

ARTICLE XX

(1) The provisions of the present Convention shall not be construed to restrict in any maner any exemption, deduction, credit or other allowance accorded by the laws of one of the Contracting States in the determination of the tax imposed by such State.

(2) Should any difficulty or doubt arise as to the interpretation or application of the present Convention, the competent authorities of the Contracting States shall settle the question by mutual agreement.

(3) Citizens or corporations or other juridical persons of one of the Contracting States within the other Contracting State shall not be subjected, as regards the taxes referred to in the present Convention, to the payment of higher taxes than are imposed upon the citizens or corporations or other juridical persons of such other Contracting State.

ARTICLE XXI

The competent authorities of the two Contracting States may (in the case of the United States, with the approval of the Secretary of the Treasury, and in the case of Belgium, with the approval of the Minister of Finance) prescribe regulations necessary to carry out the provisions of the present Convention. With respect to the provisions of the present Convention relating to exchange of information and mutual assistance in the collection of taxes, such authorities may, by common agreement, prescribe rules concerning matters of procedure, forms of application and replies thereto, conversion of currency, disposition of amounts collected, minimum amount subject to collection, and related matters.

* * * * *

ARTICLE XXIII

(1) The present Convention shall be ratified and the instruments of ratification shall be exchanged at Brussels as soon as possible.

(2) The present Convention shall become effective with respect to income derived in taxable years beginning on or after the first day of January of the calendar year in which the exchange of the instruments of ratification takes place, except that if such exchange takes place after the thirtieth day of September of such calendar year, Articles VIII and VIIIA and Article IX (2) shall become effective only with respect to payments made after the thirty-first day of December of such calendar year. It shall continue effective for a period of five years beginning with the first day of January of the calendar year in which such exchange takes place and indefinitely after that period, but may be terminated by either of the Contracting States at the end of the five-year period or at any time thereafter, provided that at least six months' prior notice of termination has been given, the termination to become effective on the first day of January following the expiration of the six-month period.

* * * * *

(b) As used in this subpart, any term defined in the convention shall have the meaning so assigned to it; any term not so defined shall, unless the context otherwise requires, have the meaning which such term has under the Internal Revenue Code.

§ 7.1101 *Dividends*—(a) *General.* (1) The rate of United States tax imposed by the Internal Revenue Code upon dividends derived from sources within the United States in taxable years beginning on or after January 1, 1953, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Belgium, or by a Belgian corporation or other entity, shall not exceed 15 percent under the provisions of Article VIII of the convention if such alien, corporation, or other entity at no time during the taxable year in which such dividends are derived has a permanent establishment within the United States. As to what constitutes a permanent es-

tablishment, see Article II (1) (f) of the convention.

(2) Thus, if a nonresident alien individual who is a resident of Belgium performs personal services within the United States during the taxable year, but has at no time during such year a permanent establishment within the United States, he is entitled to the reduced rate of tax with respect to dividends derived in that year from United States sources, as provided in Article VIII of the convention, even though under the provisions of section 211 (b) of the Internal Revenue Code he has engaged in trade or business within the United States during such year by reason of his having performed personal services therein.

(b) *Effect of address in Belgium on withholding in the case of dividends.* For the purpose of withholding of United States tax in the case of dividends every nonresident alien (including a nonresident alien individual, fiduciary, and partnership) whose address is in Belgium shall be deemed by United States withholding agents to be a nonresident alien who is a resident of Belgium not having a permanent establishment within the United States; and every foreign corporation whose address is in Belgium shall be deemed by such withholding agents to be a Belgium corporation not having a permanent establishment within the United States.

(c) *Rate of withholding.* (1) Withholding at source in the case of dividends derived from sources within the United States and paid on or after January 1, 1953, to nonresident aliens (including a nonresident alien individual, fiduciary, and partnership) and to foreign corporations, whose addresses are in Belgium, shall be at the rate of 15 percent in every case except that in which, prior to the date of payment of such dividends, the Commissioner of Internal Revenue has notified the withholding agent that the reduced rate of withholding shall not apply.

(2) The preceding provisions respecting the application of the reduced withholding rate in the case of dividends paid to nonresident aliens and foreign corporations with addresses in Belgium are based upon the assumption that the payee of the dividend is the actual owner of the capital stock from which the dividend is derived and consequently is the person liable to United States tax upon such dividend. As to action by the recipient who is not the owner of the dividend, see § 7.1107.

(3) The rate at which United States tax has been withheld from any dividend paid at any time after the expiration of the thirtieth day after the date on which this subpart is published in the FEDERAL REGISTER to any person whose address is in Belgium at the time the dividend is paid shall be shown either in writing or by appropriate stamp on the check, draft, or other evidence of payment, or on an accompanying statement.

§ 7.1102 *Interest*—(a) *General.* The rate of United States tax imposed by the Internal Revenue Code upon interest on bonds, securities, notes, debentures, or on any other form of indebtedness, including interest on obligations of the United States, obligations of instrumentalities of the United States, and mortgages and bonds secured by real property, which is derived from sources within the United States in taxable years beginning on or after January 1, 1953, by a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) who is a resident of Belgium, or by a Belgian corporation or other entity, shall not exceed 15 percent under the provisions of Article VIIIA of the convention if such alien, corporation, or other entity at no time during the taxable year in which such interest is derived has a permanent establishment in the United States. As to what constitutes a permanent establishment, see Article II (1) (f) of the convention.

(b) *Application of reduced rate at source.* (1) To secure the reduced rate of United States tax at source in the case of coupon bond interest, the nonresident alien who is a resident of Belgium, or the Belgian corporation or other entity, shall for each issue of bonds file Form 1001–B in duplicate when presenting the interest coupons for payment. This form shall be signed by the owner of the interest, trustee, or agent and shall show the name and address of the obligor, the name and address of the owner of the interest, and the amount of the interest. It shall contain a statement that the owner (i) is a resident of Belgium, or is a Belgian corporation or other entity, and (ii) has no permanent establishment in the United States.

(2) The reduction in the rate of United States tax contemplated by Article VIIIA of the convention, insofar as it concerns coupon bond interest, is applicable only to the owner of the interest. The person presenting the coupon or on whose behalf it is presented shall, for the purpose of the reduction in tax, be deemed to be the owner of the interest only if he is, at the time the coupon is presented for payment, the owner of the bond from which the coupon has been detached. If the person presenting the coupon or on whose behalf it is presented is not the owner of the bond, Form 1001, and not Form 1001–B, shall be executed.

(3) The original and duplicate of Form 1001–B shall be forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland, with the quarterly return on Form 1012. See § 39.143–7 of this chapter (Regulations 118). Form 1001–B shall be listed on Form 1012.

(4) For general provisions pertaining to the use, without reference to the provisions of the convention, of ownership certificate, Form 1001, by nonresident aliens and nonresident foreign corporations, see §§ 39.143–4 and 39.143–6 of this chapter.

(5) To secure the reduced rate of United States tax at source in the case of interest, other than coupon bond interest, the nonresident alien who is a resident of Belgium, or the Belgian corporation or other entity, shall file Form 1001A–B in duplicate with the withholding agent in the United States. This form shall be signed by the owner of the interest, trustee, or agent and shall show the name and address of the obligor and the name and address of the owner of the interest. It shall contain a statement that the owner (i) is a resident of Belgium, or is a Belgian corporation or other entity, and (ii) has no permanent establishment in the United States.

(6) Form 1001A–B shall be filed with the withholding agent for each successive three-calendar-year period during which such interest is paid. For this purpose, the first such period shall commence with the beginning of the calendar year in which such income is first paid on or after January 1, 1953. Each such form filed with any withholding agent shall be filed not later than 20 days preceding the date of the first payment within each successive period, or, if that is not possible because of special circumstances, as soon as possible after such first payment. Once such a form has been filed in respect of any three-calendar-year period, no additional Form 1001A–B need be filed in respect thereto unless the Commissioner of Internal Revenue notifies the withholding agent that another such form shall be filed by the taxpayer. If, after filing such form, the taxpayer ceases to be eligible for the reduced rate of United States tax granted by Article VIIIA of the convention in respect to such interest, he shall promptly notify the withholding agent by letter in duplicate. When any change occurs in the ownership of the interest as recorded on the books of the payer, the reduction in rate of withholding of United States tax shall no longer apply unless the new owner of record is entitled to and does properly file a Form 1001A–B with the withholding agent.

(7) The duplicate of each Form 1001A–B (and letter) shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

§ 7.1103 *Natural resource royalties and real property rentals.* The convention does not change the rate of United States tax imposed pursuant to sections 211 and 231 of the Internal Revenue Code upon natural resource royalties and real property rentals. The withholding of United States tax with respect to such items derived from sources within the United States by nonresident aliens who are residents of Belgium, or by Belgian corporations or other entities, is not changed by the convention. See sections 143 (b) and 144 of the Internal Revenue Code and Articles VI and IX (1) of the convention.

§ 7.1104 *Patent and copyright royalties and film rentals*—(a) *General.* (1) Royalties derived from sources within the United States in taxable years beginning on or after January 1, 1953, by a nonresident alien individual, fiduciary, and partnership) who is a resident of Belgium, or by a Belgian corporation or other entity, as consideration for the right to use copyrights, patents, secret processes and formulae, trade-marks, and other analogous rights are exempt from United States tax under the provisions of Article IX (2) of the convention if such alien, corporation, or other entity at no time during the taxable year in which such royalties are derived has a permanent establishment within the United States. Such royalties are, therefore, not subject to the withholding of United States tax at source. As to what constitutes a permanent establishment, see Article II (1) (f) of the convention.

(2) The term "royalties" as used in this section shall be deemed to include rentals in respect of motion picture films.

(b) *Application of exemption from withholding.* (1) To avoid withholding of United States tax at source in the case of the royalties to which paragraph (a) of this section is applicable, the nonresident alien who is a resident of Belgium, or the Belgian corporation or other entity, shall file Form 1001A–B in duplicate with the withholding agent in the United States. The provisions of § 7.1102 (b) relating to the execution, filing, and effective period of such form with respect to interest are equally applicable with respect to the income falling within the scope of this section.

(2) The duplicate of each Form 1001A–B (and letter) shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

§ 7.1105 *Private pensions and annuities*—(a) *General.* Private pensions and annuities, as defined in Article X (3) and (4) of the convention, derived from sources within the United States in taxable years beginning on or after January 1, 1953, and paid to a nonresident alien individual who is a resident of Belgium are exempt from United States tax under the provisions of Article X (2) of the convention. Such items of income are, therefore, not subject to the withholding of United States tax at source.

(b) *Application of exemption from withholding.* (1) To avoid withholding of United States tax at source in the case of the items of income to which paragraph (a) of this section is applicable, the nonresident alien individual who is a resident of Belgium shall notify the withholding agent by letter in duplicate that such income is exempt from United States tax under the provisions of Article X of the convention. The letter of notification shall be signed by the owner of the income, shall show the name and address of both the payer and the owner of the income, and shall contain a statement that the owner, an individual, is neither a citizen nor a resident of the United States but is a resident of Belgium. If such letter is also to be used as authorization for the release, pursuant to § 7.1106, of excess tax withheld from such items of income, it shall also contain a statement that the owner was, at the time when the income was derived from which the excess tax was withheld, neither a citizen nor a resident of the United States but was a resident of Belgium.

(2) This letter shall constitute authorization for the payment of such items of income without withholding of United States tax at source unless the Commissioner of Internal Revenue subsequently notifies the withholding agent that the tax shall be withheld with respect to payments of such items of income made after receipt of such notice. If, after filing a letter of notification, the owner of the income ceases to be eligible for the exemption from United States tax granted by the convention in respect to such income, he shall promptly notify the withholding agent by letter in duplicate. When any change occurs in the ownership of such income as recorded on the books of the payer, the exemption from withholding of United States tax shall no longer apply unless the new owner of record is entitled to and does properly file a letter of notification with the withholding agent.

(3) Each letter of notification, or the duplicate thereof, shall be immediately forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland.

(c) *Definition of pensions and annuities.* (1) Under Article X (3) of the convention, the term "pensions", as used in Article X, means periodic payments made in consideration for services rendered or by way of compensation for injuries received.

(2) Under Article X (4) of the convention, the term "annuities", as used in Article X, means a stated sum payable periodically at stated times under an obligation to make the payments in consideration of money paid.

§ 7.1106 *Release of excess tax withheld at source.* (a) In order to give the convention effective application at the earliest practicable date, the exemptions from, and reductions in the rate of, withholding of United States tax at source granted by this subpart are hereby made effective beginning January 1, 1953, contingent upon compliance with the applicable provisions of § 7.1101 through § 7.1105.

(b) In the case of dividends derived from sources within the United States and paid to a nonresident alien (including a nonresident alien individual, fiduciary, and partnership) or to a foreign corporation, whose address at the time of payment was in Belgium, if United States tax at the statutory rate (30 percent as of the date of approval of this subpart) has been withheld from such dividends on or after January 1, 1953, there shall be released by the withholding agent and paid over to the person from whom it was withheld an amount which is equal to the amount obtained by subtracting 15 percent of such dividends from the tax so withheld.

(c) In the case of every taxpayer whose address at the time of payment was in Belgium and who furnishes to the withholding agent Form 1001A–B in accordance with §§ 7.1102 (b) and 7.1104 (b), if United States tax at the statutory rate (30 percent as of the date of approval of this subpart) has been withheld on or after January 1, 1953, from the items of income in respect of which such form is prescribed in such sections, there shall be released by the withholding agent and paid over to the person from whom it was withheld—

(1) In the case of interest (other than coupon bond interest), an amount which is equal to the amount obtained by subtracting 15 percent of such interest from the tax so withheld from such interest; and

(2) In the case of patent royalties, copyright royalties, film rentals, and the like, an amount equal to the tax so withheld from such items.

(d) In the case of every taxpayer whose address at the time of payment was in Belgium and who furnishes to the withholding agent Form 1001–B clearly marked "Substitute" and executed in accordance with § 7.1102 (b), if United States tax at the statutory rate (28 percent or 30 percent, as the case may be, as of the date of approval of this subpart) has been withheld from coupon bond interest on or after January 1, 1953, there shall be released by the withholding agent and paid over to the person from whom it was withheld an amount which is equal to the difference between the amount of such interest multiplied by the higher of such statutory rates (30 percent as of the date of approval of this subpart) and 15 percent of such interest. One such substitute form shall be filed in duplicate with respect to each issue of bonds and will serve with respect to that issue to replace all Forms 1001 previously filed by the taxpayer in the calendar year in which the excess tax was withheld and with respect to which such excess is released.

(e) The original and duplicate of such substitute Form 1001–B shall be forwarded by the withholding agent to the District Director of Internal Revenue, Audit Division, Alien Returns Section, Baltimore 2, Maryland, with the quarterly return on Form 1012. See § 39.143–7 of this chapter. Such substitute Form 1001–B shall be listed on Form 1012.

(f) In the case of every taxpayer whose address at the time of payment was in Belgium and who furnishes to the withholding agent the letter of notification prescribed in § 7.1105 (b) as authorization for the release of excess tax withheld, if United States tax at the statutory rate (30 percent as of the date of approval of this subpart) has been withheld on or after January 1, 1953, from private pensions and annuities as defined in Article X, there shall be released by the withholding agent and paid over to the person from whom it was withheld an amount equal to the tax so withheld from such items.

(g) The provisions of this section shall have no application to excess tax withheld at source which has been paid by the withholding agent to the district director of internal revenue pursuant to § 39.143–7 of this chapter.

§ 7.1107 *Addressee not actual owner*—(a) *General.* (1) If the recipient in Belgium of any dividend from sources within the United States, with respect to which United States tax at the reduced rate of 15 percent has been withheld at source pursuant to § 7.1101 (c), is a nominee or representative through whom such dividend flows to a person other than one described in § 7.1101 (a) as being entitled to such reduced rate,

such recipient in Belgium shall withhold an additional amount of United States tax equivalent to the United States tax which would have been withheld if the convention had not been in effect (30 percent of such dividend as of the date of approval of this subpart) minus the 15 percent which has been withheld at the source.

(2) In any case in which a fiduciary or partnership with an address in Belgium receives, otherwise than as a nominee or representative, a dividend from sources within the United States with respect to which United States tax at the reduced rate of 15 percent has been withheld at source pursuant to § 7.1101 (c), if a beneficiary of such fiduciary or a partner in such partnership is not entitled to the reduced rate of United States tax granted by Article VIII (1) of the convention, the fiduciary or partnership shall withhold an additional amount of United States tax with respect to the portion of such dividend included in such beneficiary's share of the distributed or distributable income, or in such partner's distributive share of the income, of such fiduciary or partnership, as the case may be. The amount of the additional tax is to be calculated in the same manner as under the immediately preceding paragraph of this section.

(3) If any amount of United States tax is released pursuant to § 7.1106 by the withholding agent in the United States with respect to a dividend paid to such a person (nominee, representative, fiduciary, or partnership) with an address in Belgium, the latter shall also withhold from such released amount any additional amount of United States tax, otherwise required to be withheld by the preceding provisions of this section in respect of such dividend, in the same manner as if at the time of payment of such dividend United States tax at the rate of only 15 percent had been withheld at source therefrom.

(b) *Returns filed by Belgium withholding agents.* The amounts withheld pursuant to paragraph (a) of this section by any withholding agent in Belgium shall be deposited, without converting such amounts into United States dollars, with the Belgium Directeur General de l'Administration des Contributions Directes on or before the 15th day after the close of the quarter of the calendar year in which such withholding in Belgium occurs. The withholding agent making such deposit shall render therewith such appropriate Belgium form as may be prescribed by the Directeur General de l'Administration des Contributions Directes. The amounts so deposited should be remitted by the Directeur General by draft in United States dollars to the District Director of Internal Revenue, Baltimore 2, Maryland, U. S. A., on or before the end of the calendar month in which the deposit is made, and should be accompanied by such Belgian form as may be required to be rendered by the withholding agent in Belgium in connection with such deposit.

§ 7.1108 *Information to be furnished in ordinary course*—(a) *General.* In compliance with the provisions of Article XV of the convention the Commissioner of Internal Revenue will transmit to the Belgian Directeur General de l'Administration des Contributions Directes, as soon as practicable after the close of the calendar year 1953 and of each subsequent calendar year during which the convention is in effect, the following information relating to such preceding calendar year:

(1) The duplicate copy of each available Form 1042 Supplement filed pursuant to paragraph (b) of this section; and

(2) The duplicate copy of each available ownership certificate, Form 1001–B, filed pursuant to § 7.1102 (b), and substitute Form 1001–B, filed pursuant to § 7.1106, in connection with coupon bond interest.

(b) *Information return.* (1) To facilitate compliance with Article XV of the convention, every United States withholding agent shall make and file in duplicate with the district director of internal revenue for the district in which the withholding agent is located an information return on Form 1042 Supplement, with respect to Belgian addressees, which shall be filed for the calendar year 1953 and subsequent calendar years. This return shall be filed simultaneously with the Form 1042 required by § 39.143–7 of this chapter.

(2) There shall be reported on such Form 1042 Supplement all items of fixed or determinable annual or periodical income derived from sources within the United States and paid to nonresident aliens (including nonresident alien individuals, fiduciaries, and partnerships) and to nonresident foreign corporations, whose addresses at the time of payment were in Belgium, including such items of income upon which, in accordance with this Treasury decision, no withholding of United States tax is required; except that any of such items which constitute interest in respect of which Form 1001–B or substitute Form 1001–B has been filed in duplicate with the withholding agent are not required to be reported on such Form 1042 Supplement.

§ 7.1109 *Beneficiaries of a domestic estate or trust.* A nonresident alien who is a resident of Belgium and who is a beneficiary of a domestic estate or trust shall be entitled to the exemption from, or reduction in the rate of, United States tax granted by Articles VIII, VIIIA, and IX (2) of the convention with respect to dividends, interest, and copyright royalties and the like, to the extent such item or items are included in his share of the distributed or distributable income of such estate or trust, provided that he otherwise satisfies the requirements of these respective articles. In order to be entitled in such instance to the exemption from, or reduction in the rate of, withholding of United States tax such beneficiary must otherwise satisfy such requirements and shall, where applicable execute and submit to the fiduciary of such estate or trust in the United States the Form 1001A–B prescribed in § 7.1102 (b) and § 7.1104 (b).

Because it is necessary to bring into effect at the earliest practicable date the rules of this Treasury decision respecting release of excess tax withheld, and exemption from, or reduction in the rate of, withholding of tax, it is hereby found that it is impracticable to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of that act.

[SEAL] O. GORDON DELK,
*Acting Commissioner of Internal Revenue.*

Approved: December 4, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

[T. D. 6058; Regs. 111, 118]

PART 29—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1941

PART 39—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1951

NONDISTRIBUTABLE INCOME OF PERSONAL HOLDING COMPANIES

On September 5, 1953, there was published in the FEDERAL REGISTER (18 F. R. 5388) a notice of proposed rule making with respect to amendments to conform Regulations 103 and 111 (26 CFR Parts 19, 29) to section 349 of the Revenue Act of 1951, approved October 20, 1951, relating to the exclusion of certain nondistributable income in determining the undistributed subchapter A net income of personal holding companies. No comments regarding the rules proposed having been received during the 30-day period prescribed in such notice, the amendments to such regulations and to Regulations 118 (26 CFR Part 39) set forth below are hereby adopted:

PARAGRAPH 1. There is inserted immediately preceding § 29.504–1 the following:

SEC. 349. NONDISTRIBUTABLE INCOME OF PERSONAL HOLDING COMPANIES (REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Effective for taxable years beginning after December 31, 1939, section 504 is hereby amended by adding at the end thereof the following new subsection:

(e) The amount by which the undistributed subchapter A net income determined without reference to this subsection exceeds the amount which could be distributed on the last day of the taxable year as a dividend (1) without violating any action, regulation, rule, order, or proclamation taken, promulgated, made, or issued by, or pursuant to the direction of, the President or any agency that he may designate, under the Trading With the Enemy Act of October 16, 1917, as amended, or the First War Powers Act of 1941, and (2) not subject to a lien in favor of the United States.

PAR. 2. Section 29.504–1 is amended as follows:

(A) By deleting in the first sentence thereof the word "and" which immediately precedes "(d)".

(B) By striking the period at the end of the first sentence and by inserting in lieu thereof a comma and the following: "and (e) the amount by which the undistributed subchapter A net income (determined without reference to this provision) exceeds the amount which could be distributed on the last day of the taxable year as a dividend (1) without violating any action, regulation, rule, order, or proclamation taken, promulgated, made, or issued by, or pursuant to the direction of, the President or any agency that he may designate, under the Trading With the Enemy Act, 40 Stat. 411, as amended (50 U. S. C. App. 1 et seq.), or the First War Powers Act, 1941, 55 Stat. 838 (50 U. S. C. App. 601 et seq.), and (2) not subject to a lien in favor of the United States."

(53 Stat. 32, 467; 26 U. S. C. 62, 3791)

[SEAL] T. COLEMAN ANDREWS,
*Commissioner of Internal Revenue.*

Approved: December 4, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

[F. R. Doc. 53-10291; Filed, Dec. 9, 1953; 8:50 a. m.]

Subchapter C—Miscellaneous Excise Taxes

[T. D. 6057; Regs. 42, 43, 113]

PART 101—TAXES ON ADMISSIONS, DUES, AND INITIATION FEES

PART 130—TAXES ON SAFE DEPOSIT BOXES AND ON CERTAIN TRANSPORTATION AND COMMUNICATION SERVICES

PART 143—TAX WITH RESPECT TO THE TRANSPORTATION OF PROPERTY

DELETION OF INSTRUCTION WITH RESPECT TO SUBMISSION OF CERTAIN INFORMATION BY DISTRICT DIRECTORS

Regulations 42 (1942 Edition) (26 CFR Part 130), Regulations 43 (1941 Edition) (26 CFR Part 101), and Regulations 113 (1943 Edition) (26 CFR Part 143) are amended as follows:

PARAGRAPH 1. Section 130.75 of Regulations 42 is amended by striking out the second sentence thereof.

(53 Stat. 206, 423, as amended, 467; 26 U. S. C. 1855, 3472, 3791)

PAR. 2. Section 101.37 of Regulations 43, as amended by Treasury Decision 5349, approved March 17, 1944, is further amended by striking out the last sentence of paragraph (d) thereof.

(53 Stat. 467; 26 U. S. C. 3791)

PAR. 3. Section 143.55 of Regulations 113 is amended by striking out the second sentence thereof.

(53 Stat. 423, as amended, 467; 26 U. S. C. 3472, 3791. Interprets or applies 53 Stat. 206; 26 U. S. C. 1855)

Because this Treasury decision merely removes from Regulations 42, Regulations 43, and Regulations 113 an instruction with respect to the submission of information by district directors of internal revenue to the Commissioner, it is hereby found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

This Treasury decision shall be effective upon its filing for publication in the FEDERAL REGISTER.

[SEAL] T. COLEMAN ANDREWS,
*Commissioner of Internal Revenue.*

Approved: December 4, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter II—Corps of Engineers, Department of the Army

PART 203—BRIDGE REGULATIONS

BISCAYNE BAY, FLORIDA

Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), special regulations governing the operations of the east and west drawspans in the bridges commonly designated as the Venetian Causeway across Biscayne at N. E. 15th Street, and MacArthur Causeway across Biscayne Bay at N. E. 13th Street, Miami, Florida, are hereby amended to read as follows:

§ 203.447 *Biscayne Bay, Fla.; State Road Department of Florida highway bridge (MacArthur or 13th Street Causeway) and Dade County Port Authority highway bridge (Venetian or 15th Street Causeway), Miami, Fla.* (a) During the period from November 1 to April 30, both dates inclusive, the owners of or agencies controlling these bridges shall not be required to open the east and west drawspans of the MacArthur Causeway and the west drawspan of Venetian Causeway between 7:00 a. m. and 9:00 a. m. or between 4:30 p. m. and 6:30 p. m., except that all three drawspans shall be opened on the half hour and even hour for sufficient time to pass any vessels awaiting passage.

(b) During the period from November 1 to April 30, both dates inclusive, the owner of or agency controlling Venetian Causeway shall not be required to open the east drawspan between 7:15 a. m. and 8:45 a. m. or between 4:45 p. m. and 6:15 p. m., except that the drawspan shall be opened at 7:45 a. m. and 8:15 a. m., 5:15 p. m. and 5:45 p. m. for sufficient time to pass any vessels awaiting passage.

(c) Any of the drawspans shall be opened at any time when required by a tow, or in an emergency. An emergency shall be indicated by four blasts of the signalling device.

(d) Officers of the Police Departments of Miami and Miami Beach shall be stationed at the respective draws and at the ends of the causeways during the above hours to regulate traffic in conjunction with the bridge tenders.

(e) Boat owners shall cooperate insofar as possible to facilitate the operation of the draws of the bridges.

(f) Signs indicating the nature of the regulations will be placed by the State Road Department and the Dade County Port Authority where and as directed by the District Engineer, Corps of Engineers, in charge of the locality.

[Regs., November 12, 1953, 823.01 (Biscayne Bay, Florida)–ENGWO] (28 Stat. 362; 33 U. S. C. 499)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army,*
*The Adjutant General.*

[F. R. Doc. 53-10265; Filed, Dec. 9 1953; 8:50 a. m.]

PART 207—NAVIGATION REGULATIONS

BERING STRAIT, ALASKA

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1) and Chapter XIX of the Army Appropriations Act of July 9, 1918 (40 Stat. 892; 33 U. S. C. 3), § 207.804 is hereby prescribed establishing and governing the use and navigation of a restricted area in Bering Strait off Cape Prince of Wales, Alaska, and §§ 207.129 and 207.141 are hereby revoked as follows:

§ 207.804 *Bering Strait, Alaska; naval restricted area off Cape Prince of Wales*—(a) *The area.* An area 2 000 feet wide extending from a point on Cape Prince of Wales marked by a triangular cable marker located approximately midway between the village of Wales and Cape Prince of Wales Light to a point four statute miles due west of the cable marker with the axis of the area passing through the two points.

(b) *The regulations.* (1) No vessel shall anchor in the restricted area described in paragraph (a) of this section.

(2) Dragging of anchors in or across the restricted area is prohibited and no object attached to a vessel shall be placed on or near the bottom.

(3) The regulations in this section shall be enforced by the Commandant, Seventeenth Naval District, Seattle, Washington, and such agencies as he may designate.

§ 207.129 *York River, Virginia; U. S. Navy anti-torpedo net areas.* [Revoked.]

§ 207.141 *Chesapeake Bay, Hampton Roads; U. S. Navy anti-torpedo net areas.* [Revoked.]

[Regs., November 17, 1953, 800.212 (Bering Strait, Alaska)-ENGWO and 800.2121 (Chesapeake Bay)-ENGWO] (40 Stat. 266, 892; U. S. C. 1, 3)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army,*
*The Adjutant General.*

[F. R. Doc. 53-10287; Filed, Dec. 9, 1953; 8:50 a. m.]

PART 209—ADMINISTRATIVE PROCEDURE

PIERS, DREDGING, ETC., IN WATERWAYS

A new subparagraph (6) is added to § 209.130 (a) as follows:

§ 209.130 *Piers, dredging, etc., in waterways*—(a) *Laws relating to permits.* * * *

(6) For minor structures and work in unimproved waterways or in improved waterways where such structures and work are well removed from the fairways used by navigation, authorization may be by a letter of permission. No drawings will be required to be submitted, nor will any public notice be issued in such cases. This procedure may be utilized when, in the opinion of the District Engineer concerned, there could be no opposition from the standpoint of navigation and authorization would unquestionably be given. If State law or local ordnance requires approval of the structures or work, a copy of such approval will be submitted with the application. Aerial crossings and submarine cables and other underwater crossings will not be regarded as minor structures or work.

* * * * *

[Regs., Nov. 27, 1953, ENGWO] (R. S. 161; 5 U. S. C. 22)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army,*
*The Adjutant General.*

## TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

### Chapter I—Veterans' Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART A—EDUCATIONAL BENEFITS

SUBPART C—TRAINING FACILITIES

MISCELLANEOUS AMENDMENTS

1. In Subpart A, paragraph (b) (3) (ix) of § 21.53 is amended to read as follows:

§ 21.53 *Extension of entitlement.*
* * *

(b) *School, college, or university courses.* * * *

(3) * * *

(ix) In all excess cost courses where the dollar value of remaining entitlement including any statutory extension is not sufficient to cover the term, semester, or period of enrollment, the converted value of the veteran's remaining entitlement, having been determined by the educational benefits representative and reported on VA Form 7-1907c or VA Form 7-1907c-1, will not be exceeded by the finance activity, and this amount may be paid regardless of the time in the course when charges for tuition, fees, supplies, etc., fall due; the time limit determined for subsistence payment shall not preclude the payment of the total amount of charges for tuition, etc., as authorized in this section in an extension of entitlement.

* * * * *

2. In § 21.54, paragraphs (a) and (b) are amended to read as follows:

§ 21.54 *Election of benefit.* (a) Any person who has eligibility for education or training under Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), and who also has eligibility for vocational rehabilitation training under Part VII, as amended, may elect either benefit or may be provided an approved combination of courses: *Provided*, That the total period of any such combination of courses shall not exceed the maximum period or limitations under either Part VII or Part VIII, as amended, whichever affords the greater period of eligibility. An approved combination of courses under these laws may not be construed to mean concurrent pursuit under both laws. This provision of the law offers the veteran the right to elect whether he will take training under either Part VII or Part VIII, as amended, and further specifies that the Veterans' Administration may provide him with a combination of courses involving training under one act supplemented with training under the other. However, it is wholly within the discretion of the Veterans' Administration whether any combination of courses is to be provided in any case for the veteran.

(b) For the purposes of election between Parts VII and VIII, a presumption of eligibility under Part VII will attach (if need has not been officially determined to exist or not to exist), when there is of record, an official finding by duly constituted claims authority that the veteran has a service-connected compensable disability incurred in or aggravated by service in the Armed Forces of the United States in World War II or on or after June 27, 1950, and prior to such date as shall thereafter be determined by Presidential proclamation or concurrent resolution of Congress. This presumption may be rebutted in any case only through filing by the veteran of VA Form 7-1900 and a subsequent determination that need for training does not exist.

* * * * *

3. In § 21.625 of Subpart C, paragraph (d) is amended, paragraph (f) is deleted, and former paragraphs (g), (h), (i), and (j) are redesignated paragraphs (f), (g), (h), and (i), so that the amended and redesignated material reads as follows:

§ 21.625 *Contract negotiations for correspondence courses.* * * *

(d) *Negotiation of contracts.* All contracts and supplements to existing contracts for correspondence courses shall be negotiated by central office and decentralized to regional offices. Where possible, contracts for correspondence courses will be negotiated for use under both Public Laws 16 and 346. In some instances, a separate contract may be negotiated separately for Public Law 16 and Public Law 346 enrollments. In the event that a contract is limited in scope, indication will be given either in the body or on the face thereof by a stamp impression or otherwise. Contracts negotiated for correspondence courses are usually approved for use in all States. Occasionally, however, contracts are negotiated by central office for correspondence courses of limited application as to program or region.

* * * * *

(f) *Information concerning correspondence courses.* Information concerning the subject matter of courses and academic credit for such courses of institutions which are members of the National University Extension Association can be obtained from the Guide to Correspondence Study, a publication of that association. Copies of such publication have been furnished each regional office. Specific questions as to the content of courses covered in the above publication and courses included in Veterans Administration contracts may be directed to the institutions offering the courses. The Home Study Blue Book and Directory of Private Home Study Schools and Courses, published by the National Home Study Council, Washington, D. C., also furnishes information as to courses offered by member institutions of such council.

(g) *Request for correspondence course for which no contract exists.* When a correspondence course is desired for which no contract has been decentralized to the regional offices, request for a contract for the desired course may be made to central office by the school or the regional office.

(h) *Courses not included in contract.* Before any correspondence course offered by an institution with which a contract has been negotiated but which course is not included in the contract may be made available to eligible veterans, an amendment by a supplement to the original contract including such courses must be negotiated by central office.

(i) *Changes in courses.* Changes in courses made by the institution with which a contract has been negotiated during the life of the contract will become effective and a part of the contract only upon negotiation of a supplement to the existing contract. Minor changes in courses or course material not affecting the length of the course of number of lessons and not lowering the educational value of the courses or the quality of the course materials, such as revision of text, the substitution of a newer lesson for an older one, or the substitution of equipment of equal or greater value, are permitted without notice. Such minor changes and revisions shall be placed on file with the Director, Training Facilities Service For Vocational Rehabilitation and Education, Central Office, Veterans' Administration, Washington 25, D. C., at the time of the change or revision, in all cases in which the original course material was submitted to the Veterans' Administration for review.

4. In § 21.669, paragraph (b) is deleted.

§ 21.669 *Certification by institution.*
* * *

(b) [Deleted.]

5. Section 21.669a *Compliance with ceiling price regulations* is revoked.

(Sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 2, 57 Stat. 43, as amended, sec. 400, 58 Stat. 287, as amended; 38 U. S. C. 11a, 701, 707, ch. 12 note. Interpret or apply secs. 3, 4, 57 Stat. 43, as amended, secs. 300, 1500–1504, 1506, 1507, 58 Stat. 286, 300, as amended; 38 U. S. C. 693g, 697–697d, 697f, g, ch. 12 note)

This regulation is effective December 10, 1953.

[SEAL] H. V. STIRLING,
*Deputy Administrator.*

[F. R. Doc. 53-10299; Filed, Dec. 9, 1953; 8:52 a. m.]

## TITLE 50—WILDLIFE

### Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter B—Hunting and Possession of Wildlife

PART 6—MIGRATORY BIRDS AND CERTAIN GAME MAMMALS

COMPENSATORY EXTENSION OF CERTAIN MIGRATORY GAME BIRD SEASON

*Basis and purpose.* A request has been received from the State of Tennessee for an extension of the mourning dove season by the number of days sportsmen were not permitted to hunt such birds due to emergency State action closing extensive areas to shooting as a forest fire prevention measure. It has been determined that the slight compensatory extension sought is not likely to result in a diminution of the birds to any greater extent than was contemplated for the original period.

Accordingly, pursuant to authority conferred upon me by § 6.4 of the Migratory Bird Treaty Act Regulations (16 F. R. 7513), the seasons fixed by the amendments to such regulations approved August 21 and October 28, 1953 (18 F. R. 5175 and 18 F. R. 6971) are, subject to shooting hours and other applicable provisions of the current Federal regulations, extended as follows:

In that part of Tennessee lying east of Kentucky Lake, mourning doves from December 8 to December 12, both dates inclusive, an extension of five days.

Since these amendments are relaxations of existing regulations, notice and public procedure thereon are not required (60 Stat. 237; 5 U. S. C. 1001 et seq.), and they shall become effective immediately.

(Sec. 3, 40 Stat. 755, as amended; 16 U. S. C. 704)

Dated: December 4, 1953.

JOHN L. FARLEY,
*Director,*
*Fish and Wildlife Service.*

[F. R. Doc. 53-10269; Filed, Dec. 9, 1953; 8:45 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### [ 26 CFR Part 192 ]

FERMENTED MALT LIQUORS

PROPOSED AMENDMENT OF REQUIREMENTS FOR FILLING CASES AND PREPARING CERTAIN FORMS

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted, in writing, in duplicate, to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 161 of the Revised Statutes and sections 3176 and 3791 of the Internal Revenue Code (Sec. 161 R. S.; 5 U. S. C. 22; 53 Stat. 375, 467; 26 U. S. C. 3176, 3791.)

[SEAL] T. COLEMAN ANDREWS,
*Commissioner of Internal Revenue.*

In order to provide for more accurate determination of a brewer's tax liability by eliminating the present provisions for packaging an indiscriminate mixture of seven and eight ounce bottles or eleven and twelve ounce bottles of beer in one case, and to require that the daily statement of fermented malt liquor bottled be reported in Form 103 in lieu of Form 139, Regulations 18 (26 CFR Part 192), are hereby amended as follows:

PARAGRAPH 1. Wherever the term "supervisor" or "district supervisor" appears in the sections of the regulations revised by this Treasury decision, such term is hereby amended to read "Assistant Regional Commissioner."

PAR. 2. Section 192.281 is amended by changing the colon in the first sentence to a period and striking the proviso which begins *"Provided,* That due to conditions".

PAR. 3. Section 192.440 is amended as follows:

(A) By inserting in the first sentence, immediately after the words "removed from the brewery premises," the phrase "the quantity of fermented liquor bottled,".

(B) By striking the fifth sentence, which begins "The aggregates of quantities bottled".

PAR. 4. Section 192.441 is amended as follows:

(A) By striking from the second sentence the words "bottled and the aggregate quantity".

(B) By striking from the last sentence the words "bottled and entries as to quantities".

These amendments shall become effective on the first day of the first month which begins not less than thirty days following the date of publication in the FEDERAL REGISTER.

[F. R. Doc. 53-10292; Filed, Dec. 9, 1953; 8:51 a. m.]

## SECURITIES AND EXCHANGE COMMISSION

### [ 17 CFR Parts 240, 249 ]

WHEN ISSUED TRADING RULES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration the above-mentioned proposals for revision of its when issued trading rules, pursuant to the provisions of section 3 (a) (12), 12 and 23 (a) of the Securities Exchange Act of 1934.

The Commission is engaged in a comprehensive review of the rules, regulations, forms and procedures adopted under the various statutes administered by it. It is attempting to eliminate duplication and to simplify its requirements wherever practicable without prejudice to the public interest or the protection of investors. The present proposals are part of this program.

Regulation X-12D3, which consists of §§ 240.12d3-1 through 240.12d3-10 (Rules X-12D3-1—X-12D3-10), provides for the registration for when issued trading on national securities exchanges of unissued short-term warrants, commonly called subscription rights, and for such registration of unissued securities other than short-term warrants. Form 1-J (17 CFR 249.231) is the appropriate form required to be filed for registration of such warrants, and Form 2-J (17 CFR 249.232) is required to be filed for registration of other unissued securities.

For all practical purposes, Regulation X-12D3 and Form 1-J have been obsolete as to warrants since June 22, 1950, when the Commission amended § 240.-12a-4 (Rule X-12A-4) to provide that an unissued short-term warrant as well as an issued short-term warrant could be traded on an exchange as an exempted security pursuant to the filing of an exemption statement on Form AN-4 (17 CFR 249.235) by either the issuer or the exchange for both when issued and regular way trading. On December 29, 1952, the Commission further amended Rule X-12A-4 to substitute the filing by the exchange of a notice of intent to trade in lieu of the formal filing of an exemption statement on Form AN-4, and Form AN-4 was then rescinded.

On March 20, 1953, the Commission amended § 240.12a-5 (Rule X-12A-5) so that the conditional temporary exemption from registration provided by that rule for trading issued securities on exchanges would also provide such exemption for trading such securities on a when issued basis before they are issued. Since trading under § 240.12a-5 (Rule X-12A-5) is on the basis of a notice from the exchange, the amendment of March 20, 1953, made unnecessary the filing of formal applications for registration on Form 2-J for when issued trading in unissued securities proposed to be issued in stock splits, stock dividends, mergers, consolidations, reorganization plans, etc., to the holders of securities already traded on exchanges.

The only cases in which Regulation X-12D3 is still believed to serve a substantial practical purpose is where the securities to be traded are the subject of a voluntary subscription or exchange right granted to the holders of a security traded on an exchange. The present proposal contemplates that § 240.12a-5 (Rule X-12A-5) be further amended to cover these cases and generally to simplify its requirements. The provisions of § 240.12a-5 (Rule X-12A-5), which are applicable whether the new security is issued or unissued, should be far less burdensome to issuers and exchanges than the provisions of Regulation X-12D3, and in almost all cases public information concerning the transactions is available either under one of the Acts administered by the Commission or otherwise.

If the proposed amendment to § 240.-12a-5 (Rule X-12A-5) is adopted, it is believed that none of the ten rules of Regulation X-12D3 will continue to serve a useful purpose and it is, therefore, proposed to rescind the entire regulation and Form 1-J and 2-J promulgated thereunder.

It is also proposed to rescind §§ 240.-12a-6, 240.12a-7, 240.12a-8, and 240.12a-9 (Rules X-12A-6, X-12A-7, X-12A-8 and X-12A-9). The situation to which §§ 240.12a-6 and 240.12a-8 (Rules X-12A-6 and X-12A-8) relate are believed to be covered by § 240.12a-5 (Rule X-12A-5). Sections 240.12a-7 and 240.12a-9 (Rules X-12A-7 and X-12A-9) were promulgated in the light of particular circumstances and it is believed are no longer of general usefulness.

The text of the proposed amendments to § 240.12a-5 (Rule X-12A-5) is as follows:

§ 240.12a-5 *Temporary exemption of substituted or additional securities.* (a) (1) Whenever by operation of law or otherwise the holders of a security admitted to trading on a national securities exchange (hereinafter called the "original" security) have the right to subscribe to or otherwise acquire all or any part of a class of another security in substitution for or in addition to the original security, the entire class outstanding of such other security shall be exempted from the operation of section 12 (a) to the extent necessary to render lawful the effecting of transactions therein on any national securities exchange on which the original security is admitted to trading: *Provided*, That a registration statement is in effect under the Securities Act of 1933 as to such other security, to the extent required, or the terms of any applicable exemption from registration under such act have been complied with, if required.

(2) An unissued security shall be exempt from the operation of section 12 (a) of the act to the extent necessary to render lawful when issued trading in such security on a national securities exchange, provided (i) transactions in the security on such exchange would upon the issuance of the security be exempt under this rule from the operation of said section, (ii) a registration statement is in effect under the Securities Act of 1933 as to such unissued security, to the extent required, or the terms of any applicable exemption from registration under such act have been complied with, if required, (iii) the approval of stockholders of the issuance of such security has been obtained, if required, and (iv) all other necessary official action, other than the filing or recording of charter amendments or other documents with the appropriate State authorities, has been taken to authorize and assure the issuance of such security.

* * * * *

(d) The exchange shall notify the Commission in writing of any event within the purview of paragraph (a) of this section promptly after acquiring knowledge thereof. The notification shall briefly describe the event, shall state the date on which the substituted or additional security was or is proposed to be admitted to trading on the exchange as a security exempted from the operation of section 12 (a) by this section, and shall, unless a registration statement has been filed under the Securities Act of 1933 or an application has been filed under the Securities Exchange Act of 1934 with respect to such security, briefly describe the plan of issuance of such security. The exchange shall promptly notify the Commission of any material change in the foregoing.

All interested persons are invited to submit data, views and comments on these proposals in writing to the Secretary, Securities and Exchange Commission, at its principal office, 425 Second Street NW., Washington 25, D. C., on or before December 24, 1953.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

DECEMBER 2, 1953.

## [ 17 CFR Part 240 ]

### PROXY RULES

### PUBLIC HEARING ON PROPOSED AMENDMENTS

On October 9, 1953, the Commission announced in Securities Exchange Act Release No. 4950, that it had under consideration proposed amendments to its proxy rules under the Securities Exchange Act of 1934, and invited all interested persons to submit views and comments in writing with respect to the proposals. Having considered the comments received, the Commission has decided that the public interest warrants a hearing on the proposed changes in the proxy rules.

Accordingly, notice is hereby given that a public hearing will be held in Room 102 at its offices, 425 Second Street NW., Washington 25, D. C., on Wednesday, December 16, 1953, at 9:30 a. m.

Any person interested in presenting his views on the proposed amendments to the proxy rules at this public hearing should, not later than December 14, 1953, at 5:30 p. m., submit to the Commission in writing a statement of his intention to appear at the hearing, and of the matters upon which he desires to be heard. In view of the fact that only the one day, December 16, 1953, is available for this hearing, it is urged that interested persons file written statements of their views in advance of the hearing date and limit their requests for time to make oral presentations to not more than 15 minutes, if possible, so as to provide an opportunity for all interested persons to be heard.

Communications or requests with respect to the hearing should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

DECEMBER 4, 1953.

[F. R. Doc. 53-10281; Filed, Dec. 9, 1953; 8:48 a. m.]

## [ 17 CFR Parts 240, 249 ]

### REGISTRATION OF CLASSES OF SECURITIES

### NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration the above-mentioned proposals, pursuant to the provisions of sections 12 and 23 (a) of the Securities Exchange Act of 1934.

The Commission is engaged in a comprehensive review of the rules, regulations, forms and procedures adopted under the various statutes administered by it. It is attempting to eliminate duplication and to simplify its requirements wherever practicable without prejudice to the public interest or the protection of investors. As a part of this program, the Commission is circulating for comment certain simplifications and revisions of its when issued trading rules.

The Commission is also considering a revision of its registration practice under section 12 of the act. Under the existing practice, registration is effective only as to a specified number of shares or a specified amount of a class of security so that if additional shares or amounts of the same class are subsequently issued, a new application on Form 8-A (17 CFR 249.208a) must be filed for registration of the additional amounts. Under the present proposal the original application for registration would be deemed to apply for registration of the entire class, and the registration of unissued shares or amounts would become automatically effective when they are issued, without further application, certification or order. This proposal would make unnecessary a large majority of the applications previously filed on Form 8-A since most such applications are for registration of additional blocks of a class of security already registered in part. In view of the reporting requirements of Forms 8-K and 10-K (17 CFR 249.308 and 249.310), it is not believed that the filing of such applications is necessary in the interest of investors. Under the proposed procedure, applications on Form 8-A would have to be filed only in the event that a new class or series is to be registered. The time and expense saved by registrants, exchanges and the Commission itself should be considerable.

The new procedure, if adopted, will, of course, not affect the continuing right of exchanges to require certain filings with them prior to actual listing or issuance of specified blocks of the registered class or prior to modification thereof.

If the above proposal is adopted, it is also proposed (1) to amend the provisions of Regulation X-12D1 which govern exchange certifications so as to eliminate requirements which will be unnecessary under the new procedure and (2) to rescind paragraph (b) of § 240.12d2-2 (Rule X-12D2-2) for the same reason.

It is further proposed to amend Form 8-A. A copy of the proposed amended form is attached.[1] It will be noted that the revision considerably simplifies the old form. This has been made possible principally by the deletion of certain requirements which are considered to be unnecessarily burdensome and detailed in view of the current and annual reporting requirements of the registrant and in view of the class registration technique.

The text of the proposed amended Regulation X-12D1 is as follows:

[1] Filed as part of the original document.

### EFFECTIVENESS OF REGISTRATION; EXCHANGE CERTIFICATION

§ 240.12d1-1 *Registration effective as to class or series.* (a) An application filed pursuant to section 12 (b) and (c) of the act for registration of a security on a national securities exchange shall be deemed to apply for registration of the entire class or series of such security. Registration shall become effective, as provided in section 12 (d) of the act, (1) as to the shares or amounts of such class or series then issued, and (2), without further application for registration, upon issuance as to additional shares or amounts of such class or series then or thereafter authorized.

(b) This section shall apply to classes and series of securities of which a specified number of shares or amounts was registered or registered upon notice of issuance, and to applications for registration filed, prior to the close of business on ----------, as well as to classes and series registered, or applications filed, thereafter.

(c) This section shall not affect the right of a national securities exchange to require the issuer of a registered security to file documents with or pay fees to the exchange in connection with the modification of such security or the issuance of additional shares or amounts.

§ 240.12d1-2 *Acceleration of effectiveness of registration.* A request for acceleration of the effective date of registration pursuant to section 12 (d) of the act and § 240.12d1-1 shall be made in writing by either the registrant, the exchange, or both and shall briefly describe the reasons therefor.

§ 240.12d1-3 *Requirements as to certification.* (a) Certification that a security has been approved by an exchange for listing and registration pursuant to section 12 (d) of the act and § 240.12d1-1 shall be made by the governing committee or other corresponding authority of the exchange.

(b) The certification shall specify (1) the approval of the exchange for listing and registration; (2) the title of the security so approved; (3) the date of filing with the exchange of the application for registration and of any amendments thereto; and (4) any conditions imposed on such certification. The exchange shall promptly notify the Commission of the partial or complete satisfaction of any such conditions.

(c) The certification may be made by telegram but in such case shall be confirmed in writing. All certifications in writing and all amendments thereto shall be filed with the Commission in duplicate and at least one copy shall be manually signed by the appropriate exchange authority.

§ 240.12d1-4 *Date of receipt of certification by Commission.* The date of receipt by the Commission of the certification approving a security for listing and registration shall be the date on which the certification is actually received by the Commission or the date on which the application for registration to which the certification relates is actually received by the Commission, whichever date is later.

§ 240.12d1-5 *Operation of certification on subsequent amendments.* If an amendment to the application for registration of a security is filed with the exchange and with the Commission after the receipt by the Commission of the certification of the exchange approving the security for listing and registration, the certification, unless withdrawn, shall be deemed made with reference to the application as amended.

§ 240.12d1-6 *Withdrawal of certification.* An exchange may, by notice to the Commission, withdraw its certification prior to the time that the registration to which it relates first becomes effective pursuant to § 240.12d1-1.

All interested persons are invited to submit data, views and comments on these proposals in writing to the Secretary, Securities and Exchange Commission, at its principal office, 425 Second Street NW., Washington 25, D. C., on or before December 24, 1953.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

DECEMBER 2, 1953.

### U. S. STANDARDS FOR GRADES OF CUCUMBER PICKLES

### EXTENSION OF TIME FOR FILING DATA, VIEWS, AND ARGUMENTS

Proposed United States Standards for Grades of Cucumber Pickles were set forth in the notice which was published in the FEDERAL REGISTER of October 15, 1953 (18 F. R. 6566).

In consideration of comments and suggestions received indicating the need for further study of the proposed standards, notice is hereby given of an extension until January 15, 1954, of the period of time within which written data, views, and arguments may be submitted by interested parties for consideration in connection with the aforesaid proposed United States Standards for Grades of Cucumber Pickles.

Done at Washington, D. C., this 7th day of December 1953.

### RICE

### NOTICE OF DETERMINATIONS PERTAINING TO MARKETING QUOTAS AND ACREAGE ALLOTMENTS FOR THE 1954 CROP

Section 354 (a) of the Agricultural Adjustment Act of 1938, as amended (7

U. S. C. 1354 (a)), requires the Secretary of Agriculture to determine whether marketing quotas shall be in effect on the 1954 crop of rice and, if quotas are required, to proclaim such quotas not later than December 31, 1953. Section 352 of the act, as amended (7 U. S. C. 1352), requires the Secretary not later than December 31, 1953, to proclaim the national acreage allotment of rice for the calendar year 1954.

Prior to the determinations and proclamations with respect to marketing quotas and acreage allotments for the 1954 crop of rice, consideration will be given to any data, views, and recommendations pertaining thereto which are submitted in writing to the Director, Grain Branch, Commodity Stabilization Service (formerly the Production and Marketing Administration), United States Department of Agriculture, Washington 25, D. C. All written submissions must be postmarked not later than 15 days after the date of publication of this notice in the FEDERAL REGISTER.

Issued at Washington, D. C., this 7th day of December 1953.

[SEAL] HOWARD H. GORDON, *Administrator.*

## DEPARTMENT OF COMMERCE

### Office of the Secretary

[Case No. 157; Appeals Board Docket FC-19]

ATLANTIC & PACIFIC WIRE & CABLE CO., INC., ET AL.

DECISION OF APPEALS BOARD

In the matter of: Atlantic & Pacific Wire & Cable Co., Inc., Martin Oboler, its president, Irving Rubin, its secretary and treasurer, 112-01 Northern Boulevard, East Elmhurst, Long Island, New York; Vicente Larrauri, 814 Cortlandt Avenue, Bronx, New York, Respondents; Case No. 157; Appeals Board Docket FC-19.

This matter comes before the Appeals Board by letter of appeal in behalf of Vicente Larrauri, dated July 29, 1953, and by letter of appeal dated July 30, 1953, by and in behalf of the Atlantic and Pacific Wire and Cable Company, Inc. (hereinafter referred to as A & P), and Martin Oboler and Irving Rubin, its officers. These parties appeal from an Order Revoking and Denying License Privileges dated July 17, 1953, issued by the Office of International Trade against said appellants. Also named in the said Order was one Julio Limantour of New York City, who has not appealed.

On August 3, 1953, the Order Revoking and Denying License Privileges was stayed in all respects as to these appellants, but not as to Limantour, by action of the Office of International Trade, pending final decision on their respective appeals by this Board.

A hearing in the matter of these appeals was held by the Appeals Board on October 1, 1953, at which time appellant Larrauri was represented by counsel, and appellants A & P, Oboler and Rubin were represented by Martin Oboler, president of said company.

The record in this appeal includes the charging letter from the Office of International Trade to the several appellants, dated March 13, 1953, transcript of the hearing before a Compliance Commissioner of the Office of International Trade, in New York City, on May 19, 1953, and various exhibits admitted in evidence at the said hearing. The report and recommendations of the Compliance Commissioner and the Order Revoking and Denying License Privileges are also a part of the record.

An application for an export license, dated June 18, 1951, was made by Oboler as president of A & P. Relying upon statements made therein and in various amendments and additions thereto, the Office of International Trade issued a license permitting the exportation of 2,500 pounds of resistance wire, having a copper content of 2,110 pounds, to a named consignee (one Alfredo Lopez) in Buenos Aires, Argentina. The exportation, however, was never made.

During the period of validity of the said license, on or about May 21, 1952, A & P inserted in the New York Times an advertisement offering for sale 3,500 pounds of assorted nichrome wire for export to Argentina with export license. Despite the obvious disparity in the amount and nature of the commodity covered by the license and referred to in the advertisement, appellants do not dispute that the advertisement refers to any other than the license which is involved in this appeal.

Subsequently, the Office of International Trade charged these appellants and the aforesaid Limantour with violation of the Export Control Act and the regulations issued pursuant thereto, in several material respects having to do with the specified application for export license and the placing of the advertisement.

The record in this case shows the following:

1. When the subject application for export license was filed, it named A & P as the exporter, Alfredo Lopez as the intermediate and ultimate consignee, and stated that the ultimate end use of the wire would be "For maintenance and repair of hospital and medical equipment. For purchaser's end use."

2. The application for export license was originally prepared by Larrauri with the assistance and guidance of Limantour, his employer.

3. Oboler signed the application for A & P; that it was returned by the Office of International Trade to A & P more than once after its original filing for additional information; that this information was supplied by Oboler or Rubin in behalf of A & P.

4. An order for the wire in question was given to A & P by the J. L. Distributing Corporation (a defunct New York Corporation then owned or controlled by Limantour).

5. That a purported "import permit" was issued to Lopez by the Argentine Government which could have covered steel, nichrome or nickelin wire, but not wire having more than 80 percent copper content, as described in the A & P application and the export license which was issued thereon.

There were indications that A & P had been selling wire to or through the J. L. Distributing Corporation, Limantour and Larrauri, and was paid for this wire by Runyon Trading Corporation, Lopez' domestic agent. These were domestic transactions as far as A & P was concerned because while the wire was shipped to the dock by A & P, it was admittedly exported by Runyon under general license to a foreign consignee, believed to be Lopez in Argentina.

Larrauri was found by the Compliance Commissioner to have knowingly stated falsely in the application for the export license which he prepared, that A & P was to be the exporter; and to have stated the end use although he had no basis for assuming that the end use was to be as hereinbefore quoted. Further he was found to have known that there was no contract or agreement to buy and sell as between A & P and Lopez.

Larrauri argues from the record (1) that since the exportation never took place, it cannot be shown conclusively that the statement that A & P was to be the exporter was false at the time it was made; (2) that the existence of the "import permit", the history of previous similar transactions, and the absence of any evidence of falsity, create an inference of credibility as to the existence of a contract or agreement. In view of the obviously loose business methods of the persons concerned, the Board believes that the evidence adduced can do no more than create a doubt as to the veracity of the statements, and concludes that Larrauri is entitled to the benefit of that doubt, especially in view of his inexperience with validated license shipments and the fact that he had nothing more to do with the transaction after preparing the application.

A & P, through Oboler, was found by the Compliance Commissioner to have executed the original application for export license as prepared by Larrauri, and, in so doing, represented that the statements therein were true; to have falsely represented that A & P had received an order from the named consignee for the commodity mentioned therein; to have falsely represented that A & P was to be the exporter; to have represented that A & P had purchased the resistance wire intended to be exported, when, in fact, the consignee had an import permit for nichrome wire, and A & P had not purchased and did not have the 10,000 pounds of nichrome wire for this transaction; and that, after receipt of the resulting export license, A & P placed an advertisement in a New York City newspaper offering for sale 3,500 pounds of nichrome wire for export to Argentina with export license for immediate shipment. Rubin, on behalf of A & P, was found by the Commissioner to have resubmitted the application with additional information, thereby participating in the misrepresentations found by the Commissioner to be contained therein. Since the acts of Oboler and Rubin, as officers of A & P, and the acts of A & P as a corporation, are so interrelated, the Board hereinafter considers them together.

It is not disputed that the application was in fact signed by Oboler in his capacity as president of A & P. Accordingly, he must be taken to have assumed for A & P the role and responsibility of the exporter.

As previously stated, on various occasions A & P had sold wire to J. L. Distributing Corporation, had received payment therefor from Runyon Trading Corporation (Lopez' domestic contact) and had delivered such wire to the dock knowing that Runyon would then export the wire to Argentina for delivery to Lopez. These transactions occurred during the time that validated licenses were not required for such operations. In the light of such past experience, Oboler argues that he could rely (as he claims he did) on an order from J. L. Distributing Corporation as representing in fact the existence of an order from the consignee. However, the certificate signed by Oboler, and referred to in the pertinent finding of fact, recites that the application for export license represents a request to export commodities which the named purchaser has contracted to buy, and the applicant has contracted to sell; it further certifies that "the documents or records evidencing this contract will be kept by this applicant for three years. * * *"

The finding that A & P did not have the type of wire covered by the "import permit" is in considerable degree supported by the record.

These appellants admit that A & P inserted the advertisement in a New York newspaper as charged. They claim, in exculpation of this violation, that they were wholly inexperienced in export control regulations; that they found themselves in possession of a quantity of wire available for the prospective transaction, which at that time appeared to have "evaporated"; that the advertisement was withdrawn and the license surrendered on demand by the Office of International Trade. A reasonable interpretation of the facts strongly suggests that the placing of the advertisement was the result of ignorance of the regulations.

After careful consideration of all the evidence, the Board concludes that there has been, on the part of all these appellants, a high degree of carelessness in their dealing with the Government. There is the testimony of Larrauri that he and Limantour inserted the name of A & P as the applicant for license in the belief that the Office of International Trade might thereby be more favorably impressed. There is the testimony of Oboler that the application was originally signed by him without attention to its content and without any question or investigation as to the existence of a contract from Lopez. The casual business methods of these appellants and their irresponsible dealing with their Government cannot be passed over in silence lest the Government be made impotent to perform its statutory duty of controlling exports.

As to Larrauri, the record shows that he prepared an export license application for A & P, but it does not appear that he knew that the statements he placed on this application were untrue. After presenting the application to A & P for signature, apparently he had no further part in the application, and the later changes and additions were made thereto by A & P in order to make it acceptable to the Office of International Trade.

As to A & P, Oboler and Rubin, the record shows conclusively that they were careless, negligent and had little regard for their obligations in dealing with the U. S. Government in making sure of the facts set forth in an export license application before presenting it to the Office of International Trade. This, particularly when coupled with the advertisement in the New York Times, constitutes acts that are in such blatant disregard of government regulations that they constitute culpable ignorance which cannot be excused.

After careful consideration of the evidence and arguments, before it the Appeals Board finds that the findings in the Order Revoking and Denying License Privileges, insofar as they relate to culpable acts on the part of Vicente Larrauri are not supported by substantial evidence, but that, as to A & P, Oboler and Rubin, sufficient evidence exists to sustain in part such findings. *Now, therefore, it is ordered*, That:

(a) The appeal of Vicente Larrauri be granted, and that the Order Revoking and Denying License Privileges, dated July 17, 1953, OIT Case No. 157 (18 F. R. 4345), insofar as it relates to said appellant, be, and it is, hereby vacated.

(b) The appeal of the Atlantic and Pacific Wire and Cable Company, Inc., Martin Oboler and Irving Rubin be denied and that the Order Revoking and Denying License Privileges, dated July 17, 1953, OIT Case No. 157 (18 F. R. 4345), insofar as it relates to said appellants be, and it is, hereby sustained and confirmed in all respects except that the period during which the suspension of privileges thereunder shall be effective is reduced from twelve months to one month from the date hereof; thereafter for a period of eleven months the order shall be held in abeyance provided that these appellants shall not in the opinion of the Director, Office of Export Supply, Bureau of Foreign Commerce, violate during said eleven months period, any provision of the order or regulations of the Bureau of Foreign Commerce (formerly Office of International Trade) relating to export control. If, in the opinion of the Director, Office of Export Supply, such violations do occur, he may summarily issue an order as to these appellants reinstating and making effective said Order for the balance of said eleven months period.

Dated: December 3, 1953, at Washington, D. C.

FREDERIC W. OLMSTEAD, *Chairman, Appeals Board.*

[Docket No. G-2271]

TENNESSEE GAS TRANSMISSION CO.

ORDER FIXING DATE OF HEARING

Tennessee Gas Transmission Company (Applicant), a Delaware corporation having its principal place of business in Houston, Texas, on October 12, 1953, filed an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing the transportation and sale of natural gas in increased volumes to Alabama-Tennessee Natural Gas Company, Tennessee Natural Gas Lines, Inc. and Western Kentucky Gas Company for the purpose of enabling these customer companies to meet their requirements during the 1953-1954 winter, all as more fully described in said application on file with the Commission and open to public inspection.

By order issued October 28, 1953, in Docket No. G-2222, et al., that part of the above-entitled proceeding involving increased deliveries of gas to Alabama-Tennessee Natural Gas Company was severed from the other matters involved in said proceeding for the purpose of separate hearing and disposition.

Applicant has requested that its application be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, and no request to be heard, protest, or petition in opposition to the application as it relates to Tennessee Natural Gas Lines, Inc., and Western Kentucky Gas Company has been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on October 23, 1953 (18 F. R. 6741).

The Commission finds: That part of this proceeding involving the transportation and sale of increased volumes of natural gas to Tennessee Natural Gas Lines, Inc. and Western Kentucky Gas Company is a proper one for disposition under the provisions of § 1.32 (b) of the Commission's rules and practice and procedure.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on December 18, 1953, at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by that part of the above application involving the transportation and sale of increased volumes of natural gas to Tennessee Natural Gas Lines, Inc. and Western Kentucky Gas Company: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: December 2, 1953.

Issued: December 4, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-10274; Filed, Dec. 9, 1953; 8:46 a. m.]

[Docket No. G-2268]

EAST TENNESSEE NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

On October 7, 1953, East Tennessee Natural Gas Company (Applicant), a Tennessee corporation with its principal office near Knoxville, Tennessee, filed an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation near Calhoun, in McMinn County, Tennessee, of certain natural gas interconnecting, metering and regulating facilities for the purpose of delivering and selling, upon an interruptible basis, up to 9,000 Mcf of natural gas per day to Bowaters Southern Paper Corporation for use in its plant being constructed in such area for the processing of wood into wood pulp for use in the manufacturing of paper.

Applicant has requested that its application be heard under the shortened-procedure provided for in § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32 (b)). Due notice of the filing of the application has been given, including publication in the FEDERAL REGISTER on October 29, 1953 (18 F. R. 6838).

Petitions for leave to intervene in the above-entitled proceeding have been filed by, among others, Tennessee Gas Company, Chattanooga Gas Company, and Athens (Tenn.) Utilities Board, utility customers of Applicant. Such Petitioners object to this proceeding being considered under the shortened-procedure rule and request to be heard concerning the application.

The Commission finds:

(1) This proceeding, in the circumstances, is not a proper one for disposition under the provisions of the aforesaid § 1.32 (b) of its rules of practice and procedure.

(2) It is appropriate, reasonable, and in the public interest in carrying out the provisions of the Natural Gas Act, and good cause exists, to hold a public hearing in the above-entitled proceeding, as hereinafter provided and ordered.

The Commission orders:

(A) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7, 15, and 16 of the Natural Gas Act, and the Commission's general rules and regulations, including rules of practice and procedure (18 CFR, Chapter I), a public hearing be held, commencing on January 12, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the application herein.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

Adopted: December 2, 1953.

Issued: December 4, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket No. G-2323]

EL PASO NATURAL GAS CO.

ORDER SUSPENDING PROPOSED CANCELLATION OF TARIFF AND FIXING DATE OF HEARING

On November 6, 1953, El Paso Natural Gas Company (El Paso) filed a Notice of Cancellation of its Rate Schedule T-1, and on November 9, 1953, filed a Notice of Cancellation of Service Agreement Form C of its FPC Gas Tariff, Original Volume No. 1, applicable only to the transportation service prescribed in Rate Schedule T-1, proposing the cancellation of its common carrier Rate Schedule T-1 for transportation of natural gas and of Form C of Service Agreement, respectively.

Rate Schedule T-1, which together with Form C of the Service Agreement has been in effect since December 19, 1950, was filed to comply with a stipulation entered into by El Paso with the Department of Interior requiring that El Paso have on file with the Commission a rate schedule for common carrier service, as a prerequisite to Interior's issuance under the Mineral Leasing Act of permits granting rights-of-way to El Paso. No service has yet been rendered under the rate schedule and service agreement.

The Mineral Leasing Act has recently been amended and El Paso states that it has been advised by the Department of the Interior that, in effect, the common carrier requirement of the Mineral Leasing Act is not now applicable to a company subject to regulation under the Natural Gas Act. El Paso now proposes to cancel Rate Schedule T-1, as it "does not consider the rate schedule to be in the public interest."

Notice of the proposed cancellation has been sent to those parties notified by El Paso at the time the T-1 rate schedule was filed initially, to others who have in the past expressed a desire to obtain transportation service, to the State commissions concerned, and to the Department of the Interior. Several of such parties have protested or filed objection to the proposed cancellation of the transportation rate schedule, requesting additional time to prepare and file answers to the proposed cancellation, or requesting a hearing on the matter and seeking additional time to prepare therefor.

The cancellation of Rate Schedule T-1 and Form C of the Service Agreement has not been shown to be justified, and such cancellation may result in the making or granting of an undue preference or advantage to some or the subjecting of others to an undue prejudice or disadvantage or may result in rates that are unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

Unless suspended by order of the Commission, the proposed cancellation of the Rate Schedule T-1 will become effective upon expiration of statutory notice on December 7, 1953, and of the Form C of the Service Agreement on December 10, 1953, pursuant to the provisions of the Natural Gas Act and the general rules and regulations thereunder.

The Commission finds: It is necessary and proper in the public interest, and to aid in the enforcement of the provisions of the Natural Gas Act, that the Commission enter upon a hearing pursuant to the authority contained in section 4 of the Natural Gas Act, concerning the lawfulness of the proposed cancellation of El Paso's Rate Schedule T-1 and Form C of the Service Agreement, and whether the cancellation thereof would result in the making or granting of an undue preference or advantage to some or the subjecting of others to an undue prejudice or disadvantage or in rates that are unjust, unreasonable, unduly discriminatory, or preferential or otherwise unlawful; and that the proposed Notices of Cancellation be suspended as hereinafter provided, and the effect thereof deferred pending hearing and decision herein.

The Commission orders:

(A) A public hearing be held commencing on March 1, 1954, at 10 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of El Paso's proposed cancellation of its common carrier Rate Schedule T-1 for transportation of natural gas, and the Form C of Service Agreement of its FPC Gas Tariff, Original Volume No. 1, as proposed by the Notices of Cancellation filed November 6, 1953, and November 9, 1953.

(B) Pending such hearing and decision thereon, the proposed Notices of Cancellation of El Paso, described in paragraph (A) above, be and they are hereby suspended, and the effect thereof deferred until May 8, 1954, and May 11, 1954, respectively, unless otherwise ordered by the Commission, or until such time as said proposed cancellations may be made effective in the manner prescribed by the Natural Gas Act.

(C) At the hearing, the parties, including Commission staff counsel, may reserve cross-examination until after El Paso shall have presented and completed its case-in-chief.

(D) El Paso shall serve upon all parties not later than February 15, 1954, copies of the testimony and exhibits proposed to be offered at the hearing, including five (5) copies upon Commission staff counsel.

(E) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: December 2, 1953.

Issued: December 4, 1953.

By the Commission.

## INTERSTATE COMMERCE COMMISSION

[Drouth Order 52]

TRANSPORTATION OF HAY AND FEED TO ALABAMA

REDUCED RATES

In the matter of relief under section 22 of the Interstate Commerce Act.

It appearing that by reason of a prolong drouth existing in the State of Alabama, the Under Secretary of Agriculture by letter dated December 3, 1953, has requested the Commission to enter an order under section 22 of the Interstate Commerce Act authorizing railroads subject to the Commission's jurisdiction to transport hay and feed to Alabama at reduced rates;

*It is ordered*, That carriers by railroad participating in the transportation of hay and feed to Alabama be, and they are hereby, authorized under section 22 of the Interstate Commerce Act, to establish and maintain to and including June 30, 1954, reduced rates for such transportation, the rates to be published and filed in the manner prescribed in

section 6 of the Interstate Commerce Act except that they may be made effective one day after publication and filing instead of thirty.

*It is further ordered*, That the class of persons entitled to such reduced rates is hereby defined as persons designated as being in distress and in need of relief by the United States Department of Agriculture or by such State agents or agencies as may in turn be designated by the United States Department of Agriculture to assist in relieving the distress caused by the drouth.

*It is further ordered*, That during the period in which any reduced rates authorized by this order are effective the carriers may, notwithstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate-of-intermediate rates over the same routes if one or more of the factors of such aggregate-of-intermediate rates is a reduced rate established under the authority of this order.

*It is further ordered*, That any tariffs or tariff provisions published under the authority of this order shall explicitly so state, making reference to this order by number and date.

*And it is further ordered*, That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the office of the Secretary of the Commission and by filing a copy with the Director, Division of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, N. Y., the Chairman of the Southern Freight Association, Atlanta, Georgia, the Chairman of the Executive Committee, Western Traffic Association, Chicago, Illinois, the Traffic Vice-President of the Association of American Railroads, Washington, D. C., and to the President of the American Short Line Railroad Association, Washington, D. C.

Dated at Washington, D. C., this 7th day of December 1953.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-10208; Filed, Dec. 9, 1953; 8:52 a. m.]

## SECURITIES AND EXCHANGE COMMISSION

[File No. S7-72]

REDDY KILOWATT, INC.

NOTICE OF FILING OF PETITION TO AMEND RULE U-40 UNDER THE PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

DECEMBER 4, 1953.

Notice is hereby given that Reddy Kilowatt, Inc. ("Petitioner"), a Delaware corporation and a non-utility company, has filed a petition requesting that the Commission amend its Rule U-40 of the general rules and regulations promulgated under the Public Utility Holding Company Act of 1935 ("act") so as to exempt from section 9 (a) (1) of the act the acquisition by a registered holding company or subsidiary company thereof of securities of a company such as Petitioner.

Petitioner requests that the Commission renumber the present paragraph (c) of Rule U-40 as paragraph (d) and add a new paragraph (c) reading as follows:

(c) Section 9 (a) (1) shall not apply to the acquisition of securities of a company whose principal business is the ownership and/or licensing of trade names, trade-marks and service marks used by public-utility companies in the ordinary course of their business and the preparation, distribution and/or sale of material and services related wholly to such names and marks.

In support of its petition, Petitioner states as follows:

Petitioner is the successor of Ashton B. Collins (who since 1934 had been engaged as a sole proprietorship doing business as Reddy Kilowatt and Reddy Kilowatt Service) and owns certain trade names, trade-marks and service marks, including the term "Reddy Kilowatt" and the character known by that name. Petitioner and/or its predecessor have licensed the use of such marks to about 222 public utility companies, of which approximately 47 are subsidiaries of holding companies registered under the act.

At the time Petitioner was organized in June 1953, Collins turned over to it all of his business and assets and received in exchange all of the authorized stock of Petitioner consisting of 1,000 shares of common stock of $1 par value per share. To enable licensees to participate in the control of the marks owned by Petitioner, Collins created a joint tenancy in 200 shares of such stock and offered Petitioner's licensees the opportunity to become the joint owners of such shares without payment. Acceptance of such offer by a licensee subject to the requirements of the act would require the Commission's approval pursuant to section 9 (a) (1) of the act.

Petitioner asserts that the Commission has power to promulgate the requested amendment pursuant to section 9 (c) (3) of the act since the promotion of sales and good consumer relations and the protection and enhancement of valuable trade-marks which serve these ends is part of the ordinary course of business of a public-utility company. Petitioner further asserts that adoption of the proposed amendment would not be detrimental to the public interest or the interests of investors or consumers and that such interests would be better served by such an amendment which would eliminate the expenditure by the Commission and the licensees subject to the act of time and money in connection with the transactions as to which the exception is sought.

All interested persons are invited to submit in writing data, views and comments, regarding Petitioner's request to the Secretary, Securities and Exchange Commission, at its principal office, 425 Second Street NW., Washington 25, D. C., on or before December 22, 1953.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

[File No. 70-3129]

ARKANSAS LOUISIANA GAS CO.

SUPPLEMENTAL ORDER RELEASING JURISDICTION OVER CERTAIN FEES AND EXPENSES

DECEMBER 4, 1953.

The Commission, on September 14, 1953, having issued its memorandum opinion and order permitting a declaration to become effective regarding the issuance and sale by Arkansas Louisiana Gas Company ("Arkansas Louisiana") of $35,000,000 principal amount of First Mortgage Bonds to a group of 15 institutional investors and not to exceed $35,000,000 of temporary bank notes, and having reserved jurisdiction with respect to all fees, commissions and expenses incurred or to be incurred in connection with said transactions; and

Arkansas Louisiana having filed amendments to its declaration listing fees, commissions and expenses aggregating $281,962 which includes fees and expenses incurred in connection with its previous unconsummated offer at competitive bidding of $35,000,000 first mortgage bonds (Holding Company Act Release No. 12134). Such fees and expenses include $90,000 financial advisers and placement fee, and not to exceed $2,500 as reimbursement for expenses, to The First Boston Corporation, Halsey Stuart and Co., Inc. and Lazard Freres & Co.; $35,000 attorneys' fee to Frueauff Burns, Farrell, Shanley & Johnson, and attorneys' fee to Blanchard, Goldstein, Walker & O'Quinn, both as counsel for Arkansas Louisiana; and, $20,000 attorneys' fee to Davis Polk Wardwell & Kiendl, who acted as counsel for the prospective underwriters in the competitive bidding offer and as counsel for the institutional purchasers; and

It appearing that said fees, commissions and expenses are not unreasonable;

*It is ordered*, That the jurisdiction heretofore reserved over fees, commissions and expenses be, and the same hereby is, released.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

[File No. 70-3157]

QUINCY ELECTRIC LIGHT AND POWER CO. ET AL.

NOTICE OF PROPOSED ISSUANCE AND SALE OF SHORT-TERM UNSECURED PROMISSORY NOTES TO PARENT COMPANY

DECEMBER 4, 1953

In the matter of Quincy Electric Light and Power Company, Suburban Electric Company, New England Electric System; File No. 70-3157.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, and its subsidiary companies, Quincy Electric Light and Power Company ("Quincy") and Suburban Electric Company ("Suburban"), have filed with this Commission a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 (the "act"). The applicants-declarants have designated sections 6 (a), 7, 9 (a), 10 and 12 (f) of the act and Rules U-23, U-42 (b) (2), U-43 (a), U-45 (b) (1) and U-50 (a) (3) promulgated thereunder as applicable to the proposed transactions which are summarized as follows:

Quincy and Suburban propose to issue to NEES, from time to time but not later than December 31, 1953, unsecured promissory notes in the respective aggregate principal amounts of $1,250,000 and $2,500,000. Each of said notes will mature April 1, 1954, and may be prepaid in whole or in part without payment of a premium.

Quincy presently has outstanding unsecured promissory notes payable to NEES in the principal amount of $1,080,000 and notes payable to banks in the principal amount of $200,000. Suburban presently has outstanding $3,800,000 principal amount of unsecured promissory notes payable to banks. Both companies have Commission authorization to issue additional promissory notes to banks; Quincy in the amount of $1,080,000 and Suburban in the amount of $635,000 (see Holding Company Act Release No. 12121, August 31, 1953). Such authorization will not be effective if and when this Commission makes its order approving the notes herein proposed to be issued to NEES. The proceeds derived from such notes will be used by Quincy and Suburban to prepay a like principal amount of note indebtedness to banks and to NEES. The interest rate on such notes will be at the prime interest rate being paid by Quincy and Suburban on the notes prepaid until their maturity date and thereafter at the prime interest rate at the time of issuance. The notes to be prepaid bear interest at 3¼ percent which, according to the application-declaration, is the present prime interest rate.

Each borrowing company has stipulated that if any permanent financing is done prior to the maturity date of its then outstanding unsecured promissory notes, the proceeds derived therefrom will be applied in reduction of, or in total payment of, notes then outstanding, and the amount of then authorized but unissued promissory notes will be reduced by the amount, if any, by which such permanent financing exceeds the amount of the then outstanding unsecured promissory notes.

The application-declaration states that incidental services in connection with the proposed note issues will be performed at cost by New England Power Service Company, an affiliated service company, such cost being estimated not to exceed $150 for each applicant-declarant, or an aggregate of $450.

The application-declaration further states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Applicants-declarants request that the Commission's order herein become effective forthwith upon issuance.

Notice is further given that any interested person may, not later than December 21, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the joint application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

# FEDERAL REGISTER

VOLUME 18 NUMBER 241

*Washington, Friday, December 11, 1953*

## TITLE 7—AGRICULTURE

### Chapter III—Bureau of Entomology and Plant Quarantine, Department of Agriculture

[B. E. P. Q. 542, Amended]

PART 319—FOREIGN QUARANTINE NOTICES

MODIFICATION OF ADMINISTRATIVE INSTRUCTIONS PRESCRIBING METHOD OF TREATMENT OF ORANGES, GRAPEFRUIT, TANGERINES, AND MANILA MANGOES FROM MEXICO

Pursuant to the authority conferred by § 319.56–2 of the regulations supplemental to the Fruit and Vegetable Quarantine (Notice of Quarantine No. 56, 7 CFR 319.56), § 319.56–2g (a) (8) of the administrative instructions prescribing method of treatment of oranges, grapefruit, tangerines, and Manila mangoes from Mexico (7 CFR Supp. 319.56–2g (a) (8); B. E. P. Q. 542, as amended), is hereby amended to read as follows:

§ 319.56–2g *Administrative instructions prescribing method of treatment of oranges, grapefruit, tangerines, and Manila mangoes from Mexico*—(a) *Conditions for issuance of permits.* * * *

(8) In cases where treating rooms are located in the interior of Mexico, or at places removed from ports of entry where inspectors are regularly stationed, those in interest must make advance arrangements for approval of the plant and for supervision, and furnish the Chief of the Bureau of Entomology and Plant Quarantine with acceptable assurance that they will provide, without cost to the United States Department of Agriculture, all salaries, transportation, per diem, and other incidental expenses for the supervising inspectors, including the payment to the inspectors of additional compensation for their services in excess of 40 hours weekly, according to rates established for the payment of Bureau of Entomology and Plant Quarantine inspectors.

The purpose of this amendment is to specify additional conditions that must be met when inspectors are sent to points in the interior of Mexico or places removed from ports of entry where inspectors are regularly stationed, to supervise treatments authorized in the administrative instructions hereby amended. It is necessary that such conditions be made effective immediately in order to parallel employment procedures for inspectors working at their assigned stations in this country. Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U. S. C. 1003) it is found for good cause that notice and public procedure on the foregoing amendment are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making the effective date hereof less than 30 days after its publication in the FEDERAL REGISTER.

(Sec. 3, 33 Stat. 1270, sec. 9, 37 Stat. 318; 7 U. S. C. 143, 162)

This amendment shall be effective December 11, 1953.

Done at Washington, D. C., this 18th day of November 1953.

[SEAL] W. L. POPHAM,
*Acting Chief,*
*Bureau of Entomology and Plant Quarantine.*

| Part 18 (proposed) | 8141 |

1952 Sup., Part 994), effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). In said notice opportunity was afforded interested persons to submit to the Department written data, views, or arguments for consideration prior to issuance of the final rule. No such documents were received during the time specified in the notice.

It is hereby found and determined that it is unnecessary and contrary to the public interest to delay the effective date of this order later than the date of its publication in the FEDERAL REGISTER for the reasons that (1) it is necessary that the Pecan Administrative Committee be authorized to collect assessments from handlers to defray expenses incurred in administering the marketing agreement and order during the current fiscal period and the establishment of a rate of assessment is necessary to such collection; (2) the handling of assessable inshell pecans of the 1953 crop has begun; and (3) the order herein will require no special preparation by handlers or the Pecan Administrative Committee.

Therefore, after consideration of all relevant matters, it is hereby found and determined that the expenses of the Pecan Administrative Committee and rate of assessment shall be as follows:

§ 994.304 *Expenses for the fiscal period beginning October 1, 1953, and rate of assessment*—(a) *Expenses.* Expenses in the amount of $32,000 are reasonable and likely to be incurred by the Pecan Administrative Committee for its maintenance and functioning during the fiscal period beginning October 1, 1953; and

(b) *Rate of assessment.* The rate of assessment to be paid, in accordance with the applicable provisions of said marketing agreement and order, by each handler who first handles unshelled pecans shall be 16 cents per hundred pounds of assessable unshelled pecans handled by him as the first handler thereof during the fiscal period beginning October 1, 1953.

(Sec. 5, 48 Stat. 31, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 7th day of December 1953 to become effective upon publication in the FEDERAL REGISTER.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-10306; Filed, Dec. 10, 1953; 8:45 a. m.]

## TITLE 5—ADMINISTRATIVE PERSONNEL

### Chapter I—Civil Service Commission

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

MISCELLANEOUS AMENDMENTS

Effective upon publication in the FEDERAL REGISTER, subparagraph (3) is added to § 6.103 (f), subparagraph (11) is added to § 6.302 (b), subparagraph (9) is added to § 6.323 (a), and § 6.366 is added as set out below.

§ 6.103 *Treasury Department.* * * *

(f) *Bureau of Customs.* * * *

(3) The positions of Collector of Customs at Puerto Rico and the Virgin Islands.

§ 6.302 *Department of State.* * * *

(b) *Bureau of Security, Consular Affairs and Personnel.* * * *

(11) Chief Inspector.

§ 6.323 *Department of Health, Education, and Welfare*—(a) *Office of the Secretary.* * * *

(9) One Special Representative of the Secretary.

§ 6.366 *Federal Mediation and Conciliation Service.* (a) One General Counsel.

(b) Two Private Secretaries to the Director.

(c) One Private Secretary to each of the following: The Associate Director, the Assistant Director, and the General Counsel.

(R. S. 1753, sec. 2, 22 Stat. 403; 5 U. S. C. 631, 633. E. O. 10440, March 31, 1953, 18 F. R. 1823)

UNITED STATES CIVIL SERVICE COMMISSION,

### Chapter III—Foreign and Territorial Compensation

Subchapter C—Civil Service Commission

PART 350—TERRITORIAL POST DIFFERENTIALS AND TERRITORIAL COST-OF-LIVING ALLOWANCES

PAYMENT

Section 350.6 (h) is amended to read as follows:

§ 350.6 *Payment of territorial post differentials and territorial cost-of-living allowances.* * * *

(h) Payments of territorial post differentials represent "additional compensation properly includible in the gross income of the recipient for Federal income tax purposes." (Letter of Commissioner of Internal Revenue to Bureau of the Budget, August 28, 1948). Payments of territorial cost-of-living allowances "are excludable from gross income and exempt from Federal income tax under the provisions of section 116 (j) of the Internal Revenue Code." (Revenue Ruling 237, Internal Revenue Bulletin No. 22 of October 26, 1953, page 13.)

(Sec. 202, Part II, E. O. 10000, Sept. 16, 1948, 13 F. R. 5453; 3 CFR, 1948 Supp.)

## TITLE 16—COMMERCIAL PRACTICES

### Chapter I—Federal Trade Commission

[Docket 6093]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

GARDEN RESEARCH LABORATORIES ET AL.

Subpart—*Advertising falsely or misleadingly:* § 3.20 *Comparative data or merits;* § 3.25 *Competitors and their products*—Competitors' products; § 3.30 *Composition of goods;* § 3.85 *Government approval, action, connection or standards*—in general; § 3.90 *History of product or offering;* § 3.170 *Quantities or properties of product or service;* § 3.195 *Safety;* § 3.205 *Scientific or other relevant facts;* § 3.210 *Scientific tests;* § 3.265 *Tests and investigations.* Subpart—*Disparaging competitors and their products*—Competitors' products: § 3.1000 *Performance;* § 3.1010 *Qualities or properties;* § 3.1025 *Safety.* In connection with the offering for sale, sale and distribution in commerce, of the chemical fertilizer designated "RX–15", or any other product containing substantially the same ingredients or possessing substantially the same properties, representing, directly or by implication: (1) That RX–15 is the scientific designation of a plant fluid; (2) that said product is a new plant food or new discovery, or that it was developed as a result of atomic research; (3) that persons identified with any college, university, or other institution of learning discovered said product, conducted tests or made reports with respect thereto, unless such be the fact; (4) that personnel identified with Rutgers University or any other educational institution made photographs showing the results obtained by the use of respondents' products or that the United States Atomic Energy Commission had taken photographs pertaining to respondents' product or authorized the use by respondents of any such photographs; (5) that photographs of plants taken one hour after being fertilized by liquid fertilizer were taken only fifteen minutes thereafter, or representing that photographs were taken at any specified time contrary to the fact; (6) that respondents' product contains radioactive materials; (7) that the use of said product, by sprinkling and without other factors, will assure an abundance of flowers or vegetables on a small patch of ground; (8) that the ingredients of said products are absorbed by the leaves within fifteen minutes, or within any other period of time which is contrary to fact; (9) that dry fertilizers do not produce results for months or other extended periods of time after application, or misrepresenting in any other manner the time within which dry fertilizers are absorbed or produce results; (10) that said product is more powerful than all other fertilizers; or that it supplies 360 percent more plant food at the rate of 1,000 times faster than other fertilizers or at any other given quantity or rate inconsistent

with the facts, or misrepresenting in any other manner the amount of plant food supplied by said product or the period of time within which such plant food takes effect in comparison with other fertilizers; (11) that said product is substantially cheaper in price under conditions of effective use than all other fertilizers; (12) that there are vitamins and harmones contained in said product which aid plant growth; (13) that the amount of plant food supplied by said product, when in a water solution, is any amount in excess of the quantity of respondents' product actually present in such solution; or that, under such conditions of use, the cost of said plant food is less than it is in fact; (14) that other fertilizers, even though used according to directions, may injure plants; and (15) that respondents' product, unlike other fertilizers, will not burn or injure foliage, even though not used according to directions; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719; 5 U. S. C. 45) [Cease and desist order, Garden Research Laboratories et al., Madison, N. J., Docket 6093, November 13, 1953.]

*In the Matter of Garden Research Laboratories, a Corporation, and Cecil C. Hoge, Individually and as an Officer of said Corporation; Cecil C. Hoge, Hamilton Hoge, John Hoge, Sidney C. Hoge and Barbara Obolensky, copartners Trading Under the Name of Huber Hoge and Sons; and Alfred S. Pfeil, an Individual*

This proceeding was heard by John Lewis, hearing examiner, upon the complaint of the Commission, and a hearing before said examiner, theretofore duly designated by the Commission, at which a stipulation as to the facts was entered into by counsel in lieu of oral testimony in support of or in opposition to the allegations of the complaint, and certain documentary evidence by agreement of counsel was introduced into evidence.

Thereafter the proceeding regularly came on for final consideration by said examiner upon the complaint and said stipulation as to the facts and documentary evidence (which were recorded and filed in the office of the Commission), and counsel having elected not to file proposed findings and conclusions for consideration by said examiner and oral argument not having been requested; and said examiner, having duly considered the record in the matter and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

No appeal having been filed from said initial decision of said hearing examiner, as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on November 13, 1953.

Said order to cease and desist is as follows:

*It is ordered*, That the respondent Garden Research Laboratories, a corporation and its officers, and the respondent Cecil C. Hoge, individually and as an officer of said corporation, and the respondents Cecil C. Hoge, Hamilton Hoge, John Hoge, Sidney C. Hoge and Barbara Obolensky, individually and as copartners doing business as Huber Hoge and Sons, or under any other name, and the respondent Alfred S. Pfeil, individually, and said respondents' agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of the chemical fertilizer designated RX–15, or any other product containing substantially the same ingredients or possessing substantially the same properties, do forthwith cease and desist from representing, directly or by implication:

1. That RX–15 is the scientific designation of a plant food.

2. That said product is a new plant food or new discovery, or that it was developed as a result of atomic research.

3. That persons identified with any college, university or other institution of learning discovered said product, conducted tests or made reports with respect thereto, unless such be the fact.

4. That personnel identified with Rutgers University or any other educational institution made photographs showing the results obtained by the use of respondents' product or that the United States Atomic Energy Commission had taken photographs pertaining to respondents' product or authorized the use by respondents of any such photographs.

5. That photographs of plants taken one hour after being fertilized by liquid fertilizer were taken only fifteen minutes thereafter, or representing that photographs were taken at any specified time contrary to the fact.

6. That respondents' product contains radioactive materials.

7. That the use of said product, by sprinkling and without other factors, will assure an abundance of flowers or vegetables on a small patch of ground.

8. That the ingredients of said products are absorbed by the leaves within fifteen minutes, or within any other period of time which is contrary to fact.

9. That dry fertilizers do not produce results for months or other extended periods of time after application, or misrepresenting in any other manner the time within which dry fertilizers are absorbed or produce results.

10. That said product is more powerful than all other fertilizers; or that it supplies 360 percent more plant food at the rate of 1,000 times faster than other fertilizers or at any other given quantity or rate inconsistent with the facts, or misrepresenting in any other manner the amount of plant food supplied by said product or the period of time within which such plant food takes effect in comparison with other fertilizers.

11. That said product is substantially cheaper in price under conditions of effective use than all other fertilizers.

12. That there are vitamins and hormones contained in said product which aid plant growth.

13. That the amount of plant food supplied by said product, when in a water solution, is any amount in excess of the quantity of respondents' product actually present in such solution; or that, under such conditions of use, the cost of said plant food is less than it is in fact.

14. That other fertilizers, even though used according to directions, may injure plants.

15. That respondents' product, unlike other fertilizers, will not burn or injure foliage, even though not used according to directions.

By "Decision of the Commission and Order to File Report of Compliance," Docket 6093, November 13, 1953, which announced and decreed fruition of said initial decision, report of compliance was required as follows:

*It is ordered*, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: November 13, 1953.

By the Commission.

[SEAL] ALEX. AKERMAN, Jr., *Secretary.*

[F. R. Doc. 53–10342; Filed, Dec. 10, 1953; 8:53 a. m.]

## TITLE 21—FOOD AND DRUGS

### Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for certification of batches of antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 146; 18 F. R. 2099, 2337) are amended as indicated below:

1. In § 146.58 *Penicillin and streptomycin* • • • subparagraph (1) (iv) of paragraph (c) *Labeling* is amended by changing the figure "36" to "48".

2. Section 146.201 (c) (2) and (3) are amended to read:

§ 146.201 *Chlortetracycline hydrochloride (chlortetracycline hydrochloride salt).* • • •

(c) *Labeling.* • • •

(2) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is intended solely for intravenous veterinary use, the statement "Caution: Federal law restricts this drug to sale by or on the order of a licensed veterinarian."

(3) On the circular or other labeling within or attached to the package, if it is packaged for dispensing:

(i) If it is intended for use by man, adequate directions and warnings for its use by practitioners licensed by law to administer such drug.

(ii) If it is intended for intravenous veterinary use, adequate directions and warnings for its use by veterinarians licensed by law to administer such drug.

(iii) If it is intended solely for veterinary use other than for intravenous injection and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(iv) A statement of the conditions under which such solutions should be stored, including a reference to their instability when stored under other conditions, and a statement "Sterile solutions must be injected immediately after preparation."

3. Section 146.307 (c) (1) (iii) is amended to read:

§ 146.307 *Chloramphenicol solution.* • • •

(c) *Labeling.* • • •

(1) • • •

(iii) The statement "Expiration date --------," the blank being filled in with the date which is 12 months after the month during which the batch was certified if it is the solution of the drug, or 24 months after the month during which the batch was certified if it is the dry mixture of the drug.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: December 7, 1953.

[SEAL] OVETA CULP HOBBY, *Secretary.*

[F. R. Doc. 53–10305; Filed, Dec. 10, 1953; 8:45 a. m.]

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

EXEMPTION FROM CERTIFICATION OF ANIMAL FEED CONTAINING ANTIBIOTICS UNDER CERTAIN CONDITIONS

Under authority provided in the Federal Food, Drug, and Cosmetic Act (sec. 507 (c), 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409; 21 U. S. C. 357 (c); 67 Stat. 18), I find that the requirements of sections 502 (l) and 507 of the act with respect to animal feed containing certifiable antibiotics and 0.056 percent of nitrofurazone, when used for the treatment of swine enteritis caused by Salmonella choleraesuis, are no longer necessary to insure safety and efficacy of such drugs when used for the purpose indicated, and hereby promulgate the following amendment exempting such drugs from the requirements:

Section 146.62 is amended by adding the following new paragraph:

(l) It is intended for use solely as a treatment for infectious swine enteritis caused by Salmonella choleraesuis, its labeling bears adequate directions and warnings for such use, and it contains nitrofurazone in a quantity, by weight of feed, of 0.056 percent.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry, since it would be against public interest to delay providing for the aforesaid amendment, and since it conditionally relaxes existing requirements.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: December 7, 1953.

[SEAL] OVETA CULP HOBBY, *Secretary.*

[F. R. Doc. 53–10304; Filed, Dec. 10, 1953; 8:45 a. m.]

## TITLE 22—FOREIGN RELATIONS

### Chapter I—Department of State

PART 44—VISAS: DOCUMENTATION OF IMMIGRANTS UNDER THE REFUGEE RELIEF ACT OF 1953

*Correction*

In Federal Register Document 53–10112, appearing at page 7783 of the issue for Thursday, December 3, 1953, the following corrections should be made:

1. In the eighth line of § 44.3 (b) the beginning of the second sentence of (b) should read "If it is found".

2. The first two words of (6) of § 44.4 (a) should read "a satisfactory".

3. In the fifth line of § 44.7 (e) the word "visas" should read "visa".

[Departmental Reg. 108.203]

PART 99—INFORMATION MEDIA GUARANTIES UNDER THE ECONOMIC COOPERATION ACT OF 1948, AS AMENDED

WITHDRAWAL

Part 99 of Chapter I, Title 22, is hereby withdrawn.

For the Secretary of State.

EDWARD T. WAILES, *Assistant Secretary.*

[F. R. Doc. 53–10324; Filed, Dec. 10, 1953; 8:50 a. m.]

## TITLE 32A—NATIONAL DEFENSE, APPENDIX

### Chapter I—Office of Defense Mobilization

[Defense Mobilization Order VI–2]

DMO VI–2—POLICY GUIDANCE AND DELEGATION OF RESPONSIBILITY WITH RESPECT TO TRANSPORTATION IN PREPARATION FOR ATTACK CONDITIONS, UNDER ATTACK CONDITIONS, AND IN POST-ATTACK REHABILITATION

1. Under the authority vested in me by Executive Order 10480 of August 14, 1953 (18 F. R. 4939), I hereby assign to the Commissioner of the Interstate Commerce Commission who is responsible for the supervision of the Bureau of Service of the Commission, the Secretary of Commerce, the Secretary of the Army, the Secretary of the Treasury, and the Secretary of the Interior, within their respective areas of responsibility designated in section 201 of Executive Order 10480 and section 401 of Executive Order 10219, responsibility for preparing plans and programs for the most effective use of the nation's transportation facilities[1] (a) in preparation for attack conditions, (b) under attack conditions, and (c) in post-attack rehabilitation.

2. It is the policy of the Office of Defense Mobilization to develop through the designated agencies plans to meet the problems which would thus be presented with the objective of:

a. Developing the greatest possible resistance within the transportation plant to attack and achieving the maximum operating flexibility under attack conditions.

b. Assuring the maximum transportation performance under attack conditions, by the above and by such control measures as may be required to that end.

c. Directing this performance toward the most urgent transportation requirements presented at the time.

d. Coordinating transportation with plans and programs for meeting the production problems presented by loss and disorganization of productive capacity.

e. Assuring the most rapid restoration of transportation capacity to the level of post-attack transportation requirements, in the priority dictated by those requirements, and coordinated with other national post-attack rehabilitation programs.

[1] The word "transportation" includes warehousing, storage, and port facilities.

3. The policy above indicated applies specifically in the following, among other matters:

a. Development for each type of transportation of plans for the security of communications, operating facilities, operating personnel, operating headquarters, and essential operating records.

b. Development of alternative routes tending to disperse risk, nationwide detour plans around all major traffic centers, and all other measures of like character that study of the situation may disclose to be desirable as well as necessary steps to minimize the impact of attacks upon transportation.

c. Development of (1) a comprehensive plan of operation, including operating procedures and channels of communications under post-attack conditions, and (2) in coordination with the Federal Civil Defense Administration, a similar plan of operation under attack conditions which enables determination of the priority to be accorded traffic and enables such priority to be carried out.

d. Development of plans for determining the amount and priority of restoration of transportation plant in the post-attack phase in coordination with national post-attack controls and requirements and for the concentration of materials, work equipment, and forces to accomplish such restoration. To this end, the designated agencies shall develop for each type of transportation plans for the stockpiling of necessary restoration materials and the provision of work equipment.

4. The designated agencies shall cooperate with each other, and with other government agencies having statutory or other legal responsibility relating to activities assigned herein, to assure effective correlation of government plans and programs.

5. The designated agencies shall report from time to time to the Director of the Office of Defense Mobilization the progress made in carrying out this assignment.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

[F. R. Doc. 53-10388; Filed Dec. 9, 1953; 2:46 p. m.]

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Docket No. 10711]

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

TABLE OF FREQUENCY ALLOCATIONS

At a session of the Federal Communications Commission, held at its offices in Washington, D. C., on the 2d day of December 1953;

The Commission having under consideration its proposal in the above entitled matter; and

It appearing, That in accordance with the requirements of section 4 (a) of the Administrative Procedure Act, notice of proposed rule making in this matter which made provision for the submission of written comments by interested parties, was duly published in the FEDERAL REGISTER on October 7, 1953 (18 F. R. 6384) and that the period for the filing of comments has now expired; and

It further appearing, that no comments were submitted in this proceeding; and

It further appearing, that the public interest, convenience, and necessity will be served by the amendment herein ordered, the authority for which is contained in section 303 (c), (f), and (r) of the Communications Act of 1934, as amended;

*It is ordered*, That, effective 30 days after publication in the FEDERAL REGISTER, Part 2 of the Commission's rules is amended as set forth below.

(Sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: December 4, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

Amend § 2.104 (a) (5) by adding the footnote "NG1" to all frequency bands allocated to the broadcasting service in which the footnote does not now appear. The portion of the section so affected will then read as follows:

| 8 | 9 | 10 | 11 |
|---|---|---|---|
| 535-550 (US27) (NG1) (NG24) | Broadcasting | Broadcasting | | Standard broadcast. |
| 550-1500 (NG1) (NG24) | Broadcasting | Broadcasting | | Standard broadcast. |
| 1500-1600 (NG1) (NG24) | Broadcasting | Broadcasting | | Standard broadcast. |
| 1600-1605 (NG1) (NG24) | Broadcasting | Broadcasting | | Standard broadcast. |
| 6000-6200 (NG1) | Broadcasting | International broadcasting | | International broadcasting. |
| 9500-9700 (NG1) | Broadcasting | International broadcasting | | International broadcasting. |
| 11,700-11,900 (NG1) | Broadcasting | International broadcasting | | International broadcasting. |
| 15,100-15,350 (NG1) | Broadcasting | International broadcasting | | International broadcasting. |
| 17,770-17,850 (NG1) | Broadcasing | International broadcasting | | International broadcasting. |
| 21,450-21,750 (NG1) | Broadcasting | International broadcasting | | International broadcasting. |

[F. R. Doc. 53-10317; Filed, Dec. 10, 1953; 8:47 a. m.]

[Docket No. 10646]

PART 3—RADIO BROADCAST SERVICES

TELEVISION BROADCAST STATIONS; TABLE OF ASSIGNMENTS

1. The Commission has under consideration its notice of proposed rule making issued on August 21, 1953 (FCC 53-1066) and published in the FEDERAL REGISTER on August 28, 1953 (18 F. R. 5148), proposing to assign Channel 7 to Carthage, New York.

2. The time for filing comments in this proceeding expired September 23, 1953. The Brockway Company, Watertown, N. Y., supported the proposal. Meredith Syracuse Television Corporation and WAGE, Inc., both of Syracuse, N. Y., opposed the proposal.

3. In support of the proposed assignment of Channel 7 to Carthage, Brockway urged that the assignment would provide a first VHF assignment in the area of New York State known as the "North Country"; that this area is sparsely populated and underserved; that Jefferson County, in which Carthage is located, has a population of 85,521, including Carthage with a population of 4,420 and Watertown with a population of 34,350; and that it will file an application for a construction permit to build a station on this channel at Carthage.

4. Meredith opposed the assignment of Channel 7 to Carthage on the grounds that such an operation would cause interference within the service area of Station WHEN operating on adjacent Channel 8 at Syracuse, N. Y. Meredith concedes that the proposed assignment meets the required minimum adjacent channel spacing and that existing stations are not protected from any interference which may be caused by the grant of a new station or the modification of the facilities of an existing station but contends that in making a determination on the assignment of new channels in an area the Commission should take into account the effect on other stations notwithstanding the fact that the proposed assignment meets the minimum spacings. In the sixth report and order the Commission concluded that adjacent channel interference was not interference in the sense that no service was available but that it was a substitution of one service for another. In that report reasons were given for deleting the previously proposed adjacent channel ratios and the replacement therefore of minimum mileage separations. We must reject the contention that existing stations are entitled to more protection from interference from proposed assignments than from other existing stations. Further the rules as finally adopted in the sixth report do not provide for interference calculations of any sort.

5. WAGE, Inc., opposed the assignment of Channel 7 to Carthage, and filed a counterproposal requesting, instead, that Channel 11 be assigned as a third VHF channel to Syracuse, New York. This assignment requires that we switch VHF channels in Buffalo, New York, and in three Canadian cities. The WAGE, Inc., counterproposal, therefore, would require an amendment of the United States-Canadian Television Agreement relating to television channel assignments along the Canadian border. Channel 11 in Syracuse, under the WAGE, Inc., proposal, would be 170 miles from the co-channel assignment in Toronto. This proposal, in addition, would require that an existing station on Channel 9 in Toronto be shifted to another frequency. Representatives of the Canadian Government were consulted with reference to this counterproposal; however, agreement to an amendment of the United States-Canadian Television Agreement that would incorporate the assignment changes requested by WAGE, Inc., could not be reached. In view of these facts, we believe the public interest in insuring stability of assignments along the United States-Canadian border requires the rejection of the WAGE, Inc., counterproposal.

6. The Commission finds that the assignment of Channel 7 to Carthage, N. Y., meets the requirements of the rules and would be in the public interest.

7. Authority for the adoption of the proposed amendments is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended.

8. In view of the foregoing: *It is ordered*, That effective 30 days after publication in the FEDERAL REGISTER, the table of assignments contained in § 3.606 of the Commission's rules and regulations is amended as follows:

a. Add to the table under the State of New York:

| City: | Channel No. |
|---|---|
| Carthage, N. Y. | 7— |

b. Change the Channel 7 assignment in Calais, Maine, from 7 to 7—.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1084; 47 U. S. C. 301, 303, 307)

Adopted: December 2, 1953.

Released: December 4, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-10320; Filed, Dec. 10, 1953; 8:48 a. m.]

[Docket No. 10713]

PART 3—RADIO BROADCAST SERVICES

TELEVISION BROADCAST STATIONS; TABLE OF ASSIGNMENTS

1. The Commission has under consideration its notice of proposed rule making (FCC 53-1323) issued in this proceeding on October 8, 1953, proposing to amend the Commission's table of television assignments by assigning Channel 6 to Whitefish Bay, Wisconsin, to be accomplished by interchanging the assignments of Channels 5 and 6 between Marquette, Michigan, and Green Bay, Wisconsin.

2. The Hearst Corporation and the Common Council of the City of Milwaukee filed comments supporting the proposed amendment. Comments in opposition to the proposed amendment were filed by WJIM, Inc., Lansing, Michigan; Central Broadcasting Company, Davenport, Iowa; Midwest Broadcasting Company, Milwaukee, Wisconsin; and the Ultra High Frequency Television Association.

3. In support of the assignment of Channel 6 to Whitefish Bay, The Hearst Corporation urges that this assignment would provide an additional VHF service to Wisconsin and the Milwaukee metropolitan area without depriving any other community of an assignment. Hearst contends that such assignment, which can be accomplished merely by interchanging Channel 5 for Channel 6 between Marquette, Michigan, and Green Bay, Wisconsin, would effect a more efficient use of television channels since it would make three commercial VHF services available in the Milwaukee area. Hearst states that no applications are presently pending for Channel 5 in Marquette, two applications, which have not yet been designated for hearing, are pending for Channel 6 in Green Bay, and that only minor changes would be required in order to amend the Green Bay applications to specify Channel 5. The Green Bay applicants have not filed oppositions to the proposed assignments. The Common Council of the City of Milwaukee, in supporting the assignment of Channel 6 to Whitefish Bay, urges that "there is real justification and merit" for the additional assignment of VHF Channel 6 to the Milwaukee area.

4. WJIM, Inc., licensee of Station WJIM-TV on Channel 6 in Lansing, Michigan, opposed the assignment of Channel 6 in Whitefish Bay. WJIM urges that shifting Channel 6 from Green Bay to Whitefish Bay will substantially increase the interference caused to WJIM-TV. Central Broadcasting Company, licensee of Station WOC-TV on Channel 6 in Davenport, Iowa, also opposed the proposed amendment of Channel 6 in Whitefish Bay.[1] Central submits that in the recent television proceedings in Docket 8736 et al., it was directed to show cause why the television channel authorized for the operation of WOC-TV should not be changed from 5 to 6 and the purpose of the channel change was to reduce the interference which WOC-TV received on Channel 5. Central states that it spent considerable time and money in shifting to Channel 6. Central argues that assigning Channel 6 to Whitefish Bay will increase the interference to WOC-TV "to approximately the same extent that it would have suffered if it had remained on Channel 5."

5. Both WJIM, Inc., and Central Broadcasting Company concede that Channel 6 in Whitefish Bay would comply with all minimum spacing requirements, but urge that their existing stations in Lansing and Davenport are entitled to greater protection. However, § 3.612 of the rules provides that "Permittees and licensees of television broadcast stations are not protected from any interference which may be caused by the grant of a new station or of authority to modify the facilities of an existing station * * *" and that "The nature and extent of the protection from interference accorded to television broadcast stations is limited solely to the protection which results from the minimum assignment and station separation requirements and the rules with respect to maximum powers and antenna heights set forth in this subpart." The Commission made clear in the sixth report (paragraph 206) issued in the recent television proceedings that "the Commission is not basing the Table of Assignments on any theory of protected contours" and that "In establishing the Table we have not provided for any protection to specific contours of existing stations in connection with the grant of individual applications." In light of the above, and since Channel 6 in Whitefish Bay would meet all minimum spacing requirements, we can see no merit to the contentions of WJIM, Inc. and Central Broadcasting Company. It is correct that in the recent allocation proceedings WOC-TV was changed from Channel 5 to Channel 6; however, this change was required in order to eliminate a substandard separation of only 155 miles.

6. The Ultra High Frequency Association and Midwest Broadcasting Company filed comments opposing the assignment of Channel 6 to Whitefish Bay. Midwest has been operating UHF Station WCAN-TV on Channel 25 in Milwaukee since September 6, 1953. Midwest and the Association state that they oppose "any assignment of VHF channels which distorts the assured plan under which UHF stations were financed and built." They urge that permittees, "relying upon the finality of the Commisison's allocation action," have "invested money in the acquisition of equipment and construction of facilities." The assignment of an additional VHF channel in the Milwaukee area, they assert, will have a deleterious economic effect on the UHF operators. Midwest and the Association contend that two basic principles expressed in the sixth report and table of assignments are the preservation of "a competitive balance of power between VHF and UNF" and a fostering of "the maximum utilization of television channels in both bands throughout the United States in a manner consistent with the public interest." They state that relying on these principles and the belief that nothing would be done to upset the table of assignments in regard to the balance between the VHF and UHF, and that equipment would be soon available which would permit transmissions at high

[1] Central Broadcasting Company filed its comments on November 10, 1953, one day after the last date for filing such comments in this proceeding, and moved that its late comments be accepted, alleging good cause. This motion has been granted and the comments have been accepted in this proceeding.

power and which would enable conversion of VHF sets to UHF, many UHF grantees expended money and effort in developing UHF service. Midwest and the Association submit that adding VHF assignments in large cities is unfair to such UHF operators and is contrary to the Commission's previous efforts to expedite the establishment of UHF service. They contend that in Milwaukee, the addition of Channel 6 would deter the conversion of receivers to receive UHF and would substantially decrease the possibility of the UHF stations receiving network affiliations. The Association requests that the time for filing comments in this proceeding be extended for a period of at least 90 days to enable it to complete a number of surveys concerning the VHF-UHF relationship. Midwest and the Association also request that action on the Whitefish Bay assignment be withheld until after the decision in the case of Logansport Broadcasting Corp. v. United States, in the Court of Appeals for the District of Columbia Circuit. They argue that this decision might make an overall allocation proceeding necessary. Midwest and the Association request oral argument or an oral hearing.

7. It is our view that the record in this proceeding supports the assignment of Channel 6 to Whitefish Bay. The oppositions to this assignment filed by Midwest and the Ultra High Frequency Association are apparently premised on the assumption that the Commission's table of assignments is static and that existing licensees are entitled to a protection from additional assignments which would conceivably adversely affect their private economic interests. Both of these assumptions are incorrect. The Commission's table of assignments is not an inflexible allocation plan and the Commision's rules specifically provide procedures for amendments to the table: And since the sixth report numerous changes in channel asignments have been accomplished. Nor is it the case that licensees are entitled to a "freeze" on changes in the table of assignments because of a possible adverse effect on private commercial interests. Channel 6 in Whitefish Bay meets the Commission's assignment requirements and we see no merit, therefore, in the contentions advanced by Midwest Broadcasting Company and the UHF Association.

8. Nor do we see any necessity for extending the time for filing comments in this proceeding or for the holding of an oral hearing or oral argument. Adequate opportunity has been afforded all interested parties to participate in this proceeding, and lengthy comments have been submitted by both Midwest and the UHF Association. Oral argument or an oral hearing at this time is unnecessary and would serve no useful purpose. Finally, we are of the view that the pendency of the Logansport appeal has no relevance to this proceeding.

9. Authority for the adoption of the proposed amendments is contained in sections 4 (i), 301, 303 (c) (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended.

10. In view of the foregoing; *It is ordered*, That, effective 30 days from publication in the FEDERAL REGISTER, the table of assignments contained in § 3.606 of the commission's rules and regulations is amended as follows:

1. Add to table:

| City: | Channel No. |
|---|---|
| Whitefish Bay, Wis | 6 |

2. Amend the table to read:

| City: | Channel No. |
|---|---|
| Marquette, Mich | 6−, 17 |
| Green Bay, Wis | 2+, 5+, 70+ |

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1084; 47 U. S. C. 301, 303, 307)

Adopted: December 3, 1953.

Released: December 4, 1953.

FEDERAL COMMUNICATIONS COMMISSION,

[Docket No. 10591]

## PART 3—RADIO BROADCAST SERVICES

### STANDARDS OF GOOD ENGINEERING PRACTICE CONCERNING STANDARD BROADCAST STATIONS

1. The Commission has under consideration its notice of proposed rule making issued on July 15, 1953 (FCC 53-876), proposing to amend its Standards of Good Engineering Practice Concerning Standard Broadcast Stations with respect to blanketing requirements.

2. The standards presently provide that where a station is to be located in a city which is not part of a metropolitan district, the transmitter site shall be so located that the population within the 250 mv/m contour shall be less than 1 percent of the population of the city in which the main studio is located. However, there is a proviso that where it is impossible or impractical to locate a station at such a site, it may be located so that the population within the 500 mv/m contour shall be less than 1 percent of the population of the city. Where the station is to be located in a city which is part of a metropolitan district, the standards now provide that the transmitter site shall be located so that the population within the appropriate contour (250 mv/m) or 500 mv/m) shall be less than 1 percent of the population within the metropolitan district receiving primary service.

3. The July 15th notice proposes that the 1 v/m (1000 mv/m) contour be considered the blanket contour instead of the 250 mv/m, that the 25 mv/m contour be used as the reference contour for blanketing purposes in all situations, and that the population within the blanket contour not exceed 1 percent of the population within the reference (25 mv/m) contour. Further, an exception is provided where the number of persons within the 1 v/m contour is 300 or less.

4. Comments were filed by three parties.[1] Radio Cincinnati's comments are directed to the last sentence of paragraph D of section 4 which provides:

> The Commission will not authorize new stations, increased facilities to existing stations or auxiliary transmitters, of greater than 500 watts operating power in such areas or utilizing rooftop antennas.

Radio Cincinnati, licensee of Station WKRC, Cincinnati, Ohio, is presently authorized to use a roof-top antenna and does not now have an alternate main transmitter or auxiliary transmitter. Radio Cincinnati points out that if it were to install such an alternate or auxiliary transmitter, it would not be permitted to use its presently authorized site for such installation. To avoid the "unjustifiable hardship" thus imposed, it recommends appropriate revision of paragraph D.

5. We believe Radio Cincinnati's comments have merit. It was not our intention to prevent the installation of rooftop auxiliary transmitters where the main transmitter is so located. We have, accordingly, revised the provision to make this clear.

6. The Association of Federal Communications Consulting Engineers filed comments which approved the proposed use of 1 v/m (1000 mv/m) contour as the blanket contour. The Association, however, does not believe the 25 mv/m contour should be employed as the reference contour "because of the vast difference in the 25 mv/m areas of stations operating on the high end of the band." In this connection, it points out that the higher frequency stations must locate closer to the business and industrial districts than stations on low frequencies and thus approach more closely areas of higher population density. It is the Association's recommendation that the population within the blanket area be related to the population in the interference-free service area.[2]

7. With respect to the above arguments, it is pointed out that the Association's proposal to employ the interference-free contour would favor the lower frequency station to a much greater extent than our present proposal does. The following sample situation, although somewhat simplified, demonstrates this: Assume two 1 kw non-directional stations with a uniform conductivity of 10 millimos per meter, one on 600 kc and one on 1590 kc. Assuming a radiated field of 200 mv/m, the distance to the 1 v/m contour would be approximately 0.2 miles in both cases. The distance to the 25 mv/m contour would be 7 miles for the low frequency station and 4.6 miles for the high. To provide the city with the same coverage, the high frequency station would, therefore, have to move 2.4 miles nearer the city than its low frequency counterpart. The low frequency station would have 2.3 times more area within its 25 mv/m contour than the high frequency one (with the probable consequent increase in the number of persons within such contour) and 8 times more area within its 0.5 mv/m contour. Accordingly, the Commission's proposal results in only about one quarter the difference between the ratios for the low and high frequency stations that obtains in the Association's proposal. A further drawback to the Association's proposal stems from the fact that since there is in most instances considerable difference between the population within the daytime and nighttime interference-free contour due to skywave limitations, there could be considerable difference between the daytime and nighttime blanket ratios. Under the Commission's proposal, however, the ratio would be constant except in the instances where different powers or radiation patterns are used day and night. Finally, it should be pointed out that the population within the 25 mv/m contour can be readily determined [3] whereas calculations of the number of persons within interference-free contours are not only relatively laborious but also are subject to more varying results. Accordingly, we conclude that use of the interference-free contour in this connection would be unappropriate.

8. National Broadcasting Company, Inc. states that it is not opposed to the instant proposal except to the extent that it fails to recognize and adequately provide reasonable protection from the increased image interference which might result from its adoption.[4] NBC urges that the proposal be modified so as to retain substantially the present blanketing protection whenever a new assignment involves a frequency separation of 910 kc with an existing primary broadcast service which is a condition conducive to image interference.

9. We find no merit in this objection to the subject proposal. The Commission's standards are explicit that the phenomenon of image interference is not a condition to be considered in connection with station assignments. This is so for the reason that well designed receivers are not susceptible to such interference; that receivers of simpler design may be modified or protected by wave traps, and that the probability of the combination of factors necessary to cause image interference is so small that it does not merit consideration in this connection. This view has been repeatedly reaffirmed by the Commission in various decisions.[5]

10. In view of the foregoing, we conclude that as revised with respect to auxiliary transmitters, the amendments should be adopted. Authority for the issuance of this amendment is contained in sections 303 (e), (f), (r) and 4 (i) of the Communications Act of 1934, as amended.

11. *It is ordered*, That, effective 30 days after publication in the FEDERAL REGISTER, section 4 of the Standards of Good Engineering Practice Concerning Broadcast Stations and Part 3 of the Commission's rules governing Radio Broadcast Services are amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Adopted: December 2, 1953.

Released: December 7, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Section 3.14 is amended as follows: Add a new paragraph (r) as follows:

(r) *Blanketing.* Blanketing is that form of interference which is caused by the presence of a broadcast signal of 1 v/m or greater intensity in the area adjacent to the antenna of the transmitting station. The 1 v/m contour is referred to as the blanket contour and the area within this contour is referred to as the blanket area.

2. Section 3.24 is amended as follows: Redesignate subparagraph (g) as (h) and add a new subparagraph (g) as follows:

(g) That the population within the 1 v/m contour does not exceed 1.0 percent of the population within the 25 mv/m contour: *Provided, however*, That where the number of persons within the 1 v/m contour is 300 or less the provisions of this paragraph are not applicable.

3. Add a new § 3.88 as follows:

§ 3.88 *Blanketing interference.* The license of each broadcast station is required to satisfy all reasonable complaints of blanketing interference within the 1 v/m contour.

4. Section 4 of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations is amended to read as follows:

SECTION 4. LOCATIONS OF TRANSMITTERS OF STANDARD BROADCAST STATIONS

A. The four primary objectives to be obtained in the selection of a site for a transmitter of a broadcast station are as follows:

(1) To serve adequately the center of population in which the studio is located and to give maximum coverage to adjacent areas.

(2) To cause and experience minimum interference to and from other stations.

(3) To prevent a minimum hazard to air navigation consistent with objectives 1 and 2.

(4) To fulfill certain other requirements given below.

B. The site selected should meet the following conditions:

(1) A minimum field intensity of 25 to 50 mv/m will be obtained over the business or factory areas of the city.

(2) A minimum field intensity of 5 to 10 mv/m will be obtained over the most distant residential section.

(3) The absorption of the signal is the minimum for any obtainable sites in the area. As a guide in this respect the absorption of the signals from other stations in that area should be followed, as well as the results of tests on other sites.

(4) The population within the blanket contour does not exceed that specified by § 3.24 (g).

C. In selecting a site in the center of a city it is usually necessary to place the radiating system on the top of a building. This building should be large enough to permit the installation of a satisfactory ground and/or counterpoise system. Great care must be taken to avoid selecting a building surrounded by taller buildings or where any nearby building higher than the antenna is located in the direction which it is desired to serve. Such a building will tend to cast "radio shadows" which may materially reduce the coverage of the station in that direction. Irrespective of the height of surrounding buildings, the building on which the antenna is located should not have height of approximately one-quarter wavelength. A study of antenna systems located on buildings tends to indicate that where the building is approximately a quarter wavelength in height, the efficiency of radiation may be materially reduced.

D. Particular attention must be given to avoiding cross-modulation. In this connection, attention is invited to the fact that it has been found very unsatisfactory to locate broadcast stations so that high signal intensities occur in areas with overhead electric power or telephone distribution systems and sections where the wiring and plumbing are old or improperly installed. These areas are usually found in the older or poorer sections of a city. These conditions give rise to cross-modulation interference

---

[1] The comments of the National Broadcasting Company, Inc., were filed late, with a request to accept such late filing; that request is granted.

[2] The Association also points out that the notice contains a Table B which indicates the value of inductivity and conductivity recommended for various types of country; that in the notice of proposed rule making in Docket 10604, the Commission proposes to eliminate Table B and all references thereto; and that the alleged conflict demonstrates the expediency of revising the standards on an over-all basis instead of the piecemeal manner illustrated by the subject proceeding. This contention is entirely without merit. The notice of proposed rule making pointed out that: "The substantive revisions of section 4 of the standards proposed herein relate only to the blanketing requirements and cross modulation." Table B is not concerned with blanketing or cross modulation and is, therefore, not involved here. It is found herein only because it is more convenient to set out the whole of section 4 than to separate out those parts dealing with blanketing or cross modulation. No conflict or inconsistency results from the fact that Table B is the subject of a separate rule making proceeding in which its replacement is proposed.

[3] In this connection, the recommended use of population density maps Series P-D and H-E should be noted (see section 4E of the standards herein).

[4] Image interference is a phenomenon which can occur in superheterodyne receivers in the presence of two radio signals separated in frequency by twice the intermediate frequency of the particular receiver. Such interference manifests itself when the receiver is tuned to one of the stations and the program of the other station is also audible. The condition giving rise to such interference occurs when the signal strength of the undesired station is considerably greater than the signal strength of the desired station and where the particular receiver has no image rejection circuits or pre-selection at radio frequency stages.

[5] See, for example, WBUT (6 RR 266), WNOE (7 RR 264), and KGKO (8 RR 864).

due to the nonlinear conductivity characteristics of contacts between wiring, plumbing, or other conductors. This type of interference is independent of the selectivity characteristics of the receiver and normally can be eliminated only by correction of the condition causing the interference. Cross-modulation tends to increase with frequency and in some areas it has been found impossible to eliminate all sources of cross-modulation, resulting in an unsatisfactory condition for both licensee and listeners. The Commission will not authorize, (1) new stations (2) increased facilities to existing stations, or (3) auxiliary transmitters, for use with other than the authorized antenna system of the main transmitter, located in such areas or utilizing roof-top antennas, when the operating power would be in excess of 500 watts.

E. If it is determined that a site should be selected removed from the city, there are several general conditions to be followed in determining the exact site. Three maps should be given consideration if available:

(1) Map of the density of population and number of people by sections in the area.[1a]

(2) Geographical contour map with contour intervals of 20 to 50 feet.

(3) Map showing the type, nature and depth of the soil in the area with special reference to the condition of the moisture throughout the year.

From these maps a site should be selected with a minimum number of intervening hills between it and the center of the city. In general, because of ground conditions, it is better to select a site in a low area rather than on top of a hill, and the only condition under which a site on top of a hill should be selected is that it is only possible by this means to avoid a substantial number of hills, between the site and the center of a city with the resulting radio shadows. If a site is to be selected to serve a city which is on a general sloping area, it is generally better to select a site below the city than above the city.

F. If a compromise must be made between probable radio shadows from intervening hills and locating the transmitter on top of a hill, it is generally better to compromise in favor of the low area, where an efficient radiating system may be installed which will more than compensate for losses due to shadows being caused by the hills, if not too numerous or too high. Several transmitters have been located on top of hills, but so far as data has been supplied not a single installation has given superior efficiency of propagation and coverage.

G. The ideal location of a broadcast transmitter is in a low area of marshy or "crawfishy" soil or area which is damp the maximum percentage of time and from which a clear view over the entire center of population may be had and the tall buildings in the business section of the city would cast a shadow across the minimum residential area.

[1a] See Bureau of Census series P-D and H-E available from Superintendent of Documents, Washington 25, D. C.

H. The type and condition of the soil or earth immediately around a site is very important. Important, to an equal extent, is the soil or earth between the site and the principal area to be served. Sandy soil is considered the worst type, with glacial deposits and mineral-ore areas next. Alluvial, marshy areas and salt-water bogs have been found to have the least absorption of the signal. One is fortunate to have available such an area and, if not available, the next best condition must be selected.

I. Table B indicates the values of inductivity and conductivity which it is recommended be used for various types of country in the absence of surveys over the particular area involved. Naturally, values obtained from the use of these figures will be only approximate and should, if possible, be replaced by actual measurements in the area under consideration

TABLE B

| Type of terrain | Inductivity | Conductivity | Absorption factor at 50 miles, 1,000 kc.[1] |
|---|---|---|---|
| Sea water, minimum attenuation. | 81 | $4.64\times10^{-11}$ | 1.0 |
| Pastoral, low hills, rich soil, typical of Dallas Tex. | 20 | $3\times10^{-13}$ | .50 |
| Lincoln, Nebr., and Wolf Point, Mont., areas. | ------ | ------ | ------ |
| Pastoral, low hills, rich soil, typical of Ohio and Illinois. | 14 | $10^{-13}$ | .17 |
| Flat country, marshy, densely wooded, typical of Louisiana near Mississippi River. | 12 | $7.5\times10^{-14}$ | .13 |
| Pastoral, medium hills, and forestation, typical of Maryland, Pennsylvania, New York, exclusive of mountainous territory and sea coasts. | 13 | $6\times10^{-14}$ | .09 |
| Pastoral, medium hills, and forestation, heavy clay soil, typical of central Virginia. | 13 | $4\times10^{-14}$ | .05 |
| Rocky soil, steep hills, typical of New England. | 14 | $2\times10^{-14}$ | .025 |
| Sandy, dry, flat, typical of coastal country. | 10 | $2\times10^{-14}$ | .024 |
| City, industrial areas, average attenuation. | 5 | $10^{-14}$ | .011 |
| City, industrial areas, maximum attenuation. | 3 | $10^{-15}$ | .003 |

[1] This figure is stated for comparison purposes in order to indicate at a glance which values of conductivity and inductivity represent the higher absorption. This figure is the ratio between field intensity obtained with the soil constants given and with no absorption.

J. In general, broadcast transmitters operating with approximately the same power can be grouped in the same approximate area and thereby reduce the interference between them. If the city is of irregular shape, it is often possible to take advantage of this in selecting a suitable location that will give a maximum coverage. The maps giving the density of population will be a key to this. The map giving the elevation by contours will be a key to the obstructing hills between the site and city. The map of the soil conditions will assist in determining the efficiency of the radiating system that may be erected and the absorption of the signal encountered in the surrounding area.

K. Another factor to be considered is the relation of the site to airports and airways. Procedures and standards with respect to the Commission's consideration of proposed antenna structures which will serve as a guide to persons intending to apply for radio station licenses are contained in Part 17 of the Commission rules (Rules Concerning the Construction, Marking and Lighting of Antenna Structures).

L. In finally selecting the site, consideration must be given to the required space for erecting an efficient radiating system, including the ground or counterpoise. It is the general practice to use direct grounds consisting of a radial buried wire system. If the area is such that it is not possible to get such ground system in soil that remains moist throughout the year, it probably will be found better to erect a counterpoise. (Such a site should be selected only as a last resort.) It, like the antenna itself, must of course be designed properly for the operating frequency and other local conditions.

M. While an experienced engineer can sometimes select a satisfactory site for a 100-watt station by inspection, it is necessary for a higher power station to make a field-intensity survey to determine that the site selected will be entirely satisfactory. There are several facts that cannot be determined by inspection that make a survey very desirable for all locations removed from the city. Often two or more sites may be selected that appear to be of equal promise. It is only by means of field-intensity surveys taken with a transmitter at the different sites or from measurements on the signal of nearby stations traversing the terrain involved that the most desirable site can be determined. There are many factors regarding site efficiency that cannot be determined by any other method. When making the final selection of a site, the need for a field-intensity survey to establish the exact conditions cannot be stressed too strongly. The selection of a proper site for a broadcast station is an important engineering problem and can only be done properly by experienced radio engineers.

[F. R. Doc. 53-10318; Filed, Dec. 10, 1953; 8:48 a. m.]

## PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICE

### OPERATING CONTROLS FOR RADIO-TELEGRAPH INSTALLATIONS ON CERTAIN SHIPS

In the matter of amendment of Subpart U of Part 8 of the Commission's rules regarding operating controls for radiotelegraph installations on board ships subject to the radio provisions of the International Convention for the Safety of Life at Sea, London, 1948.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 2d day of December 1953;

The Commission having under consideration the matter of implementation of the radio provisions of the International Convention for the Safety of Life at Sea, London, 1948; and Subpart U of Part 8 of its rules which contains rules and regulations designed to guide persons in complying with these provisions; and

It appearing, that Chapter IV, Regulation 10, subparagraph (q) of the Safety Convention contains a requirement which became effective November 19, 1953, that radiotelegraph installations "be provided with a device permitting changeover from transmission to reception and vice versa without manual switching"; and

It further appearing, that for the purpose of completing Subpart U, the above referred to requirement should be added to the present provisions of Subpart U; and

It further appearing, that compliance with the provisions of section 4 of the Administrative Procedure Act, is unnecessary since the rule amendment herein ordered finalized does no more than reflect the Safety Convention requirement;

*It is ordered*, That, effective immediately, and pursuant to sections 303 (r) and 359 of the Communications Act of 1934, as amended, and Chapter IV, Regulation 10, of the International Convention for the Safety of Life at Sea, London, 1948, Part 8 of the Commission's rules is amended by redesignating § 8.712 as § 8.713 and by inserting a new § 8.712 to read as follows:

§ 8.712 *Operating controls.* The radiotelegraph installation shall be provided with a device permitting changeover from transmission to reception and vice versa without manual switching.

(Sec. 303, 48 Stat. 1082, as amended, sec. 359, 50 Stat. 195; 47 U. S. C. 303, 359)

Released: December 4, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 997 ]

[Docket No. AO 205-A1]

### HANDLING OF FILBERTS GROWN IN OREGON AND WASHINGTON

### NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER

*Correction*

In Federal Register Document 53-9964, appearing at page 7556 of the issue for Thursday, November 26, 1953, the following changes should be made:

1. In the middle column of page 7559, the 21st line of (i) should read "each of the candidates by an appreciable".

2. In the third column of page 7560, the reference in the sixth line of the second paragraph should read "13 F. R. 4623".

3. In § 997.32 (page 7565) the last sentence of paragraph (a) should be designated paragraph (b) so that such paragraph (b) shall read as follows:

(b) Nominations on behalf of growers who market their filberts through other than cooperative handlers shall be submitted after ballot by such growers conducted as follows: Names of the grower candidates to accompany the ballot shall be submitted to the control board prior to February 10 of each fiscal year on petitions signed by not less than ten growers who market their filberts through other than cooperative handlers and who are of record with the control board; each grower may sign only as many petitions as there are persons to be nominated as members of the control board; ballots accompanied by the list of candidates submitted by petitions, together with instructions, shall be mailed to all growers who market their filberts through other than cooperative handlers and who are of record with the control board; the qualified person receiving the highest number of votes for the position for which his name was placed on the ballot shall be the nominee for that position, except that, in case of a tie, the names of the tied candidates shall be submitted. If the Secretary determines that this procedure is unsatisfactory to the growers who market their filberts through other than cooperative handlers, because it is too difficult or costly to administer, it does not result in the name of a sufficient number of qualified candidates being submitted with the ballot, or it should be changed for other reasons, he may change this procedure through the formulation and issuance of superseding regulations.

4. In the proviso at the end of paragraph (c) of § 997.50 "$^{3}/_{64}$" should read "$^{5}/_{64}$".

## DEPARTMENT OF LABOR

### Wage and Hour Division

### [ 29 CFR Parts 655, 703 ]

[Administrative Order 433]

### PUERTO RICO; SPECIAL INDUSTRY COMMITTE No. 15

### APPOINTMENT TO INVESTIGATE CONDITIONS AND RECOMMEND MINIMUM WAGES FOR CERTAIN INDUSTRIES

1. Pursuant to authority under the Fair Labor Standards Act of 1938, as amended (52 Stat. 1060, as amended 29 U. S. C., and Sup., 201 et seq.) I, Wm. R. McComb, Administrator of the Wage and Hour Division, United States Department of Labor, do hereby appoint and convene a special industry committee for Puerto Rico composed of the following representatives:

For the public: A. Cecil Snyder, San Juan, P. R., chairman; Joan Borden Colt, Providence, R. I.; Pedro Munoz-Amato, Rio Piedras, P. R.

For the employers: Sam Schweitzer, Mayaguez, P. R.; A. C. Bob Reuter, Mayaguez, P. R.; George Marlin, New York, N. Y.

For the employees: David Dubinsky, New York, N. Y.; Gladys Dickason, New York, N. Y.; Hipolito Marcano, San Juan, P. R.

2. The special industry committee herein created, in accordance with the provisions of the Fair Labor Standards Act, as amended, and the regulations promulgated thereunder (29 CFR Part 511), shall meet beginning on January 11, 1954, at 10:00 a. m. in Room 412, New York Department Store Building, Stop 16½, Ponce de Leon Avenue, Santurce, Puerto Rico, and shall proceed to investigate conditions in the industries in Puerto Rico hereinafter enumerated and recommend to the Administrator minimum wage rates for all employees in said industries in Puerto Rico, who within the meaning of said Act are "engaged in commerce or in the production of goods for commerce" excepting employees exempted by virtue of the provisions of section 13 (a) and employees coming under the provisions of section 14. Minimum wage rates recommended by the committee shall be the highest rates (not in excess of 75 cents per hour) which it determines will not substantially curtail employment in such industries and will not give any industry in Puerto Rico a competitive advantage over any industry in the United States outside of Puerto Rico.

Said special industry committee shall investigate conditions respecting, and recommend minimum wage rates for, the employees in the following industries in Puerto Rico: The needlework and fabricated textile products industry; the corsets, brassieres and allied garments industry; and the men's and boys' clothing and related products industry.

3. For the purpose of this order these industries are defined as follows:

*Needlework and fabricated textile products industry.* The manufacture from any material of all apparel and apparel furnishings and accessories made by the knitting, crocheting, cutting, sewing, embroidering, or other processes; the manufacture of all textile products and the manufacture of like articles in which a synthetic material in sheet form is the basic component: *Provided, however*, That the definition shall not cover products or activities included in the corsets, brassieres and allied garments industry, as defined herein, nor products or activities included in the following industries in Puerto Rico as defined in the wage orders for such industries: The artificial flower industry, the button, buckle, and jewelry industry, the hairnet industry, the handicraft products industry, the hosiery industry, the hooked rug industry, the men's and boys' clothing and related products industry, the shoe manufacturing and allied industries, the textile and textile products industry. This definition includes, but without limitation, handkerchiefs, scarves and mufflers; gloves; women's, misses', girls' and infants' outerwear, underwear, and nightwear; handbags (except handbags made by hand out of raffia, maguey, straw or similar materials); household art linens; needlepoint; embroideries and trim-

mings; curtains, draperies, and bedspreads; and miscellaneous fabricated textile products.

*Corsets, brassieres, and allied garments industry.* The manufacture of corsets, brassieres, brassiere pads, girdles, sanitary belts, foundation garments, and similar items.

*Men's and boys' clothing and related products industry.* The manufacture from any material of men's and boys' clothing and related products, including, but without limitation, suits, coats, overcoats, trousers, shirts, underwear, nightwear, work clothing, sports wear (including bathing suits, riding habits and athletic uniforms), heavy outerwear, neckties, caps, hats (except hand-made straw hats), belts (except leather belts), robes and dressing gowns, raincoats, suspenders, garters, academic caps and gowns, vestments, costumes, and other items of apparel and accessories (except gloves, handkerchiefs, scarves and mufflers, hosiery, and shoes).

Signed at Washington, D. C., this 8th day of December 1953.

WM. R. MCCOMB,
*Administrator,*
*Wage and Hour Division.*

[F. R. Doc. 53-10343; Filed, Dec. 10, 1953; 8:54 a. m.]

## FEDERAL COMMUNICATIONS COMMISSION

### [ 47 CFR Part 2 ]

[Docket No. 10797]

FREQUENCY ALLOCATIONS

NON-GOVERNMENT FIXED AND MOBILE SERVICES

In the matter of amendment of Part 2 of the Commission's rules and regulations regarding frequency allocations above 890 Mc to the non-Government Fixed and Mobile services; Docket No. 10797.

Notice is hereby given of proposed rule making in the above entitled matter.

The proposed amendments are issued as the result of the Commission's study of current frequency allocation problems above 890 Mc and are considered to be responsive to the following problems:

(a) Requirement for additional exclusive spectrum space for TV pickup operations.

(b) Requirment for exclusive spectrum space for common carrier mobile functions, including additional broadcast and "closed circuit" TV pickup service, and for public mobile radiotelephone service including land mobile, maritime mobile and aeronautical mobile public correspondence.

(c) Requirement for exclusive microwave spectrum space for Safety and Special Radio Services mobile functions.

(d) Requirement for additional exclusive broadcast STL frequencies, including AM STL, FM STL and TV STL (sound only).

(e) Requirement for additional common carrier fixed service spectrum space below 3700 Mc.

(f) Requirement for exclusive, as compared to shared, allocations for the non-Government fixed services now operating in the vicinity of 900 Mc.

In proposing these allocation changes, the Commission has given due consideration to the development of the various services, both as to operating techniques and equipment, as well as to pending petitions now before the Commission requesting reallocations in the microwave fixed bands, and is of the opinion that these proposed adjustments will be in the public interest.

The conclusion of this proceeding will terminate consideration of the reallocation petitions filed by the Federal Telecommunications Laboratories on August 15, 1950; by the Peninsular Telephone Company on October 25, 1950; and by the Lenkurt Electric Company, Inc., on June 5, 1953. It may be noted that the proposed reallocation, if adopted, would constitute a denial of the petitions of the Federal Telecommunications Laboratories and the Peninsular Telephone Company and would grant the petition of the Lenkurt Electric Company, Inc.

If the proposal is adopted, it is intended to make the new allocations effective on May 1, 1954, for new stations. Those licenses which expire prior to May 1, 1955, may, upon appropriate application, be extended to May 1, 1955. Stations in these bands which may have license expiration dates later than May 1, 1955, will not be authorized to operate on frequencies which are not in accordance with the new allocation.

The proposed amendments to the rules are set forth below and are issued pursuant to the authority of sections 303 (c), (f) and (r) of the Communications Act of 1934, as amended.

Any interested party who is of the opinion that the proposed amendments should not be adopted, or should not be adopted in the form set forth herein, may file with the Commission on or before February 15, 1954, a written statement or brief setting forth his comments. Persons favoring such proposal may also file comments. Replies to such comments may be filed within ten days from the last date for filing the original comments. The Commission will consider all comments and briefs presented before taking final action in the matter.

In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs or comments filed shall be furnished the Commission.

Adopted: December 2, 1953.

Released: December 4, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

a. Proposed amendments to § 2.1:

1. Add the definition:

*Standard broadcast STL station (FXS).* A fixed station utilizing telephony to transmit from a studio of a standard broadcast station to the transmitter of that broadcast station, programs to be broadcast by that station.

2. Delete the definition of mobile except television pickup station (MOZ).

3. Add the definition:

*Common carrier mobile station (MOC).* A mobile station open to public correspondence.

4. Add the definition:

*Common carrier land station (FLC).* A land station open to public correspondence.

b. Proposed amendments to § 2.101:

1. Add the following symbols and terms to the list of stations:

FXS—Standard Broadcast STL Station.
MOC—Common Carrier Mobile Station.
FLC—Common Carrier Land Station.

2. Delete the symbol and term "MOZ—Mobile (except television pickup) station."

c. Proposed amendment to § 2.104 (a):

| Band (mc) | Service | Class of station | Frequency (mc) | Nature of SERVICES of stations |
|---|---|---|---|---|
| 7 | 8 | 9 | 10 | 11 |
| 890–936 (NG1) | Fixed | (a) Common carrier fixed<br>(b) International control | 915 | Industrial scientific and medical equipment. |
| 936–950 (NG1) | Fixed | (a) Standard Broadcast STL<br>(b) FM Broadcast STL<br>(c) Television STL (sound only) (NG14) (NG34). | | |
| 950–960 (NG1) | Fixed | Operational fixed | | |
| 3500–3600 (NG1) | Mobile | (a) Land<br>(b) Mobile. | | Aviation, Industrial, Land Transportation, Marine, Public Safety. |
| 3600–3700 (NG1) | Mobile | (a) Common carrier land<br>(b) Common carrier mobile. | | |
| 6425–6500 (NG1) | Mobile | (a) Common carrier land<br>(b) Common carrier mobile. | | |
| 6500–6575 (NG1) | Mobile | (a) Land<br>(b) Mobile. | | Aviation, Industrial, Land Transportation, Marine, Public Safety. |
| 6875–7125 (NG1) | (a) Fixed<br>(b) Mobile | (a) Television pickup<br>(b) Television STL (NG16). | | |
| 11,700–11,950 (NG1) | Mobile | (a) Common carrier land<br>(b) Common carrier mobile. | | |
| 11,950–12,200 (NG1) | Mobile | (a) Land<br>(b) Mobile. | | Aviation, Industrial, Land Transportation, Marine, Public Safety. |

NG13—Delete.
NG14—Interim FM relay stations may be authorized to use frequencies in this band on the condition that harmful interference will not be caused to stations operating in accordance with the table of frequency allocations..
NG15—Delete.
NG34—Television inter-city relay stations may be authorized to use frequencies in this band, for audio purposes only, on the condition that harmful interference will not be caused to stations operating in accordance with the table of frequency allocations

[F. R. Doc. 53-10323; Filed, Dec. 10, 1953; 8:50 a. m.]

### [ 47 CFR Parts 2, 10, 11, 16, 18 ]

[Docket No. 10798]

APPLICATION AND LICENSING PROCEDURE EQUIPMENT ACCEPTABLE FOR LICENSING; WITHDRAWAL OF CERTIFICATE OF TYPE APPROVAL

In the matter of amendment of Part 2 of the Commission's rules to establish a program for the certification of equipment acceptable for licensing. Amendment of Parts 10, 11 and 16 of the Commission's rules to require type acceptance of equipment. Amendment of § 18.16 of the Commission's rules to clarify the procedure for withdrawal of type approval; Docket No. 10798.

1. Notice is hereby given of proposed rule making in the above entitled matters.

2. The Commission has recently adopted a new application and licensing procedure involving the use of Form 400 in the non-common carrier land mobile services; i. e., the services covered by Part 10—Public Safety Radio Services, Part 11—Industrial Radio Services, and Part 16—Land Transportation Radio Services. This new procedure requires reference to a List of Equipment Acceptable for Licensing. Due to the exigency of the situation it was necessary to issue a list prior to the promulgation of a formal procedure for obtaining a listing. The proposed rules are intended to fill this need by establishing a procedure to be followed by manufacturers or other persons desiring to have equipment certified by the Commission as acceptable for licensing.

3. These rules also collect in one place the various procedures dealing with type approval of equipment which involves the actual testing of equipment by the Commission. These procedures cover ship radiotelegraph equipment required for safety purposes, diathermy and industrial heating equipment and Citizens Radio Equipment. In addition the proposed rules contain an amendment to § 18.16 of the Commission's rules relating to the withdrawal of type approval for medical diathermy equipment and miscellaneous equipment in order to conform that section to the proposed general provisions respecting type approval in Part 2.

4. The proposed rules are issued under authority of sections 303 (e), (f) and (r) of the Communications Act of 1934, as amended.

5. Any interested person who is of the opinion that the proposed rules should not be adopted, or should not be adopted in the form set forth, may file with the Commission on or before February 1, 1954, a written statement or brief setting forth his comments. At the same time any person who favors the proposed rules may file a statement or brief in support thereof. Comments or briefs in reply to the original comments or briefs may be filed within ten days from the last date of filing of said original comments or briefs. The Commission will consider all such comments, briefs and statements before taking final action and, if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place thereof will be given.

6. In accordance with § 1.784 of the Commission's rules, an original and 14 copies of all statements, briefs or comments shall be furnished the Commission.

Adopted: December 2, 1953.

Released: December 3, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Add Subpart F to Part 2, as follows:

SUBPART F—EQUIPMENT TYPE APPROVAL AND TYPE ACCEPTANCE FOR LICENSING

§ 2.501 *Program defined.* In order to carry out its responsibilities under the Communications Act and the various treaties and international regulations, it is necessary for the Commission to ascertain that the equipment proposed by various applicants is capable of meeting the technical operating standards set forth in said statutes, treaties and the Commission's rules and regulations. To facilitate such determinations in those services where equipment is generally standardized, to promote the improvement of equipment and to promote the efficient use of the radio spectrum the Commission has designed two specific procedures for securing advance approval of transmitting equipment in such services as a prerequisite for securing station licenses. These procedures are designated as type approval and type acceptance. In general, type approval contemplates tests conducted by Commission personnel, while type acceptance is based on data concerning the equipment submitted by the manufacturer. The procedures described in the sections that follow are intended to apply to equipment in those services which specifically require either type approval or type acceptance. These procedures may also be applied to equipment components, such as power amplifiers, etc., but only to the extent specified in the rules of the particular service in which such components will be used.

§ 2.510 *Type approval.* (a) Type approval is normally based on tests performed at the Commission's laboratory at Laurel, Maryland. In certain cases, type approval may be based on tests performed at other locations provided the tests are conducted in accordance with procedures specified by the Commission and under the direction and supervision of Commission personnel.

(b) Application for type approval may be in the form of a letter addressed to the Commission. The letter shall specify the part of the rules under which type approval is desired and shall include any information specifically required to be submitted under such part of the rules. In addition the request shall describe the equipment to be tested and include the size and weight of each component. On receipt of a reply from the Commission the applicant shall ship the equipment prepaid to Chief, Laboratory Division, P. O. Box 31, Laurel, Md., complete with operating instructions and circuit diagrams. Upon completion of the tests, the equipment will be returned to the applicant, shipping charges collect.

(c) In the event of failure of the equipment to meet the Commission's technical requirements, notice may be given directly by the Chief, Laboratory Division, and arrangements made for modification or adjustment as required.

§ 2.511 *Limitations on type approval.* (a) Type approval is limited to a determination that, if the equipment is properly maintained and operated and no unauthorized change whatsoever is made in its construction, it is capable of complying with the technical requirements of the applicable part of the rules. Type approval shall not be construed as a determination with respect to features not covered by the rules of the service under which the equipment is approved.

(b) Type approval shall not be construed to mean that the equipment will continue to be satisfactory as the Commission's technical standards may be changed to conform with progress in the state of the art.

§ 2.512 *Withdrawal of type approval.* (a) Type approval may be withdrawn, if upon subsequent inspection or operation it is determined that unauthorized changes have been made in the equipment or that it does not comply with the technical requirements of the applicable part of the rules. The procedure for withdrawal of type approval in such cases shall be the same as that prescribed by the Commission for revocation of a radio station license pursuant to the provisions of the Communications Act of 1934, as amended.

(b) In the event changes in the Commission's technical standards necessitate the withdrawal of type approval, the procedure to be followed will be set forth in the order finalizing the revised technical standards after appropriate rule making proceedings.

(c) When type approval has been withdrawn, the manufacturer shall make no further sale of equipment which in any manner indicates that such equipment meets the type approval requirements of the Commission.

(d) When type approval has been withdrawn for unauthorized changes or failure to comply with technical requirements, the Commisison will consider that fact in determining whether the manufacturer in question is eligible to receive any new type approval.

§ 2.520 *Type acceptance.* (a) Acceptance of equipment for licensing is based on representations and test data submitted by the manufacturer.

(b) A separate request for type acceptance shall be submitted for each different type of equipment. Each request shall be in triplicate, signed by the applicant or by a duly authorized representative who shall certify that the application was prepared by him or at his direction and that to the best of his knowledge and belief the facts set forth in the application and accompanying technical data are true and correct. The technical test data required to be submitted shall be certified by the engineer who performed or supervised the

tests who shall attach a brief statement of his qualifications.

§ 2.521 *Limitations on type acceptance.* (a) Type acceptance is limited to a finding that, insofar as can be determined from the data submitted, and if the equipment is properly maintained and operated and no unauthorized change whatsoever is made in its construction, the equipment complies with current technical standards of the service in which the equipment will be operated. The fact that a particular equipment has been type accepted for licensing purposes shall not be construed as a determination with respect to mechanical features nor of reliability under service conditions not covered by the rules of the service under which the equipment is accepted.

(b) Type acceptance shall not be construed to mean that the equipment will continue to be satisfactory as the Commission's technical standards may be changed to conform with progress in the state of the art.

§ 2.522 *Withdrawal of type acceptance.* (a) Type acceptance may be withdrawn, if upon subsequent inspection or operation it is determined that unauthorized changes have been made in the equipment or that it does not comply with the technical requirements of the applicable part of the rules. The procedure for withdrawal of type acceptance in such cases shall be the same as that prescribed by the Commission for revocation of a radio station license pursuant to the provisions of the Communications Act of 1934, as amended.

(b) In the event changes in the Commission's technical standards necessitate the withdrawal of type acceptance, the procedure to be followed will be set forth in the order finalizing the revised technical standards after appropriate rule making proceedings.

(c) When type acceptance has been withdrawn, the manufacturer shall make no further sale of equipment which in any manner indicates that such equipment meets the type acceptance requirements of the Commission.

(d) When type acceptance has been withdrawn for unauthorized changes or failure to comply with technical requirements, the Commission will consider that fact in determining whether the manufacturer in question is eligible to receive any new type acceptance.

§ 2.523 *Information required for type acceptance.* (a) Each request for type acceptance of equipment shall include the information listed in paragraph (b) of this section. This information is general and is the minimum required for all equipments. In many cases, additional information specific to a particular service is also required. The applicant should carefully read the rules of the service in which the proposed equipment is intended to be operated to make sure that such additional specific information is furnished. If deemed necessary, the Commission may require additional information, test data, or testing in its own laboratory at Laurel, Maryland, before determining the acceptability of any specific equipment.

(b) The request shall include the following information:

(1) The type number of the equipment.

NOTE: See § 2.540 regarding the assignment of type numbers.

(2) The service and rule part under which the equipment is intended to be operated.

(3) A complete description of the equipment including a listing of all tubes used, function of each, multiplication in each stage, plate current and voltage applied to each tube. The description should be sufficiently complete to develop all factors that may affect a determination as to whether the equipment will comply with the technical standards of the applicable rule part.

(4) The type of emission for which the equipment is designed. Include a description of the modulator and the modulation limiting circuit, if incorporated.

(5) A curve, or equivalent data, showing the limiting action of the modulation limiting circuit, if incorporated.

(6) A curve, or other equivalent data, showing the frequency characteristic of the audio modulating circuit between 100 and 5,000 cycles, in voice modulated communications equipment.

(7) A curve, or equivalent data, showing the band occupied by the emitted signal (see subparagraph (1)) of this paragraph).

(8) A description of the circuits incorporated to provide suppression of harmonic and spurious radiation.

(9) Curves, or equivalent data, showing the magnitude of each spurious or harmonic radiation that can be detected when the equipment is omitting:

(i) An unmodulated carrier;

(ii) A modulated carrier (see subparagraph (11) of this paragraph).

Spurious radiation should be checked at the equipment terminals when properly loaded with a suitable artificial antenna (lossy line method). The spectrum should be investigated from the lowest radio frequency generated in the equipment up to at least the tenth harmonic of the carrier frequency or to the highest frequency possible in the present state of the art of measuring techniques. Particular attention should be paid to harmonics and subharmonics of the carrier frequency as well as to those frequencies removed from the carrier by multiples of the oscillator frequency. Spurious signals attenuated more than 20 db below the required attenuation need not be shown separately.

(10) A report of field intensity measurements made to detect spurious signals that may be radiated directly from the cabinet, control circuits, power leads or intermediate circuit elements for the following equipments:

(i) Equipment in which more than a minimum of 60 db of spurious attenuation must be provided.

(ii) All equipment operating on frequencies higher than 25 Mc.

(iii) Hand carried transmitters, or others, where the antenna is an integral part of and attached directly to the transmitter.

Field intensity measurements of spurious emissions for other types of equipment may be required, when in the opinion of the Commission, there is a need for such measurement.

(11) The test data required by subparagraphs (7) and (9) of this paragraph should be measured for the following conditions, as applicable:

(i) Telegraph transmitters for manual operation, when keyed at 40 words per minute.

(ii) Other telegraph transmitters, when keyed at the maximum machine speed.

(iii) Voice modulated transmitters required to be equipped with a modulation limiting circuit when modulated by an input signal 10 db greater than that required to produce 100 percent modulation: Test 1 at 500 cycles; test 2 at 2,500 cycles; test 3 with voice or equivalent.

(iv) Voice modulated transmitter without limiters when modulated by an input signal large enough to produce at least 85 percent modulation: Test 1 at 500 cycles; test 2 at 2,500 cycles; test 3 with voice or equivalent.

(v) Broadcast transmitters, when modulated under the conditions prescribed in Part 3 of this chapter.

(vi) Transmitters designed for other types of modulation when modulated by an appropriate signal of sufficient amplitude to be representative of the type of service in which used. A description of the input signal used should be supplied.

(12) A description of the oscillator circuit together with any devices installed for the purpose of frequency stabilization.

(13) Measured data to show the frequency stability of the transmitter with variation of temperature and with variation of primary supply voltage:

(i) Vary temperature from −30° C. to 50° C. for non-broadcast equipment. Use other suitable limits for other types of equipment, such as broadcast.

(ii) Vary primary supply voltage from 85 percent to 115 percent of the normal supply voltage at the input to the cable normally provided with the equipment, or at the power supply terminals if cables are not normally provided.

(14) Frequency range of the equipment.

(15) Measured data to show the r. f. carrier power at the equipment terminals for the circuit constants specified in the general description of the equipment. Specify how the equipment was loaded when the power output was measured.

(16) A description of each measurement procedure together with a listing of the actual test equipment used and a block diagram showing the test setup.

(17) A complete circuit diagram, wiring diagram, instruction book and photographs showing the general construction and layout of the equipment.

§ 2.530 *Submission of technical data for application reference.* (a) In certain services, neither type approval nor acceptance for licensing is required. However, applications for station authorizations in such services require a detailed technical description of the equipment proposed to be used. In order to simplify the handling of applications and to facilitate the filing of applications by eliminating the need for individual submission of equipment specifications the Commission will accept for application reference purposes detailed technical specifications of equipment proposed to be used in these services. Persons desiring to avail themselves of this privilege, may submit the data described below in triplicate. Applications for station authorizations submitted subsequent to such filing may refer to the technical data so filed.

(b) In order for the applicant to refer to technical data on file, the submission referred to above should contain the following information:

(1) The type number of the equipment.

(2) The service under which the equipment is to operate.

(3) A complete description of the equipment including a listing of all tubes used, function of each, oscillator frequency, multiplication in each stage, plate current and voltage applied to each tube, etc.

(4) Type of emission for which equipment is designed.

(5) Description of the modulator, including modulation limiting circuit if incorporated.

(6) Bandwidth occupied by the emission.

(7) Frequency range of the equipment.

(8) A description of the oscillator circuit together with any devices installed for the purpose of frequency stabilization.

(9) Statement of the frequency stability of the equipment including the temperature range over which the frequency stability is guaranteed.

(10) The rated r. f. carrier power.

(11) A description of the circuits incorporated to provide suppression of harmonic and spurious radiation. State the amount of such suppression incorporated in db below the level of the unmodulated carrier, or other stated reference level if a carrier is not employed.

(12) Describe the power supply intended to be used.

(13) Attach circuit diagram, wiring diagram, instruction book. If available also attach photographs showing the general construction and layout of the equipment.

(c) Receipt by the Commission of data for application reference purposes does not imply that the Commission has made or intends to make any finding regarding the acceptability of the equipment for licensing. Each applicant is expected to exercise appropriate care in the selection of equipment to insure that the unit selected will comply with the rules governing the service in which it is proposed to operate.

§ 2.540 *Identification and changes in equipment.* (a) Each equipment for which type approval or type acceptance is requested shall be identified by a distinctive type number. All equipment sold or used pursuant to type approval or type acceptance must have affixed to it such indication of type approval or type acceptance as may be specified by the service rules governing such equipment.

(b) No change whatsoever may be made in type approved equipment without prior authorization from the Commission. When a change is authorized, the Commission may require the manufacturer to identify the modified equipment with a new type number and to reapply for type approval.

NOTE: See § 2.512 regarding withdrawal of type approval.

(c) Changes in type accepted equipment may be made without prior authorization provided the change does not adversely affect the test data filed with the Commission and on which type acceptance was based. If the change will adversely affect the test data on file with the Commission prior authorization must be obtained before the change may be made; and the Commission may require the manufacturer to identify the modified equipment with a new type number and to reapply for type acceptance.

NOTE: See § 2.522 regarding the withdrawal of type acceptance.

(d) If the manufacturer provides a modification kit for installation in the field, such kit shall contain a name plate bearing the new type number if a new type number has been required by the Commission.

(e) Licensees proposing to modify their own equipment shall follow the procedure of paragraph (b) or paragraph (c) of this section as applicable.

§ 2.541 *Radio equipment list.* From time to time the Commission will publish lists of type approved and type accepted equipment. Such lists will include all equipment (except for custom built and composite transmitters) which has been type approved and type accepted by the Commission, as well as the services and frequencies for which it may be used and the power, emission and other limitations on the use of each type of equipment. These lists are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

§ 2.542 *Limitation on availability of equipment files for public reference.* (a) Information about equipment submitted by manufacturers and other persons pursuant to this subpart will not be open to the public until such time as the equipment has been included on the appropriate radio equipment list, except that information about equipment filed for application reference purposes will be available for inspection.

(b) The Commission will comply with a manufacturer's request temporarily to withhold the release of data concerning new types of equipment. Such data will not be made public prior to the date on which the equipment is included on the appropriate radio equipment list.

§ 2.543 *Making available type approved or type accepted equipment for testing or inspection.* Any manufacturer of equipment which has been type-approved or type accepted by the Commission shall immediately, upon request by the Commission, make available to the Commission production models of said type approved or type accepted equipment in order that the equipment may be tested or inspected either at the place of manufacture or at the Commission's laboratory at Laurel, Maryland. Failure to comply immediately with any such request by the Commission shall be considered grounds for revoking type approval or type acceptance.

2. Add new §§ 10.110, 11.110, 16.110 to read as follows:

*Acceptability of transmitters for licensing.* (a) Except for transmitters used at developmental stations, each transmitter utilized by a station authorized for operation under this part after January 1, 1955, and all transmitters in use after January 1, 1960, must be acceptable to the Commission under one or more of the following conditions:

(1) The transmitter may be type accepted by the Commission as being capable of meeting the technical standards set forth in Subpart C of this part for the type of operation specified in the station's instrument of authorization and included on its "List of Equipment Acceptable for Licensing" pursuant to paragraph (c) of this section.

(2) The transmitter may be type accepted by the Commission as being capable of meeting the technical standards set forth in Subpart C of this part for the type of operation specified in the station's instrument of authorization but not included on its "List of Equipment Acceptable for Licensing" pursuant to paragraph (d) of this section.

(3) A transmitter which is not included on the Commission's "List of Equipment Acceptable for Licensing" but is described on a station authorization by manufacturer and type number (in the case of a composite transmitter by type number only) and is in use prior to January 1, 1955, may continue to be used by the licensee, his successors or assigns in business until January 1, 1960, provided such transmitter does not cause harmful interference due to failure to comply with the technical standards in this part.

(b) Where a transmitter is used under a developmental authorization, it is merely necessary to submit the technical specifications of the equipment together with such additional information as the Commission may require. Greater detail regarding this type of submission is contained in Part 2 of this chapter.

(c) Any manufacturer of a transmitter to be built in quantity for use in this service may request "Type Acceptance" for such transmitter following the type acceptance procedure set forth in Part 2 of this chapter. From time to time, the Commission will publish a list of such Type Accepted transmitters entitled "Radio Equipment List, Part C, List of Equipment Acceptable for Licensing." Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

(d) Type acceptance may be requested by the prospective station licensee, as part of his application for a station authorization for custom built

or composite transmitters, by following the type acceptance procedure set forth in Part 2 of this chapter. However, such transmitters will not normally be included on the Commission's "List of Equipment Acceptable for Licensing" but will be individually enumerated on the document authorizing the operation of such transmitters.

(e) Type acceptance is limited to a finding that insofar as can be determined from the data submitted, and if the equipment is properly maintained and operated and no unauthorized change whatsoever is made in its construction, the equipment complies with current technical standards of these services to the extent specified in the "List of Equipment Acceptable for Licensing" or in the station's instrument of authorization. Type acceptance shall not be construed as a finding with respect to mechanical features nor of reliability under service conditions not covered by this part, nor shall type acceptance be construed to mean that the equipment will continue to be satisfactory as the technical standards in this part may be changed to conform with progress in the state of the art.

(f) In the event the Commission finds it necessary to withdraw type acceptance for a particular equipment, because of unauthorized changes by the manufacturer or for other justifiable reasons, steps to be taken by licensees using such equipment will be set out in the order withdrawing type acceptance.

(g) Licensees proposing to modify existing equipment must receive prior authorization from the Commission if the proposed change will adversely affect the test data on file with the Commission and on which type acceptance was based. The licensee may be required to assign a new type number that will identify the modified equipment, install new name plates bearing such new type number and reapply for type acceptance. Authorization is not required by each individual licensee where the change consists of the installation of a modification kit approved by the Commission, which is being furnished by the manufacturer for installation in the field.

(h) Type acceptance is valid only when the transmitter is operated within the power, emission and other limitations as set forth in the Commission's "List of Equipment Acceptable for Licensing," for the particular equipment.

3. *Add new paragraph* (c) *regarding power tolerance to* §§ 10.106, 11.106, 16.106:

(c) The plate input to the final r. f. stage under actual operating conditions shall not exceed by more than 10 percent the plate power input shown in the Radio Equipment List, Part C, for Transmitter included in this list, or the plate power input shown on the authorization for all other transmitters.

4. Amend § 18.16 to read as follows:

§ 18.16 *Withdrawal of certificate of type approval.* (a) A certificate of type approval may be withdrawn if the type of equipment for which it was issued proves defective in service and under usual conditions of maintenance and operation such equipment cannot be relied on to meet the conditions set forth in this part for the operation of the type of equipment involved or if any change whatsoever is made in the construction of equipment sold under the Certificate of Type Approval issued by the Commission, without the specific approval of the Commission.

(b) The procedure for withdrawal of a Certificate of Type Approval shall be the same as that prescribed for withdrawal of a radio station license pursuant to the provisions of the Communications Act of 1934, as amended.

(c) In the case of withdrawal of a Certificate of Type Approval the manufacturer shall make no further sale of equipment under such certificate.

(d) When a Certificate of Type Approval has been withdrawn for unauthorized changes or for failure to comply with technical requirements, the Commission will consider that fact in determining whether the manufacturer in question is eligible to receive any new Certificate of Type Approval.

[F. R. Doc. 53-10321; Filed, Dec. 10, 1953; 8:49 a. m.]

---

## [ 47 CFR Part 4 ]

### TELEVISION AUXILIARY BROADCAST STATIONS

### NOTICE OF FURTHER PROPOSED RULE MAKING

In the matter of amendment of Part 4 of the Commission's rules and regulations governing television auxiliary broadcast stations; Docket No. 10345.

1. Notice is hereby given of further proposed rule making in the above-entitled matter.

2. On November 12, 1952, the Commission adopted a notice of proposed rule making proposing certain changes in the rules governing television auxiliary broadcast stations in order to provide channels for the operation of television pickup, television STL, and television intercity relay stations by licensees of television broadcast stations assigned channels in the UHF television broadcast band. It was proposed to provide a minimum of ten channels in the 1990–2110 Mc and the 6875–7125 Mc bands by reducing the channel widths from 17 to 12 Mc and from 25 to 19 Mc, respectively, in these bands. The notice also proposed to require the use of cross-polarization on adjacent auxiliary channels and added two new sections to the rules to provide for special temporary authorizations and require station identification.

3. Comments were received from the National Association of Radio and Television Broadcasters, Motorola, Inc., American Telephone and Telegraph Company, A. Earl Cullum, Jr., United States Independent Telephone Association, National Broadcasting Company, Inc., WSM, Inc., The Chronicle Publishing Company, American Broadcasting Company, Inc. (now American Broadcasting-Paramount Theatres, Inc.), WBEN, Inc., Raytheon Manufacturing Company, and Federal Telecommunication Laboratories, Inc.

4. The above comments represent a cross-section of the television broadcast industry and were almost unanimous in opposing a reduction in the channel widths at this time. Most such comments were directed toward the instability of present equipment, degradation of the transmitted intelligence with reduced frequency swing due to less favorable signal-to-noise ratios, adjacent channel interference, and impossibility of multiplexing visual and aural signals within the narrower channels. The comments opposing reduction of channel widths appear to have considerable merit and further examination of the proposal to reduce channel widths has been made. It is concluded that such reduction should not be made at this time.

5. It has become increasingly clear in these proceedings that it is undesirable to retain television auxiliary channels on an apportioned basis as is the case in the existing rules. Although such a plan reduces the administrative burden to a minimum it creates wholly undesirable situations with respect to best utilization of the microwave channels. Under such a plan the only two television stations in a particular city might be required to operate their studio-transmitter links on adjacent channels, with the attendant interference problems, while the remaining microwave channels remained unused. Upon reconsideration, and on the basis of the comments received, it now appears more desirable to place the assignment of television auxiliary channels on a case-to-case basis. This will place an additional administrative burden on the Commission but will result in greater flexibility for the broadcast user and will permit better service on their part.

6. In order to do this and maintain present channel widths it appears desirable to make the entire spectrum allocated for television pickup and television STL purposes, available for assignment to television broadcast licensees. In its Report and Order in Docket No. 9363, adopted October 5, 1950, which established the present rules governing television auxiliary broadcast stations the Commission listed only seven of the ten 25 megacycle channels allocated in the 6875–7125 Mc band and thirteen of the twenty 25 megacycle channels allocated in the 12700–13200 Mc band for assignment to television broadcast licensees. In so doing, the Commission stated:

> This plan leaves 3 channels in the 7000 Mc. band and 7 channels in the 12000 Mc. band for the exclusive use of communications common carriers to provide television pickup and STL service to television broadcasters thus meeting the assertion of the communications common carriers that they could best provide a nation-wide service by using a group of channels on an exclusive basis, which would permit freedom in exchanging equipment from city to city to meet the demand for common carrier service where it arises. In addition to the above, 6 additional channels in the 13000 Mc. band are provided for the shared use of television broadcasters and communication common carriers. On the basis of present information, this plan appears to provide a practical and equitable apportionment of channels. If future experience demonstrates that the apportionment adopted herein is not the best one to meet the respective needs of broadcasters and common carriers, the Commission will, of course, consider proposals for amendment of the rules in this respect.

In addition to the above reservation, the Commission's rules provide that where a television broadcast licensee engages a communications common carrier to provide a television pickup or STL service, the channels normally available to that broadcaster under the television auxiliary rules may be assigned to the communications common carrier providing such service to the broadcaster. Raytheon Manufacturing Company, National Association of Radio and Television Broadcasters, and The Chronicle Publishing Company all requested that the present reservation of channels for use by common carriers be deleted. The Commission believes that better channel utilization will be achieved if they are now made available to television broadcasters. The present provision of the television auxiliary rules which will be continued in the proposed rules makes these as well as other television auxiliary channels available to communication common carriers on the same basis as they are available to broadcasters.

7. It is proposed, therefore, to list all channels allocated for television pickup and television STL stations in § 4.602(a) of the rules, channelled on the present basis, i. e., six 17 Mc. and one 18 Mc. channel in the band 1990–2110 Mc.; two 17 Mc. and one 16 Mc. channel in the band 2450–2500 Mc.; ten 25 Mc. channels in the band 6875–7125 Mc.; eight 25 Mc. channels in the band 10,500–10,700 Mc.; and, twenty 25 Mc. channels in the band 12,700–13,200 Mc. The proposed rules will provide for the assignment of two exclusive channels to each television licensee for use in a particular area and will place the remaining unused channels in a "pool" equally available to all licensees in that area. This will permit licensees to select frequencies so as to avoid mutual interference and will eliminate the artificial shortages created by a "paper" reservation of channels which may not be used by the licensee for whom they are reserved. It is anticipated that in some areas real congestion may arise. However, the proposed rules encourage licensees to share a common channel for fixed installations where circumstances are such as to permit interference-free co-channel operation. The original proposal to require a certain plane of polarization for each channel has been discarded in order to permit maximum flexibility on the part of licensees in the elimination of interference and more efficient utilization of available channels. It is further proposed to amend § 4.603 to point out that equipment used for sound transmission in STL stations must have performance capabilities sufficient to permit the overall TV system to meet the requirements of § 3.687 of the rules governing television broadcast stations. An additional amendment to § 4.632 (a) has been added to establish the basis for identifying the "exclusive" channel of a licensee. This proposal also contains a slight change in the originally proposed station identification rule to meet certain practical objections to the original proposal. The modified proposal will not work undue hardship on the licensee and call sign transmission will serve to facilitate investigations of interference reports. Section 4.604 is amended to reflect proposed changes in § 4.602.

8. Authority for the issuance of the proposed amendments is vested in the Commission under sections 303 (a), (b), (c), (d), (e), (f), (g), (r), and 4 (i) of the Communications Act of 1934, as amended.

9. Any interested person who is of the opinion that the proposed amendments should not be adopted, or should not be adopted in the form set forth below, may file with the Commission on or before February 15, 1954, written data, views or arguments concerning said proposals. Persons favoring the amendments as proposed may file written data, views, or arguments supporting said proposals by the same data. Replies to such data, views or arguments may be filed within 10 days from the last day for filing said original comments or briefs. The Commission will consider all such comments before taking final action in the matter, and if comments are submitted which warrant the holding of oral argument, notice of the time and place of such oral argument will be given.

10. This proceeding does not involve any change in frequency allocations set forth in Part 2 of our rules and heretofore made by the Commission. Accordingly, no data, views or arguments will be accepted in this proceeding proposing any such changes in frequency allocations.

11. In accordance with the provisions of § 1.784 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs or comments shall be furnished the Commission.

Adopted: December 2, 1953.

Released: December 7, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Delete the present language of § 4.602 and substitute the following:

§ 4.602 *Frequency assignment.* (a) The following frequencies are allocated for assignment to television pickup, television STL, and television intercity relay stations:

| Band A (Mc) | Band B (Mc) | Band C (Mc) | Band D (Mc) | |
|---|---|---|---|---|
| 1990–2007 | 6875–6900 | 10500–10525 | 12700–12725 | 12950–12975 |
| 2007–2024 | 6900–6925 | 10525–10550 | 12725–12750 | 12975–13000 |
| 2024–2041 | 6925–6950 | 10550–10575 | 12750–12775 | 13000–13025 |
| 2041–2058 | 6950–6975 | 10575–10600 | 12775–12800 | 13025–13050 |
| 2058–2075 | 6975–7000 | 10600–10625 | 12800–12825 | 13050–13075 |
| 2075–2092 | 7000–7025 | 10625–10650 | 12825–12850 | 13075–13100 |
| 2092–2110 | 7025–7050 | 10650–10675 | 12850–12875 | 13100–13125 |
| 2450–2467 | 7050–7075 | 10675–10700 | 12875–12900 | 13125–13150 |
| 2467–2484 | 7075–7100 | | 12900–12925 | 13150–13175 |
| 2484–2500 | 7100–7125 | | 12925–12950 | 13175–13200 |

Frequencies shown above between 2450 and 2500 Mc in Band A and between 10,500 and 10,700 Mc in Band C are allocated to accommodate the incidental radiations of industrial, scientific, and medical (ISM) equipment, and stations operating therein must accept any interference that may be caused by the operation of such equipment. ISM frequencies are also shared with other communication services and exclusive channel assignments will not be made, nor is the channeling shown above necessarily that which will be employed by such other services.

(b) Except as provided in paragraph (a) of this section each television broadcast station licensee in an area may request the assignment of one channel in Band A or Band B and one channel in Band D on an exclusive basis. In making such exclusive assignments, priority will be based on the filing date of an appropriate application (FCC Form 313) completed in accordance with the instructions thereon. Frequency assignments will normally be made as requested if the requested frequency is not assigned to another licensee on an exclusive basis. However, the Commission reserves the right to assign frequencies other than those requested if, in its opinion, such action is warranted.

(c) Where the relative locations of the studio and transmitter are such as to permit co-channel operation of television STL stations by two or more licensees in the same area such licensees may, by mutual agreement, request the assignment of a common channel for STL use on an exclusive basis. In the event that such a shared assignment is made each participating licensee may request the assignment of an individual exclusive channel in Band A, Band B, or Band D in addition to the shared STL channel.

(d) A television broadcast station licensee may request the assignment of not more than two channels in addition to its exclusive channel on a non-exclusive basis for television pickup, television STL, and television intercity relay purposes. Such non-exclusive channel assignments are subject to withdrawal should they be needed to provide an exclusive channel assignment to a licensee pursuant to the provisions of paragraph (b) of this section. Withdrawal of non-exclusive channel assignments will be made in the following order:

(1) The most recent existing assignment of a third channel to a single licensee.

(2) The most recent existing assignment of a second channel to a single licensee which does not utilize its exclusive channel for STL purposes.

(3) The most recent existing assignment of a non-exclusive channel.

(e) The use of frequencies in the bands 1990–2110 Mc., 6875–7125 Mc., and 12,700–13,200 Mc., by television intercity relay stations shall be on a secondary basis and is subject to the condition that no harmful interference is caused to stations operating in accordance with the Table of Frequency allocations in § 2.104 (a) of this chapter.

(f) In the event that a television broadcast station licensee engages a communications common carrier to provide television pickup or television STL service, the channels available to that licensee may be assigned to the communications common carrier for the purpose of providing such service to that licensee.

2. In § 4.603: a. Substitute the following text for the present text of paragraph (a):

§ 4.603 *Sound channels.* (a) The frequencies listed in § 4.602 (a) may be used for the simultaneous transmission of the picture and sound portions of television broadcast programs and for cue and order circuits, either by means of multiplexing or by the use of a separate transmitter within the same channel. When multiplexing of a television STL station is contemplated consideration should be given to the requirements of § 3.687 of this chapter regarding the overall system performance requirements. Applications for new television pickup, television STL, and television intercity relay stations shall clearly indicate the nature of any multiplexing proposed. Multiplexing equipment may be installed on licensed equipment without further authority of the Commission: *Provided*, That the Commission in Washington, D. C., and the Commission's Engineer-in-charge of the Radio District in which the station is located shall be promptly notified of the installation of such apparatus: *And provided further*, That the installation of such apparatus on a television STL station shall not result in degradation of the overall system performance of the television broadcast station below that permitted by § 3.687 of this chapter.

b. Delete footnote 3 and the designator at the end of the first sentence of paragraph (b) and add the following new paragraph (c):

(c) Remote pickup broadcast stations may be used in conjunction with television pickup stations for the transmission of the aural portion of television programs or events that occur outside a television studio and for the transmission of cues, orders, and other related communications necessary thereto. The rules governing remote pickup broadcast stations are contained in Subpart D of this part.

3. Substitute the following for the present text of § 4.604:

§ 4.604 *Frequency selection to avoid interference.* (a) Applicants for new television pickup, television STL, and television inter-city relay stations shall endeavor to select frequency assignments which will be least likely to result in mutual interference with other licensees in the same area. Consideration should be given to the relative locations of receiving points, normal transmission path, and nature of the contemplated operation.

(b) Because of the more or less continuous nature of the operation of television STL stations frequency assignments to such stations will normally be designated as the exclusive channel of the licensee pursuant to § 4.602 (b). The operation of television STL stations on frequencies other than the exclusive channel shall be subject to the condition that no harmful interference is caused to the operation of television pickup stations.

(c) Where two or more licensees are assigned a common channel for television pickup, television STL, or television inter-city relay purposes in the same area and simultaneous operation is contemplated they shall take such steps as may be necessary to avoid mutual interference. If a mutual agreement to this effect cannot be reached the Commission shall be notified and it will take such action as may be necessary, including time-sharing arrangements, to assure an equitable distribution of available facilities.

4. a. Substitute the following text for the present text of § 4.632 (a):

(a) A licensee for a television pickup, television STL, or television inter-city relay station will be issued only to the licensee of a television broadcast station.[4] A separate application is required for each transmitter and the application shall be specific with regard to the frequency requested. The first channel assigned in Band A or Band B to a licensee will be considered to be the exclusive assignment provided in § 4.602 (b). Exclusive channel assignments in Band D will be designated only upon request. A licensee may request a change in its exclusive channel assignment only where there are unassigned channels available. In making such changes the priority set forth in § 4.602 (b) will be observed.

b. Delete present paragraph (e).

5. Add a new § 4.633 as follows:

§ 4.633 *Temporary authorizations.* (a) Special temporary authority may be granted for the operation, as a television auxiliary broadcast station, of equipment licensed to another television broadcast station, or other class of station, or equipment of suitable design not heretofore licensed. Such authority will normally be granted only for special operation of a temporary nature.

(b) A request for special temporary authority for the operation of a television auxiliary broadcast station may be made by informal application, which shall be filed with the Commission at least 10 days prior to the date of the proposed operation: *Provided*, That an application filed within less than 10 days of the proposed operation may be accepted upon a satisfactory showing of the reasons for the delay in submitting the request.

(c) An application for special temporary authority shall set forth full particulars of the purpose for which the request is made, and shall show the type of equipment, power output, emission, and frequency or frequencies proposed to be used, as well as the time, date and location of the proposed operation. In the event that the proposed antenna installation will increase the height of any natural formation, or existing man-made structure, by more than 20 feet, a vertical plan sketch showing the height of the structure proposed to be erected, the height above ground of any existing structure, the elevation of the site above mean sea level, and the geographic coordinates of the proposed site, shall be submitted with the application.

(d) A request for special temporary authority shall specify a channel or channels consistent with the provisions of § 4.602: *Provided*, That in the case of events of widespread interest and importance which cannot be transmitted successfully on these frequencies assigned to other services may be requested upon a showing that operation thereon will not cause interference to established stations: *And provided further*, That in no case will a television auxiliary broadcast operation be authorized on frequencies employed for the safety of life and property.

6. Section 4.637 is amended to read as follows:

§ 4.637 *Emission and bandwidth.* (a) Television auxiliary broadcast stations operating on frequencies above 1500 Mc may be authorized to employ any type of emission suitable for the transmission of the visual and accompanying aural signals. The bandwidth of such emissions shall be limited to the assigned channel.

(b) Television auxiliary broadcast stations operating on frequencies below 1500 Mc may be authorized to employ either frequency modulation or amplitude modulation, or both, depending upon the equipment employed. The emissions of such stations shall be confined to the assigned channel.

7. Section 4.651 is amended to read as follows:

§ 4.651 *Equipment changes.* (a) Commission authority upon appropriate formal application (FCC Form 313) therefor is required for any of the following equipment changes:

(1) A change of the transmitter as a whole (except replacement with an identical transmitter), or a change in the power output.

(2) A change of frequency assignment.

(3) A change in the location of a television STL or television inter-city relay station (except relocation of the equipment within the same building) or a change in the area of operation of a television pickup station.

(4) Any change in the antenna system of a television STL or television inter-city relay station which will result in a change of more than 20 feet in the height above ground of the antenna and supporting structure, or that will result in a change of the direction of the main radiation lobe.

(b) Other equipment changes not specifically referred to in paragraph (a) of this section may be made at the discretion of the licensee provided that the Engineer-in-Charge of the radio district in which the station is located, and the Commission at its Washington office, are notified in writing upon the completion of such changes, and provided that the changes are appropriately reflected in the next application for renewal of license of the television auxiliary broadcast station filed by the licensee.

8. Section 4.662 is amended to read as follows:

§ 4.661 *Frequency tolerance.* (a) The licensee of a television auxiliary broadcast station shall maintain the operating frequency of its station so that the normal sideband energy shall fall within the assigned channel. If transmission is by asymmetrical sideband operation, suitable filters or other devices shall be employed to insure a minimum of radiated energy outside the assigned channel.

(b) Television STL stations operating on frequencies shown in § 4.603 (b) shall maintain their operating frequency within 0.005 percent of the assigned frequency.

9. Add a new § 4.682 as follows:

§ 4.682 *Station identification.* (a) Each television auxiliary broadcast station shall identify itself by transmitting its call sign at the beginning and end of each period of operation; and during operation, shall identify itself on the hour by transmitting its own call sign or the call sign of the television broadcast station with which it is associated.

(b) Identification transmissions during operation need not be made when to make such transmission would interrupt a single consecutive speech, play, religious service, symphony concert, or any type of production. In such cases, the identification transmission shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

(c) Where more than one television auxiliary broadcast station is employed in an integrated relay system, the station at the point of origination may originate the transmission of the call signs of all the stations in the relay system.

(d) The transmission of the call sign shall normally employ the type of emission for which the station is authorized, i. e. a visual transmitter shall employ visual identification and an aural transmitter shall employ aural identification: *Provided, however*, When the transmitter is used for visual transmission only the identifying call sign may be transmitted in international Morse code by keying the radio frequency carrier or a modulating signal impressed on the carrier. The Commission may, at its discretion specify other methods of identification.

[F. R. Doc. 53-10322; Filed, Dec. 10, 1953; 8:49 a. m.]

## DEPARTMENT OF COMMERCE

### Federal Maritime Board

BLACK DIAMOND STEAMSHIP CORP. ET AL

NOTICE OF AGREEMENTS FILED FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, as amended; 39 Stat. 733, 46 U. S. C. section 814.

(1) Agreement No. 7924 between Black Diamond Steamship Corp., and Alcoa Steamship Company, Inc., covers the transportation of cargo under through bills of lading from Holland, Belgium and Germany to Puerto Rico, with transshipment at New York.

(2) Agreement No. 7928, between United States Navigation Company, Inc., and Alcoa Steamship Company, Inc., covers transportation of cargo under through bills of lading from Holland and Belgium to Puerto Rico, with transshipment at New York.

(3) Agreement No. 7929 between N. V. Nederlandsch-Amerikaansche Stoomvaart-Maatschappij (Holland America Line) and Alcoa Steamship Company, Inc., covers the transportation of cargo under through bills of lading from Holland and Belgium to Puerto Rico, with transshipment at New York.

(4) Agreement No. 7936 between Nippon Yusen Kaisha and Alcoa Steamship Company, Inc., covers the transportation of cargo under through bills of lading from Japan and the Philippines to Virgin Islands, with transshipment at New York.

(5) Agreement No. 7937 between Nippon Yusen Kaisha and Alcoa Steamship Company, Inc., covers the transportation of cargo under through bills of lading from Japan and the Philippines to Puerto Rico, with transshipment at New York.

(6) Agreement No. 8220, between American Export Lines, Inc., Isthmian Steamship Company, Israel America Line, Ltd., and M. Dizengoff & Co. (Shipping) 1949, Ltd., provides for the creation of a conference to be known as the North Atlantic Israel Freight Conference, for the establishment and maintenance of just and reasonable rates, charges and practices, for or in connection with the transportation of all cargo, in the trade from U. S. North Atlantic ports, Hampton Roads Maine range, either direct or via transshipment, to all ports in Israel on the Mediterranean.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to any of the agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: December 8, 1953.

By order of the Federal Maritime Board.

[SEAL] A. J. WILLIAMS, *Secretary.*

### Office of the Secretary

[Dept. Order 132, Amended]

LOAN GUARANTEE PROGRAM

ORGANIZATION AND DELEGATION OF AUTHORITY

SECTION 1. *Purpose.* The purpose of this order is to provide organization and delegate authority for performance of the guarantee loan functions of the Department of Commerce as a guaranteeing agency under the provisions of section 301 of the Defense Production Act of 1950, as amended, and Part III of Executive Order 10480 of August 14, 1953.

SEC. 2. *Authority.* (a) Section 301 of the Defense Production Act of 1950, as amended, provides in substance that (i) in order to expedite production and deliveries under Government contracts, the President may authorize certain agencies (including the Department of Commerce) to guarantee any financing institution, public or private, against loss on loans made to finance any contractor or subcontractor, in connection with the performance or termination of any contract deemed by the guaranteeing agency to be necessary to expedite production and deliveries or services under Government contracts for the procurement of materials or the performance of services for the national defense; (ii) any Federal Reserve Bank may act, on behalf of any guaranteeing agency, as fiscal agent of the United States, and be reimbursed by the guaranteeing agency for expenses in acting as agent; (iii) the President may issue regulations and prescribe rates of interest, guarantee and commitment fees, and other charges; and (iv) each guaranteeing agency may use funds allocated or appropriated for such purposes.

(b) Under Executive Order 10480, the President designated the Department of Commerce as one of the guaranteeing agencies. He designated the Federal Reserve Banks as fiscal agents for the guaranteeing agencies, and authorized the Board of Governors of the Federal Reserve System after consultation with the guaranteeing agencies, to prescribe necessary regulations.

SEC. 3. *Delegation of authority.* (a) Authority is hereby delegated to the Assistant Secretary of Commerce for Domestic Affairs, and, as alternate, the Deputy Assistant Secretary of Commerce for Domestic Affairs to exercise the powers and authorities vested in the Secretary of Commerce by section 301 of the Defense Production Act of 1950, as amended, sections 301 and 302 of Executive Order 10480, and regulations which have been or may subsequently be prescribed by the Board of Governors of the Federal Reserve System.

(b) This delegation of authority is made in accordance with the provisions of section 703 of the Defense Production Act of 1950, as amended, section 602 (b) of Executive Order 10480 and Reorganization Plan No. 5 of 1950.

SEC. 4. *Establishing of Loan Guarantee Advisory Board.* (a) There is hereby

established in the Office of the Secretary a Loan Guarantee Advisory Board which shall be composed of the General Counsel of the Department of Commerce (or his designated representative), the Administrator of the Business and Defense Services Administration (or his designated representative), and, in the case of each proposed loan guarantee, the head of the primary organization unit having preponderant interest in the procurement contracts for which the financing is required (or his designated representative). The Administrator of the Business and Defense Services Administration (or his designee) shall represent the small business functions of the Department as well as the other interests of the Business and Defense Services Administration.

(b) It shall be the function of the Loan Guarantee Advisory Board, after review and analysis of the request for a loan guarantee and the procurement of the necessary Certificates of Eligibility and other documents and clearances, to recommend to the Assistant Secretary of Commerce for Domestic Affairs the action to be taken with respect to each proposed loan guarantee.

(c) The General Counsel, or his designated representative, shall serve as Chairman of the Board. The Office of the General Counsel shall provide the Board with such professional and clerical assistance as may be necessary.

(d) A representative of the Board of Governors of the Federal Reserve System may be invited to meet with the Board as deemed desirable by the Board. Likewise, the Board may from time to time obtain the advice of representatives of other branches of the Government and other persons and may invite such representatives and persons to its meetings.

SEC. 5. *Issuance of instructions.* The Assistant Secretary of Commerce for Administration shall issue any orders, instructions, or directives necessary to implement the provisions of this order.

SEC. 6. *Effect on other orders.* This order supersedes Department Order No. 132, dated June 29, 1951 (16 F. R. 6967). Any other orders or parts of orders the provisions of which are inconsistent or in conflict with the provisions of this order are hereby amended or superseded accordingly.

Effective date: November 27, 1953.

SINCLAIR WEEKS,
*Secretary of Commerce.*

## CIVIL AERONAUTICS BOARD

[Docket No. 6432]

NORTH CENTRAL AIRLINES, INC.

NOTICE OF PREHEARING CONFERENCE

In the matter of an investigation instituted by the Board to determine whether the public convenience and necessity require that North Central's amended temporary certificate of public convenience and necessity for route No. 86, be altered, amended, or modified insofar as said certificate authorizes service by North Central over Segment 5 of said route.

Notice is hereby given that a prehearing conference in the above-entitled proceeding is assigned to be held on January 12, 1954, at 10:00 a. m., e. s. t., in Room 5132, Commerce Building, Fourteenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Walter W. Bryan.

Dated at Washington, D. C., December 7, 1953.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

## FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 8809, 10788, 10789, 10790]

ST. LOUIS TELECAST, INC., ET AL.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of St. Louis Telecast, Inc., St. Louis, Missouri, Docket No. 8809, File No. BPCT-294; St. Louis Amusement Company, St. Louis, Missouri, Docket No. 10788, File No. BPCT-745; Columbia Broadcasting System, Inc., St. Louis, Missouri, Docket No. 10789, File No. BPCT-1565; 220 Television, Inc., St. Louis, Missouri, Docket No. 10790, File No. BPCT-1778; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 2d day of December 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 11 in St. Louis, Missouri; and

It appearing, that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; that each of the above-named applicants is legally, financially and technically qualified to construct, own and operate a television broadcast station; but that questions are raised concerning other qualifications of Columbia Broadcasting System, Inc. to construct, own and operate its proposed television broadcast station.

*It is ordered,* That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 31st day of December 1953 in Washington, D. C. upon the following issues:

1. To determine the stock ownership and management interests of Columbia Broadcasting System, Inc., in existing television broadcast stations and in applicants for television broadcast stations.

2. To determine whether, in the light of the evidence adduced at the hearing with respect to issue "1", a grant of the application of Columbia Broadcasting System, Inc. would be consistent with the provisions of § 3.636 of the Commission's rules and with its policies concerning the ownership of interests, minority or majority, by one party in more than five television stations.

3. To determine on a comparative basis which of the operations proposed in the above-entitled applications would best serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences among the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered,* That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

*It is further ordered,* That the action taken in this order is without prejudice to any action which the Commission may take with respect to the "Petition For Reconsideration And Acceptance Of Application For Filing" filed by Broadcast House, Inc., on November 30, 1953.

Released: December 4, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket Nos. 8936, 10795, 10796]

LOYOLA UNIVERSITY ET AL.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Loyola University, New Orleans, Louisiana, Docket No. 8936, File No. BPCT-359; The Times-Picayune Publishing Company, New Orleans, Louisiana, Docket No. 10795, File No. BPCT-648; James A. Noe, Harry Allsman, Raymond F. Hufft, and James A. Noe, Jr., d b as James A. Noe and Company, New Orleans, Louisiana, Docket No. 10796, File No. BPCT-1588; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 2d day of December 1953;

The Commission having under consideration the above-entitled applications each requesting a construction permit for a new television broadcast station to operate on Channel 4 in New Orleans, Louisiana; and

It appearing, that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; that Loyola University and The Times-Picayune Publishing Company are legally, financially and technically qualified to construct, own and operate television broadcast stations; and that James A. Noe and Company is legally and technically qualified to construct, own and operate a television broadcast station; and

It further appearing, that the application of Loyola University proposes an antenna location in the vicinity of the antenna of standard broadcast Station WTPS; that the installation and operation of the television antenna as proposed is possible and feasible without adversely affecting the ability of Station WTPS to operate in accordance with the terms of its license; that appropriate proof thereof should be submitted after installation and operation of the said proposed antenna; and that a grant, if made, of the application should be subject to a condition in this respect as follows:

The construction authorized is subject to the condition that such shall not adversely affect the ability of standard broadcast Station WTPS to operate in accordance with the terms of its license, particularly with respect to its antenna system, and that sufficient field intensity measurements of Station WTPS shall be made before and after such construction to prove that no material effect thereon has resulted.

*It is ordered,* That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 31st day of December 1953 in Washington, D. C., upon the following issues:

1. To determine whether James A. Noe and Company is financially qualified to construct, own and operate the proposed television broadcast station.

2. To determine on a comparative basis which of the operations proposed in the above-entitled applications would best serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences among the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered,* That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 8, 1953.

[Docket Nos. 8954, 9015, 10793, 10794]

WISCONSIN BROADCASTING SYSTEM, INC., ET AL.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Wisconsin Broadcasting System, Inc., Milwaukee, Wisconsin, Docket No. 8954, File No. BPCT-377; Milwaukee Broadcasting Company, Milwaukee, Wisconsin, Docket No. 9015, File No. BPCT-472; Milwaukee Area Telecasting Corporation, Milwaukee, Wisconsin, Docket No. 10793, File No. BPCT-1578; Kolero Telecasting Corporation, Milwaukee, Wisconsin, Docket No. 10794, File No. BPCT-1796; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 2d day of December 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 12 in Milwaukee, Wisconsin; and

It appearing, that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; that Milwaukee Broadcasting Company and Milwaukee Area Telecasting Corporation are legally, financially and technically qualified to construct, own and operate a television broadcast station; and that Wisconsin Broadcasting System, Inc., and Kolero Telecasting Corporation are legally and financially qualified to construct, own and operate a television broadcast station and are technically so qualified except as to the matter referred to in issue "1" below;

*It is ordered,* That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 31st day of December 1953 in Washington, D. C., upon the following issues:

1. To determine whether the installation of either of the stations proposed by Wisconsin Broadcasting System, Inc., and Kolero Telecasting Corporation in their above-entitled applications would constitute a hazard to air navigation.

2. To determine on a comparative basis which of the operations proposed in the above-entitled applications would best serve the public interest, convenience or necessity in the light of the record made with respect to the significant differences among the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered,* That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issues: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

[Docket Nos. 10285, 10352, 10779]

PORT ARTHUR COLLEGE ET AL.

MEMORANDUM OPINION AND ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUE

In re applications of Port Arthur College, Port Arthur, Texas, Docket No. 10285, File No. BPCT–839; Joe B. Carrigan, trustee and James K. Smith, a partnership, d/b as Smith Radio Company, Port Arthur, Texas, Docket No. 10352, File No. BPCT–1013; Jefferson Amusement Company, Port Arthur, Texas, Docket No. 10779, File No. BPCT–1440; for construction permits for new television broadcast stations.

1 The Commission has before it for consideration (a) a "Petition for Rehearing and Other Relief", filed by Jefferson Amusement Company (hereinafter called Jefferson) on May 22, 1953, of the Commission's Memorandum Opinion and Order (FCC 53–450, adopted April 22, 1953); (b) "Reply to 'Petition for Rehearing and Other Relief'" filed by Port Arthur College on June 8, 1953; (c) "Opposition to 'Petition for Rehearing and Other Relief'" filed by Joe B. Carrigan, Trustee, and James K. Smith, a partnership d/b as Smith Radio Company on June 8, 1953,[1] and (d) a "Reply to Opposition To Petition for Rehearing" filed by Jefferson Amusement Company on June 16, 1953.

2. The detailed and comprehensive factual situation involved in the matter before us is set forth in our Memorandum Opinion and Order of April 22, 1953 (9 Pike & Fischer RR 219). In brief, we found there that the motion of the Lufkin Amusement Company for dismissal of its application to construct a television station on Channel 4 assigned to the Beaumont-Port Arthur, Texas, area was granted insofar as it requested dismissal but was denied insofar as it requested that such dismissal be without prejudice; that through stock ownership and certain directorships common to all three corporations, Lufkin controlled East Texas Theatres, Inc., which, in turn, controlled Jefferson Amusement Company; that the application of Jefferson Amusement Company for the same channel in the same area was one filed on "behalf of or for the benefit of" Lufkin Amusement Company; and that, under the provisions of § 1.363 (a) of the Commission's rules,[2] the Jefferson application should be dismissed. Our conclusions, in this connection, are set forth in paragraph "9" of the above Memorandum Opinion and Order wherein we stated:

9. There remains for our consideration the determination of whether Jefferson's application, with relation to the dismissed Lufkin application, is one filed by the "same applicant, or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest." In reaching this determination, we cannot confine our considerations to the Lufkin and Jefferson Corporations only for there are present facts which involve a third corporation, East Texas Theatres, Inc. We have set forth in paragraph "3" above, that E. L. Kurth, Sr., J. H. Kurth, Jr. and Simon W. Henderson, Jr., are directors common to the three corporations; that E. L. Kurth and S. W. Henderson, Jr. are officers and directors of both Lufkin and East Texas; that the board of directors of East Texas Theatres, Inc. is composed of six persons as is the board of directors of Jefferson; that M. L. Wertheim, Secretary of Jefferson, signed the Lufkin application as Assistant Secretary of that corporation; that Robert H. Park, a director and shareholder of Jefferson, was proposed as station manager in the Lufkin application and now is proposed as general manager in the proposed Jefferson station; and that the narrative statements as to policy on public issues and program plans and policies are identical. By virtue of the fact that Lufkin has negative control of East Texas through its 50 percent stock ownership and 50 percent representation on East Texas' board of six directors, it is apparent that Lufkin is in the position of being able to veto any proposed action of East Texas which is inconsistent with the objectives of Lufkin. This veto power extends not only to actions requiring a stockholders' vote, but also to the day-to-day operations of East Texas based on policies adopted by the board of directors. This negative control possessed by Lufkin does not terminate with the East Texas Corporation but it pervades Jefferson as well. Since East Texas Theatres, Inc., owns 50 percent of the issued and outstanding stock of Jefferson, the policies and interests of Lufkin are capable of being advanced and carried into fruition in Jefferson through the exercise of Lufkin's negative control of East Texas. The presence of E. L. Kurth, Sr., J. H. Kurth, Jr. and Simon W. Henderson, Jr., on Jefferson's board of directors further assures Lufkin that its interests in East Texas and its expressions of policy emanating from East Texas will be vigorously protected and advanced at the meetings of Jefferson's board of directors.

3. In its respective pleadings herein, Jefferson alleges, in substance, that the facts and rules which the Commission should consider in making its determination herein should be based on the application as filed by Jefferson on November 24, 1952, and not as of December 12, 1952, the date it amended its application,[1] citing In re Tampa Television Company, 8 Pike & Fischer RR 395; that on December 5, 1952, the date Lufkin petitioned to dismiss its application, "Lufkin had no controlling interest in Jefferson, either affirmative or negative, directly or indirectly"; that between November 24, 1952, and December 16, 1952 (the date the Lufkin application was dismissed) the Commission did not "notify either Lufkin or Jefferson that their respective applications were inconsistent, conflicting, multifarious, or repetitious, so as to put the parties on notice for the purpose of correcting any deficiency or defect, or of electing which application was desired to be prosecuted"; that failure to take such action was the "best evidence" that the Jefferson application was not in violation of § 1.363 (a) after Lufkin's dismissal because the Lufkin application, "having neither received a hearing on the merits of its application nor been in default, the Rule is patently not applicable"; that Lufkin and Jefferson did not apply for the same facilities; that by failing to include Jefferson as a party to the hearing designated on December 1, 1952, the Commission failed to comply with section 309 (b) of the Communications Act; that the interest of Lufkin in East Texas is only a beneficial one; that 50 percent of East Texas stock is owned by E. L. Kurth, J. H. Kurth, Jr., and S. W. Henderson; that Jefferson has a management contract with East Texas covering all of its theatres "now owned or hereafter acquired by East Texas"; that the Gordon interests own 66⅔ percent of the "beneficial or liquidating" interest in Jefferson; that it is "peculiarly unrealistic for the Commission to infer 'working control' of Jefferson by Lufkin, arising solely out of the beneficial ownership of 50 percent of East Texas stock by individuals who are also Lufkin stockholders, and nothing more"; that the "status quo or incumbency of Mr. Gordon as President of the two companies, and of one-half of the board of directors of each of the two companies, representing the Gordon interest or family group, is of prime importance, because in effect it gives to this group positive management control of both corporations"; that "granting the validity of the concept of 'negative control', insofar as it implies a theoretical power of veto on the part of East Texas, and indirectly therefore, Lufkin, in the affairs of Jefferson, the concept is one of legal presumption, and is not per se conclusive of the interpretation advanced by the Commission"; and that the Commission should reconsider its action insofar as it purports to find that the Jefferson application was filed on behalf of or for the benefit of Lufkin. Alternatively, and in addition, petitioner requests that the Commission (a) waive the provisions of § 1.363 (a) and reinstate its application; (b) grant a hearing on the issues raised by its Memorandum Opinion and Order; (c) grant oral argument; and (d) rescind its hearing orders, continue said hearing and consolidate the Jefferson application with that of the other two pending applications for the same channel.

4. In their oppositions to the petition herein, Smith Radio Company and Port Arthur College allege, in substance, that the Tampa Television case was not concerned with § 1.363 (a) but with § 1.364 "prohibiting the contemporaneous processing of inconsistent or multiple applications"; that "we are not concerned here with the ownership of Jefferson at the time Lufkin dismissed, but with its ownership at the time the Commission dismissed Jefferson"; that Lufkin was dismissed after it had been designated for hearing, after it had participated in oral argument on its motion to dismiss, and after it had defaulted in its showing of good cause justifying a dismissal without prejudice; that the facts in the instant case justify the conclusion that the application of Jefferson is for and on behalf of the Lufkin group; that no justification has been shown for a waiver of § 1.363 (a); that such request is untimely and a grant thereof would be prejudicial; that the Jefferson application should not have been accepted and such error should not be repeated; that since, as alleged by Jefferson, "in 1948, and up to November, 1952, Jefferson was 50 percent owned by United Paramount Theatres, which would not acquiesce in the filing of a Jefferson application", it is quite possible "that Lufkin may have been used as the 'stalking horse' for the Gordon-Lufkin desires to get into television"; that with Jefferson operating from the transmitter site proposed by Lufkin, service of the same kind to the same area will result; that the Lufkin application states unequivocally that it owns 50 percent of East Texas and that petitioner now attempts to "condition, contradict or somehow qualify these unequivocal statements"; and that the petition for rehearing and for other relief should be denied in toto.

5. Jefferson urges that in the light of our decision in In re Tampa Television Company, 8 Pike & Fischer RR 393, where we held that, under the facts of that case, the date of the Motions Commissioner's action with relation to a motion to dismiss an application is taken to be effective as of the time of the filing of the motion to dismiss, the Jefferson application is not repetitious with the dismissed Lufkin Amusement Company application. It urges this by the following reasoning: Lufkin petitioned to dismiss its application without prejudice on December 5, 1952; the Motions Commissioner dismissed its application with prejudice on December 16, 1952; in the meantime, Jefferson, on December 12, 1952, amended its application to reflect that, by the deletion of United Paramount Theatres, Inc., as a stockholder, East Texas Theatres, Inc. increased its interest in Jefferson's voting stock to 50 percent; therefore, dating the effectiveness of the Motions Commissioner's action back to the date of filing of Lufkin's petition to dismiss its application without prejudice, it is apparent that as of December 5, 1952, the Lufkin and Jefferson applications did not have that identity of interest which would bring Jefferson within the intent of § 1.363 (a). We do not believe that our decision in the Tampa Television Company case, supra, is controlling here. There, we were concerned with the question of multiple application by the same applicant and not with the question of whether an application was filed on "behalf of or for the benefit of the original parties in interest" where the original parties had been dismissed with prejudice. In arguing that the Jefferson and Lufkin applications, insofar as determining whether they are the same application for the purposes of § 1.363 (a), must be considered as they were constituted on December 5, 1952, Jefferson overlooks the essential purpose of § 1.363 (a). That rule, as it pertains to an application which has been dismissed with prejudice, does not restrict itself to a consideration of two applications as they may exist on the date of a dismissal with prejudice. The rule expressly provides that where an application is dismissed with prejudice, after hearing or default, the Commission will not consider a like application involving service of the same kind to the same area by the same applicant, or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of twelve months from the effective date of the Commission's order.

6. Upon the facts which were before us for our consideration in our Memorandum Opinion and Order of April 22, 1953, we were compelled to reach the conclusion that the Jefferson application was filed on behalf or for the benefit of Lufkin Amusement Company, with the consequent result that under § 1.363 (a) Jefferson's application was not entitled to remain before us for consideration. In the instant petition for rehearing, Jefferson presents additional facts with respect to the relationship between Lufkin Amusement Company, East Texas Theatres, Inc., and Jefferson Amusement Company and additional legal arguments with respect to the applicability of § 1.363 (a) which were not previously presented in this cause. Without attempting to assess the probative value of the evidence brought forward by Jefferson, we believe that the additional facts and arguments submitted by Jefferson raise questions as to the applicability of § 1.363 (a) to the case before us sufficient to warrant a hearing thereon. The hearing record on this issue will permit a determination as to whether or not, in fact, comparative consideration of Jefferson's application by the Commission would be consistent with the provisions of § 1.363 (a) of the Commission's rules.

7. In view of the foregoing: *It is ordered*, That our order of April 22, 1953 (FCC 53–450) is rescinded; and that the above-entitled application of Jefferson Amusement Company is designated for hearing to commence at 10:00 a. m. on the 16th day of December 1953, in Washington, D. C., upon the following issue: To determine whether the application of Jefferson Amusement Company should be dismissed pursuant to the provisions of § 1.363 (a) of the Commission's rules, in light of the filing and dismissal of the application of Lufkin Amusement Company (BPCT–545).

*It is further ordered*, That Port Arthur College, and Joe B. Carrigan, Trustee and James K. Smith, a partnership d/b as Smith Radio Company are hereby made parties to the above hearing.

Adopted: December 2, 1953.

Released: December 4, 1953.

FEDERAL COMMUNICATIONS COMMISSION,[1]

[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53–10337; Filed, Dec. 10, 1953; 8:52 a. m.]

[1] On May 29, 1953, Smith Radio Company and Port Arthur College filed a joint request for extension of time to reply to Jefferson's petition for reconsideration to June 8, 1953. By letter of June 4, 1953, Smith Radio Company, Port Arthur College and Jefferson were advised that the time to reply had been extended to June 8, 1953.

[2] Section 1.363 (a) provides in pertinent part as follows: "Where an applicant has been afforded an opportunity to be heard with respect to a particular application for new station * * * and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider a like application involving service of the same kind to the same area by the same applicant, or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of twelve months from the effective date of the Commission's order. The Commission may, for good cause shown, waive the requirements of this section."

[1] When the Jefferson application was filed on November 24, 1952, East Texas Theatres, Inc. had a 25 percent interest in Jefferson and United Paramount Theatres, Inc. then had a 50 percent interest in Jefferson. The Jefferson amendment to its application, filed December 12, 1952, stated that it (Jefferson) had purchased and would hold as Treasury Stock the 50 percent interest of United Paramount Theatres, Inc. With this action, the East Texas Theatres' interest in Jefferson voting stock increased from 25 percent to 50 percent, and the stock purchased by Jefferson and to be held in its Treasury became a nonvoting stock.

[Docket No. 10505]

DONZE ENTERPRISES, INC. (KSGM)

ORDER CONTINUING HEARING

In re application of Donze Enterprises, Inc. (KSGM), Ste. Genevieve, Missouri, Docket No. 10505, File No. BP–8488; for construction permit.

The Commission having under consideration a joint petition filed December 3, 1953, by Midland Broadcasting Company and Donze Enterprises, Inc., respondent and applicant, respectively, in the above-entitled proceeding, requesting that the hearing presently scheduled for December 7, 1953, be continued to January 5, 1954; and

It appearing, that several informal conferences between counsel have developed a favorable atmosphere for negotiating a settlement of, at least, some of the differences between the parties, but that the details cannot be worked out without consideration of data which the engineers for the parties have been unable to prepare because of their workload; that the engineers have been requested to prepare and present such data and it is believed this will be done within the next two weeks; and that, it is now difficult to determine what exhibits may be accepted without formal proof, particularly in view of the fact that there has been considerable discussion and a generally accepted feeling that most of the engineering exhibits can be agreed upon before the hearing starts, if they are available for full examination by the opposing party prior to the commencement of the hearing; and

It further appearing, that counsel for the Broadcast Bureau of the Commission has consented to a waiver of the requirements of § 1.745 of the Commission's rules and regulations and agreed to an immediate consideration and grant of the petition for continuance;

*It is ordered*, This 4th day of December 1953, that the petition be and it is hereby granted; and the hearing presently scheduled to commence on December 7, 1953, is continued to January 5, 1954.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] WM. P. MASSING,
*Acting Secretary.*

[1] Commissioners Hyde, Chairman and Lee dissented in opinion.

[Docket No. 10587]

GREEN BAY BROADCASTING CO. (WMAW)

ORDER CONTINUING HEARING WITHOUT DATE

In re application of Green Bay Broadcasting Company (WMAW), Menominee, Michigan, Docket No. 10587, File No. BMP-6064; for modification of construction permit.

Whereas, by order of the Commission granted September 24, 1953, hearing on the application herein was set for December 14, 1953; and

Whereas the applicant above-named has on November 4, 1953, filed its Petition for Reconsideration and Grant Without Hearing, which petition is now pending, and the effect of favorable action thereon by the Commission would be to render the hearing on said application unnecessary.

*It is ordered*, This 7th day of December 1953, that the hearing conference on the application of Green Bay Broadcasting Company, pursuant to § 1.841, heretofore scheduled for December 14, 1953, be continued without date.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket Nos. 10791, 10792]

MANSFIELD JOURNAL CO. AND FERGUM THEATRES, INC.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Mansfield Journal Company, Mansfield, Ohio, Docket No. 10791, File No. BPCT-1178; Fergum Theatres, Inc., Mansfield, Ohio, Docket No. 10792, File No. BPCT-1179; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 2d day of December 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 36 in Mansfield, Ohio; and

It appearing, that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; that Mansfield Journal Company is legally, financially and technically qualified to construct, own and operate a television broadcast station except as to the matters referred to in issues "1", "2", and "3" below; and that Fergum Theatres, Inc., is legally, financially and technically qualified to construct, own and operate a television broadcast station except as to the matters referred to in issues "3" and "4" below;

*It is ordered*, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 31st day of December 1953 in Washington, D. C. upon the following issues:

1. To determine whether Mansfield Journal Company is qualified to be the licensee of a television broadcast station, in the light of its past activities in violation of Federal antitrust laws and those of its officers, directors and stockholders.

2. To determine the transmitter output and effective radiated power, as affected by diplexer loss, of the operation proposed by Mansfield Journal Company, with particular reference to the ratio of aural to visual effective radiated power required by § 3.682 (a) (15) of the Commission's rules.

3. To determine whether the installation of either of the stations proposed in the above-entitled applications would constitute a hazard to air navigation.

4. To determine whether good cause exists for the location of the proposed main studio of Fergum Theatres, Inc., outside the principal community to be served; whether such location would be consistent with the operation of the station proposed by Fergum Theatres, Inc., in the public interest; and whether the provisions of § 3.613 (a) of the Commission's rules should be waived.

5. To determine on a comparative basis which of the operations proposed in the above-entitled applications would better serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences between the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 7, 1953.

[Project No. 2144]

CITY OF SEATTLE

NOTICE OF APPLICATION FOR PRELIMINARY PERMIT

DECEMBER 7, 1953.

Public notice is hereby given that The City of Seattle, Washington, has filed application under the Federal Power Act (16 U. S. C. 791a–825r) for preliminary permit for proposed Project No. 2144 to be located on the Pend Oreille River in Pend Oreille County, Washington, affecting public lands and lands of the United States within Kaniksu National Forest. The proposed project would consist of a concrete dam about 300 to 350 feet high with crest length of about 500 feet located about one mile from the International Boundary forming a reservoir having a water surface elevation of 1,990 feet above mean sea level; a power plant operating under a gross head of about 270 feet located immediately downstream from the dam with provisions for an installed capacity of about 570,000 kilowatts; and transmission facilities consisting initially of two 230-kilovolt circuits connecting to the grid system of the Bonneville Power Administration in the area of Spokane, Washington. The power to be produced or displaced by the proposed project would be used by The City of Seattle to supply customers in its service area. The preliminary permit, if issued, shall be for the sole purpose of maintaining priority of application for license under the terms of the Federal Power Act for the proposed project.

Protests of petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10) on or before January 14, 1954. The application is on file with the Commission for public inspection.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 7-1578]

ROCKWELL SPRING AND AXLE CO.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 4th day of December A. D. 1953.

The Los Angeles Stock Exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application for unlisted trading privileges in the Common Stock, $5 Par Value, of Rockwell Spring and Axle Company, a security listed and registered on the New York Stock Exchange, on the Pittsburgh Stock Exchange, and on the Midwest Stock Exchange.

Rule X-12F-1 provides that the applicant shall furnish a copy of the application to the issuer and to every exchange on which the security is listed or already admitted to unlisted trading privileges. The application is available for public inspection at the Commission's principal office in Washington, D. C.

Notice is hereby given that, upon request of any interested person received prior to January 5, 1954, the Commission will set this matter down for hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to this matter.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[File Nos. 54-171, 59-92]

NORTH AMERICAN CO. AND NORTH AMERICAN UTILITY SECURITIES CORP.

MEMORANDUM OPINION AND ORDER APPROVING APPLICATION AND RELEASING JURISDICTION

DECEMBER 4, 1953.

In the matter of the North American Company, File No. 54-171; North American Utility Securities Corporation, the North American Company, File No. 59-92.

We have before us the fees and expenses to be allowed in connection with a plan, as amended, filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act"), by the North American Company ("North American"), a registered holding company, providing for the liquidation and dissolution of its investment company subsidiary, North American Utility Securities Corporation ("NAUSCORP"). The plan was designed to effect partial

compliance with the provisions of section 11 (b) of the act and our Order of April 14, 1942, in that upon completion of the liquidation and dissolution North American was committed to the prompt disposition of the security holdings thus received.

The original plan was filed on June 21, 1948, and provided that North American would receive all the assets, subject to the current liabilities of NA US CORP, by reason of its holdings of all of the $7 cumulative preferred stock, of which there were 60,000 shares outstanding and that the common stock, of which 90,397 shares were held by the public and 376,151 shares were held by North American, would receive nothing. Hearings were held with respect to this plan and with respect to the issues raised by the Commission in its order instituting proceedings against NA US CORP under section 11 (b) (2) of the act.[1] On August 16, 1950, the staff of the Division of Corporate Regulation filed its recommended findings and opinion in which it recommended that the plan not be approved by the Commission. The Protective Committee for the Public Holders of Common Stock concurred in the staff's recommendation and exceptions thereto were filed by the companies.[2]

The matter was thereafter submitted to us for decision. Before a resolution of the issues was reached, North American filed an Amended Plan providing that the holders of the publicly held common stock should receive $9 a share in full satisfaction of all rights in respect thereof. The Commission's findings, opinion and order approving the amended plan were issued on July 23, 1952,[3] and was ordered enforced by the District Court on September 16, 1952.[4] North American also opposed the request by the Protective Committee for the Public Holders of Common Stock for a list of stockholders of NA US CORP to enable the committee to solicit the public common stockholders.[5] A suit for an injunction against the committee was filed in District Court. This action was dismissed in December 1948[6] and this decision was affirmed by the Court of Appeals in June 1949.[7]

The order of July 23, 1952, approving the amended plan contained a condition to the effect that North American and NAUSCORP should pay only such fees and expenses in connection with the amended plan and the proceedings relating thereto as the Commission may approve on appropriate application made to it. Subsequently, we notified the interested persons that applications for approval of fees and expenses should be filed and the companies were requested to supply information regarding certain fees and expenses paid or proposed to be paid for services in connection with these proceedings.

The following table shows the amounts of fees and expenses for which applications have been filed:

| Applicant | Amount requested | |
|---|---|---|
| | Fees | Expenses |
| Sullivan & Cromwell, counsel to companies | $100,000 | $753.20 |
| Irving Steinman, counsel to protective committee for public holders of common stock of NAUSCORP | 60,000 | 1,557.08 |
| Samuel I. Posen, chairman of committee | 6,500 | 910.97 |
| Maurice K. Kraft, member of committee and financial expert | 13,500 | 502.72 |
| The Ad Press, Ltd., & printing | ..... | 6,854.00 |
| Total | 180,000 | 10,637.97 |

The Commission having examined the statements and affidavits submitted in support of such requests and having examined the record and the requested fees and expenses in the light of the standards of the act, and having concluded that the requested fees and expenses in the amounts set forth herein are reasonable and for necessary services:

*It is ordered*, That the foregoing applications for allowances and reimbursement of expenses are approved and that the reservation of jurisdiction in this matter with respect to said fees and expenses, be, and the same hereby is, released.

By the Comission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[F. R. Doc. 53-10329; Filed, Dec. 10, 1953; 8:51 a. m.]

[File No. 54-211]

CENTRAL PUBLIC UTILITY CORP.

ORDER APPROVING PLAN

DECEMBER 4, 1953.

Central Public Utility Corporation ("Cenpuc"), a registered holding company, having filed an application with this Commission for approval of a plan under section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") for compliance with section 11 (b) thereof; and

Said plan providing, among other things, for the distribution by Cenpuc to its stockholders, on a pro rata basis, of the reclassified stock of its public-utility subsidiary, Central Indiana Gas Company ("Central Indiana") and the liquidation and dissolution of its non-utility subsidiary, Central Natural Gas Corporation ("Central Natural"); and

Public hearings having been duly held after appropriate notice with respect to said plan at which hearings all interested persons were afforded an opportunity to be heard; and

Cenpuc having requested that the Commission's order approving said plan contain recitals and findings in accordance with the requirements of the Internal Revenue Code, as amended, including Supplement R and section 1808 (f) thereof; and

The Commission having considered the entire record in this matter and having this day filed its findings and opinion herein finding that said plan is necessary to effectuate the provisions of section 11 (b) of the act and is fair and equitable to the persons affected thereby:

*It is ordered*, On the basis of the record herein and said findings and opinion, pursuant to section 11 (e) and other applicable provisions of the act, that said plan be, and the same hereby is, approved, forthwith, subject to the terms and conditions contained in Rule U-24 promulgated under the act and to the following additional terms and conditions:

1. That only such fees and expenses, and no more, in connection with said plan and the proceedings incident thereto shall be paid as the Commission may approve on appropriate application made to it and, with the exception of fees and expenses to be paid Stone & Webster Service Corporation and Baltimore National Bank ("Baltimore") for services to be rendered as transfer agents under the plan, jurisdiction hereby is specifically reserved with respect to the reasonableness, appropriate allocation, and payment by Cenpus and its subsidiaries of all fees and expenses and all other remuneration incurred or to be incurred in connection with said plan, the transactions incident thereto, and the proceedings thereon and related thereto; and

2. That jurisdiction be, and it hereby is, specifically reserved with respect to the following:

a. All aspects of the procedure with respect to the selection of the reconstituted Board of Directors of Central Indiana and the composition thereof; and

b. The entertaining of such further proceedings, entering of such further orders and the taking of such further action as may be deemed to be necessary or appropriate in connection with the plan, the transactions incident thereto, and the consummation thereof and as may be deemed to be necessary or appropriate to effectuate the requirements of section 11 (b) of the act.

*It is further ordered and recited*, Pursuant to section 11 (e) and other applicable sections of the act and the rules and regulations promulgated thereunder, that the transactions itemized below proposed in said plan and involved in the consummation thereof, are approved and found to be necessary or appropriate to effectuate the provisions of section 11 (b) of the act, and necessary or appropriate to the integration or simplification of the holding company system of which Cenpuc, Central Indiana and Central Natural are members:

(1) The amendment of Central Indiana's Certificate of Incorporation as proposed in section I of said plan and the effectuation thereby and in connection therewith of the following:

(a) The increase and change of Central Indiana's authorized common stock from 500,000 shares, having a par value of $10 each, to 1,100,000 shares having a par value of $5 each ("Central Indiana's new common stock") and the giving of (i) cumulative voting rights, and (ii) preemptive rights, both as described in (4) and (5) of sub-section B of section I of said plan, to the holders of the shares of Central Indiana's new common stock.

(b) The increase and change of the outstanding shares of Central Indiana's common stock from 400,000 shares, having a par value of $10 each, to 1,000,100 shares, having a par value of $5 each.

(c) The increase of the capital of Central Indiana from $4,000,000 to $5,000,500 by the transfer of $1,000,500 from Central Indiana's earned surplus account to its capital stock account.

(2) The assignment by Cenpuc, as the owner thereof, and the transfer at the time and in the manner proposed in section II of said plan of all of the 1,000,100 shares of Central Indiana's new common stock on a share for share basis to the holders of record (including Baltimore) of the shares of Cenpuc's capital stock at the close of business on a date subsequently to be fixed as the record date by resolution of Cenpuc's Board of Directors, and, as a result thereof, the acquisition by such holders of record of the shares of Central Indiana's new common stock so assigned and transferred.

(3) The acceptance by Baltimore, for the account of those persons identified in section III of said plan, of the shares of Central Indiana's new common stock transferred under section II of said plan to Baltimore as the holder of record of distributable shares of Cenpuc's capital stock (shares distributable by Baltimore under Cenpuc's amended plan, approved by order of this Commission, dated June 13, 1952), and the assignment by Baltimore and the transfer to, and the acquisition by such persons of said shares of Central Indiana's new common stock at the times, to the extent, and subject to the conditions specified in section III of the plan.

(4) The payment to and the receipt by Baltimore for the account of those persons identified in section III of said plan, of any and all dividends paid by Central Indiana to Baltimore on the aforesaid shares of Central Indiana's new common stock, and the payment by Baltimore of such dividends to the persons entitled thereto at the time, to the extent, and subject to the conditions specified in section III of said plan.

(5) The surrender by Baltimore to Central Indiana for extinguishment at the time specified and otherwise as provided in subsection C of section III of said plan, and the acceptance by Central Indiana of the surrender for that purpose, of all of the aforesaid shares of Central Indiana's new common stock not theretofore transferred or then transferable under said section III, and concurrently therewith the payment by Baltimore to, and the acceptance by Central Indiana, free and clear for its own use, of all moneys representing dividends theretofore paid by Central Indiana on the surrendered shares.

(6) The dissolution and liquidation of Central Natural, as proposed in section V of said plan, and as a result of and at the time of such liquidation, the transfer to and the acquisition by Cenpuc of all of the then assets of Central Natural.

*It is further ordered*, That jurisdiction be, and hereby is, reserved to enter such other or further orders conforming to the requirements of Supplement R of Chapter 1 and section 1808 (f) of Chapter 11 of the Internal Revenue Code, as amended, as may be necessary or appropriate.

By the Commission.

MEMORANDUM OPINION AND ORDER RELEASING AND RESERVING CERTAIN JURISDICTIONS

DECEMBER 4, 1953.

In the matter of the North American Company and its subsidiary companies, File No. 59-10; the North American Company, File Nos. 54-82, 59-95; the North American Company, Union Electric Company of Missouri, File No. 54-205; North American Light & Power Company Holding Company System and the North American Company, File No. 59-39; North American Light & Power Company, File No. 54-50; the North American Company, Union Electric Company of Missouri, West Kentucky Coal Company, File No. 54-176.

We have before us the fees and expenses to be allowed in connection with various plans filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") by the North American Company ("North American"), a registered holding company, Union Electric Company of Missouri ("Union Electric"), a public utility company and also a registered holding company, West Kentucky Coal Company ("West Kentucky"), a former non-utility subsidiary of North American and North American Light & Power Company ("Light & Power"), a registered holding company, now in process of liquidation. All of these proceedings were proposed and filed as a result of an order of this Commission dated December 30, 1941, directing the liquidation of Light & Power under section 11 (b) (2) of the act,[1] and of an order dated April 14, 1942, which, with certain minor exceptions not here pertinent, required that to comply with the provision of section 11 (b) (1) of the act, North American must dispose of all of its interests in its utility and non-utility holdings, other than those comprising the Union Electric system.[2]

On August 4, 1943, North American filed its so called "Regional Plan" under section 11 (e) of the act for the stated purpose of effecting compliance with the provisions of section 11 (b) of the act.

No decision was ever rendered by the Commission with respect to the 1943 plan and on April 18, 1946, this plan was withdrawn and a new plan was filed which proposed to effectuate compliance with section 11 (b) of the act by the payment of North American's bank loans and the distribution of certain of its security holdings to its stockholders under a warrant, the creation of an investment company, the withdrawal of certain claims asserted by Illinois Power Company, a former subsidiary of Light & Power, against Light & Power and North American and the integration of Illinois Power Company with Union Electric, evidence on which was taken in proceedings relating to a section 11 (e) plan filed by Light & Power providing for its liquidation and dissolution. Hearings were held and briefs filed with respect to this plan, but before a decision could be reached, a new plan was filed, which in addition to modifying certain provisions of the 1946 plan to which objections were raised, also embodied the settlement of the intercompany claims and provided for the liquidation and dissolution of Light & Power. The claims settlement was approved by this Commission[3] and enforced by the District Court in May 1947.[4] After a further amendment, the plan of liquidation for Light & Power was also approved by this Commission[5] and enforced by the District Court.[6] An appeal was taken by certain common stockholders of Light & Power with respect to certain phases of the Light & Power plan which was not finally resolved until 1950, but in the meantime distributions and sales of Light & Power's portfolio holdings were effected and the claims of the holders of the publicly held preferred and common stocks of Light & Power were satisfied.

In the years 1947, 1948, and 1949 North American, after appropriate approvals by this Commission, sold and distributed major investments in its principal subsidiaries in accordance with the provisions of the 1947 plan relating to compliance with section 11 (b) of the act, including a section 11 (e) plan providing for the transfer of a portion of the properties of West Kentucky to Union Electric as a capital contribution by North American and the distribution of its holdings of West Kentucky stock by North American to its stockholders.

[5] The North American Company and its Subsidiary Companies 26 S. E. C. 169 (1947).

[6] In re Illinois Power Co. 74 F. Supp. 317 (D. Del. 1947).

By order dated October 31, 1952, we approved a plan under section 11 (e) of the act filed on April 18, 1952, by North American and joined in, to the extent necessary, by Union Electric providing primarily for the liquidation and dissolution of North American, subject to certain terms and conditions, including one that North American shall pay only such fees and expenses in connection with the plan and proceedings relating thereto as the Commission may approve on appropriate application made to it.[1] Subsequently, we notified the interested persons that applications for approval of fees and expenses should be filed and North American was requested to supply information regarding certain fees and expenses paid or proposed to be paid for services in connection with these proceedings.

On November 30, 1950, we released jurisdiction with respect to the fees and expenses requested by the applicants for services rendered in connection with the joint plan under section 11 (e) of the act filed by North American, Union Electric and West Kentucky.[2] In approving a fee of $10,000 to George Rosier for services in that proceeding, we indicated that such approval should not be construed as any indication of what weight we would accord his contentions as to the proper measure of the compensation to which he might be entitled, either in the Light & Power reorganization or with respect to any future application that he might file in connection with any proceeding under section 11 (e) of the act relating to North American.

On December 21, 1950, we issued an order releasing jurisdiction with respect to the payment of certain fees and expenses, as therein set forth, for services in connection with the plan of reorganization of Light & Power, and reserving jurisdiction with respect to the fees and expenses to be allowed to the firm of Burns, Currie, Walker and Rich until the matter of fees for services in the over-all North American situation was disposed of, and in allowing an interim payment of $20,000 to George Rosier for his services in that proceeding, reiterated that the amount was not to be construed as any indication of what we might determine subsequently, in future proceedings, to be an appropriate total allowance for Rosier's over-all services.

The firm of Burns, Currie, Walker and Rich has filed a supplemental statement which completes the record with respect to services performed in the Light & Power matter. With regard to Rosier, we believe the amounts heretofore allowed Rosier represent adequate compensation for services performed in those matters and that no further allowance should be made to him for such services. The allowance made herein to Rosier is for services performed in connection with the plan of liquidation and dissolution of North American.

The following table shows the amounts of fees and expenses for services performed in the above proceedings, the approval of which has been requested:

| Recipient or applicant | Amount requested | |
|---|---|---|
| | Fees | Expenses |
| Sullivan & Cromwell, counsel to North American | $150,000.00 | $783.04 |
| Burns, Currie, Walker & Rich, counsel to North American | 29,500.00 | 413.71 |
| George Rosier, counsel to trustees of Central States Electric Corp., and its two subsidiaries, American Cities Power & Light Corp. and Blue Ridge Corp. | 35,000.00 | 712.45 |
| The Ad Press, Ltd. | | 103,148.00 |
| Neville Press | | 6,701.10 |
| Lincoln Engraving & Printing Co. | | 631.00 |
| Merrill Lynch, Pierce, Fenner & Beane, brokers for North American stockholders that disposed of small holdings of Union Electric stock | 2,000.50 | |
| Total | 217,100.50 | 112,102.30 |

The Commission having considered the statements and affidavits heretofore submitted in support of the requested fees and expenses and having examined the record and the requested fees and expenses in the light of the standards of the act, and having concluded that the requested fees and expenses in the amounts set forth are reasonable and for necessary services:

*It is ordered*, That the applications for allowance and reimbursement of expenses are reasonable and that the reservations of jurisdiction in these matters with respect to said fees and expenses, be, and the same hereby are, released.

*It is further ordered*, That jurisdiction be and hereby is reserved with respect to any additional fees and expenses to be incurred in connection with further proceedings on North American's section 11 (e) plan.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28726]

PULPBOARD AND FIBREBOARD FROM CLYATTVILLE AND ESKAY, GA., TO OFFICIAL AND ILLINOIS TERRITORIES

APPLICATION FOR RELIEF

DECEMBER 8, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Pulpboard and fibreboard, carloads.

From: Clyattville and Eskay, Ga.

To: Points in official and Illinois territories.

Grounds for relief: Rail competition, circuity, to maintain grouping, to apply rates constructed on the basis of the short line distance formula, and additional origins.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1349, supp. 27.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

## TITLE 20—EMPLOYEES' BENEFITS

### Chapter II—Railroad Retirement Board

PART 327—AVAILABLE FOR WORK

Pursuant to the general authority contained in section 12 of the act of June 25, 1938 (52 Stat. 1094, 1107; 45 U. S. C. 362), Part 327 of the regulations of the Railroad Retirement Board under such act is adopted by Board Order 53-296, dated November 18, 1953, effective July 1, 1953, to be read as follows:

Sec.
327.1 Statutory provisions.
327.5 Meaning of "available for work".
327.10 Consideration of availability.
327.15 Reasonable efforts to obtain work.

AUTHORITY: §§ 327.1 to 327.15 issued under sec. 12, 52 Stat. 1107, as amended; 45 U. S. C. 362.

§ 327.1 *Statutory provisions.* (a) "Subject to the provisions of section 4 of this Act, * * * a day of unemployment, with respect to any employee, means a calendar day on which he is * * * available for work * * *" (Section 1 (k) of the act.)

(b) "* * * The Board shall prescribe a procedure for registration of unemployed employees at employment offices. Such procedure for registration shall be prescribed with a view to such registration affording substantial evidence of the days of unemployment of the employees who register. The Board may, when such registration is made personally by an employee, accept such registration as initial proof of unemployment sufficient to certify for payment a claim for benefits." (Section 12 (i) of the act.)

§ 327.5 *Meaning of "available for work"—(a) General definition.* A claimant for unemployment benefits is available for work if he is willing and ready to work.

(b) *Willing to work.* A claimant is willing to work if he is willing to accept and perform for hire such work as is reasonably appropriate to his circumstances in view of factors such as:

(1) The current practices recognized by management and labor with respect to such work;

(2) The degree of risk involved to the claimant's health, safety, and morals;

(3) His physical fitness and prior training;

(4) His experience and prior earnings;

(5) His length of unemployment and prospects for obtaining work; and

(6) The distance of the work from his residence and from his most recent work.

(c) *Ready to work.* A claimant is ready to work if he:

(1) Is in a position to receive notice of work which he is willing to accept and perform, and

(2) Is prepared to be present with the customary equipment at the location of such work within the time usually allotted.

§ 327.10 *Consideration of availability—(a) Initial proof.* When a claimant has complied with the provisions of Part 325 of this chapter, he shall initially be considered available for work.

(b) *Information indicating unavailability.* If the office of the Board which is adjudicating a claimant's claims for benefits receives information indicating that the claimant may not be available for work, he shall be required to submit evidence of his availability for work, and no benefits shall thereafter be paid with respect to any day in the period of the claimant's unemployment unless sufficient evidence of the claimant's availability for work on such day is presented.

§ 327.15 *Reasonable efforts to obtain work—(a) Requirement.* A claimant may be required at any time to show, as evidence of willingness to work, that he is making reasonable efforts to obtain work which he professes to be willing to accept and perform, unless he has good prospects of obtaining such work or his circumstances are such that any efforts to obtain work other than by making application for employment service pursuant to § 325.13 of this chapter would be fruitless to the claimant.

(b) *Failure to comply with requirement.* When the office of the Board which is adjudicating claims for benefits has information that the claimant has failed to comply with the requirements set forth in paragraph (a) of this section, no benefits shall be paid with respect to any days in the period of the claimant's unemployment unless sufficient evidence of the claimant's availability for work on such days is presented.

(c) *"What constitutes reasonable efforts."* A claimant shall be considered as making reasonable efforts to obtain work when he takes such steps toward obtaining work as are appropriate to his circumstances. In determining what steps are appropriate to a claimant's circumstances, consideration shall be given to actions such as:

(1) Registering with a union hiring or placement facility;

(2) Applying for employment with former employers;

(3) Making application with employers including individuals and companies not covered by the act, who may reasonably be expected to have openings in work suitable for him;

(4) Responding to appropriate "want ads" for work which appears suitable for him;

(5) Actively prosecuting his claim for reinstatement in his former work;

(6) Any other action reasonably directed toward obtaining work.

Dated: December 7, 1953.

By authority of the Board.

MARY B. LINKINS,
*Secretary of the Board.*

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter II—Corps of Engineers, Department of the Army

PART 204—DANGER ZONE REGULATIONS

PAMLICO SOUND, BOGUE SOUND, AND ADJACENT WATERS, NORTH CAROLINA

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), and Chapter XIX of the Army Appropriations Act of July 9, 1918 (40 Stat. 892; 33 U. S. C. 3), § 204.55 establishing and governing the use and navigation of danger zones in Pamlico Sound, Bogue Sound, and adjacent waters, North Carolina, is hereby amended to read as follows:

§ 204.55 *Pamlico Sound, Bogue Sound, and adjacent waters, N. C.; danger zones for Marine Corps operations*—(a) *Bombing and rocket firing area in Pamlico Sound in vicinity of Brant Island*—(1) *The area.* The waters within a circular area with a radius of 3.0 statute miles having its center on the southern side of Brant Island at latitude 35°12'30", longitude 76°36'30".

(2) *The regulations.* The area shall be closed to navigation at all times except for vessels engaged in operational and maintenance work as directed by the enforcing agency. Prior to bombing or firing operations the area will be "buzzed" by plane. Upon being so warned vessels working in the area shall leave the area immediately.

(b) *Bombing, rocket firing, and strafing areas in Pamlico Sound and Neuse River*—(1) *The areas.* (i) The waters within a circular area with a radius of 1.8 statute miles having its center at latitude 35°02'12", longitude 76°28'00".

(ii) The waters within a circular area with a radius of 0.5 statute mile having its center at latitude 35°00'30", longitude 76°29'50".

(iii) The waters within a circular area with a radius of 0.5 statute mile having its center at latitude 35°04'12", longitude 76°28'24".

(iv) The waters within a circular area with a radius of 0.5 statute mile having its center at latitude 35°01'42", longitude 76°25'48".

(v) The waters within a circular area with a radius of 0.5 statute mile having its center at latitude 34°58'48", longitude 76°26'12".

(2) *The regulations.* (i) The areas described in subparagraph (1) (i) and (ii) of this paragraph will be used as bombing, rocket firing, and strafing areas. Live and dummy ammunition will be used. The areas shall be closed to navigation at all times except for such vessels as may be directed by the enforcing agency to enter on assigned duties. The areas will be patrolled and vessels "buzzed" by the patrol plane prior to the conduct of operations in the areas. Vessels which have inadvertently entered the danger zones upon being so warned shall leave the area immediately.

(ii) The areas described in subparagraph (1) (iii), (iv), and (v) of this paragraph will be used as bombing, rocket firing, and strafing areas. Practice and dummy ammunition will be used. All operations will be conducted during daylight hours, and the areas will be open to navigation at night. No vessel shall enter these areas during the hours of daylight without special permission from the enforcing agency. The areas will be patrolled and vessels "buzzed" by the patrol plane prior to the conduct of operations in the areas. Vessels which have inadvertently entered the danger zones upon being so warned shall leave the areas immediately.

(c) *Bombing area in Atlantic Ocean in vicinity of Bear Inlet*—(1) *The area.* The waters within a rectangular area described as follows: Beginning at latitude 34°38'03", longitude 77°10'06"; thence to latitude 34°32'53", longitude 77°06'30"; thence to latitude 34°31'15", longitude 77°09'41"; thence to latitude 34°36'33", longitude 77°13'18"; and thence to the point of beginning. The area includes all of the entrance to Bear Inlet, and extends westward to a point approximately 1,000 yards east of Browns Inlet and seaward approximately five and one-half miles from Bear Inlet.

(2) *The regulations.* The area shall be closed to navigation at all times except for vessels proceeding along established waterways. Adequate safety precautions will be taken before and during each practice. Operations will be suspended, if necessary, to insure the safety of vessels proceeding along established waterways.

(d) *Enforcing agency.* The regulations in this section shall be enforced by the Commander, Marine Corps Air Bases, Cherry Point, North Carolina, or his authorized representatives.

[Regs., Nov. 24, 1953, 800.2121-ENGWO] (40 Stat. 266, 892; 33 U. S. C. 1, 3)

PART 207—NAVIGATION REGULATIONS

CHESAPEAKE BAY ENTRANCE

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), § 207.158 establishing and governing the use and navigation of a naval restricted area across Chesapeake Bay entrance is hereby modified by changes in the limits of the area and redesignation of an enforcing agency, as follows:

§ 207.158 *Chesapeake Bay entrance; naval restricted area*—(a) *The area.* Beginning at a point on the south shore of Chesapeake Bay at longitude 76°03'06"; thence to latitude 37°01'18", longitude 76°02'06"; thence to latitude 37°00'18", longitude 75°55'54"; thence to latitude 36°58'00", longitude 75°48'24"; thence to latitude 36°51'48", longitude 75°51'06"; thence to the shore at longitude 75°58'48", and thence northwesterly and southwesterly along the shore at Cape Henry to the point of beginning.

(b) *The regulations.* (1) Anchoring, trawling, crabbing, fishing, and dragging in the area are prohibited, and no object attached to a vessel or otherwise shall be placed on or near the bottom.

(2) This section shall be enforced by Officer in Charge, Harbor Defense Unit, Norfolk, Virginia.

[Regs., Nov. 19, 1953, 800.2121 (Chesapeake Bay) ENGWO] (40 Stat. 266; 33 U. S. C. 1)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army,*
*The Adjutant General.*

# TITLE 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### Subchapter C—Miscellaneous Excise Taxes

[Regulations 30]

### PART 198—PRODUCTION OF VOLATILE FRUIT-FLAVOR CONCENTRATES

*Preamble:* 1. These regulations, Regulations 30, Volatile Fruit-Flavor Concentrates (26 CFR Part 198) are a republication of Regulations 30, 1949 edition (26 CFR Part 198).

2. These regulations, except for the addition of several definitions, consist only of previously approved material but the text has been rearranged and renumbered to conform to the Federal Register Regulations (13 F. R. 5929).

3. This republication of these regulations shall not affect or limit any act done or any liability previously incurred, or any suit, action, or proceeding had or commenced in any civil, administrative, or criminal cause and proceeding prior to the date of republication, nor shall this republication release, acquit, affect, or limit any offense committed in violation of these regulations prior to republication, or any penalty, liability or forfeiture incurred prior to such date.

4. It is found that compliance with notice and public rule making procedure of section 4 (a) and the effective date limitations of section 4 (c) of the Administrative Procedure Act (5 U. S. C. 1001 et seq.) is unnecessary in connection with the republication of the regulations in this part for the reason that the changes made relate merely to form and not substance.

Sec.

198.0 Statutory provisions.
198.0-1 Registry of stills.
198.0-2 Premises prohibited for distilling.
198.0-3 Changes in apparatus and fastenings.
198.0-4 Entry and examination of distillery.
198.0-5 Distillers and rectifiers to furnish facilities and give assistance for examination of premises.
198.0-6 Installation of meters, tanks, and other apparatus.
198.0-7 Officer's authority to break up grounds or walls.
198.0-8 Rules and regulations.
198.0-9 Volatile fruit-flavor concentrates.
198.0-10 Rules and regulations.
198.0-11 Verification of returns, penalties of perjury.

Subpart A—Scope of Regulations

198.1 Production of volatile fruit-flavor concentrates.
198.2 Prohibited operations.
198.3 Instruments and papers.

Subpart B—Definitions

198.6 Meaning of terms.
198.7 Assistant Regional Commissioner.
198.8 Commissioner.
198.9 Concentrate.
198.10 Concentrate plant.
198.11 Flashed juice or mash.
198.12 Fold.
198.13 Fruit.
198.14 Including.
198.15 Inclusive language.
198.16 I. R. C.
198.17 Person.
198.18 Processing material.
198.19 Proprietor.
198.20 Secretary.
198.21 U. S. C.

Subpart C—Location and Use

198.25 Restrictions.
198.26 Within 600 feet of a rectifying plant.
198.27 Special application.
198.28 Changes requiring approval.
198.29 Use of premises.

Subpart D—Construction

198.35 Buildings or rooms.
198.36 Means of ingress or egress.
198.37 Distilling department.

Subpart E—Sign

198.40 Posting of sign.

Subpart F—Equipment

198.45 Processing material storage tanks.
198.46 Distilling apparatus.
198.47 Pipe lines.
198.48 Details of construction and equipment.

Subpart G—Qualifying Documents

198.55 Notice, Form 27-G.
198.56 Description of premises.
198.57 Description of apparatus and equipment.
198.58 Capacity.
198.59 Amended and supplemental notices.
198.60 Corporate documents.
198.61 Power of attorney, Form 1534.
198.62 Execution of power of attorney.
198.63 Duration of power of attorney.
198.64 Registry of stills, Form 26.
198.65 Taxable status of stills.
198.66 Bond, Form 1694.
198.67 Penal sum of bond.

Subpart H—Bonds and Consents of Surety

198.75 General requirements.
198.76 Surety or security.
198.77 Corporate surety.
198.78 Two or more corporate sureties.
198.79 Powers of attorney.
198.80 Individual sureties.
198.81 Ownership of real property.
198.82 Description of real property.
198.83 Execution of Form 33.
198.84 Certificate of title.
198.85 Appraisal.
198.86 Investigation.
198.87 Requalification.
198.88 Interest in business.
198.89 Deposit of collateral.
198.90 Disposition of collateral by Assistant Regional Commissioner.
198.91 Consents of surety.
198.92 Approval required.
198.93 Authority to approve.
198.94 Cause for disapproval.
198.95 Appeal to Commissioner.
198.96 Disapproval of Commissioner final.
198.97 Additional or strengthening bonds.
198.98 New bond.
198.99 Superseding bond.

Subpart I—Plats and Flow Plans

198.105 Plats and flow plans.
198.106 Preparation.
198.107 Depiction of premises.
198.108 Rectifying plant within 600 feet.
198.109 Contiguous premises.
198.110 Elevational flow plans.
198.111 Certificate of accuracy.
198.112 Revised plats and plans.

Subpart J—Requirements Governing Changes in Name, Proprietorship, Control, Location, Premises and Equipment

198.120 General requirements.

CHANGES IN INDIVIDUAL, FIRM, OR CORPORATE NAME

198.121 Notice, Form 27-G.
198.122 Sign.
198.123 Records.

CHANGES IN PROPRIETORSHIP

198.124 Notice, Form 27-G.
198.125 Registry of stills.
198.126 Records.
198.127 Non-fiduciary successor.
198.128 Fiduciary.
198.129 Adoption of plat and plans.
198.130 Sign.
198.131 Materials and concentrates.

OTHER CHANGES

198.132 Change in partnership.
198.133 Changes in stockholders, officers, and directors of corporations.
198.134 Reincorporation.
198.135 Change in the location of the concentrate plant.
198.136 Change in premises.
198.137 Changes in equipment.

Subpart K—Action by Assistant Regional Commissioner

ORIGINAL ESTABLISHMENTS

198.145 Special application.
198.146 Examination of qualifying documents.
198.147 Inspection of premises.
198.148 Inaccurate documents.
198.149 Defective construction.
198.150 Bonds and consents of surety.
198.151 Inquiry by Assistant Regional Commissioner.
198.152 Approval of bond.
198.153 Disapproval of qualifying documents.
198.154 Appeal to Commissioner.
198.155 Disposition of qualifying documents.
198.156 Registry numbers.

CHANGES SUBSEQUENT TO ESTABLISHMENT

198.157 Procedure applicable.

CONSENTS OF SURETY, AND ADDITIONAL AND SUPERSEDING BONDS

198.158 Procedure applicable.

Subpart L—Action by Commissioner

ORIGINAL ESTABLISHMENT

198.165 Review of documents.

CHANGES SUBSEQUENT TO ORIGINAL ESTABLISHMENT

198.166 Procedure applicable.

Subpart M—Termination of Bonds

198.170 Termination of bond.
198.171 Application of surety for relief from bond.
198.172 Extent of release of surety from liability.
198.173 Notice of release of surety from liability.
198.174 Action on application for termination of bond.
198.175 Notices, Forms 1490 and 1491.
198.176 Release of collateral.

Subpart N—Suspension or Discontinuance of Business

198.180 Form of notice.
198.181 Registry of stills.

Subpart O—Plant Operation

198.190 Compliance with requirements of law and regulations.
198.191 Inspection of premises and records.

COMMENCEMENT OF OPERATIONS

198.192 Processing material.
198.193 Use of processing material.
198.194 Quantity of processing material to be determined.
198.195 Quantity and alcohol content of concentrate produced to be determined.
198.196 Removal of concentrate.
198.197 Label.

Subpart P—Proprietor's Records and Reports

198.200 General.
198.201 Commercial records.
198.202 Retention of commercial records.
198.203 Report, Form 1695.
198.204 Execution.
198.205 Permanent record.
198.206 Requirements where change in proprietorship occurs.
198.207 Audit of reports, Form 1695, by Assistant Regional Commissioner.

AUTHORITY: §§ 198.1 to 198.207 issued under 53 Stat. 375, 467; 26 U. S. C. 3176, 3791. Interpret or apply 63 Stat. 611; 26 U. S. C. 5142. Other statutory provisions interpreted or applied are cited to the text in parenthesis.

§ 198.0 *Statutory provisions.* Sections 198.0-1 to 198.0-11 set forth the text of laws of more common application pertaining to the production of volatile fruit-flavor concentrates.

§ 198.0-1 *Registry of stills.*

26 U. S. C. 2810 *Registry of stills*—(a) *Requirement.* Every person having in his possession or custody, or under his control, any still or distilling apparatus set up, shall register the same with the collector of the district in which it is, by subscribing and filing with him duplicate statements, in writing, setting forth the particular place where such still or distilling apparatus is set up, the kind of still and its cubic contents, the owner thereof, his place of residence, and the purpose for which said still or distilling apparatus has been or is intended to be used, one of which statements shall be retained and preserved by the collector, and the other transmitted by him to the Commissioner. Stills and distilling apparatus shall be registered immediately upon their being set up.

Every still or distilling apparatus not so registered, together with all personal property in the possession or custody, or under the control of such person, and found in the building, or in any yard or inclosure connected with the building in which the same may be set up, shall be forfeited.

And every person having in his possession or custody, or under his control, any still or distilling apparatus set up which is not so registered, shall pay a penalty of $500, and shall be fined not less than $100, nor more than $1,000, and imprisoned for not less than six months nor more than two years.

Stills and distilling apparatus set up at refineries for the refining of crude petroleum or the production of petroleum products and not used in the manufacture of distilled spirits are not required to be registered under this section.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 198.0-2 *Premises prohibited for distilling.*

26 U. S. C. 2819 *Premises prohibited for distilling.* No person shall use any still, worm, or other vessel, for the purpose of distilling in any dwelling house, or in any shed, yard or inclosure connected with any dwelling house, or on board of any vessel or boat or in any building, or on any premises where beer, lager beer, ale, porter, or other fermented liquors, vinegar, or ether, are manufactured or produced, or where sugars or syrups are refined, or where liquors of any description are retailed, or where any other business is carried on; or within six hundred feet in a direct line of any premises authorized to be used for rectifying, except that the Secretary is authorized to permit such use for distilling on premises at such nearer distance than six hundred feet as he prescribes, in any case in which he deems that such permission may be granted without danger to the revenue; and every person who does any of the acts prohibited by this section, or aids or assists therein, or causes or procures the same to be done, shall be fined $1,000 and imprisoned for not less than six months nor more than two years, in the discretion of the court, for each such offense: *Provided*, That saleratus may be manufactured, or meal or flour ground from grain, in any building or on any premises where spirits are distilled; but such meal or flour shall be used only for distillation on the premises: *Provided further*, That any boiler used in generating steam or heating water to be used in any distillery, may be located in any other building or on any other premises to be connected with such still or boiling tubs, by suitable pipes or other apparatus, or the steam from such boiler in the distillery may be conveyed to other premises to be used for manufacturing or other purposes.

§ 198.0-3 *Changes in apparatus and fastenings.*

26 U. S. C. 2823 *Changes in apparatus and fastenings*—(a) *Power of Commissioner.* The Commissioner is authorized to order and require such changes of or additions to distilling apparatus, connecting pipes, pumps, or cisterns, or any machinery connected with or used in or on the distillery premises, or may require to be put on any of the stills, tubs, cisterns, pipes, or other vessels, such fastenings, locks, or seals as he may deem necessary.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 198.0-4 *Entry and examination of distillery.*

26 U. S. C. 2827 *Entry and examination of distillery*—(a) *Power of revenue officers.* It shall be lawful for any revenue officer at all times, as well by night as by day, to enter into any distillery or building or place used for the business of distilling, or used in connection therewith for storage or other purposes, and to examine, gauge, measure, and take an account of every still or other vessel or utensil of any kind, and of all low-wines, and of the quantity and gravity of all mash, wort, or beer, and of all yeast, or other compositions for exciting or producing fermentation in any mash or beer, of all spirits and of all materials for making or distilling spirits, which may be in any such distillery or premises, or in possession of the distiller.

And whenever any internal revenue officer, or any person called by him to his aid, is hindered, obstructed, or prevented by any distiller or by any workman, or other person acting for such distiller, or in his employ, from entering into any such distillery or building or place as aforesaid; or any such officer is by the distiller, or his workman, or any person in his employ, prevented or hindered from, or opposed, or obstructed, or molested in the performance of his duty under the internal revenue laws, in any respect, the distiller shall forfeit the sum of not exceeding $1,000.

And whenever any officer, having demanded admittance into a distillery or distillery premises, and having declared his name and office, is not admitted into such distillery, or premises by the distiller or other person having charge thereof, it shall be lawful for such officer at all times, as well by night as by day, to break open by force any of the doors or windows, or to break through any of the walls of such distillery or premises necessary to be broken open or through, to enable him to enter the said distillery or premises; and the distiller shall forfeit the sum of not exceeding $1,000.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 198.0-5 *Distillers and rectifiers to furnish facilities and give assistance for examination of premises.*

26 U. S. C. 2828 *Distillers and rectifiers to furnish facilities and give assistance for examination of premises*—(a) *Power of revenue officers.* On the demand of any internal revenue officer or agent, every distiller or rectifier shall furnish strong, safe, and convenient ladders of sufficient length to enable the officer or agent to examine and gauge any vessel or utensil in such distillery or premises; and shall, at all times when required, supply all assistance, lights, ladders, tools, staging, or other things necessary for inspecting the premises, stock, tools, and apparatus belonging to such person, and shall open all doors, and open for examination all boxes, packages, and all casks, barrels, and other vessels not under the control of the revenue officer in charge, under a penalty of $500 for every refusal or neglect so to do.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 198.0-6 *Installation of meters, tanks, and other apparatus.*

26 U. S. C. 2829 *Installation of meters, tanks, and other apparatus*—(a) *Power of the Commissioner.* The Commissioner, with the approval of the Secretary, is authorized to require at distilleries, breweries, rectifying houses, and wherever else in his judgment such action may be deemed advisable, the installation of meters, tanks, pipes, or any other apparatus for the purpose of protecting the revenue, and such meters, tanks, and pipes and all necessary labor incident thereto shall be at the expense of the person on whose premises the installation is required. Any such person refusing or neglecting to install such apparatus when so required by the Commissioner shall not be permitted to conduct business on such premises.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 198.0-7 *Officer's authority to break up grounds or walls.*

26 U. S. C. 2830 *Officer's authority to break up grounds or walls*—(a) *Power of revenue agent.* It shall be lawful for any revenue officer, and any person acting in his aid, to break up the ground on any part of a distillery, or premises of a distiller or rectifier, or any ground adjoining or near to such distillery or premises, or any wall or partition thereof, or belonging thereto, or other place, to search for any pipe, cock, private conveyance, or utensil; and, upon finding any such pipe or conveyance leading therefrom or thereto, to break up any ground, house, wall, or other place through or into which such pipe or other conveyance leads, and to break or cut away such pipe or other conveyance, and turn any cock, or to examine whether such pipe or other conveyance conveys or conceals any mash, wort, or beer, or other liquor, which may be used for the distillation of low-wines or spirits, from the sight or view of the officer, so as to prevent or hinder him from taking a true account thereof.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 198.0-8 *Rules and regulations.*

26 U. S. C. 3176 *Rules and regulations*—(a) *Power of Commissioner.* The Commissioner, with the approval of the Secretary, shall prescribe and publish all needful rules and regulations for the enforcement of this chapter.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 198.0–9 *Volatile fruit-flavor concentrates.*

26 U. S. C. 3182 *Volatile fruit-flavor concentrates*—(a) *Exemption.* The provisions of this chapter (other than sections 2810, 2819, and 2823 and other than sections 2827 to 2830, both inclusive) shall not be applicable with respect to the manufacture, by any process which includes evaporations from the mash or juice of any fruit, of any volatile fruit-flavor concentrate if:

(1) Such concentrate, and the mash or juice from which it is produced, contains no more alcohol than is reasonably unavoidable in the manufacture of such concentrate; and

(2) Such concentrate is rendered unfit for use as a beverage before removal from the place of manufacture; and

(3) The manufacturer thereof keeps such records, renders such reports, files such bonds, and complies with such other rules and regulations with respect to the production, removal, sale, transportation, and use of such concentrate and of the mash or juice from which such concentrate is produced, as the Commissioner, with the approval of the Secretary, may prescribe as necessary for the protection of the revenues imposed by this chapter.

(b) *Control after tax-free manufacture.* If any volatile fruit-flavor concentrate (or any fruit mash or juice from which such concentrate is produced) containing one-half of 1 per centum or more of alcohol by volume, which is manufactured free from tax under the provisions of subsection (a), is sold, transported, or used by any person in violation of the provisions of this chapter or regulations promulgated thereunder, such person and such concentrate, mash, or juice shall be subject to all provisions of this chapter pertaining to distilled spirits and wines, including those requiring the payment of tax thereon; and the person so selling, transporting, or using such concentrate, mash, or juice shall be required to pay such tax.

§ 198.0–10 *Rules and regulations.*

26 U. S. C. 3791 *Rules and regulations*—(a) *Authorization*—(1) *In general.* Except as provided in section 1928 (a), Cotton Futures, section 2599, Marihuana, section 2559, Narcotics, section 3176, Liquor, and section 1805, Silver, the Commissioner, with the approval of the Secretary, shall prescribe and publish all needful rules and regulations for the enforcement of this title.

(2) *In case of change in law.* The Commissioner may make all such regulations, not otherwise provided for, as may have become necessary by reason of any alteration of law in relation to internal revenue.

(b) *Retroactivity of regulations or rulings.* The Secretary, or the Commissioner with the approval of the Secretary, may prescribe the extent, if any, to which any ruling, regulation, or Treasury Decision, relating to the internal revenue laws, shall be applied without retroactive effect.

§ 198.0–11 *Verification of returns; penalties of perjury.*

26 U. S. C. 3809 *Verification of returns; penalties of perjury*—(a) *Penalties.* Any person who willfully makes and subscribes any return, statement, or other document, which contains or is verified by a written declaration that it is made under the penalties of perjury, and which he does not believe to be true and correct as to every material matter, shall be guilty of a felony, and, upon conviction thereof, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

(b) *Signature presumed correct.* The fact that an individual's name is signed to a return, statement, or other document filed shall be prima facie evidence for all purposes that the return, statement, or other document was actually signed by him.

(c) *Verification in lieu of oath.* The Commissioner, under regulations prescribed by him with the approval of the Secretary, may require that any return, statement, or other document required to be filed under any provision of the internal revenue laws shall contain or be verified by a written declaration that it is made under the penalties of perjury, and such declaration shall be in lieu of any oath otherwise required.

### Subpart A—Scope of Regulations

§ 198.1 *Production of volatile fruit-flavor concentrates.* Pursuant to the provisions of section 3132, I. R. C. (Public Law 240, 81st Congress), any volatile fruit-flavor concentrate containing alcohol developed in the processing of such volatile fruit-flavor may be manufactured, stored, sold, distributed and used, in accordance with this part without being subject to the provisions of chapter 26 of the Internal Revenue Code, other then sections 2810, 2819, 2823, and other then sections 2827 to 2830, both inclusive, if:

(a) Such concentrate, and the mash or juice from which it is produced, contains no more alcohol than is reasonably unavoidable in the manufacture of such concentrate; and

(b) Such concentrate is unfit or is rendered unfit for use as a beverage before removal from the place of manufacture; and

(c) The manufacturer thereof keeps such records, renders such reports, files such bonds, and complies with such other rules and regulations with respect to the production, removal, sale, transportation, and use of such concentrate and of the mash or juice from which such concentrate is produced, as the Commissioner, with the approval of the Secretary, may prescribe as necessary for the protection of the revenues imposed by chapter 26 of the Internal Revenue Code.

§ 198.2 *Prohibited operations.* Under the law a manufacturer of volatile fruit-flavor concentrate who violates any of the conditions exempting him from the provisions of chapter 26 of the Internal Revenue Code will subject himself to the taxes and penalties otherwise applicable under that chapter in respect of such operations, and any person who sells, transports, or uses any volatile fruit-flavor concentrate or the mash or juice from which it is produced in violation of chapter 26 of the Code or the regulations promulgated thereunder will subject himself to all the provisions of the chapter pertaining to distilled spirits and wines, including those requiring payment of the tax thereon.

§ 198.3 *Instruments and papers.* The terms, conditions, and instructions contained in instruments and papers required to be furnished by law or regulations are hereby made a part of the regulations in this part as fully and to the same extent as if incorporated herein.

### Subpart B—Definitions

§ 198.6 *Meaning of terms.* As used in this part, unless the context otherwise requires, terms shall have the meaning ascribed in this subpart.

§ 198.7 *Assistant Regional Commissioner.* "Assistant Regional Commissioner" shall mean the Assistant Regional Commissioner, Alcohol and Tobacco Tax.

§ 198.8 *Commissioner.* "Commissioner" shall mean the Commissioner of Internal Revenue.

§ 198.9 *Concentrate.* "Concentrate" shall mean any volatile fruit-flavor concentrate produced by any process which includes evaporations from the mash or juice of any fruit.

§ 198.10 *Concentrate plant.* "Concentrate plant" shall mean a factory or plant for the manufacture, by any process which includes evaporations from the mash or juice of any fruit, of any volatile fruit-flavor concentrate, established and operated under this part and as described in the proprietor's notice, Form 27–G.

§ 198.11 *Flashed juice or mash.* "Flashed juice or mash" shall mean the spent processing material from which the volatile fruit-flavors have been removed.

§ 198.12 *Fold.* "Fold" shall mean the ratio of the volume of a concentrate to the volume of the processing material from which distilled. For example, one gallon of concentrate of 100-fold would be the product from 100 gallons of processing material.

§ 198.13 *Fruit.* "Fruit" shall mean and include all products commonly known and classified as fruit, berries, or grapes.

§ 198.14 *Including.* The word "including" shall not be deemed to exclude things other than those enumerated which are in the same general class.

§ 198.15 *Inclusive language.* Words in the plural form shall include the singular, and vice versa, and words in the masculine gender shall include females, a trust, estate, partnership, company, or corporation and the term "include" shall not be deemed to exclude things other than those enumerated which are in the same general class.

§ 198.16 *I. R. C.* "I. R. C." shall mean the Internal Revenue Code.

§ 198.17 *Person.* "Person" shall be construed to mean and include an individual, a trust, estate, partnership, company, or corporation.

§ 198.18 *Processing material* "Processing material" shall mean the fruit juice or mash which is fed to the evaporator for the separation of volatile fruit-flavors from such fruit juice or mash.

§ 198.19 *Proprietor.* "Proprietor" shall mean the person in whose name notice of the intention to engage in the business of manufacturing volatile fruit-flavor concentrates has been given to the Assistant Regional Commissioner.

§ 198.20 *Secretary.* "Secretary" shall mean the Secretary of the Treasury.

§ 198.21 *U. S. C.* "U. S. C." shall mean the United States Code.

### Subpart C—Location and Use

§ 198.25 *Restrictions.* Plants for the production of concentrates under this part may not be located in any dwelling house, or in any shed, yard, or enclosure connected with any dwelling house, or on board of any vessel or boat, or in any building or on any premises where beer, lager beer, ale, porter, or other fermented liquors, vinegar, or ether, are manufactured or produced, or, except as provided in § 198.29, where sugars or syrups are refined, or where liquors of any description are retailed, or where any other business is carried on; or within six hundred feet in a direct line of any rectifying plant. (53 Stat. 314; 26 U. S. C. 2819)

§ 198.26 *Within six hundred feet of a rectifying plant.* No person shall carry on the business of manufacturing volatile fruit-flavor concentrates by any process which includes evaporations from the mash or juice of any fruit at a distance of less than six hundred feet in a direct line from any rectifying plant, except when he has been so authorized by the Assistant Regional Commissioner. The Assistant Regional Commissioner may grant such authority when he is of the opinion that the revenue will not be endangered thereby. (53 Stat. 314; 26 U. S. C. 2819)

§ 198.27 *Special application.* A person desiring to manufacture volatile fruit-flavor concentrates by any process which includes evaporations from the mash or juice of any fruit within six hundred feet of a rectifying plant shall file a special application, in triplicate, for such privilege, with the Assistant Regional Commissioner. The application shall state the locations of the concentrate plant and the rectifying plant, the distance between the premises, the name of the proprietor of the rectifying plant, a description of any connecting pipelines, the reason for locating the concentrate plant within six hundred feet of such other premises, and any additional information which the Assistant Regional Commissioner may require. The Assistant Regional Commissioner will take action on such application in accordance with the procedure prescribed in § 198.145. (53 Stat. 314; 26 U. S. C. 2819)

§ 198.28 *Changes requiring approval.* Where there is to be a change in the distance between a concentrate plant and a rectifying plant, located within six hundred feet of each other as a result of the extension or curtailment, or other change in either premises, a new special application, in triplicate, must be filed with the Assistant Regional Commissioner by the proprietor of the premises which is to be extended or curtailed. Where a change occurs in the proprietorship of the concentrate plant or of a rectifying plant, located within six hundred feet of each other, the new proprietor shall file with the Assistant Regional Commissioner a new special application, in triplicate. Unless the concentrate plant premises are extended or curtailed as the result of such change, the change may be reflected in the next notice, and plat, filed by the proprietor. Such new special application shall be considered and disposed of in accordance with the procedure prescribed in § 198.145. (53 Stat. 314; 26 U. S. C. 2819)

§ 198.29 *Use of premises.* The premises of a concentrate plant shall be used exclusively for the manufacture of concentrates by any process which includes evaporations from the mash or juice of any fruit: *Provided*, That flashed juice or mash, which is a byproduct of the concentrate process, or fruit juice, may be processed, for the purpose of manufacturing a marketable article, on the concentrate plant premises. (53 Stat. 314; 26 U. S. C. 2819)

### Subpart D—Construction

§ 198.35 *Buildings or rooms.* The concentrate plant must be so constructed and equipped as to be suitable for the production of concentrate, and must be completely separated from contiguous buildings or rooms, which are not used in conjunction with the concentrating process, or the processing of juice and mash or flashed juice and mash, by solid, unbroken partitions, or floors, of substantial construction. Such partitions shall extend from the ground to the roof, or, if a room is used, from the floor to the ceiling: *Provided*, That necessary openings for the passage of approved pipe lines for the conveyance of fruit juice, water, steam, fuel, or similar lines, may be permitted in the walls or partitions.

§ 198.36 *Means of ingress or egress.* Except as provided in § 198.35 the doors and other openings must lead into a yard connected with the concentrate plant, or a public street: *Provided*, That where a room or floor is used, the door may open into an elevator shaft, or a common passageway partitioned off from other businesses, leading either directly or through another elevator shaft or similar passageway to the street or yard. Where the door of the concentrate plant opens into a common passageway, as provided above, the partition forming the common passageway shall be substantially constructed of solid materials or of expanded metal or woven wire of not less than nine gauge, and not more than 2-inch mesh, and shall extend from the floor to the ceiling or roof, except that doors may be permitted therein. Common passageways must be used exclusively as means of communication. (53 Stat. 314; 26 U. S. C. 2819)

§ 198.37 *Distilling department.* A room or rooms must be provided in which shall be located the apparatus and equipment used in processing the fruit juice or mash received on the premises. Such room or rooms shall be known as the distilling department and shall be used exclusively for the processing of fruit juices. A sign must be posted over the door to the distilling department, bearing the words "Distilling Department," and, if more than one room is used, such rooms shall be given alphabetical designations as "A," "B," "C," etc.

### Subpart E—Sign

§ 198.40 *Posting of sign.* The proprietor shall place and keep conspicuously on the outside and at the front of the concentrate plant or over the front entrance thereto, where it can be plainly seen, a sign exhibiting in plain and legible letters, not less than three inches in height and of a proper and proportionate width, the name of the proprietor and the words "Volatile Fruit-Flavor Concentrate Plant No. ----," followed by the registry number assigned by the Assistant Regional Commissioner.

### Subpart F—Equipment

§ 198.45 *Processing material storage tanks.* Each processing material storage tank shall have plainly and legibly painted thereon the words "Processing Material Storage Tank" followed by its serial number and capacity in wine gallons. Such tanks shall be located in the distilling department or in a separate room or building and must be so placed as to be accessible for examination by Government officers. (53 Stat. 318; 26 U. S. C. 2829)

§ 198.46 *Distilling apparatus.* The equipment used in the processing of a volatile fruit-flavor concentrate, from the place where steam or heat is first applied and through the vapor-liquid separator, the fractionating column, and the final condenser must have a clear space of not less than two feet around them. Every still or condenser must be numbered, commencing with the number "1" at the evaporator, and shall have painted thereon its designated use, such as "evaporator," "vapor-liquid separator," etc., and its number. Where the distilling equipment is insulated, or the manufacturer's serial number is otherwise obscured, such number will likewise be painted on the covering of the still.

§ 198.47 *Pipe lines.* The distilling apparatus and equipment must be closed and continuous commencing with the evaporator from which the vapor rises and continuing with securely closed pipe lines to the concentrate receiving tank or other receptacle in which the product is deposited. All such pipe lines must be of a fixed and permanent character, constructed of metal or other suitable material, and so arranged as to be exposed to view throughout their entire lengths. (53 Stat. 318; 26 U. S. C. 2829)

§ 198.48 *Details of construction and equipment.* Where details of construction and equipment are not covered by this part, such construction and equipment must afford adequate supervision and control. The Assistant Regional Commissioner may approve details of construction and equipment in lieu of those specified herein where it is shown that it is impracticable to conform to the prescribed specifications, and the proposed construction and equipment will afford adequate supervision and control. Where it is proposed to substitute construction and equipment for that for which specifications are prescribed, approval of the Assistant Regional Commissioner should be first obtained. (53 Stat. 318; 26 U. S. C. 2829)

### Subpart G—Qualifying Documents

§ 198.55 *Notice, Form 27–G.* Every person, before engaging in the business of manufacturing concentrates pursuant

to the provisions of section 3182, I. R. C. (Public Law 240, 81st Congress), must file notice on Form 27–G, in triplicate, with the Assistant Regional Commissioner. Except as provided in § 198.59, in the case of amended and supplemental notices, all of the information indicated by the lines of the form and the instructions printed thereon, and by this part, shall be furnished. Notices on Form 27–G must be filed in accordance with the instructions printed on the form and sworn to before an officer authorized to administer oaths. Such notices must be numbered serially, commencing with "1" and continuing in regular sequence for all notices thereafter filed, whether amended or supplemental.

§ 198.56 *Description of premises.* The notice, Form 27–G shall contain a complete description of the building constituting the concentrate plant, including the height, width, and length, the material of which constructed, and the number of stories. All rooms comprising the concentrate plant shall be described on Form 27–G. The description shall include the designated name of each room, which shall be according to its use, and the dimensions thereof.

§ 198.57 *Description of apparatus and equipment.* There must be described on the Form 27–G the number of tanks, evaporators, separators, stills, condensers, and, if any, receiving and storage tanks, which shall be listed separately as to serial number and capacity in wine gallons. All other regular and permanent equipment must also be described on Form 27–G.

§ 198.58 *Capacity.* The kind, by name of fruit, of processing materials to be used, the maximum quantity of each kind of processing material that shall be processed in 24 hours, the maximum quantity of concentrates (in wine gallons) that will be produced in 24 hours, and, as to each kind, the minimum and maximum folds to which the volatile fruit-flavors shall be concentrated, and the maximum percent of alcohol to be contained in the concentrates, must be stated on the Form 27–G.

§ 198.59 *Amended and supplemental notices.* Amended and supplemental notices on Form 27–G may be executed in skeleton form, except as to the items amended or supplemented. All other items which are correctly set forth in prior notices, and in which there has been no change since the last preceding notice, may be incorporated in the amended or supplemental notices by reference to the respective notice previously filed. Such incorporation by reference shall be made by entering for each such item in the space provided therefor the statement, "No change since filing Form 27–G, serial number ——," (the number being inserted), and the date of such form.

§ 198.60 *Corporate documents.* There must be submitted with, and made a part of, the original or initial notice on Form 27–G given by a corporation to engage in the business of manufacturing volatile fruit-flavor concentrates, properly certified copies, in triplicate, of the following documents:

(a) Extracts of the minutes of meetings of the board of directors, authorizing certain officers or other persons to sign for the corporation;

(b) A list of the names and addresses of the officers, directors, and stockholders.

§ 198.61 *Power of attorney, Form 1534.* If the notice or other qualifying documents are signed by an attorney in fact for an individual, partnership, association, or corporation, or by one of the members for a partnership or association, or, in the case of a corporation, by an officer or other person not authorized to sign by the corporate documents described in § 198.60, such notice or other qualifying documents must be supported by a duly authenticated copy of the power of attorney conferring authority upon the person filing the document to execute the same. Such powers of attorney shall be executed on Form 1534, in triplicate, and submitted to the Assistant Regional Commissioner.

§ 198.62 *Execution of power of attorney.* Where the principal giving the power of attorney is an individual, it must be executed by him in person, and not by an agent. In the case of a copartnership or association, powers of attorney authorizing one or more of the members, or another person, to execute documents on behalf of the copartnership or association must be executed by all of the members constituting the copartnership or association. However, if one or more members less than the whole number constituting the copartnership or association have been delegated the authority to appoint agents or attorneys in fact, the power of attorney may be executed by such member or members, provided it is supported by a duly authenticated copy, in triplicate, of the document conferring authority upon the member or members to execute the same. Where, in the case of a corporation, powers of attorney are executed by an officer thereof, such documents must be supported by triplicate copies of the authorization of such officer so to do, certified by the secretary or assistant secretary of the corporation, under the corporate seal, if any, to be true copies.

§ 198.63 *Duration of power of attorney.* Power of attorney authorizing the execution of documents on behalf of a person engaged in, or intending to engage in, the business of concentrating volatile fruit-flavors shall continue in effect until written notice, in triplicate, of the revocation of such authority is received by the Assistant Regional Commissioner, unless terminated by operation of law.

§ 198.64 *Registry of stills, Form 26.* Every person having in his possession or custody, or under his control, any still or distilling apparatus set up, must register the same with the Assistant Regional Commissioner for the region in which the still is located, on Form 26 immediately it is set up. The Form 26 shall be executed, in triplicate, in accordance with the requirements of the columns, lines and instructions on the form. (53 Stat. 308 as amended; 26 U. S. C. 2310)

§ 198.65 *Taxable status of stills.* Stills, when used in the production of concentrates pursuant to this part, shall not be subject to special occupational and commodity taxes.

§ 198.66 *Bond, Form 1694.* Every person intending to commence the business of manufacturing volatile fruit-flavor concentrates shall, upon filing his notice of such intention, Form 27–G, and before proceeding with such business, execute a volatile fruit-flavor concentrate manufacturer's bond, Form 1694 in triplicate, in conformity with the provisions of Subpart H of this part and file the same with the Assistant Regional Commissioner.

§ 198.67 *Penal sum of bond.* The penal sum of a manufacturer's bond to cover the manufacture of volatile fruit-flavor concentrates shall be $5 000: *Provided, however*, That, where, because of the magnitude of the proposed operation or for other good reason, it is the opinion of the Assistant Regional Commissioner that additional bond should be required for the protection of the revenue, such additional bond, not to exceed $20 000, may, with the approval of the Commissioner, be required.

### Subpart H—Bonds and Consents of Surety

§ 198.75 *General requirements.* Every person required to file a bond or consent of surety under the regulations in this part, shall prepare and execute it on the prescribed form, in triplicate, in accordance with this part and the instructions printed on the form, and shall submit it to the Assistant Regional Commissioner.

§ 198.76 *Surety or security.* Bonds required by this part shall be given with surety or collateral security.

§ 198.77 *Corporate surety.* Bonds may be given with corporate surety authorized by the Secretary of the Treasury to become surety on Federal Bonds, subject to the limitations prescribed by the Secretary in Treasury Department Form 356, Commissioner of Accounts, Surety Bonds Branch, which is issued annually, and subject to such amendatory circulars as may be issued from time to time.

§ 198.78 *Two or more corporate sureties.* A bond executed by two or more corporate sureties shall be the joint and several liability of the principal and the sureties: *Provided*, That each corporate surety may limit its liability in terms upon the face of the bond in a definite, specified amount, which amount shall not exceed the limitations prescribed for such corporate surety by the Secretary, as set forth in Treasury Department Form 356. When the sureties so limit their liability, the aggregate of such limited liabilities must equal the required penal sum of the bond.

§ 198.79 *Powers of attorney.* Powers of attorney and other evidence of appointment of agents and officers to execute bonds on behalf of corporate sureties are required to be filed with, and passed upon by, the Commissioner of Accounts, Surety Bonds Branch, Treasury Department. Such powers and other evidence of appointment need not be filed with, or submitted to Assistant Regional Commissioners.

§ 198.80 *Individual sureties.* Bonds may be given with individual sureties, of which there must be not less than two, each of whom must qualify by executing Form 33 (AT), in triplicate. Individual sureties must be citizens of the United States and reside in the State in which the business of the principal is to be conducted. No person will be accepted as an individual surety in a State in which he is not authorized to become a surety.

§ 198.81 *Ownership of real property.* Each individual surety must own unencumbered real property, in fee simple, the appraised value of which, over and above any exemptions from execution allowed by the laws of the State, is equal to the penal sum of the bond. Such real property must be located within the State where the business of the principal is to be conducted.

§ 198.82 *Description of real property.* The real property must be described in the surety's affidavit, Form 33 (AT), with all of the formalities required in conveyances of real estate by the laws of the State in which it is situated.

§ 198.83 *Execution of Form 33 (AT).* The surety's affidavit on Form 33 (AT) shall contain all of the information required by this part and the instructions printed on the form. The form shall be subscribed and sworn to before an officer duly authorized to administer oaths, and one copy thereof shall be attached to each copy of the bond to which it relates.

§ 198.84 *Certificate of title.* There must be submitted with the surety's affidavit, Form 33 (AT), a certificate of title, in triplicate, showing that the surety has a fee simple title, free of encumbrances, to the realty described in the form.

§ 198.85 *Appraisal.* There will also be submitted with Form 33 (AT) an appraisal, in triplicate, by two or more competent persons designated by the Assistant Regional Commissioner for the purpose, showing separately the value of the land and buildings, and a full and clear statement of the method employed by them in determining their valuation. The appraisal shall be at the expense of the principal on the bond, unless it is made by Government officers.

§ 198.86 *Investigation.* The Assistant Regional Commissioner must cause an investigation to be made of all the facts stated in the surety's affidavit on Form 33 (AT) and supporting documents, and shall forward one copy of the report of such investigation to the Commissioner with the bond and accompanying Form 33 (AT).

§ 198.87 *Requalification.* The Commissioner or Assistant Regional Commissioner may at any time, in his discretion, require the requalification of individual sureties on Form 33 (AT).

§ 198.88 *Interest in business.* The surety, whether individual or corporate, must have no interest whatever in the business covered by the bond.

§ 198.89 *Deposit of collateral.* Bonds or notes of the United States, or other obligations which are unconditionally guaranteed as to both interest and principal by the United States, may be pledged and deposited by principals as collateral security in lieu of individual or corporate sureties.

§ 198.90 *Disposition of collateral by Assistant Regional Commissioner.* Assistant Regional Commissioners, on receiving such bonds or notes, or other obligations, pledged and deposited by principals as collateral security in lieu of surety, shall deposit such securities as required by Department Circular No. 154, revised (31 CFR Part 225).

§ 198.91 *Consents of surety.* Consents of surety to a change in the terms of a bond must be executed on Form 1533 in as many copies as are required of the bond which they affect, by the principal and all sureties with the same formality and proof of authority to execute as are required for the execution of bonds. Form 1533 will be used by obligors on collateral bonds as well as those on surety bonds. The Form 1533 must properly identify the bond affected thereby and state specifically and precisely what is covered by the extended terms thereof. If the surety is a corporation, the consent may be executed by an agent or attorney in fact duly authorized so to do by power of attorney filed by the surety with the proper Assistant Regional Commissioner, through the office of the Commissioner; or the consent may be executed by the home office officials, of such corporate surety; except that, in cases where the saving of time is an element, the consent may be executed by an agent or attorney in fact where the home office officials, by specific direction, direct and order its execution. A copy of such specific direction should be attached to each copy of such consent.

§ 198.92 *Approval required.* No individual, firm, partnership, corporation, or association intending to commence or to continue the business of producing volatile fruit-flavor concentrates shall commence such business until all bonds in respect of such business required by any provision of law have been approved by the Assistant Regional Commissioner.

§ 198.93 *Authority to approve.* Assistant Regional Commissioners are authorized to approve all bonds required in this part and consents of surety relating thereto.

§ 198.94 *Cause for disapproval.* Bonds or consents of surety submitted by any individual, firm, partnership, corporation, or association, in respect to the business of a manufacturer of volatile fruit-flavor concentrates, may be disapproved if the individual, firm, partnership, corporation, or association giving the same, or owning, controlling, or actively participating in the management of such business of the individual, firm, partnership, corporation, or association giving the same, shall have been previously convicted in a court of competent jurisdiction of:

(a) Any fraudulent noncompliance with any provision of any law of the United States, if such provision relates to internal revenue or customs taxation of distilled spirits, wines, or fermented malt liquors, or if such an offense shall have been compromised with the individual, firm, partnership, corporation, or association upon payment of penalties or otherwise; or

(b) Any felony under a law of any State, Territory, or the District of Columbia, or the United States, prohibiting the manufacture, sale, importation, or transportation of distilled spirits, wine, fermented malt liquor, or other intoxicating liquor.

§ 198.95 *Appeal to Commissioner.* Where a bond or consent of surety is disapproved by the Assistant Regional Commissioner, the person giving the bond may appeal from such disapproval to the Commissioner.

§ 198.96 *Disapproval of Commissioner final.* The disapproval by the Commissioner of any bond or consent of surety with respect to the commencement or continuance of the business of manufacturing volatile fruit-flavor concentrates shall be final.

§ 198.97 *Additional or strengthening bonds.* In any case where, in the opinion of the Assistant Regional Commissioner, the penal sum of the bond on file and in effect is not sufficient, the principal shall give an additional or strengthening bond in a sufficient penal sum, as provided in § 198.67, provided the surety thereon is the same as on the bond already on file and in effect; otherwise, a new bond covering the entire amount required by the Assistant Regional Commissioner shall be required. Such additional or strengthening bonds, being filed to increase the bond liability of the principal and the surety, shall not be construed in any sense to be substitute bonds, and the Assistant Regional Commissioner shall refuse to approve, or recommend the approval of any additional or strengthening bond where any notation is made thereon intended, or which may be construed, as a release of any former bond, or as limiting the amount of either bond to less than its full penal sum. Additional or strengthening bonds must show the current date of execution and the effective date in the blank spaces provided therefor. Such bonds must have marked thereon, by the obligors at the time of execution, "Additional Bond," or "Strengthening Bond."

§ 198.98 *New bond.* A new bond may be required at any time in the discretion of the Commissioner or Assistant Regional Commissioner. A new bond shall be required immediately in the case of the death, removal, or insolvency of an individual surety, or the insolvency of a corporate surety. Executors, administrators, assignees, receivers, trustees, or other persons acting in a fiduciary capacity, continuing or liquidating the business of the principal, must execute and file a new bond or obtain the consent of the surety or sureties on the existing bond or bonds. When, in the opinion of

the Commissioner or the Assistant Regional Commissioner, the interests of the Government demand it, or in any case where the security of the bond becomes impaired in whole or in part for any reason whatever, the principal will be required to give a new bond. Where a bond is found to be not acceptable, the principal shall be required to file immediately a new and satisfactory bond, or discontinue business forthwith.

§ 198.99 *Superseding bond.* Where a new bond is submitted by the principal to supersede a bond or bonds then in effect, and such superseding bond has been approved, notice of termination of the superseded bond may be issued as provided in Subpart M of this part. Superseding bonds must show the current date of execution and the date they are to be effective, and each such bond shall have marked thereon, by obligors at the time of execution, "Superseding Bonds."

### Subpart I—Plats and Flow Plans

§ 198.105 *Plats and flow plans.* Every person intending to engage in the business of concentrating volatile fruit-flavors pursuant to the regulations in this part must submit to the Assistant Regional Commissioner with his notice, Form 27–G, an accurate plat of the concentrate plant premises and accurate flow plans of the distilling apparatus and equipment, in triplicate, conforming to the requirements of this subpart.

§ 198.106 *Preparation.* Every plat and flow plan shall be drawn to scale. Each plat and flow plan shall bear a distinctive title, and the complete name and address of the proprietor, enabling ready identification. Each sheet of the original plats and flow plans shall be numbered, the first being designated number "1," and the other sheets numbered in consecutive order. The dimensions of plats and flow plans shall be 15" x 20", outside measurement, with a clear margin of at least 1" on each side of the drawing, lettering, and writing. Plats and flow plans shall be submitted on sheets of good quality white paper, tracing cloth, opaque cloth, or sensitized linen. Plats and flow plans may be original drawings, or reproductions made by the "Ditto Process" or by blue or brown line lithoprint, if such reproductions are clear and distinct.

§ 198.107 *Depiction of premises.* Plats must show the outer boundaries of the concentrate plant premises, in feet and inches, in a color contrasting with those used for other drawings on the plat, and they must contain an accurate depiction of the building or buildings comprising the premises. The depiction of the premises should agree with the description in the notice, Form 27–G. If two or more buildings are to be used, they must be shown in their relative position and the designated name or use of each indicated. Where two or more buildings are used for the same purpose, the name of each such building shall include an alphabetical designation, beginning with "A". All first floor exterior openings of each building on the premises will be shown on the plat. If the concentrate plant consists of a room or a floor of a building, an outline of the building, the precise location and designation of the room or floor and the means of ingress from and egress to a public street or yard shall be shown.

§ 198.108 *Rectifying plant within six hundred feet.* Where a concentrate plant is to be established on premises at a distance of less than six hundred feet in a direct line from a rectifying plant, the plat must show the relative location of such premises, all pipe lines and other connections, if any, between them, and the distance, in feet and inches that they are from each other in a direct line. The outline of the two premises must be shown in contrasting colors. (53 Stat. 314; 26 U. S. C. 2819)

§ 198.109 *Contiguous premises.* The plat must show the relative location of any premises on which distilled spirits, wines, beer, lager beer, ale, porter, or other liquors are manufactured or produced, stored, used, or sold, contiguous to the concentrate plant premises, and all pipe lines and other connections, if any, between them, and the distance they are from each other. The outlines of such contiguous premises and the concentrate plant premises must be shown in contrasting colors.

§ 198.110 *Elevational flow plans.* Elevational flow plans (diagrams) shall be submitted covering: (a) Processing material system, (b) distilling system, and (c), if any, the concentrate receiving and storage tank systems. Such flow plans shall clearly depict all equipment in its relative operating sequence, and elevation by floors, with all connecting pipe lines, valves, flanges, measuring devices, etc. The elevation by floors on the flow plans may be indicated by horizontal lines representing floor levels. All of the flow plans as a unit must show the flow of the processing material, and the resulting products, from the processing material feed tank through the evaporators, stills, condensers, sight boxes, and other equipment and the deposit and removal of the finished concentrate from the concentrate receiving tanks, if any. All major equipment, such as tanks, evaporators, stills, condensers, etc., must be identified on these flow plans as to number and use. The elevational flow plans must be so drawn that all fixed pipe lines connected with the distilling system may be readily traced from beginning to end, and the direction of flow through the equipment must be indicated by arrows. Other types of drawings that clearly depict the information required herein may be submitted in compliance with this section.

§ 198.111 *Certificate of accuracy.* The plat and plans shall bear a cerificate of accuracy in the lower right-hand corner of each sheet, signed by the proprietor, the draftsman and the Assistant Regional Commissioner, substantially in the following form:

---
(Name of proprietor)

---
(Address)

Approved: ---
(Date)

---
(Assistant Regional Commissioner)

Accuracy certified by:

---
(Name and capacity for the proprietor)

---
(Draftsman)

---- 19 ---- Sheet No. ----

§ 198.112 *Revised plats and plans.* The sheets of revised plats and plans shall bear the same number as the sheets superseded, but will be given a new date. Any additional plats and plans shall be given a new number in consecutive order, or will be otherwise numbered and lettered in such manner as will permit the filing of the plats and plans in proper sequence.

### Subpart J—Requirements Governing Changes in Name, Proprietorship, Control, Location, Premises and Equipment

§ 198.120 *General requirements.* Where any change in the location, form, capacity, ownership, agency, superintendency, or in the persons interested in the business of operating a concentrate plant, is made, written notice must be given to the Assistant Regional Commissioner within 10 days, and in the form prescribed in this subpart.

#### Change in Individual, Firm, or Corporate Name

§ 198.121 *Notice, Form 27–G.* Where there is to be a change in the individual, firm, or corporate name of the proprietor, the proprietor must submit to the Assistant Regional Commissioner notice on Form 27–G, in triplicate, covering the new name.

§ 198.122 *Sign.* Where there is to be a change in the individual, firm, or corporate name of the proprietor, the proprietor must change the concentrate plant sign to conform with the provisions of Subpart E of this part.

§ 198.123 *Records.* Where there is to be a change in the individual, firm, or corporate name of the proprietor, the proprietor must keep records covering operations under the new name to conform with the provisions of Subpart P of this part.

#### Change in Proprietorship

§ 198.124 *Notice, Form 27–G.* If the outgoing proprietor is to discontinue permanently the business of concentrating volatile fruit-flavors, Form 27–G, in triplicate, stating thereon the purpose to be "Discontinuance of Business," and giving the date of the discontinuance, must be filed with the Assistant Regional Commissioner.

§ 198.125 *Registry of stills.* Where there is to be a change in proprietorship of the concentrate plant, the outgoing proprietor must register the stills "Not for Use" on Form 26, in triplicate, in accordance with the provisions of Subpart N of this part.

§ 198.126 *Records.* Where there is to be a change in proprietorship of the concentrate plant, the outgoing proprietor must make appropriate entry in the concentrate plant records in accordance with the provisions of Subpart P of this part.

§ 198.127 *Non-fiduciary successor.* If the change in proprietor is brought about by any means, except by the appointment of an administrator, executor, receiver, trustee, assignee, or other fiduciary, the successor must qualify in the same manner as the proprietor of a new concentrate plant, except that he may adopt the plat and plans of his predecessor as provided in § 198.129.

§ 198.128 *Fiduciary.* If the successor is an administrator, executor, receiver, trustee, assignee, or other fiduciary, and intends to manufacture volatile fruit-flavor concentrates, he must comply with the provisions of Subpart G of this part, to the extent that such provisions are applicable. The fiduciary may adopt the plat and plans of the predecessor in accordance with § 198.129. The fiduciary must also furnish certified copies, in triplicate, of the order of the court or other pertinent documents showing the qualification as such fiduciary. The effective date of the qualifying documents filed by a fiduciary must be the same as the date of the court order, or the day specified therein, for him to assume control.

§ 198.129 *Adoption of plat and plans.* The plat and plans of the concentrate plant may be adopted by a successor where they clearly describe and depict the premises and the building, apparatus, and equipment thereon, to be taken over by the successor. The adoption by a successor of the plat and plans of a predecessor shall be in the form of a certificate, in triplicate, in which shall be set forth the name of the predecessor, the address and number of the concentrate plant, the number of each sheet comprising each plat and plan covered by such certificate, and a statement that the concentrate plant premises, and the building, apparatus, and equipment thereon, are correctly described and depicted on such plat and plans.

§ 198.130 *Sign.* The successor, if other than a fiduciary temporarily operating the concentrate plant, must change the concentrate plant sign to conform to the requirements of Subpart E of this part.

§ 198.131 *Materials and concentrates.* If processing materials and concentrates are received by transfer from the predecessor, the successor must comply with the requirements of Subpart P of this part.

#### Other Changes

§ 198.132 *Change in partnership.* The withdrawal of one or more members of a partnership or the taking in of a new partner, whether active or silent, shall constitute a change in proprietorship. Likewise, the bankruptcy or adjudicated insolvency of one or more of the copartners results in a dissolution of the partnership and, consequently, a change in proprietorship. Where such a change in proprietorship occurs, the successor must qualify in the same manner as a new proprietor, except that the successor may adopt the plats and plans of the predecessor, as provided in § 198.129.

§ 198.133 *Changes in stockholders, officers, and directors of corporations.* The sale or transfer of the capital stock of a corporation operating a concentrate plant does not constitute a change in the proprietorship of such plant. However, where the sale or transfer of capital stock results in a change in the control or management of the business, or where there is a change in the officers or directors, the proprietor, within 10 days, must give notice thereof, in triplicate, to the Assistant Regional Commissioner. Mere change in stockholders of corporations not constituting a change in control need not be so reported.

§ 198.134 *Reincorporation.* Where a corporation operating a concentrate plant is reorganized and a new charter or certificate of incorporation is secured, the new corporation must qualify in the same manner as a new proprietor of the concentrate plant, except that the new corporation may adopt the plat and plans of the predecessor, as provided in § 198.129.

§ 198.135 *Change in the location of the concentrate plant.* The proprietor must comply with the applicable provisions of Subparts C through I of this part, where there is a change in location.

§ 198.136 *Change in premises.* Where the concentrate plant premises are to be extended or curtailed, and prior to the use of the extended or curtailed premises, the proprietor must file with the Assistant Regional Commissioner an amended notice, Form 27–G, and an amended plat of the premises as extended or curtailed. If the plans are affected by the extension or curtailment they also must be amended.

§ 198.137 *Changes in equipment.* Where changes are to be made in the apparatus and equipment of the distilling department, which changes would affect the accuracy of the notice, plat, or plans, the proprietor shall first secure approval thereof by the Assistant Regional Commissioner pursuant to application, in triplicate, setting forth specifically the proposed changes: *Provided*, That emergency repairs may be made without prior approval of the Assistant Regional Commissioner. Where such emergency repairs are made, the proprietor shall file immediately a report thereof, in triplicate, with the Assistant Regional Commissioner. Upon completion of changes in equipment, where such changes affect the accuracy of the notice, plats, or plans, the proprietor must file an amended notice and amended plans, except that, in the case of minor changes such as general repairs, changes in pipe lines, or the addition or removal of a tank, an amended notice and amended plans need not be filed immediately: *Provided*, That the Commissioner or Assistant Regional Commissioner may, at any time, in his discretion require the filing of an amended notice and amended plans covering such minor changes. Where an amended notice and amended plans are not filed immediately upon completion of minor changes in equipment, the proprietor must include such changes in the next amended notice and plans filed by him.

### Subpart K—Action by Assistant Regional Commissioner

#### Original Establishments

§ 198.145 *Special application.* Where a special application for permission to operate a concentrate plant within six hundred feet of a rectifying plant is submitted, and such special application conforms to the requirements of this part, the Assistant Regional Commissioner will cause an inspection to be made to determine whether the proposed operation of the concentrate plant within six hundred feet of the rectifying plant may be permitted without jeopardy to the revenue. The inspector will ascertain whether the application accurately describes the relative location of the two premises and all pipe lines and other connections, if any, between such premises. The inspector will also observe the surroundings, including all streets, roads, and driveways connecting the two premises, and any condition which might endanger the revenue, and will describe the same in his report. If the Assistant Regional Commissioner finds, upon consideration of the inspection report, that the concentrate plant may be operated at the designated location without danger to the revenue, he will note his approval on all copies of the special application. He will then return one copy of the approved application to the applicant, retain the original for his files, and forward the remaining copy, together with a copy of the inspection report, to the Commissioner. Approval of the special application pertains to the location of the concentrate plant only, and does not authorize the operation thereof. The concentrate plant may not be operated until the other qualifying documents required by law and this part have been approved by the Assistant Regional Commissioner. If the special application is disapproved, the Assistant Regional Commissioner will note his disapproval thereon and will return all copies of such application to the applicant, with advice as to the reasons for disapproval. (53 Stat. 314; 26 U. S. C. 2819)

§ 198.146 *Examination of qualifying documents.* Upon receipt of notice, plat, plans, bond, and other documents required by this part, of persons intending to engage in the business of producing volatile fruit-flavor concentrates, the Assistant Regional Commissioner shall examine the same to determine whether they have been properly executed, and whether they reflect compliance with the requirements of the law and regulations. Where any required document has not been filed, or where errors or discrepancies are found in those filed, or where the documents filed do not reflect compliance with this part, action thereon will be held in abeyance until the omission or material errors or discrepancies,

have been rectified, and there has been full compliance with all requirements.

§ 198.147 *Inspection of premises.* Where the required documents have been filed in proper form, the Assistant Regional Commissioner shall assign an inspector to examine the premises, buildings, apparatus, and equipment, and determine whether they conform with the description thereon in the notice, plat and plans, and whether the apparatus and equipment, and measures of protection to the revenue afforded meet the requirements of the law and regulations. The inspector shall observe particularly the manner in which the rooms or buildings on the premises are separated from other premises, or other rooms or buildings, the means of communication, of ingress and egress, and the construction of the distilling apparatus and equipment. Where the inspection discloses minor irregularities in the qualifying documents, or in construction, the inspector shall, at the time of the discovery, direct the attention of the proprietor to such irregularities in order that the proprietor may correct the discrepancies before completion of the inspection. Upon completion of the inspection, a report thereof shall be submitted to the Assistant Regional Commissioner.

§ 198.148 *Inaccurate documents.* Where the Assistant Regional Commissioner's examination, or the inspector's report, discloses discrepancy in the qualifying documents, the inaccurate or incomplete documents shall be returned to the proprietor for correction. A record of any bonds so returned shall be maintained.

§ 198.149 *Defective construction.* Where it is found that the construction of the distilling apparatus or equipment does not conform to the requirements of the law and regulations, the Assistant Regional Commissioner shall inform the proprietor concerning the defects, and further action must be held in abeyance pending correction thereof.

§ 198.150 *Bonds and consents of surety.* All bonds and consents of surety required to be filed by manufacturers of concentrates shall be approved or disapproved by the Assistant Regional Commissioner.

§ 198.151 *Inquiry by Assistant Regional Commissioner.* Before approving any bond or consent of surety given by any individual, firm, partnership, corporation, or association, in respect to the business of a concentrate manufacturer, the Assistant Regional Commissioner shall make such inquiry or investigation as may be deemed necessary to ascertain whether such individual, firm, partnership, corporation, or association, or any person owning, controlling, or actively participating in the management of the business has been convicted of, or has compromised, an offense of the nature specified in § 198.94.

§ 198.152 *Approval of bond.* If the Assistant Regional Commissioner finds that the person seeking to qualify as a proprietor has complied in all respects with the requirements of law and this part, he shall note his approval on all copies of the bond, and his approval on all copies of the notice, plat, and plans.

§ 198.153 *Disapproval of qualifying documents.* If the Assistant Regional Commissioner finds that the applicant has not complied in all respects with the requirements of the law and regulations, or that the individual, firm, partnership, corporation, or association intending to commence business as a manufacturer of concentrates, or any person owning, controlling, or actively participating in the management of such business, has been convicted of, or has compromised, an offense of the nature specified in § 198.94, or, if he finds that the situation of the premises is in other respects such as would enable the proprietor to defraud the United States, he shall disapprove the bond, notice, plat, plans, and other documents.

§ 198.154 *Appeal to Commissioner.* Where a bond or consent of surety is disapproved by the Assistant Regional Commissioner, and an appeal is taken to the Commissioner, the Assistant Regional Commissioner shall furnish the Commissioner with full information respecting the disapproval, stating the nature of the offense, the names of the offenders, the date of conviction, or the date of acceptance of an offer in compromise, and all other reasons for his action. The Commissioner will grant a hearing in the matter if the parties so request at the time appeal is taken from the action of the Assistant Regional Commissioner.

§ 198.155 *Disposition of qualifying documents.* Where the bond or consent of surety is approved by the Assistant Regional Commissioner, he shall assign a registry number to the concentrate plant, in accordance with the provisions of § 198.156, and shall forward the original copy of the bond, and the original copies of the notice, plat, plans, and other qualifying documents, together with a copy of all inspection reports, to the Commissioner, return one copy of the bond, notice, plat, plans, and other qualifying documents to the proprietor, retain one copy of each such qualifying document for the file of the proprietor, and authorize the proprietor to commence operations. If the bond or consent of surety is disapproved by the Assistant Regional Commissioner all copies thereof shall be returned to the principal, and the surety or sureties shall be notified of such action. The Assistant Regional Commissioner shall promptly advise the Commissioner fully regarding the disapproval of any bond. If the bond or consent of surety has been disapproved, the Assistant Regional Commissioner shall return all copies of other qualifying documents to the proprietor with advice as to the reasons for disapproval.

§ 198.156 *Registry numbers.* Concentrate plants will be numbered serially in the order of their establishment. A separate series shall be used for each State. Registry numbers assigned to discontinued concentrate plants will not be reassigned to other concentrate plants. The same registry number shall be continued whenever there is a change of proprietorship.

CHANGES SUBSEQUENT TO ESTABLISHMENT

§ 198.157 *Procedure applicable.* The provisions of this subpart, respecting the action required of Assistant Regional Commissioners in connection with the establishment of concentrate plants shall be followed, to the extent applicable, where there is a change in the individual, firm, or corporate name of the proprietor, or where there is a change in the proprietorship, location of premises, distilling apparatus and equipment, of the concentrate plant, or where operations are permanently discontinued.

CONSENTS OF SURETY, AND ADDITIONAL AND SUPERSEDING BONDS

§ 198.158 *Procedure applicable.* The procedure prescribed herein for the approval and disapproval of notices and bonds submitted in connection with the establishment of concentrate plants will, to the extent applicable, govern the approval and disapproval of consents of surety, and additional and superseding bonds.

### Subpart L—Action by Commissioner

ORIGINAL ESTABLISHMENT

§ 198.165 *Review of documents.* The Commissioner will review the qualifying documents, and determine that they are properly executed, and in conformity with the requirements of law and regulations concerning construction and establishment. Where the documents are found to be in conformity with the above requirements, they will be accepted for filing by the Commissioner. If such documents are not in conformity with the above requirements, the Commissioner will return them to the Assistant Regional Commissioner with the necessary instructions for correction.

CHANGES SUBSEQUENT TO ORIGINAL ESTABLISHMENT

§ 198.166 *Procedure applicable.* The provisions of § 198.165 concerning the action of the Commissioner in connection with the establishment of concentrate plants shall be followed to the extent applicable, where there is a change in individual, firm, or corporate name, or where there is a change in the proprietorship, location, premises, or distilling apparatus and equipment, of the concentrate plant.

### Subpart M—Termination of Bonds

§ 198.170 *Termination of bond.* The manufacturer's bond, Form 1694 may be terminated as to future liability (a) pursuant to application by the surety as provided in § 198.171 or (b) pursuant to approval of a superseding bond or discontinuance of business by the principal. Application for termination of a manufacturer's bond upon approval of a superseding bond or discontinuance of the business, must be filed in duplicate with the Assistant Regional Commissioner.

§ 198.171 *Application of surety for relief from bond.* A surety on any bond required by this part may at any time in writing, notify the principal and the Assistant Regional Commissioner in whose office the bond is on file that he desires, after a date named, which shall be at least 60 days after the date of such notification, to be relieved of liability under said bond. The notice shall be executed in triplicate by the surety, who shall deliver one copy to the principal and two copies to the Assistant Regional Commissioner, who shall retain one copy and transmit one copy to the Commissioner. This notice may not be given by an agent of the surety unless it is accompanied by a power of attorney, duly executed by the surety, authorizing him to give such notice, or by a verified statement that such power of attorney is on file with the department. The surety must also file with the Assistant Regional Commissioner an acknowledgement or other proof of service of such notice on the principal.

§ 198.172 *Extent of release of surety from liability.* If such notice is not thereafter in writing withdrawn, the rights of the principal as supported by said bond shall be terminated on the date named in the notice, and the surety shall be relieved from liability for concentrates, and fruit juice or mash, which are produced or received wholly subsequent to the date named in the notice. If the concentrate manufacturer files a valid superseding bond on Form 1694 prior to the date named in the surety's notice, the surety shall also be relieved from liability for concentrates and juice or mash on hand at the concentrate plant on said date. If the principal fails to file such superseding bond, the surety, notwithstanding his release from liability as specified above, shall continue to remain liable under the bond for all concentrates and juice or mash on hand at the concentrate plant on said date, until such concentrate and juice or mash have been lawfully disposed of or a new bond has been filed by the principal covering the same. Liability under the bond, Form 1694, for concentrate, and fruit juice or mash, produced, received, or removed thereunder prior to the date named in the surety's notice shall continue until such concentrates, and fruit juice or mash, are properly accounted for according to law and regulations, regardless of whether the principal files a superseding bond.

§ 198.173 *Notice of release of surety from liability.* If the principal files a valid superseding bond prior to the date named in the surety's notice, the Assistant Regional Commissioner shall issue "Notice of Release" on Form 1491, in accordance with § 198.175. Where the principal fails to file such superseding bond, the Assistant Regional Commissioner shall, by letter, notify the surety of such fact and of his continued liability under the bond for concentrates and juice or mash on hand at the concentrate plant on said date. The Assistant Regional Commissioner shall also at such time notify the concentrate manufacturer that no further operations may be conducted at the concentrate plant until a valid bond is filed and approved. The Assistant Regional Commissioner will forward a copy of each such letter to the Commissioner.

§ 198.174 *Action on application for termination of bond.* When an application for the termination of a manufacturer's bond as to future liability is filed with the Assistant Regional Commissioner in a case where a superseding bond has been approved, or the principal has discontinued business, as provided in § 198.170, the Assistant Regional Commissioner shall retain one copy of such application and forward one copy to the Commissioner, with his recommendation. The Assistant Regional Commissioner shall, before forwarding the application to the Commissioner, make a complete examination of records to determine whether there is any liability then due and payable outstanding against the bond. He shall also ascertain from the District Director of Internal Revenue whether there are any outstanding unpaid assessments against the principal. If it is found that violations of law or regulations occurred during the period covered by the bond and that penalties incurred or fines imposed have not been paid, or that outstanding assessments, or demands for payment of taxes, chargeable against the bond have not been paid or otherwise settled, no further action will be taken until all such liabilities have been settled.

§ 198.175 *Notices, Forms 1490 and 1491.* Upon approval of the application for termination of a manufacturer's bond, the Assistant Regional Commissioner will execute Form 1490, where a superseding bond has been approved, or Form 1491, where the principal has discontinued business, in quadruplicate (in quintuplicate if there are two sureties), and will forward the original to the Commissioner, one copy to each obligor on the bond, and retain one copy on file with the bond to which it relates.

§ 198.176 *Release of collateral.* The release of collateral pledged and deposited to support bonds required by the regulations in this part shall be in accordance with the provisions of Department Circular No. 154, revised (31 CFR Part 225), subject to the conditions governing the issuance of notices on Forms 1490 and 1491 of the termination of such bonds. When the Assistant Regional Commissioner determines that there is no outstanding liability against the bond, he will fix the date or dates on which a part or all of the security may be released. In fixing such date, which ordinarily will be not less than six months from the date of such determination, the Assistant Regional Commissioner shall satisfy himself that the interests of the Government will not be jeopardized. At any time prior to the release of such security the Assistant Regional Commissioner may, in his discretion and for proper cause, further extend the date of release of such security for such additional length of time as in his judgment may be appropriate.

### Subpart N—Suspension or Discontinuance of Business

§ 198.180 *Form of notice.* Any proprietor of a concentrate plant desiring to suspend operations in connection with the production, use, and removal of concentrates for an indefinite period, or for a definite period exceeding 15 days, shall give notice to such effect, on Form 27–G, in triplicate, to the Assistant Regional Commissioner, stating when he will suspend operations. The giving of such notice will not be required where operations are temporarily suspended. The proprietor shall fix in the notice, the time and date when operations shall be suspended.

§ 198.181 *Registry of stills.* The temporary suspension of operations at a concentrate plant does not necessitate reregistration of stills. The operations of a concentrate plant by alternating proprietors, where no permanent change in ownership occurs does not require registry of the stills by the proprietors. Where there is a change in location or use, or a bona fide change in ownership of a still, the still must be registered to reflect the change. The Assistant Regional Commissioner shall, upon approving the registration of a still on Form 26, retain one copy, forward one copy to the Commissioner and return the remaining copy to the proprietor. The proprietor shall retain his copy at the concentrate plant premises, available for inspection by Government officers.

### Subpart O—Plant Operations

§ 198.190 *Compliance with requirements of law and regulations.* Under no circumstances shall any person produce concentrates until compliance with all the requirements of law and this part, and the required notice, Form 27–G, and supporting documents have been approved in accordance with provisions of this part.

§ 198.191 *Inspection of premises and records.* All persons manufacturing concentrates pursuant to the provisions of this part shall permit any internal revenue officer to inspect the premises, equipment, stocks, and records, at any reasonable hour, as well by night as by day, as required by law. (53 Stat. 317; 26 U. S. C. 2827, 2828)

COMMENCEMENT OF OPERATIONS

§ 198.192 *Processing material.* The proprietor of a concentrate plant may produce processing material on his premises to be used in the manufacture of concentrates or such processing material may be produced elsewhere and transported to the concentrate plant. Processing material must be measured when produced or, if produced elsewhere, when received on the premises. The production or receipt of such materials shall be recorded in a record to be maintained by the proprietor, as provided in § 198.201. This record shall also show the name and address of the person from whom received. If processing material is stored on the premises, and it is desired to remove the same for any purpose whatsoever, the proprietor shall enter on his record the kind and quantity so removed, the name and address of the person to whom disposed of, and the reason therefor.

§ 198.193. *Use of processing material.* The proprietor may use processing ma-

terial produced, and received as set forth in § 198.192, if it contains no more alcohol than is reasonably unavoidable. To this end, fermented processing material must not be used in the manufacture of a concentrate. The proprietor must use processing material as soon as produced, or as soon thereafter as it is practicable.

§ 198.194 *Quantity of processing material to be determined.* The proprietor shall determine the number of gallons of processing material fed to the evaporator and shall enter the same on his record, as provided in § 198.201.

§ 198.195 *Quantity and alcohol content of concentrate produced to be determined.* As to each lot of processing material processed, the total quantity of concentrate produced therefrom and the alcohol content of such concentrate shall be determined and recorded. The alcohol content shall be determined by the use of a standard hydrometer and in accordance with the provisions of the Gauging Manual (26 CFR Part 186).

§ 198.196 *Removal of concentrate.* Concentrate which is fit for use as a beverage may not be removed from the place of manufacture. Such concentrate, may, however, be used on the premises in the completion of the manufacture of any product authorized to be made by the provisions of § 198.29, if such products contain less than one-half of one percent alcohol by volume. Where the alcoholic content of any concentrate exceeds six percent but not more than fifteen percent of alcohol by volume, and it is desired to remove such concentrate from the premises, there shall be added to each gallon thereof not less than:

(a) $8\frac{3}{10}$ pounds of sucrose; or

(b) $2\frac{1}{2}$ ounces of any one of the following:

(1) Malic acid;

(2) Citric acid;

(3) Tartaric acid.

Concentrate containing not more than six percent alcohol by volume may be removed from the premises without being modified by the addition of any substance; unless the Commissioner finds that the concentrate is fit for use as a beverage and requires the addition thereto of the materials specified in paragraphs (a) or (b) of this section.

§ 198.197 *Label.* Each container of concentrate shall have affixed thereto, at the time of filling, a label showing: (a) The name of the proprietor; (b) the registry number of the plant and the State in which located; and (c) the address of the plant, as shown on the notice, Form 27–G.

**Subpart P—Proprietor's Records and Reports**

§ 198.200 *General.* The proprietor of every concentrate plant shall keep commercial records and render reports on Form 1695 as hereinafter provided.

§ 198.201 *Commercial records.* The proprietor shall keep commercial records showing daily, the production, receipt, and use of processing material, the use of flashed juice or mash, the production of concentrate and the percent, by volume, of alcohol contained therein, the removal or use of concentrates, and the removal of articles manufactured from juice or mash, and flashed juice or mash. The names and addresses of the persons from whom processing materials are received and the names and addresses of the persons to whom concentrates are disposed of shall be shown on these records. The commercial records shall also show the receipt and use of substances that are used to render concentrates unfit for use as a beverage in accordance with the provisions of § 198.196.

§ 198.202 *Retention of commercial records.* Commercial records shall be maintained on the premises available for inspection by Government officers at all reasonable hours as provided in § 198.191. Such commercial records shall be retained as permanent records for a period of not less than four years.

§ 198.203 *Report, Form 1695.* Entries on Form 1695 shall be made as indicated by the headings of the various columns, and lines, and in accordance with the instructions on the form and as set forth in this part. The entries must be made by the proprietor, or by his agent from personal knowledge or from data furnished by the proprietor. At the close of the month, but in no case later than the tenth day of the succeeding month, the proprietor shall prepare and forward two copies of the Form 1695 to the Assistant Regional Commissioner.

§ 198.204 *Execution.* The monthly report, Form 1695, shall be signed by the proprietor or his authorized agent and shall be verified by a written declaration that it is made under the penalties of perjury. Where the report is signed by an agent, proper power of attorney authorizing the agent to execute the report for the proprietor must be filed in triplicate, with the Assistant Regional Commissioner. (63 Stat. 667; 26 U. S. C. 3809)

§ 198.205 *Permanent record.* One copy of the Form 1695 shall be retained by the proprietor as a permanent record, in bound form, and shall be kept on the premises available for inspection by Government officers at all reasonable hours.

§ 198.206 *Requirements where change in proprietorship occurs.* When a succession or change in the proprietorship of the concentrate plant occurs, the outgoing proprietor shall enter on his record, Form 1695, an account of all processing material and concentrates transferred to his successor, who shall in turn enter such items on his report, Form 1695, as received from his predecessor. The outgoing proprietor shall make appropriate notation on all forms and records required to be kept by him, showing the change in the proprietor and the date thereof.

§ 198.207 *Audit of reports, Form 1695, by Assistant Regional Commissioner.* The Assistant Regional Commissioner shall, after audit and not later than the last day of the month succeeding that for which the reports are rendered, forward one copy of Form 1695 to the Commissioner and retain the remaining copy.

*Effective date.* The provisions of this part shall be effective December 1, 1953.

[SEAL] T. COLEMAN ANDREWS,
*Commissioner of Internal Revenue.*

Approved:

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

## TITLE 7—AGRICULTURE

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 8]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.308 *Navel Orange Regulation 8*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on December 3, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period specified in this section; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., December 13, 1953, and ending at 12:01 a. m., P. s. t., August 1, 1954, no handler shall handle any Navel oranges, grown in District 2, which are of a size smaller than 2.31 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 5 percent, by count, of oranges smaller than such minimum size, but not less than 2.20 inches in diameter, shall be permitted: *Provided*, That in determining the percentage of oranges which are smaller than 2.31 inches in diameter, such percentage shall be based only on those oranges which are of a size 2.43 inches in diameter and smaller, but oranges in any container must average not less than a diameter of 2.375 inches. The aforesaid tolerance is on a container basis but individual packages in any lot may contain not more than double the tolerance specified: *Provided*, That the average for the entire lot is within the tolerance specified: *Provided further*, That at least one orange which does not meet the requirements shall be permitted in any one package.

(2) As used in this section, "handler," "handle," and "District 2," shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of December 1953.

S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[F. R. Doc. 53–10370; Filed, Dec. 11, 1953; 8:49 a. m.]

---

[Navel Orange Reg. 9]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.309 *Navel Orange Regulation 9*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on December 10, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., December 13, 1953, and ending at 12:01 a. m., P. s. t., December 20, 1953, is hereby fixed as follows:

(i) District 1: 400 carloads;

(ii) District 2: 57.25 carloads;

(iii) District 3: 145 carloads;

(iv) District 4: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section "handled," "handler," "carloads," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 11th day of December 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[Lemon Reg. 515]

## PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### LIMITATION OF SHIPMENTS

§ 953.626 *Lemon Regulation 515*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 18 F. R. 6767), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on December 9, 1953, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., December 13, 1953, and ending at 12:01 a. m., P. s. t., December 20, 1953, is hereby fixed as follows:

(i) District 1: 25 carloads;

(ii) District 2: 130 carloads;

(iii) District 3: 20 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2" and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 10th day of December 1953.

# TITLE 14—CIVIL AVIATION

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 23]

## PART 600—DESIGNATION OF CIVIL AIRWAYS

### ALTERATIONS

The civil airway alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 600 is amended as follows:

1. Section 600.12 *Green civil airway No. 2 (Seattle, Wash., to Boston, Mass.)* is amended by deleting the following: "Lone Rock, Wis., radio range station;", and by adding the following in lieu thereof: "the intersection of the southeast course of the La Crosse, Wis., radio range and the west course of the Madison, Wis., radio range;"

2. Section 600.214 *Red civil airway No. 14 (Lone Rock, Wis., to Bowling Green, Ky.)* is amended by deleting the portion which reads: "From the Lone Rock, Wis., radio range station via the Rockford, Ill., radio range station;", and by adding the following in lieu thereof: "From the intersection of the southeast course of the La Crosse, Wis., radio range and the west course of the Madison, Wis., radio range via the Rockford, Ill., radio range station;"

3. Section 600.631 *Blue civil airway No. 31 (Burlington, Iowa, to Madison, Wis.)* is amended by changing the last portion to read: "From the intersection of the south course of the Madison, Wis., radio range and the northwest course of the Rockford, Ill., radio range to the Madison, Wis., radio range station."

4. Section 600.639 *Blue civil airway No. 39 (Savannah, Ga., to Elmira, N. Y.)* is amended between the Morgantown, W. Va., radio range station and the Elmira, N. Y., radio range station to read: "Morgantown, W. Va., radio range station to the New Alexandria, Pa., nondirectional radio beacon. From the intersection of the southwest course of the Elmira, N. Y., radio range and the east course of the Philipsburg, Pa., radio range to the Elmira, N. Y., radio range station."

5. Section 600.647 *Blue civil airway No. 47 (Blackstone, Va., to Dunkirk, N. Y.)* is amended between the Altoona, Pa., radio range station and the Dunkirk, N. Y., nondirectional radio beacon to read: "Altoona, Pa., radio range station; Philipsburg, Pa., radio range station; Bradford, Pa., nondirectional radio beacon to the Dunkirk, N. Y., nondirectional radio beacon."

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 302, 52 Stat. 985, as amended; 49 U. S. C. 452)

This amendment shall become effective 0001, e. s. t., December 15, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-10346; Filed, Dec. 11, 1953; 8:45 a. m.]

[Amdt. 23]

## PART 601—DESIGNATION OF CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS

The control area, control zone and reporting point alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act

would be impracticable and contrary to public interest and therefore is not required.

Part 601 is amended as follows:

1. Section 601.1100 is amended to read:

§ 601.1100 *Control area extension (Lone Rock, Wis.).* That airspace within a 15-mile radius of the Lone Rock omnirange station including the airspace within 5 miles either side of the 24° True radial of the omnirange extending from the omnirange station to a point 25 miles northeast.

2. Section 601.1101 is amended to read:

§ 601.1101 *Control area extension (Madison, Wis.).* Within 5 miles either side of a line bearing 183° True from the Madison, Wis., outer marker extending from the outer marker to a point 25 miles south.

3. Section 601.2110 is amended to read:

§ 601.2110 *Lone Rock, Wis., control zone.* Within a 5-mile radius of the Municipal Airport and within 2 miles either side of the 24° True and 204° True radials of the Lone Rock omnirange extending from the Municipal Airport control zone to a point 10 miles northeast of the omnirange station.

4. Section 601.2112 is amended to read:

§ 601.2112 *Madison, Wis., control zone.* Within a 5-mile radius of Truax Field, within 2 miles either side of the east course of the Madison radio range extending from the radio range station to a point 10 miles east, and within 2 miles of lines bearing 183° True and 03° True from the outer marker extending from the Truax Field control zone to a point 10 miles south of the outer marker.

5. Section 601.4012 *Green civil airway No. 2 (Seattle, Wash., to Boston, Mass.)* is amended by deleting the following reporting point: "Lone Rock, Wis., radio range station;" and by substituting the following reporting point in lieu thereof: "the intersection of the southeast course of the La Crosse, Wis., radio range and the west course of the Madison, Wis., radio range;"

6. Section 601.7001 *Domestic VOR reporting points* is amended by changing the following reporting point to read:

Walton Intersection: The intersection of the Moline, Ill., omnirange 088° True and the Bradford, Ill., omnirange 360° True radials.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective 0001, e. s. t., December 15, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-10347; Filed, Dec. 11, 1953; 8:45 a. m.]

[Amdt. 52]

## PART 610—MINIMUM EN ROUTE IFR ALTITUDES

### ALTERATIONS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows:

1. Section 610.12 *Green civil airway No. 2* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| La Crosse, Wis. (LFR) | Lone Rock (INT), Wis. | 2,500 |
| Lone Rock (INT), Wis. | Madison, Wis. (LFR) | 2,500 |

2. Section 610.104 *Amber civil airway No. 4* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Sioux City, Iowa (LFR | Sioux Falls, S. Dak. (LFR). | 3,000 |

3. Section 610.208 *Red civil airway No. 8* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Liberty [1] (INT), Ohio | Wright-Patterson, [2] Ohio (LFR). | 3,000 |

[1] 3,000'—Minimum crossing altitude at Liberty (INT), eastbound.
[2] 3,000'—Minimum crossing altitude at Wright-Patterson (LFR), westbound.

4. Section 610.208 *Red civil airway No. 8* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Williamsport, Pa. (LFR). | Crystal Lake, Pa. (LF/RBN). | 4,000 |

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 814 ]

### 1954 SUGAR QUOTA FOR MAINLAND CANE SUGAR AREA

NOTICE OF HEARING ON PROPOSED ALLOTMENT

Pursuant to the authority contained in the Sugar Act of 1948, as amended (61 Stat. 922, as amended by 65 Stat. 318; 7 U. S. C. Sup. 1100), and in accordance with the applicable rules of practice and procedure (12 F. R. 8225, 13 F. R. 127, 2063; 7 CFR 801, et seq.), and on the basis of information before me, I do hereby find that the allotment of the 1954 sugar quota for the Mainland Cane Sugar Area is necessary to prevent disorderly marketing and to afford all interested persons an equitable opportunity to market sugar, and hereby give notice that a public hearing will be held at the Hotel Monteleone, New Orleans, Louisiana, on January 6, 1954, beginning at 10:00 a. m., c. s. t.

The purpose of such hearing is to receive evidence to enable the Secretary of Agriculture to make a fair, efficient, and equitable distribution of the abovementioned quota among persons who market sugar processed from sugarcane produced in the Mainland Cane Sugar Area.

The finding made above is in the nature of a preliminary finding based on the best information now available. It will be appropriate at the hearing to present evidence on the basis of which the Secretary may affirm, modify, or change such preliminary finding and make or withhold allotment of any such quota in accordance therewith.

In addition, the subjects and issues of this hearing also include (1) the manner in which the statutory factors of "processings from proportionate shares," "past marketings," and "ability to market," as provided in section 205 (a) of the said act, should be measured; and (2) the relative weightings which should be given to these factors.

Issued this 8th day of December 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

### [ 7 CFR Part 814 ]

### 1954 SUGAR QUOTA FOR DOMESTIC BEET SUGAR AREA

NOTICE OF HEARING ON PROPOSED ALLOTMENT

Pursuant to the authority contained in the Sugar Act of 1948, as amended (61 Stat. 922, as amended by 65 Stat. 318; 7 U. S. C. Sup. 1100), and in accordance with the applicable rules of practice and procedure (12 F. R. 8225, 13 F. R. 127, 2063; 7 CFR 801, et seq.), and on the basis of information before me, I do hereby find that the allotment of the 1954 sugar quota for the domestic beet sugar area is necessary to prevent disorderly marketing and to afford all interested persons an equitable opportunity to market sugar, and hereby give notice that a public hearing will be held at the Congress Hotel, Chicago, Illinois, on January 18, 1954, beginning at 10:00 a. m., c. s. t.

The purpose of such hearing is to receive evidence to enable the Secretary of Agriculture to make a fair, efficient, and equitable distribution of the above-

mentioned quota among persons who market sugar processed from sugar beets produced in the domestic beet sugar area.

The finding made above is in the nature of a preliminary finding based on the best information now available. It will be appropriate at the hearing to present evidence on the basis of which the Secretary may affirm, modify, or change such preliminary finding and make or withhold allotment of any such quota in accordance therewith.

The subjects and issues of this hearing include (1) the manner in which the statutory factors of "processings from proportionate shares," "past marketings," and "ability to market," as provided in section 205 (a) of the said act, should be measured; and (2) the relative weightings which should be given to these factors.

Issued this 8th day of December 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## [ 7 CFR Part 961 ]

[Docket No. AO-160-A-14-RO1]

### HANDLING OF MILK IN THE PHILADELPHIA, PA., MARKETING AREA

### DECISION WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND A PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Philadelphia, Pennsylvania, on August 12–13, 1952, pursuant to notice issued July 18, 1952 (17 F. R. 6749), and on January 28, 1953, February 24–27, 1953, and March 5–6, 1953, pursuant to notices issued December 18, 1952, including tentative findings and conclusions (17 F. R. 11723), and January 21, 1953 (18 F. R. 553).

On the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administrator, on August 20, 1953, filed with the Hearing Clerk, United States Department of Agriculture, a recommended decision in this proceeding. The notice of filing such recommended decision and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on August 26, 1953 (18 F. R. 5101, F. R. Doc. 53-7497).

The material issues of record not previously dealt with in a decision issued February 16, 1953 (18 F. R. 984), related to:

1. Butterfat differentials to be used in calculating values of milk of differing butterfat content, as received from individual producers, and as disposed of in various uses by handlers.

2. Regulation of plants disposing of Class I milk in both the Philadelphia and New York marketing areas.

3. Prices applicable to producer milk sold outside the marketing area.

4. The definition of "producer milk plant."

5. Payments for administrative expense by a handler with a small portion of his sales of milk in the marketing area.

6. Coordination of allocation provisions with corresponding provisions in the New York Federal order in connection with milk received from handlers under such order.

7. Change in the provisions with respect to time for submitting reports, reporting of producer payrolls, and computation of uniform price by handlers.

*Findings and conclusions.* The following findings and conclusions on the material issues are based upon evidence contained in the record of the hearing:

1. *Butterfat differentials.* No action is taken in this decision on this issue which is reserved for further study.

2. *Milk sold in the New York marketing area.* The price for milk sold as Class I in the New York metropolitan milk marketing area should be the New York order Class I–A price less such payment as may be required under the New York order on such milk.

A producer representative at the hearing requested that the amendment proposed in the tentative findings and conclusions apply only to handlers who become handlers by supplying milk for Class I use as specified in § 961.6 (c) to pasteurizing or bottling plants disposing of Class I milk in the marketing area. Although there is no evidence other handlers have made sales of milk for Class I use in the New York market, there does not appear to be a basis for discriminating in the manner requested between (1) handlers with named plants and pasteurizing or bottling plants distributing in the area, as against (2) handlers regulated only because they ship milk to such pasteurizing or bottling plants. The evidence submitted did not show that the proposed amendment would in any way interfere with regular operations of bona fide handlers in the Philadelphia market. Accordingly, the tentative findings and conclusions are adopted as the findings and conclusions of this recommended decision.

3. *Sales outside the area.* No action is taken in this decision on prices to be paid producers for milk sold as Class I outside the marketing area, except for sales in the New York marketing area. This matter is reserved for a further decision.

4. *Definition of "producer milk plant."* The definition of producer milk plant should be modified to include during the months of February through September, any plant supplying milk to pasteurizing or bottling plants described in § 961.6 (b) unless not more than 25,000 pounds of such milk is Class I milk, and during the months of October through January, plants shipping milk to such pasteurizing or bottling plants on 11 or more days unless such milk is only Class II.

It was proposed that the definition of producer milk plant be changed to include all plants supplying Class I milk to the marketing area. The evidence presented in support of this proposal by a representative of milk plants not ordinarily associated with this market, was directed towards making it easier for these plants to compete for supplies in the same area as Philadelphia producer milk plants. This presumably would result from the proposed amendment by causing Philadelphia handlers to handle more milk, thus reducing the uniform prices they pay producers.

The purpose given is not an adequate basis for changing the order in the manner proposed. Also, from the record it does not appear that the present order provisions are in any way detrimental to the interests of the dairy farmers supplying plants represented by the proponent.

A study of the record shows, however, that there is considerably less need than in previous periods for use of non-producer milk to fill out the supplies of handlers in meeting requirements of the fluid market. During recent years there has been a rather steady increase in the supply of producer milk. A producer witness proposed that no milk should be allowed to be used in the market for Class I use free of price regulation during the months of April, May and June, and handler representatives concurred in such modification of the order. The record is persuasive that a more extensive change is possible and desirable. During the months in which the order now allows a handler to obtain supplies of milk from a non-producer plant for Class I use on four days per month without involving such plant under regulation, it would appear possible for handlers to assure themselves without great difficulty of regular producer milk either by direct receipt or by purchase from other handlers. During these months in recent years the reserve of producer milk over Class I needs has been 18 percent or more of the total producer receipts in the market. During other months also (October through January) there is a lesser need for supplemental supplies from non-producer sources than in previous periods. It would appear that shipments on 10 days or less per month should be sufficient to accommodate handlers who may need to fill out their requirements from other than producer sources.

These provisions of the order which apply to the use of non-producer milk for Class I are designed to meet the needs of the market in a short supply situation without involving under regulation plants which are not needed on a regular basis as a part of the supply. Under current supply conditions, however, the order provisions allow some handlers to obtain part of their milk supply at a cost considerably less than the minimum prices specified in the order. The change here recommended would tend to correct this situation in that the use of milk not priced under the order would occur only when the cost of such milk is likely to be comparable with the cost of producer milk.

It is desirable that the order specify some minimum amount of milk which, if used as Class I milk, would involve a plant under order regulation. The quantity of 25,000 pounds per month, which may be considered about one tank load, would serve this purpose.

5. *Administrative expense.* No change should be made in the manner in which payment for administrative expense applies to handlers.

It was proposed that in the case of a plant which is a producer milk plant only by reason of shipments to pasteurizing and bottling plants described in § 961.6 (b), payments for administrative expense should apply only to milk sold in the marketing area. This proposal was made by the operator of a non-producer plant which sometimes supplies milk to the market. This plant operator complained that the relatively small percentage of his milk which comes into the market would require him to pay administrative expense on all receipts of milk at his plant if the plant became qualified as a producer milk plant by shipping to such pasteurizing and bottling plants on more than 4 days per month in the months of February through September, or more than 19 days in other months.

The proponent did not ask that any change be made in the qualifications for plants coming under order regulation as producer milk plants. If a plant becomes a producer milk plant, it is necessary for the market administrator to audit all payments to producers delivering to the plant and all disposition of milk therefrom. Expense of administration accordingly tends to be in proportion to the volume of milk received by the plant rather than the amount disposed of as Class I in the marketing area.

It is concluded that no change should be made in the required payments for administrative expense on the basis of this record.

6. *Coordination of allocation provisions with New York order.* No change should be made in the provisions for allocating producer and nonproducer milk to Class I and Class II.

A handler witness pointed out that a handler who receives milk from a New York order pool plant might be required to pay for more milk at the Philadelphia order Class I and the New York order Class I–B prices than his total Class I utilization. This might happen if a multiple plant handler received such milk at a plant which had a higher percentage Class I utilization than the average for all his plants. Under the Philadelphia order, during the months of October through January, such milk could be allocated pro rata to Class I, the same as producer milk, in accordance with the average utilization in all plants of the handler. Under the New York order, however, such milk would be classified either entirely as I–B, or if the New York plant operator so elects, in the proportion that Class I utilization at the Philadelphia plant is to total receipts of all milk.

In the months of February through September, under the Philadelphia order, none of the Class I utilization could be allocated to nonproducer milk from a New York order plant.

Current supply conditions are such that handlers of most of the milk sold in the market have adequate supply from regular producer sources to meet year around needs, and other handlers may arrange to do so. There are ordinarily additional supplies of milk available from plants not now regulated under either order. Accordingly, there does not appear there would be any need for a handler to buy milk from a New York order plant. In view of supply conditions, no change should be made in the allocation provisions which would reduce the shore of producer milk in Class I utilization.

7. *Reports and computation of uniform prices.* No change should be made in the provisions concerning the filing of reports. Payments for milk should continue to be at the uniform price computed for each handler by the market administrator.

Handlers' request that 8 days other than Saturday and Sunday be allowed for submission of reports required pursuant to § 961.50 would cause an uneconomical peak-load of work for the market administrator's office and increase the expense in checking these reports prior to the announcement of uniform prices. The time now provided under the order for the submission of these reports appears to be as much as can be allowed and yet afford the market administrator opportunity to properly carry out the functions of his office without delaying the payments to producers. It is understood that handlers now are submitting their reports, with few exceptions, on time.

The proposal by handlers that they be allowed to compute their own uniform price and pay producers on this basis, subject to correction of any errors after audit, is of doubtful practicability. Although such a procedure might allow handlers more time for preparing checks to producers, since they would not need to wait for verification of the price by the market administrator, experience has shown there would be increased risk of error in payments, and no doubt many handlers would request at least a preliminary check of their computations by the market administrator before beginning payments. In view of the likelihood of increased administrative problems in adjusting errors and possible confusion on the part of producers resulting from errors or different procedures used by several handlers, it is questionable whether the proposal of handlers could be made to work satisfactorily. There is nothing in the order provisions which prevents a handler from making payments prior to announcement of the uniform price by the market administrator, and if the handler's reports and computations are accurate, no discrepancies would be involved.

Omission of producer pay-roll reports was proposed by handlers to save the expense of submitting such information which, it was argued, could be obtained by the market administrator at the time of audit of the handler's records. Such a change in reporting requirements, however, would shift the burden and expense of this work to the market administrator. Pay-roll reports have been required under the order for the purpose of thoroughly checking prices, deductions and other computations involved in payments to producers. Such checking can be done more efficiently and with less expense if the reports are submitted and the clerical work is done in the market administrator's office. These reports also contain much of the statistical information regularly summarized and published by the market administrator and from time to time compiled for special purposes particularly for presentation at public hearings.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk, in the marketing area and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Rulings on exceptions.* In arriving at the findings and conclusions included in this decision each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions herein are at variance with the exceptions, such exceptions are overruled.

*Determination of representative period.* The month of October 1953 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order, as amended, regulating the handling of milk in the Philadelphia, Pennsylvania, marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such order, as amended.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled respectively "Marketing Agreement Regulating the Handling of Milk in the Philadelphia, Pennsylvania, Marketing Area" and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the Philadelphia, Pennsylvania, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and

procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

*It is hereby ordered*, That all of this decision except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as hereby proposed to be amended, by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 9th day of December 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

*Order[1] Amending the Order, as Amended, Regulating the Handling of Milk in the Philadelphia, Pennsylvania, Marketing Area*

§ 961.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Philadelphia, Pennsylvania, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest;

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the Philadelphia, Pennsylvania, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete § 961.6 (c) and substitute:

(c) Any other plant from which milk is supplied to a pasteurizing or bottling plant described in paragraph (b) of this section: *Provided*, That any such other plant shall not be included in this definition during any month in which there is shipped from the plant only Class II milk as defined in § 961.31 or during any of the months of October, November, December, and January in which shipments are made from the plant on less than 11 days, or during any other month in which shipments allocated to Class I are not more than 25,000 pounds, to such pasteurizing and bottling plant or to a plant or plants supplying such pasteurizing or bottling plant.

2. In § 961.43 delete the 2d proviso and substitute: "*And provided further*, That for Class I milk disposed of in an area where the handling of milk is regulated by another order of the Secretary the price effective under such other order shall apply, except that for Class I milk disposed of in the New York metropolitan milk marketing area, the price shall be the Class I–A price pursuant to the New York order less such payment as is required on such milk pursuant to the New York order."

[F. R. Doc. 53-10374; Filed, Dec. 11, 1953; 8:50 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

---

## [ 7 CFR Part 963 ]

[Docket No. AO-233-A1]

### HANDLING OF MILK IN THE STARK COUNTY, OHIO, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order amending the order regulating the handling of milk in the Stark County, Ohio, marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 10th day after publication of the decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

*Preliminary statement.* The hearing on the record of which the proposed marketing agreement and order were formulated was conducted at Canton, Ohio, on September 24–25, 1953, pursuant to notice thereof which was issued on September 15, 1953 (18 F. R. 5629).

The material issues of record related to:

1. Modifying the Class I price provisions of the order;
2. Placing fluid cream in a separate classification and pricing it at a discount from the Class I price;
3. Reducing the price of Class II milk diverted to a nonpool plant during the months of April, May, and June;
4. Restricting the scope of the 25-cent discount on Class I milk received at non-permit pool plants;
5. Classifying as Class II milk sold for manufacturing purposes to a manufacturer of candy, soup, or bakery products;
6. Eliminating from the marketing area those sections which are in Sugar Creek Township of Wayne County; and
7. Allowing a certain type of custom-bottling operation to be excluded from the pricing provisions of the order.

*Findings and conclusions.* The following findings and conclusions on the material issues are based upon evidence in the record:

1. *Class I price differential.* The Class I prices should be maintained in close relationship to those prevailing in the Cleveland, Ohio, marketing area. This should be accomplished by establishing the stated Class I differentials at 5 cents per hundredweight less than those for Cleveland, namely 95 cents per hundredweight during the months of April, May, and June, $1.40 during February, March, and July, and $1.85 during the months of August through January. These stated differentials should be made subject to a supply-demand adjustment similar to that for Cleveland except that the current and standard utilization percentages should include supply and utilization data for the combined markets instead of for Cleveland alone.

The pricing provisions of the Stark County order became effective December 1, 1952. The order included a supply-demand adjustment based upon data on receipts and sales in the Stark County area. However, it was provided that through July 1953 the Class I price at permit plants in the Stark County area be 15 cents less than the Class I price for milk delivered to the marketing area under the Cleveland, Ohio, milk marketing order. This 8-month period was designed to provide an opportunity for the accumulation of complete data for the Stark County market over a period of time and for a review of the prospective applicability of the supply-demand adjustment and other pricing provisions of the Stark County order.

The Class I prices provided by the Stark County order since August 1 have been unsatisfactory. The primary goal of the Class I price is to encourage the production of an adequate supply of pure and wholesome milk for the market. There is every indication that the Class I prices have been higher than needed to achieve this goal. After allowing for the seasonal variation in production, it appears that supplies have been fully adequate since the inception of the order, yet the supply-demand adjustment contained in the order indicates a lower than normal supply in every month. The present schedule of standard utilization percentages is based upon the assumption that the supply of milk is normal in relation to sales during November, the usual month of lowest production, when receipts of milk from producers are equal to 85 percent of the total utilization of Class I milk in the market. The normal supply in months other than November is based upon the normal seasonal variation in the ratio of sales to producer receipts. On the basis of the marketing area as defined in the order, the plants which have qualified as pool plants, and the organization in the market with respect to the allocation of milk between handlers, holding tank capacity, and similar factors it is clear that the Stark County market is adequately supplied when Class I sales constitute a considerably higher percentage of producer receipts than 85 percent.

A more appropriate level of Class 1 prices can be provided for Stark County by maintaining such price in close relationship with the Class I price computed under the Cleveland, Ohio, marketing order. The Stark County milkshed is almost completely encompassed by the Cleveland supply territory and Cleveland shippers are in fact located throughout the Stark County procurement area. Competition between distributors in the sale of milk also makes it important that prices in the two areas be closely related. The most direct competition is that provided by one handler whose distributing plant is regulated under the Cleveland order and who has several outlets in the Stark County marketing area. In addition, the Stark County handlers compete extensively with Cleveland handlers in sales territory outside the marketing area. These close competitive relationships made the price divergencies which have occurred since August 1 highly disruptive in the market.

During August 1953, the intermediate seasonal differential of $1.30 was subject to a supply-demand adjustment of plus 20 cents, for a total Class I differential of $1.50. In Cleveland, during the same month the fall and winter differential of $1.90 was subject to a supply-demand adjustment of minus 25 cents, for a net differential of $1.65. In September the Stark County differential was $1.70 plus 28 cents for a net of $1.98 whereas the Cleveland differential was $1.90 less 19 cents for a net of $1.71. Official notice is taken of the fact that in October the Stark County differential was $1.70 plus 38 cents as compared with a Cleveland differential of $1.90 minus 13 cents and that in November the Stark County differential was $1.70 plus 38 cents as compared with a Cleveland differential of $1.90 without any supply-demand adjustment.

In relating the Stark County Class I price differentials to those prevailing in Cleveland, the stated differentials should be only 5 cents less instead of the 15-cent differences which prevailed from December 1952 to July 1953 or the 10- to 20-cent differences incorporated in the present order. The former differentials were designed to equalize Stark County and Cleveland prices at pool plants located such distances from Cleveland as to be subject to location differentials. However, the major portion of the Stark County supply competes either with milk which is hauled directly to Cleveland or with milk which is hauled to country supply plants at which location adjustments are not fully effective. In the Stark County milkshed the distance to Stark County handlers' plants is considerably less than the distance to plants located in Cleveland. However, hauling charges to Cleveland are only moderately higher than the average hauling rate to Stark County, and 5 cents is an adequate allowance for this difference.

Both the Stark County and Cleveland orders rely primarily upon seasonal changes in the stated Class I differential to encourage producers to maximize production during the fall months and minimize it during the spring. The months during which each rate of Class I differential would apply in Cleveland were changed subsequent to the Stark County promulgation hearing. The schedule should be correspondingly changed in Stark County to provide for Class I differentials of 95 cents in April, May and June, $1.40 in February, March and July, and $1.85 in August through January. This change will not only keep Class I prices in Stark County more closely in line with those in Cleveland, but will also provide producers with an earlier indication of seasonal price changes. Under the current order, for example, the fall and winter differential does not become effective until September 1, and producers do not receive payment for their September deliveries until mid-October. To the extent that producers respond to actual payments for milk rather than to advance knowledge of what the Class I differentials will be, it would appear desirable to have the price change come to the producers' attention earlier than mid-October.

Basing the supply-demand adjustment upon the combined supply and sales data for Stark County and for Cleveland serves to reflect conditions in Stark County to a moderate degree and at the same time will keep Stark County Class I price differentials closely in line with those prevailing in Cleveland. Under the Cleveland order, supplies are considered normal in relation to sales when receipts from producers are equal to 117 percent of Class I utilization during November and the schedule reaches a seasonal peak in May when normal receipts are 171 percent of sales. In the more compact and efficiently organized Stark County marketing area normal supplies during November are substantially less than 117 percent and summer receipts from producers are smaller in relation to fall receipts than in Cleveland. The combined normal percentage for each month should be as follows:

| | | | |
|---|---|---|---|
| January | 122 | July | 145 |
| February | 127 | August | 135 |
| March | 134 | September | 130 |
| April | 148 | October | 126 |
| May | 166 | November | 115 |
| June | 160 | December | 119 |

The corresponding standard utilization percentages would be as follows:

| 2-month period | Standard relationship | Month for which prices are computed |
|---|---|---|
| January-February | 125 | March. |
| February-March | 131 | April. |
| March-April | 141 | May. |
| April-May | 157 | June. |
| May-June | 163 | July. |
| June-July | 152 | August. |
| July-August | 140 | September. |
| August-September | 132 | October. |
| September-October | 125 | November. |
| October-November | 121 | December. |
| November-December | 117 | January. |
| December-January | 121 | February. |

Another change which is necessary in order to synchronize the pricing provisions of the Stark County and Cleveland orders involves the amount of the supply-demand adjustment resulting from each given percentage of indicated oversupply or undersupply. The schedule currently in effect for Cleveland provides for an adjustment of two cents for each net utilization percentage point, with a maximum supply-demand adjustment of plus or minus 25 cents. There is no seasonal variation in the schedule. This same schedule should be adopted in Stark County.

During the period January through November 1953 these recommended changes in the supply-demand adjustment for Stark County would have resulted in the same supply-demand adjustments as would have been effective under the currently effective amendment to the Cleveland order.

2. *Fluid cream.* Handlers proposed that skim milk and butterfat utilized for Class I purpose in the form of fluid cream and cream mixtures be priced at 40 cents less than the Class I price per hundredweight of milk of 3.5 percent butterfat content. Fluid cream is now priced under the order at the same level as other Class I products. The proponents maintain that the high cost of raw product was primarily responsible for declining sales of fluid cream. They also maintained that experience under 7 years of operation of the Cleveland order demonstrated the need for a lower price on fluid cream than on other Class I products.

Cream sales data for the Stark County area as a whole are available only for the period beginning December 1, 1952, and do not provide a satisfactory basis for separating seasonal changes in sales from those of longer duration. Data for longer periods of time were made available by individual handlers, but the decline in cream sales revealed by such data are attributable in part to a general decline in cream sales for the country as a whole and to the effect of mar-

gins charged by the handlers themselves as well as to the level of raw material prices under the order. Any valid comparison between Cleveland and Stark County experience would have to include much more detailed evidence on the comparability of health regulations, price levels, and consumer purchasing habits in the two markets than was presented by the proponents.

Under the Stark County order the skim milk and butterfat used in each class is accounted for separately. In the case of fluid cream, handlers are charged only for such butterfat and such skim milk as is contained in the cream rather than for the quantity of 3.5 percent milk from which such cream is derived. By far the major proportion of the cost of cream is accounted for by the butterfat portion.

The price per pound of butterfat in Class I milk in permit plants in December 1952 was equal to 1.74 times the average price of 92-score butter at Chicago for the month. This was the highest ratio of fat values to butter prices which has prevailed since the inception of the order; the lowest ratio prevailed during April 1953 when Class I butterfat was 1.43 times the price of butter. The higher the butterfat values are set, the greater is the cost of cream to handlers. The fact that the price of butterfat has such wide seasonal variation under the Stark County order introduces a corresponding seasonal change in the cost of cream ingredients. The butterfat value also affects costs to handlers of other Class I products. A high price of butterfat increases the cost of any product testing more than 3.5 percent butterfat and reduces the price per hundredweight of products testing below 3.5.

The cost to handlers of fluid cream and other high-testing Class I items should be decreased by establishing Class I butterfat prices at a fixed ratio of 1.3 times the price of 92-score butter in Chicago. During most months of the year this will decrease the cost to handlers of cream ingredients by more than the requested 40-cent per hundredweight discount. A correspondingly larger proportion of the Class I value per hundredweight of 3.5 milk will be assigned skim milk which has experienced a steadily increasing demand in the form of the various low fat and non fat Class I items.

3. *Class II price.* Handlers proposed that during the flush production months of April, May and June any Class II milk transferred or diverted to a nonpool plant be priced at 40 cents less than the regular Class II price. This proposal was designed primarily to avoid a recurrence of the situation which prevailed during the spring of 1953 when considerable losses were incurred on milk moved to out-of-area manufacturing plants, principally for the manufacture of hard cheese.

There are serious shortcomings in this type of proposal. One relates to the definition of the eligible nonpool plants. If, for example, milk was transferred or diverted to an ice cream manufacturing plant located within the marketing area, such plant would have a competitive advantage over those handlers who pay the full Class II price for milk used to manufacture ice cream in their own plants. A more fundamental difficulty is that such a provision would tend to encourage uneconomic shipments of milk to nonpool plants. If a handler had the choice between diverting milk to another pool plant at the Class II price or diverting it to a nonpool plant at which he could obtain a return as much as 35 cents below the Class II price, it would be to his advantage to send it to the latter plant. The producers, of course, would lose 40 cents per hundredweight on such a movement and the pool plant operator would gain 5 cents.

It appears that the unusually large quantities of Class II milk in the market during 1953 are largely the result of the high rate of milk production which was experienced in Stark County and most areas in the United States from December 1952 through June 1953. If and when similar circumstances recur, consideration can be given to prompt amending action to deal with the particular situation which is then in prospect.

4. *Price discount at non-permit plants.* Under current provisions of the order, plants located within Stark County, but selling Class I milk only in areas outside the cities of Alliance, Canton and Massillon, may operate without health permits from any one of these three cities. As non-permit plants their Class I milk is priced at 25 cents less than the price applicable to plants holding such permits. The 25-cent discount is indirectly applicable in one other circumstance. Some handlers operate plants which are located outside the marketing area. So long as their sales in the area are less than 10 percent of their total Class I business, their plant remains a nonpool plant. On such Class I sales as are made from these nonpool plants in the marketing area, the handler is charged a compensatory payment equal to the difference between the Class I price and the Class II price. If the nonpool plant has a permit from Alliance, Canton or Massillon, the compensatory payment is computed at the full Class I rate. If, however, the nonpool plant does not have such a permit, the compensatory payment is computed at the non-permit rate of 25 cents less than the regular Class I price. Some of the nonpool plants currently active in the market confine their sales to the territories outside the city limits of Alliance, Canton and Massillon and do not hold permits from any of these three cities. These nonpool plants do, however, hold permits from municipal or county health authorities in the areas where their plants are located and where they distribute the principal portion of their Class I milk.

It was proposed that the 25-cent discount be limited to those plants which do not hold permits from any health authority. Under this proposal the only plants presently eligible for the 25-cent discount would be those located within Stark County and holding no permit from Alliance, Canton or Massillon.

Information was not presented in sufficient detail to determine whether the various permits held by nonpool plants currently or potentially in the market are fully comparable with the health permits by Alliance, Canton and Massillon. Moreover, it is clear that any nonpool plant which now receives the 25-cent discount must confine its sales to territory where non-permit milk sets the competitive standard. If a nonpool plant sells in one of the three designated cities, it must acquire a permit and the compensatory payment would be computed on the basis of the full Class I price.

It is concluded that no change should be made in the present provisions relating to the 25-cent discount.

5. *Sales to bakeries, candy kitchens, and soup manufacturers.* It was proposed by handlers that skim milk and butterfat disposed of as milk, skim milk, or cream in bulk to manufacturers of candy, soup or bakery products for manufacturing uses be classified as Class II utilization in all months of the year.

The fundamental problem in connection with this proposal is the fact that manufacturing grades of milk are permitted to be used for this class of manufacturing operations. It follows that inspected milk sold to such outlets commands no appreciable premium over the Class II price. In the circumstances, this outlet is not one for which producers should be encouraged to make available a year-around supply of inspected milk. If this utilization were included as Class II in all months of the year, those handlers who supply the business would be interested in signing on a sufficient number of producers to care for these customers, as well as their regular Class I trade, on a year-around basis. On the other hand, to the extent that such outlets can utilize seasonally excess milk during the months of flush production, milk sold to them can properly be classified as Class II.

It is concluded that milk, skim milk, and cream disposed of in bulk during any of the months from March through August to a manufacturer of candy, soup, or bakery products who does not dispose of any milk in fluid form should be classified as Class II.

6. *Marketing area.* A handler proposed that those sections of Sugar Creek Township in Wayne County which are designated as part of the market area be deleted. The handler operates a nonpool plant located outside the marketing area from which he distributes milk in the town of Dalton and the adjacent sections which he seeks to have deleted from the marketing area. His sales in the marketing area constitute less than 10 percent of his total Class I sales and he, therefore, does not qualify as a pool plant. Accordingly, his receipts of milk from dairy farmers are not priced under the order. However, on such sales as he makes in the marketing area, a compensatory payment is charged at a rate designed to eliminate any competitive advantage which such a handler might otherwise enjoy.

Actual sales data transmitted by the proponent and by pool plant handlers competing in the territory in question disclose that over two-thirds of the total sales in the territory are supplied by the pool plants. These data confirm the original conclusion that this territory is an integral part of the defined marketing area. It should not be excluded.

7. *Custom bottling.* A handler proposed that milk processed at a pool plant under arrangements commonly referred to as "custom bottling" be exempted from the price and classification provisions of the order. This handler has a bottling plant located within the marketing area and also operates a plant located outside the area from which fluid milk is distributed only in communities located outside the defined marketing area. The pool plant is equipped to bottle milk in paper containers. The nonpool plant is not so equipped and obtains its supply of paper-packaged milk from the pool plant. The handler's intentions were that equivalent quantities of raw milk be supplied to the pool plant. The pool plant also provides milk in paper packages to other distributors doing business outside the marketing area and some of these are also in a position to supply the raw milk for custom bottling.

The order presently provides that all milk processed at a pool plant be classified and priced under the order. The minimum order prices are applicable whether the milk is sold within the marketing area or outside such area. This uniformity of pricing avoids the possibility that a lower price on milk sold outside the area could be construed as unfair price competition by outside producers and distributors. The price uniformity also avoids imposing higher costs for milk of the same quality on the consumers who happen to be located within the marketing area than on consumers outside such area. Lower prices on outside sales would, in effect, subsidize out-of-area consumers at the expense of in-area consumers who would be obliged to pay a disproportionate share of the cost necessary to induce producers to furnish an adequate supply of milk for the market.

Any exemption of custom bottled milk would constitute a serious breach of the principle of pricing milk uniformly whether it is ultimately sold within or without the marketing area. Any handler who owned or could make suitable arrangements with a nonpool plant could supply his out-of-area business from such plant. Meanwhile the supply of those handlers who relied exclusively upon their pool plant would be fully priced under the order. It is concluded that any such exemption would be unduly disruptive of normal operations in the market and should not be allowed.

*General findings.* (a) The proposed marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk, in the marketing area and the minimum prices specified in the proposed marketing agreement and order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and order will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a proposed marketing agreement and order upon which a hearing has been held.

*Rulings.* Briefs were filed on behalf of producers and handlers. The proposed findings and conclusions and the arguments contained in these briefs were considered in making the findings and reaching the conclusions in this decision. To the extent that any proposed findings and conclusions in the briefs are at variance with the findings and conclusions of this decision, such proposed findings and conclusions are denied for the reasons set forth in support of the findings and conclusions of this decision on the issue to which the proposed findings and conclusions related.

*Recommended marketing agreement and order.* The following amendments to the order are recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as proposed to be further amended:

1. In § 963.41 (b) delete the word "or" at the end of subparagraph (4), substitute a semicolon for the period at the end of subparagraph (5) and add the word "or", and add a subparagraph (6) to read as follows:

(6) Disposed of in bulk as milk, skim milk, or cream during any of the months of March through August to a manufacturer of candy, soup, or bakery products who does not dispose of any milk in fluid form.

2. Change § 963.51 to read as follows:

§ 963.51 *Class I milk prices.* The minimum prices per hundredweight to be paid by each handler for butterfat and skim milk in producer milk received by such handler during the month which is classified as Class I milk shall be computed by the market administrator as follows:

(a) Add to the basic formula price the following amount for the month indicated:

| Month: | *Amount* |
|---|---|
| April, May, and June | $0.95 |
| February, March, and July | 1.40 |
| All others | 1.85 |

*Provided*, That in computing the price to be paid by any handler for butterfat and skim milk contained in producer milk which was received by such handler during the month at a pool plant for which the handler does not hold a permit from the health authorities of either of the cities of Alliance, Canton, or Massillon, Ohio, and which is classified as Class I milk, the amounts to be added to the basic formula price pursuant to this paragraph shall be 25 cents less in each month than the amounts indicated above.

(b) Add or subtract from the result computed pursuant to paragraph (a) of this section a "supply-demand adjustment" computed as follows:

(1) Compute a "current utilization percentage" by dividing the combined total receipts of milk from producers during the first and second preceding months under this order and under Order No. 75 regulating the handling of milk in the Cleveland, Ohio, marketing area by the total combined utilization of milk in Class I by handlers regulated under the two orders, multiplying the result by 100, and rounding to the nearest whole number;

(2) Compute a "net utilization percentage" by subtracting from the current utilization percentage computed pursuant to subparagraph (1) of this paragraph the appropriate "standard utilization percentage" shown below:

| Month for which the price is being computed: | *Standard utilization percentage* |
|---|---|
| January | 117 |
| February | 121 |
| March | 125 |
| April | 131 |
| May | 141 |
| June | 157 |
| July | 163 |
| August | 152 |
| September | 140 |
| October | 132 |
| November | 128 |
| December | 121 |

(3) The amount of the supply-demand adjustment shall be as follows:

| Net utilization percentage: | *Amount (cents)* |
|---|---|
| +13 or over | −25 |
| +10 or +11 | −19 |
| +7 or +8 | −13 |
| +4 or +5 | −7 |
| +2 to −2 | 0 |
| −4 or −5 | +7 |
| −7 or −8 | +13 |
| −10 or −11 | +19 |
| −13 or below | +25 |

When the net utilization percentage does not fall within one of the above tabulated brackets, the supply-demand adjustment shall be determined by the adjacent bracket which is the same as or nearest to the bracket used in the previous month.

(c) The price per hundredweight of butterfat classified as Class I shall be determined by multiplying by 130 the price per pound of butter as described in § 963.50 (b) (1).

(d) From the price computed pursuant to paragraphs (a) and (b) of this section subtract an amount equal to the price per hundredweight of butterfat determined pursuant to paragraph (c) of this section multiplied by 0.035, and divide the remainder by 0.965. The result shall be the price per hundredweight of skim milk classified as Class I.

3. Change § 963.52 (a) to read as follows:

(a) Multiply the basic formula price computed pursuant to § 963.50 by a factor obtained by dividing the price computed pursuant to § 963.50 (c) into the amount computed pursuant to § 963.50 (c) (1).

Filed at Washington, D. C., this 8th day of December 1953.

[SEAL] GEORGE A. DICE,
*Deputy Assistant Administrator.*

## DEPARTMENT OF COMMERCE

### Civil Aeronautics Administration

### [ 14 CFR Part 42 ]

AIR TAXI OPERATOR CERTIFICATES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Administrator contemplates the adoption of the following rules relative to the issuance, amendment, and reissuance of air taxi operator certificates. All interested persons who desire to submit written data, views, or argument for consideration by the Administrator in connection with the proposed rules, shall send them to the Civil Aeronautics Administration, Office of Aviation Safety, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER.

§ 42.5–5 *Application for an air taxi operator certificate (CAA rules which apply to § 42.5 and SR–395).* (a) Application for an air taxi operator certificate shall be made in triplicate on Form ACA–1602, provided for this purpose by the Administrator. The application form may be obtained by contacting the local Aviation Safety Agent or District Office. When the requirements, as prescribed in this part, have been met, the applicant shall present his application to the local Aviation Safety Agent and arrange for an inspection of his flight equipment and all ground facilities.

(b) Where inspection indicates that the applicant is capable of conducting the proposed operation in accordance with the provisions of this part, an Air Taxi Operator Certificate, Form ACA–1603, will be issued, together with operations specifications. The operations specifications which have been approved on the application form become a part of the certificate and specify the carriage of passengers, cargo, or both; the category and class of aircraft (e. g., aircraft single engine land); and the flight conditions under which operations are authorized (e. g., VFR day, VFR night, IFR day, IFR night).

§ 42.5–6 *Amendment and reissuance of air taxi operator certificates (CAA rules which apply to § 42.5).* (a) Application for amendment and reissuance of an air taxi operator certificate shall be made, in accordance with procedure for original issuance, when the operator desires a change in:

(1) Name or address of operator.
(2) Ownership.
(3) Area of operations.
(4) Base of operations.
(5) Type of operations.

(b) In cases set forth in paragraph (a), (1), (2), and (3) of this section the agent may elect to inspect the aircraft as for original issuance.

(c) In cases set forth in paragraph (a) (4) of this section the agent may elect to inspect the aircraft if the base of operations is not moved out of the region of previous certification. Inspection will be made and a new certificate and number will be issued when the base is moved to another region.

(d) In cases set forth in paragraph (a) (5) of this section, inspection as for original issuance will be made.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

1953 ANNUAL REVIEW AND AMENDMENTS OF AIRWORTHINESS REGULATIONS

NOTICE OF PROPOSED RULE MAKING

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau will propose to the Board amendments to the airworthiness provisions of the Civil Air Regulations in substance as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rules, communications must be received by January 11, 1954. Copies of such communications will be available after January 13, 1954, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

The proposed amendment to the airworthiness regulations attached hereto stem from the studies conducted during the Board's 1953 annual airworthiness review and particularly from the discussions which took place at the annual meetings held in Washington September 21 through September 23. Those issues which are sufficiently resolved are being published herein in the form of proposed amendments to the regulations. These pertain to the following parts of the Civil Air Regulations: 3, 4b, 5, 6, 13, 14, 18, 40 (effective January 1, 1954), 41, and 42. The explanatory statements accompanying the proposed amendments present the basis for the amendments and the reasons why certain other proposals are not considered sufficiently resolved to justify specific recommendations for amendment of the regulations at the present time.

These amendments are proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposals may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205 (a), 52 Stat. 984; 49 U. S. C. 425 (a). Interpret or apply secs. 601–610, 52 Stat. 1007–1012, as amended; 49 U. S. C. 551–560)

Dated: December 8, 1953, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN,
*Director.*

*Part 3.* At the recent annual airworthiness meeting the subject of clarification of certain administrative provisions of Part 3 was discussed. As a result of these discussions there are proposed herein certain changes. These proposed changes concern themselves mainly with designating more clearly the applicable regulations with which compliance must be shown to obtain type certification or modification of a type certificate. Although no basic change in policy from that followed in the past is contemplated, the proposed amendments specify in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the proposed rules regarding the designation of applicable regulations (§ 3.11) apply not only to new airplane types for which application for type certificate is made but also to all type irrespective of the date of original application for type certificate. For example, the provisions which require or which permit the applicant to elect compliance with newer regulations would be effective not only to new type airplanes but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the airplane need not comply with any regulations made effective subsequent to the date of application for type certificate. A significant clarification is being proposed which would define those changes in the airplane type which are sufficiently extensive to warrant treating the airplane as a new type. Another important phase of the proposal is the establishment of a time limitation of 3 years for the effectiveness of an application for type certification. The proposed amendments to the administrative provisions also include minor changes for purposes of clarification. (See proposed amendments to §§ 3.11, 3.12, 3.13, and 3.19.)

In addition to the proposed changes to the administrative provisions of Part 3, two other proposals are being made which are considered minor in nature. Neither of these proposals was discussed during the annual airworthiness meeting. The subject of requiring heaters to be of an approved type was considered sufficiently resolved prior to the meeting so that discussion was not warranted. (See proposed amendment to § 3.338 (c).) The other, fire precautions for cabin interiors, is considered necessary for clarification and consistency with other parts of the regulations (See proposed amendment to § 3.338 (a).)

It is proposed to amend Part 3 as follows:

1. By amending § 3.11 to read as follows:

§ 3.11 *Designation of applicable regulations.* The provisions of this section shall apply to all airplane types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the airplane shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required except that for applications pending on the effective date of this section such three-year period shall commence on the effective date of this section. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 3.13 (b)) may be accomplished, at the option of the applicant, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 3.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the airplane, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 3.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

NOTE: Examples of new or redesigned components and installations which might require compliance with regulations in effect on the date of application for approval, are: New powerplant installation which is likely to introduce additional fire or operational hazards unless additional protective measures are incorporated; the installation of an auto-pilot or a new electric power system.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the airplane shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the number of engines;

(2) A change to engines employing different principles of operation or propulsion;

(3) A change in design, configuration, power, or weight which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

2. By amending § 3.12 to read as follows:

§ 3.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 3.11.)

3. By amending § 3.13 (b) by deleting the parenthetical reference: "(See also § 3.11 (a).)" at the end of the paragraph.

4. By amending § 3.13 by adding a new paragraph (c) to read as follows:

§ 3.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 3.12 shall be considered as incorporated in the type certificate as though set forth in full.

5. By amending § 3.19 to read as follows:

§ 3.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 3.11 (d) and (e), and Part 1 of this subchapter.)

6. By amending § 3.388 (a) by deleting the second sentence and inserting in lieu thereof the following: "In compartments where smoking is to be permitted, the wall and ceiling linings, the covering of all upholstering, floors, and furnishings shall be flame-resistant."

7. By amending § 3.388 (b) to read as follows:

§ 3.388 *Fire precautions.* • • •

(b) *Combustion heaters.* If combustion heaters are installed, they shall be of an approved type. The installation shall comply with applicable parts of the powerplant installation requirements covering fire hazards and precautions. All applicable requirements concerning fuel tanks, lines, and exhaust systems shall be considered.

*Parts 4b, 40 (Effective January 1, 1954), 41, and 42).* A number of subjects pertaining to transport category airplanes which were discussed at the recent annual airworthiness meeting, are now considered sufficiently resolved to warrant specific proposals for amendment to the regulations.

Among the changes proposed there are some dealing with the administrative provisions of Par 4b. These proposed changes concern themselves mainly with designating more clearly the applicable regulations with which compliance must be shown to obtain type certification or modification of a type certificate. Although no basic change in policy from that followed in the past is contemplated, the proposed amendments specify in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the proposed rules regarding the designation of applicable regulations (§ 4b.11) apply not only to new airplane types for which application for type certificate is made but also to all types irrespective of the date of original application for type certificate. For example, the provisions which require or which permit the applicant to elect compliance with newer regulations would be effective not only to new type airplanes but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the airplane need not comply with any regulations made effective subsequent to the date of application for type certificate. A significant clarification is being proposed which would define those changes in the airplane type which are sufficiently extensive to warrant treating the airplane as a new type. Another important phase of the proposal is the establishment of a time limitation of 5 years for the effectiveness of an application for type certificate. The proposed amendments to the administrative provisions also include minor changes for purposes of clarification. (See proposed amendments to §§ 4b.11, 4b.12, 4b.13, and 4b.19.)

Changes are herein proposed to the requirements pertaining to flight crew accommodations. The presently effective regulations provide for the arrangement, location with respect to the plane of rotation of the propellers, etc., of the pilot and his controls and instruments. Since in certain instances the airworthiness regulations require flight crew personnel in addition to the pilot, certain of these provisions are being amended to make them applicable to the minimum flight crew which is required for safe operation of the airplane. (See proposed amendments to §§ 4b.350, 4b.351, and 4b.353.)

A new requirement is also being proposed which prescribes the application of the principle of fail-safe design to propeller reversing systems in newly certificated transport category airplanes. (See also corresponding changes being proposed for Part 14.) The intent of the rule is to preclude unwanted reversing of the propeller during normal or emergency operation in case of a single failure or malfunction of the system. It is also intended that single failures or malfunctions be considered in conjunction with manipulation of the controls by the pilot, and that failure of primary structural parts, the occurrence of which is shown to be extremely remote, need

not be considered. (See proposed amendment to § 4b.407.)

Another proposed change would require, in conjunction with the determination of usable fuel, the evaluation of the effects of moderate slips and skids which sometimes occur during landing in cross-winds. The purpose of this proposed requirement is to ascertain whether engine malfunctioning during landing may occur with low fuel, and if so, to note such effect in the flight manual for pilot information. (See proposed amendments to §§ 4b.416 and 4b.742.)

A change is being proposed to the requirements which establish the power supply needed for operation of equipment, systems, and installations during normal and power failure conditions. The proposed change makes clear that the essential power load requirements under power failure conditions may be reduced in conjunction with a monitoring procedure and, for the two-engine-inoperative conditions, permits taking into account for power supply requirements only those loads which are necessary for controlled flight. (See proposed amendment to § 4b.606.)

A couple of additional changes in Part 4b are being proposed of relatively minor nature with the intent of clarifying the regulations.

In addition to the changes in Part 4b, it is proposed to revise the two-engine-out performance operating limitations contained in Parts 40 (effective January 1, 1954), 41, and 42 for the purpose of clarifying their intent. Under the presently effective requirements, the failure of the second engine may be interpreted to be 90 minutes away from the point of departure instead of at the critical point, in which case an unsafe operation may result in long over-water flights. The proposed rewrite is intended to make clear that both engines are considered to fail simultaneously at the critical point. The proposal also makes clear that a reduction in weight of the airplane may be considered in descending from the cruising altitude at the critical point to the minimum prescribed altitude. (See proposed amendments to §§ 40.75 (Part 40 effective January 1, 1954), 41.30 (c), and 42.75.)

It is proposed to amend Parts 4b, 40, 41, and 42 as follows:

1. By amending § 4b.11 to read as follows:

§ 4b.11 *Designation of applicable regulations.* The provisions of this section shall apply to all airplane types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the airplane shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds five years, a new application for type certificate shall be required, except that for applications pending on the effective date of this section such five-year period shall commence on the effective date of this section. At the option of the applicant, a new application may be filed prior to the expiration of the five-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 4b.13 (b)) may be accomplished, at the option of the applicant, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 4b.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the airplane, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 4b.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

NOTE: Examples of new or redesigned components and installations which might require compliance with regulations in effect on the date of application for approval, are: New powerplant installation which is likely to introduce additional fire or operational hazards unless additional protective measures are incorporated; the installation of an auto-pilot, a pressurization system, or a new electric power system.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the airplane shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the number of engines;

(2) A change to engines employing different principles of operation or propulsion;

(3) A change in design, configuration, power, or weight which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

2. By amending § 4b.12 to read as follows:

§ 4b.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 4b.11.)

3. By amending § 4b.13 (b) by deleting the parenthetical reference: "(See also § 4b.11 (a).)" at the end of the paragraph.

4. By amending § 4b.13 by adding new paragraph (c) to read as follows:

§ 4b.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 4b.12 shall be considered as incorporated in the type certificate as though set forth in full.

5. By amending § 4b.19 to read as follows:

§ 4b.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 4b.11 (d) and (e), and Part 1 of this subchapter.)

6. By amending § 4b.350 by adding the following general paragraph preceding paragraph (a):

§ 4b.350 *Pilot compartment; general.* All references to flight crew in §§ 4b.350 through 4b.353 shall mean the minimum flight crew established in accordance with § 4b.720.

7. By amending § 4b.350 (a) to read as follows:

§ 4b.350 *Pilot compartment; general.* • • •

(a) The arrangement of the pilot compartment and its appurtenances shall provide safety and assurance that the flight crew will be able to perform all of their duties and operate the controls in the correct manner without unreasonable concentration and fatigue.

8. By amending § 4b.350 (b) by deleting the word "pilot" and inserting in lieu thereof the words "flight crew".

9. By amending § 4b.351 (a) (2) by deleting the word "pilots' " and inserting in lieu thereof the words "flight crews' ".

10. By amending § 4b.353 (c) by deleting in two instances the words "pilots' " and inserting in lieu thereof the words "flight crews' ".

11. By amending § 4b.362 (e) (7) by adding the word "approved" in front of the phrase "means shall be provided to assist the occupants in descending to the ground".

12. By adding a new § 4b.407 to read as follows:

§ 4b.407 *Propeller reversing system.* The propeller reversing system, if installed, shall be such that no single failure or malfunctioning of the system during normal or emergency operation will result in unwanted travel of the propeller blades below the normal flight low-pitch stop to a position which would prevent continued safe flight of the airplane.

NOTE: A propeller reversing system is considered as complying with this requirement if it provides a level of safety equivalent to that of a reversing system incorporating a secondary flight low-pitch stop system such that no single failure or malfunctioning during normal or emergency operation will result in energization or actuation of both the normal and the secondary flight low-pitch stop systems.

13. By amending § 4b.416 by redesignating paragraphs (c) and (d) as (d) and (e), respectively, and by adding a new paragraph (c) to read as follows:

§ 4b.416 *Determination of unusable fuel supply and fuel system operation on low fuel.* • • •

(c) During the determination of unusable fuel in accordance with paragraph (b) of this section, the effects of moderate slips and skids on the occurrence of engine malfunctioning with low fuel shall be investigated. Any adverse effects shall be described in the Airplane Flight Manual in accordance with § 4b.742 (a), but need not be considered in establishing the unusable fuel.

14. By amending § 4b.604 (m) by deleting the words "engine cylinder displacement" and inserting in lieu thereof the words "cylinder displacement of the engine".

15. By amending § 4b.606 (c) by adding a new subparagraph (4) to read as follows:

§ 4b.606 *Equipment, systems, and installations.* • • •

(c) *Power supply.* • • •

(4) In determining the probable operating combinations and durations of essential loads for the partial power failure conditions prescribed in subparagraphs (2) and (3) of this paragraph, it shall be permissible to assume that the power loads are reduced in accordance with a monitoring procedure which is consistent with safety in the types of operations authorized. If a particular load is not required to maintain controlled flight it need not be considered for the two-engine-inoperative condition on airplanes with four or more engines as prescribed in subparagraph (3) of this paragraph.

16. By amending § 4b.742 (a) by adding the reference: "(See also § 4b.416 (c).)"

17. By amending §§ 41.30 (c), 40.75 (Part 40 effective January 1, 1954), and 42.75 to read as follows:

§ 41.30 *En route limitations.* • • •

(c) *Airplanes with four or more engines; two engines inoperative.* The provisions of this paragraph shall apply only to airplanes certificated in accordance with the performance requirements of Part 4b of this subchapter. No airplane having four or more engines shall be flown along an intended track except under the conditions of either subparagraph (1) or subparagraph (2) of this paragraph.

(1) No place along the intended track shall be more than 90 minutes away from an available landing area at which a landing can be made in accordance with the requirements of § 41.34, assuming all engines to be operating at cruising power.

(2) The take-off weight shall not be greater than that which would permit the airplane, with the two critical engines inoperative, to have a rate of climb in feet per minute equal to 0.01 $V_{s_0}^2$ ($V_{s_0}$ being expressed in miles per hour) along along all points of the route, from the most critical point to the landing area, either at an altitude of 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is higher. In showing compliance with this prescribed rate of climb, the following shall apply:

(i) Both engines shall be assumed to fail simultaneously at the critical point along the route.

(ii) It shall be permissible to consider the reduction of the airplane's weight as a result of descending from the cruising altitude at the critical point to the point at which the prescribed minimum altitude is reached.

(iii) It shall be permissible to consider that the weight of the airplane as it proceeds along its intended track is progressively reduced by normal consumption of fuel and oil with all engines operating up to the critical point and with two engines operating beyond the critical point.

(iv) If fuel jettisoning is provided, the airplane's weight at the critical point shall be considered to be not less than that which would include sufficient fuel to proceed to an available landing area at which a landing can be made in accordance with the requirements of § 41.34 and to arrive there at an altitude of at least 1,000 feet directly over the landing area.

§ 40.75 *En route limitations; two engines inoperative.* (To read in substance the same as proposed § 41.30 (c)).

§ 42.75 *En route limitations; two engines inoperative.* (To read in substance the same as proposed § 41.30 (c)).

*Part 5.* During the annual airworthiness meeting the subject of clarification of a number of the administrative provisions of Part 5 was discussed. As a result of these discussions changes are being proposed to this part. These proposed changes concern themselves mainly with designating more clearly the applicable regulations with which compliance must be shown to obtain type certification or modification of a type certificate. Although no basic change in policy from that followed in the past is contemplated, the proposed amendments specify in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the proposed rules regarding the designation of applicable regulations (§ 5.11) apply not only to new glider types for which application for type certificate is made but also to all types irrespective of the date of original application for type certificate. For example, the provisions which require or which permit the applicant to elect compliance with newer regulations would be effective not only to new type gliders but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the glider need not comply with any regulations made effective subsequent to the date of application for type certificate. A significant clarification is being proposed which would define those changes in the glider type which are sufficiently extensive to warrant treating the glider as a new type. Another important phase of the proposal is the establishment of a time limitation of 3 years for the effectiveness of an application for type certificate. The proposed amendments to the administrative provisions also include minor changes for purposes of clarification.

It is proposed to amend Part 5 as follows:

1. By amending § 5.11 to read as follows:

§ 5.11 *Designation of applicable regulations.* The provisions of this section shall apply to all glider types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the glider shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on the effective date of this section such three-year period shall commence on the effective date of this section. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 5.13 (b)) may be accomplished, at the option of the applicant, either in accordance

with the regulations incorporated by reference in the type certificate pursuant to § 5.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the glider, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 5.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

(e) If a change in design, configuration, or weight is made which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations, the glider shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

2. By amending § 5.12 to read as follows:

§ 5.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 5.11.)

3. By amending § 5.13 (b) by deleting the parenthetical reference: "(See also § 5.11 (a).)" at the end of the paragraph.

4. By amending § 5.13 by adding new paragraph (c) to read as follows:

§ 5.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 5.12 shall be considered as incorporated in the type certificate as though set forth in full.

5. By amending § 5.19 to read as follows:

§ 5.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 5.11 (d) and (e), and Part 1 of this subchapter.)

*Part 6.* A number of subjects pertaining to rotorcraft certification were discussed at the recent annual airworthiness meeting. Some of these subjects are now considered sufficiently resolved to warrant specific proposals for amendment to the regulations.

Among the changes proposed there are some dealing with the administrative provisions of this part. These proposed changes concern themselves mainly with designating more clearly the applicable regulations with which compliance must be shown to obtain type certification or modification of a type certificate. Although no basic change in policy from that followed in the past is contemplated, the proposed amendments specify in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the proposed rules regarding the designation of applicable regulations (§ 6.11) apply not only to new rotorcraft types for which application for type certificate is made but also to all types irrespective of the date of original application for type certificate. For example, the provisions which require or which permit the applicant to elect compliance with newer regulations would be effective not only to new type rotorcraft but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the rotorcraft need not comply with any regulations made effective subsequent to the date of application for type certificate. A significant clarification is being proposed which would define those changes in the rotorcraft type which are sufficiently extensive to warrant treating the rotorcraft as a new type. Another important phase of the proposal is the establishment of a time limitation of 3 years for the effectiveness of an application for type certificate. The proposed amendments to the administrative provisions also include minor changes for purposes of clarification. (See proposed amendments to §§ 6.11, 6.12, 6.13, and 6.19.)

The presently effective regulations require a rotor high-pitch limiting device which will prevent the rotor rpm from dropping below a safe minimum. Difficulty has been encountered in complying with this requirement as it is presently worded. When the limiting device is set at sea level at relatively low temperature conditions it limits the use of full available power at higher altitudes and temperatures. In order to overcome the difficulty which has been encountered with the language and retain the original intent of the regulations an amendment in language is proposed herein. The proposal involves the use of a broader term so that the intent can possibly be fulfilled by means other than a high-pitch limiting device. (See proposed amendment to § 6.103 (a).)

An amendment is being proposed to the rotor drive and control mechanism endurance test requirements. This proposed amendment would require that all parts be in a serviceable condition at the conclusion of the test. (See proposed amendment to § 6.412 (a).)

Certain items discussed during the recent annual airworthiness meeting regarding proposed amendments to Part 6 were not sufficiently resolved to warrant proposing amendments at this time. One such item was the establishment of a rotorcraft transport category. It was the consensus during the meeting that a distinction should be made in the airworthiness requirements between "Transport" category and "Normal" category rotorcraft. There was, however, a great deal of controversy over how such a distinction should be made. It is considered that further study is necessary before appropriate changes can be made in the regulations which would make a distinction between "Transport" and "Normal" categories. During the meeting industry representatives indicated that they were continuing their studies and that by the next annual airworthiness review they would make specific proposals for amendments to Part 6 which would distinguish between the two categories. Therefore, no proposal is being made on this subject at this time.

Two other items discussed during the meeting, namely, take-off and landing distances and limiting height for autorotative landing, are not included herein as proposed amendments. It is considered that solution of these two problems is so interwoven with the establishment of the transport category for rotorcraft that their solution should be deferred to a later date.

It is proposed to amend Part 6 as follows:

1. By amending § 6.11 to read as follows:

§ 6.11 *Designation of applicable regulations.* The provisions of this section shall apply to all rotorcraft types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the rotorcraft shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on the effective date of this section such three-year period shall commence on the effective date of this section. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter a change to the type certificate (see § 6.13 (b)) may be accomplished, at the option of the applicant, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 6.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the rotorcraft, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 6.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

NOTE: Examples of new or redesigned components and installations which might require compliance with regulations in effect on the date of application for approval, are: New powerplant installation which is likely to introduce additional fire or operational hazards unless additional protective measures are incorporated; the installation of a new rotor system or a new electric power system.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the airplane shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the number of engines or rotors;

(2) A change to engines or rotors employing different principles of operation or propulsion;

(3) A change in design, configuration, power, or weight which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

2. By amending § 6.12 to read as follows:

§ 6.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 6.11.)

3. By amending § 6.13 (b) by deleting the parenthetical reference: "(See also § 6.11 (a).)" at the end of the paragraph.

4. By amending § 6.13 by adding new paragraph (c) to read as follows:

§ 6.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 6.12 shall be considered as incorporated in the type certificate as though set forth in full.

5. By amending § 6.19 to read as follows:

§ 6.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 6.11 (d) and (e), and Part 1 of this subchapter.)

6. By amending § 6.103 (a) by deleting the last two sentences and inserting in lieu thereof the following: "A means shall be provided to prevent rotational speeds substantially less than the approved minimum rotor rpm in any flight condition with full throttle and with pitch control of the main rotor(s) in the high-pitch position. It shall be acceptable for such means to allow the use of higher pitch in emergency, provided that the means incorporate provisions to prevent inadvertent transition from the normal operating range to the higher-pitch angles."

7. By amending § 6.412 (a) by adding to the end of the paragraph the following sentence: "At the conclusion of the endurance testing, all parts shall be in a serviceable condition."

*Part 13.* At the recent annual airworthiness meeting the subject of clarification of certain administrative provisions of Part 13 was discussed. As a result of these discussions there are proposed herein certain changes. These proposed changes concern themselves mainly with designating more clearly the applicable regulations with which compliance must be shown to obtain type certification or modification of a type certificate. Although no basic change in policy from that followed in the past is contemplated, the proposed amendments specify in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the proposed rules regarding the designation of applicable regulations (§ 13.11) apply not only to new engine types for which application for type certificate is made but also to all types irrespective of the date of original application for type certificate. For example, the provisions which require or which permit the applicant to elect compliance with newer regulations would be effective not only to new type engines but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the engine need not comply with any regulations made effective subsequent to the date of application for type certificate. A significant clarification is being proposed which would define those changes in the engine type which are sufficiently extensive to warrant treating the engine as a new type. Another important phase of the proposal is the establishment of a time limitation of 3 years for the effectiveness of an application for type certificate. The proposed amendments to the administrative provisions also include minor changes for purposes of clarification. (See proposed amendments to §§ 13.11, 13.12, 13.13, and 13.19.)

A minor change is also being proposed to Part 13 to clarify the acceleration and deceleration provisions of the endurance tests for turbine engines. The proposed change makes clear that in performing the accelerations and decelerations the power control lever must be moved from one extreme position to the other in not more than one second except in special cases, such as for a propeller turbine where more than one regime of control lever motion is scheduled, in which case a period of time as long as two seconds is permitted. The change also makes clear that accelerations or decelerations, whichever may be the case, must be accomplished in changing power settings in the take-off and idling operations test. (See proposed amendment to § 13.254.)

In addition to the proposals contained herein a recommendation was discussed during the annual airworthiness meeting which would have prohibited consideration of favorable service experience in determining the extent of penalty tests for parts repaired or replaced during the engine endurance test. There was not sufficient justification submitted during the meeting to warrant an amendment to the regulations on this subject. Therefore no proposal is being made.

It is proposed to amend Part 13 as follows:

1. By amending § 13.11 to read as follows:

§ 13.11 *Designation of applicable regulations.* The provisions of this section shall apply to all engine types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the engine shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on the effective date of this section such three-year period shall commence on the effective date of this section. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator, pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 13.13 (b)) may be accomplished at the option of the applicant, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 13.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a major component of the engine, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 13.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

(e) If changes listed in subparagraphs (1) and (2) of this paragraph are made, the engine shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the principle of operation;

(2) A change in design, configuration, power limitations, or speed limitations, which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

2. By amending § 13.12 to read as follows:

§ 13.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 13.11.)

3. By amending § 13.13 (b) by deleting the parenthetical reference: "(See also § 13.11 (a).)" at the end of the sentence.

4. By amending § 13.13 by adding a new paragraph (c) to read as follows:

§ 13.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 13.12 shall be considered as incorporated in the type certificate as though set forth in full.

5. By amending § 13.19 to read as follows:

§ 13.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 13.11 (d) and (e), and Part 1 of this subchapter.)

6. By amending § 13.254 (a) by adding after the first sentence the following sentence: "In changing the power setting after each period, the power-control lever shall be moved in the manner prescribed in paragraph (f) of this section."

7. By amending § 13.254 (f) by adding at the end of the paragraph the following sentence: "In complying with the provisions of this paragraph the power-control lever shall be moved from one extreme position to the other in not more than 1 second, except where different regimes of control operations are incorporated necessitating scheduling of the power-control lever motion in going from one extreme position to the other, a longer period of time shall be acceptable but in no case shall this time exceed 2 seconds."

*Part 14.* A number of subjects pertaining to propellers were discussed at the recent annual airworthiness meeting. These subjects are considered sufficiently resolved to warrant specific proposals for amendment to the regulations.

As a result of the discussions, changes are being proposed with respect to the administrative provisions of Part 14. These proposed changes concern themselves mainly with designating more clearly the applicable regulations with which compliance must be shown to obtain type certification or modification of a type certificate. Although no basic change in policy from that followed in the past is contemplated, the proposed amendments specify in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the proposed rules regarding the designation of applicable regulations (§ 14.11) apply not only to new propeller types for which application for type certificate is made but also to all types irrespective of the date of original application for type certificate. For example, the provisions which require or which permit the applicant to elect compliance with newer regulations would be effective not only to new type propellers but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the propeller need not comply with any regulations made effective subsequent to the date of application for type certificate. A significant clarification is being proposed which would define those changes in the propeller type which are sufficiently extensive to warrant treating the propeller as a new type. Another important phase of the proposal is the establishment of a time limitation of 3 years for effectiveness of an application for type certificate. The proposed amendments to the administrative provisions also include minor changes for purposes of clarification. (See proposed amendments to §§ 14.11 to 14.12, 14.13, and 14.19.)

In addition to the proposals to amend the administrative provisions of Part 14 there is also a proposal to add a new requirement which prescribes that reversible propeller designs incorporate features within themselves or be adaptable to a reversing system in an airplane which is compatible with the principle of fail-safe design. (See also corresponding change being proposed for Part 4b.) The intent of this rule is to assure that new reversible propeller designs will incorporate features which will preclude unwanted reversing during normal or emergency operation in case of a single failure or malfunctioning of the system when installed in an airplane. It is not intended by this rule to consider the failure of primary structural parts, the occurrence of which is shown to be extremely remote. (See proposed amendment to § 14.103.)

It is proposed to amend Part 14 as follows:

1. By amending § 14.11 to read as follows:

§ 14.11 *Designation of applicable regulations.* The provisions of this section shall apply to all propeller types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the propeller shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on the effective date of this section such three-year period shall commence on the effective date of this section. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 14.13 (b)) may be accomplished, at the option of the applicant, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 14.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a major component of the propeller and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 14.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

(e) If changes listed in subparagraphs (1) and (2) of this paragraph are made, the propeller shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the principle of operation;

(2) A change in design, configuration, power limitations, or speed limitations which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

2. By amending § 14.12 to read as follows:

§ 14.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 14.11.)

3. By amending § 14.13 (b) by deleting the parenthetical reference: "(See also § 14.11 (a).)" at the end of the paragraph.

4. By amending § 14.13 by adding new paragraph (c) to read as follows:

§ 14.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 14.12 shall be considered as incorporated in the type certificate as though set forth in full.

5. By amending § 14.19 to read as follows:

§ 14.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 14.11 (d) and (e), and Part 1 of this subchapter.)

6. By adding a new § 14.103 to read as follows:

§ 14.103 *Reversible propellers.* Reversible propellers shall be adaptable for use with a reversing system in an airplane so that no single failure or malfunctioning of the reversing system during normal or emergency operation will result in unwanted travel of the propeller blades below the normal flight low-pitch stop to a position which would prevent continued safe flight of the airplane.

NOTE: A reversible propeller design is considered as complying with this requirement if it can be made adaptable for use with a reversing system in an airplane which provides a level of safety equivalent to that of a reversing system incorporating a secondary flight low-pitch stop system such that no single failure or malfunctioning during normal or emergency operation will result in energization or actuation of both the normal and the secondary flight low-pitch stop systems.

*Part 18.* The discussions during the annual airworthiness meeting included the subject of the requirements pertaining to alterations in Part 18. As a result of these discussions an amendment is proposed to § 18.30 (b) intended to clarify which airworthiness requirements are applicable with respect to alterations being made. The proposed amendment primarily consists of a note which makes reference to the airworthiness parts under which the aircraft or product were type certificated. The wording of the note is consistent with changes to the administrative provisions of the various airworthiness parts of the Civil Air Regulations which are being proposed simultaneously with this proposed change.

It is proposed to amend Part 18 as follows:

1. By amending § 18.30 (b) by inserting "applicable [6]" before the words "airworthiness requirements" and by adding footnote 6 to read as follows:

[6] The airworthiness requirements applicable to an alteration are normally those with which the manufacturer originally demonstrated compliance for the issuance of a type certificate. The Aircraft Specification includes a reference to that part of the Civil Air Regulations and to the category under which the original type certification was accomplished. More detailed information on the requirements applicable at the time of type certification can be obtained from the Civil Aeronautics Administration. However, the individual parts of the airworthiness regulations specify that the provisions in effect on the date of application for approval to the alteration may be made applicable. (See §§ 3.11, 4b.11, 5.11, 6.11, 13.11, or 14.11, whichever part is applicable.)

[F. R. Doc. 53-10395; Filed, Dec. 11, 1953; 8:54 a. m.]

## SECURITIES AND EXCHANGE COMMISSION

[ 17 CFR Part 250 ]

LOANS, EXTENSIONS OF CREDIT, DONATIONS AND CAPITAL CONTRIBUTIONS TO ASSOCIATE COMPANIES

NOTICE OF ORAL ARGUMENT

On March 12, 1953, the Commission issued Holding Company Act Release No. 11761 inviting all interested persons to submit comments on its § 250.45 (b) (6) (Rule U-45 (b) (6)) and recommendations for modification or change thereof. This rule, promulgated in 1941 pursuant to section 12 of the Public Utility Holding Company Act of 1935, governs the allocation of consolidated income taxes among the member companies of registered holding company systems. Pursuant to this invitation, the Commission received a number of written communications from various public-utility holding companies, regulatory bodies, and others, setting forth in considerable detail their views, comments, and recommendations concerning Rule U-45 (b) (6).

Thereafter, on November 9, 1953, the Commission issued Holding Company Act Release No. 12206-X stating that its Division of Corporate Regulation, after having carefully considered all comments and recommendations theretofore received on the matter, had submitted to the Commission a proposed amendment to Rule U-45 (b) (6). The Commission thereupon invited all interested persons to submit data, views, and comments in writing on such proposed amended rule which, as set forth in said release, would read as follows:

§ 250.45 *Loans, extensions of credit, donations and capital contributions to associate companies.* • • •

(b) *Exceptions.* The following transactions shall be exempt from the declaration requirements of this section:

• • • • • •

(6) A loan or extension of credit or an agreement of indemnity arising out of a consolidated tax return filed by a holding company (or other parent company) and its subsidiaries: *Provided*, That the top company in the group assumes primary responsibility for the payment of any tax liability involved, subject to the right to contribution from the several members of the group in an amount not exceeding as to any company that percentage of the sum of the normal tax, surtax and excess profits tax on a consolidated basis which the sum of the normal tax, surtax, and excess profits tax of such company if paid on a separate return basis is of the aggregate amount of normal, surtax and excess profits taxes of the individual companies based upon separate returns. In computing each company's tax on a separate return basis, the gross income of each company in the group shall be computed without including therein dividends received from other companies in the group and allowance shall be made for loss carryover and other adjustments as if the company had always filed its tax returns on a separate return basis

with such dividends excluded from gross income. In no event, however, shall the liability allocated to an individual company exceed the amount of normal, surtax and excess profits tax of such company based upon a separate return.

Written comments and views on the above proposal have been received by the Commission from regulatory bodies, registered holding companies, and others. One of the regulatory bodies has requested an opportunity to be heard by the Commission.

The Commission deems it appropriate that an opportunity to be heard be extended to all interested persons:

Notice is hereby given that oral argument before the Commission on the proposed amendment to Rule U-45 (b) (6) will be held on December 22, 1953, at 9:30 a. m., e. s. t., in the offices of the Commission, 425 Second Street NW., Washington 25, D. C. Any person desiring to be heard on such matter should file with the Secretary of the Commission on or before December 21, 1953, his written request or application therefor.

*It is ordered*, That the Secretary of the Commission give notice of such oral argument, by first class mail, to the Federal Power Commission, the Federal Communications Commission, the Interstate Commerce Commission, the Civil Aeronautics Board, the Commissioner of Internal Revenue Service, the public utility commission of each State, the top company in each registered holding company system, and to all other persons who have heretofore submitted written views and comments to the Commission with respect to this matter. Notice shall be given to all other persons by general release of this Commission, which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935, and by publication in the FEDERAL REGISTER.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

DECEMBER 4, 1953.

[F. R. Doc. 53-10358; Filed, Dec. 11, 1953; 8:47 a. m.]

## [ 17 CFR Part 259 ]

### FORMS FOR PERIODIC ACCOUNTING REPORTS

### FORM U-13-60

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to revise Form U-13-60 (17 CFR 259.313), which is the annual reporting form for mutual and subsidiary service companies under the Public Utility Holding Company Act of 1935.

The Commission is engaged in a comprehensive review of the rules, regulations, forms and procedures adopted under the various statutes administered by it. It is attempting to eliminate duplication and to simplify its requirements wherever practicable without prejudice to the public interest or the protection of investors. The present proposal which is made pursuant to the provisions of sections 13, 14 and 20 (a) of the act, is a part of this program and is designed to eliminate needless detail from Form U-13-60 and to avoid unnecessary duplication of information contained in the system annual report on Form U5S (17 CFR 259.5s).

The proposed revision of Form U-13-60 contemplates the following:

(1) Items 7, 8, and 9 would be deleted.

(2) Schedule 205 would be amended by adding the following additional instruction:

Describe any changes made during the year in the bases used and principles and methods applied in the allocation of charges for service.

(3) Schedule 235 would be deleted.

(4) Schedule 240 would be deleted.

(5) Schedule 245 (and the reference thereto in Schedule 200) would be deleted.

(6) Schedule 250 would be amended by inserting after the first sentence of the instructions thereto the following sentence:

If the aggregate amount paid to anyone vendee (other than an associate company or an affiliate) and included within one account is less than $2,000, only the aggregate number and amount of all such payments included within the account need be shown.

(7) Schedule 260 would be amended by adding the following additional instruction:

The term "principal items" is defined as items of $500 or more. However, the aggregate number and amount of all items of less than $500 should be reported.

(8) Schedule 265 would be amended by adding the following additional instruction:

The aggregate number and amount of all items of less than $1,000 may be shown in lieu of details.

(9) The signature clause would be amended to read as follows:

Pursuant to the requirements of the Public Utility Holding Company Act of 1935 and the rules and regulations of the Securities and Exchange Commission issued thereunder, the undersigned company has duly caused this report to be signed on its behalf by the undersigned officer thereunto duly authorized.

---
(Name of company)

By: ---
(Signature and printed name and title of signing officer)

Date: ---

(10) The second sentence of Instruction 6 would be amended to read as follows:

Every such letter shall be stated to be signed by a duly authorized officer of the company.

All interested persons are invited to submit data, views and comments on this proposal in writing to the Secretary, Securities and Exchange Commission, at its principal office, 425 Second Street NW., Washington 25, D. C., on or before December 22, 1953.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

DECEMBER 4, 1953.

# NOTICES

## DEPARTMENT OF THE TREASURY

### Office of the Secretary

[Treasury Department Order 167-7]

[CGFR 53-34]

### COMMANDANT, U. S. COAST GUARD

### DELEGATION OF FUNCTIONS TO THE COMMANDANT

By virtue of the authority vested in me as Secretary of the Treasury and the authority in Reorganization Plan No. 26 of 1950 (15 F. R. 4935), there are hereby delegated to the Commandant, U. S. Coast Guard, the functions of the Secretary of the Treasury set forth below and all action taken thereunder prior to the effective date of this order is hereby ratified. The Commandant is authorized to re-delegate the functions herein delegated. These functions include those vested in me by the following sections of the act of July 9, 1952 (66 Stat. 481):

(1) Section 209 (a), to give or withhold consent required for enlistment or appointment of a Coast Guard Reservist in another Armed Force of the United States.

(2) Section 217 (c), to convene and take final action approving or disapproving the recommendations of the board of officers provided for therein.

(3) Section 232, to determine whether or not applicants for appointment or enlistment in the Coast Guard Reserve may be appointed or enlisted notwithstanding the existence of a physical defect.

(4) Section 233, to order Reserve personnel to extended active duty or active duty for training under the conditions and to the extent provided for therein.

(5) Section 234, to order to and retain on active duty, with their consent, Reserve personnel to perform duties in connection with the organizing, administering, recruiting, instructing, or training of the Coast Guard Reserve.

(6) Section 235 (a), to enter into a standard written agreement with Reserve personnel for periods of active duty service not to exceed five (5) years.

(7) Section 239, to release from extended active duty or active duty for training any member of the Coast Guard Reserve at any time.

(8) Section 249 (a), to convene boards of officers provided for therein.

(9) Section 253, to detail such members of the Regular Coast Guard and of the Coast Guard Reserve as may be necessary to develop, train, instruct, and administer the Coast Guard Reserve.

(10) Section 255, to make available to the Coast Guard Reserve such supplies, equipment, services, and facilities of the Regular Coast Guard as he may deem necessary and advisable for the support and development of the Coast Guard Reserve without charging the costs or value thereof, or any expenses in connection therewith, against the appropriation provided for the Coast Guard Reserve and to repossess or re-distribute such equipment and supplies as he finds to be in the best interest of the United States.

[SEAL] H. CHAPMAN ROSE, *Acting Secretary of the Treasury.*

NOVEMBER 30, 1953.

[Docket No. G-2316]

TENNESSEE GAS TRANSMISSION CO.

NOTICE OF APPLICATION

DECEMBER 8, 1953.

Take notice that Tennessee Gas Transmission Company (Applicant), a Delaware corporation, address Commerce Building, Houston, Texas, filed on November 18, 1953, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of certain transmission pipeline facilities hereinafter described.

Applicant proposes to construct and operate (1) new compressor units aggregating approximately 28,000 horsepower and other related facilities to be installed in eleven of Applicant's existing compressor stations, and (2) approximately fifty miles of 10¾-inch miscellaneous pipelines extending from the Flour Bluffs Field in Nueces County, Texas to Applicant's Compressor Station Number 1. These facilities are stated to increase the daily design capacity of Applicant's system by approximately 24,400 Mcf per day, and will enable Applicant to transport for the account of Equitable Gas Company (Equitable) up to this volume of gas purchased by Equitable in the Flour Bluffs Field. Applicant will deliver the gas to Equitable at a specified point of delivery in the Commonwealth of Pennsylvania, and the gas will be used to supply Equitable's system in Pittsburgh, Pennsylvania, and its environs, in southwestern Pennsylvania and northern West Virginia.

The estimated cost of the proposed facilities is $9,314,000. Applicant proposes no separate financing in connection with this project.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 28th day of December 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

## FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 10556, 10557, 10558]

SUPERIOR TELEVISION, INC., ET AL.

ORDER RE ISSUES

In re applications of Superior Television, Inc., Corpus Christi, Texas, Docket No. 10556, File No. BPCT-1031; Keys-TV, Inc., Corpus Christi, Texas, Docket No. 10557, File No. BPCT-1045; K-Six Television, Inc., Corpus Christi, Texas, Docket No. 10558, File No. BPCT-1434; for construction permits for new television broadcast stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 3d day of December 1953;

The Commission having under consideration (1) a petition filed October 3, 1953 by Superior Television, Inc. to enlarge the issues in the hearing on the above-entitled applications to permit inquiry into the adequacy of available funds to effectuate the proposals; and

(2) a response to the said petition filed on October 3, 1953 by K-Six Television, Inc.;

It appearing that in its original order of designation in this proceeding the Commission was satisfied that all the applicants herein were financially qualified and made specific findings to that effect; and

It further apearing that the question of whether or not the available funds of the applicants will be sufficient to effectuate their proposals, and hence whether or not the issues should be broadened to permit the receipt of evidence on this question, is a matter best left to the discretion of the Examiner after his receipt of allegations sufficiently particularized and material so that, if proved, they would establish significant differences between the competing proposals, all as set out in our Memorandum Opinion and Order in re South Central Broadcasting Corporation, et al., released October 7, 1953, Docket Nos. 10461-10464; and

It further appearing that the response to the petition filed by K-Six Television, Inc. makes no objection to the granting of this petition, and no other objections having been filed;

*It is ordered*, This 3d day of December 1953 that the petition of Superior Television, Inc., filed October 3, 1953, to enlarge the issues in this proceeding is granted insofar as it requests that the Hearing Examiner be given authority to enlarge the issues to permit inquiry into the adequacy of finances available to the applicants; and

*It is further ordered*, That the issues specified in this proceeding may be enlarged by the Examiner upon sufficient allegations of fact made in support of said enlargement, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 8, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-10392; Filed, Dec. 11, 1953; 8:53 a. m.]

---

[Docket Nos. 10701, 10702, 10703]

SANGAMON VALLEY TELEVISION CORP. ET AL.

ORDER RE ISSUES

In re application of Sangamon Valley Television Corporation, Springfield, Illinois, Docket No. 10701, File No. BPCT-589; Capitol City Television Company, Springfield, Illinois, Docket No. 10702, File No. BPCT-1699; WMAY-TV Incorporated, Springfield, Illinois, Docket No. 10703, File No. BPCT-1768; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 3d day of December 1953;

The Commission having under consideration a petition filed November 6, 1953, seeking modification of a Commission order of September 30, 1953, to include an issue giving the Examiner discretionary authority to admit evidence designed to controvert the determination that available funds will be sufficient to effectuate the proposals in each application; and

It appearing that the Commission on October 1, 1953, adopted in South Central Broadcasting Corporation, Docket No. 10461, the policy indicated in the above requested issue, applying it to future competitive proceedings; and

It further appearing that the instant proceeding was designated for hearing on September 30th, but that the hearing actually commenced on October 30, 1953, and that each of the applicants has proposed to make a showing designed to meet the indicated issue; and

It further appearing that the parties have agreed and the Broadcast Bureau has not objected to the instant petition;

*It is ordered*, That the above-described petition is granted and that the Examiner is granted authority, upon sufficient allegations of fact, made in support of said enlargement, to add the following issue to those previously designated: To determine whether the funds available to each applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 8, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

## SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Area 6]

MISSISSIPPI

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about December 3, 1953 and December 5, 1953, because of the disastrous effect of tornadoes, damage resulted to residences and business property located in certain areas in the State of Mississippi; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now, therefore, as Acting Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Office below indicated from persons or firms whose property situated in the following counties (hereinafter referred to as "the disaster areas") suffered damage or other destruction as a result of the catastrophe above referred to:

Counties of Issaquena, Warren, Coahoma: Small Business Administration Regional Office, Peachtree Seventh Building, 50 Seventh Street NE., Atlanta, Ga.

2. A special field office will be established in Vicksburg, Mississippi, to receive and process applications.

3. No disaster loan application from any resident or firm situated in the disaster areas will be accepted under the authority of this order subsequent to June 30, 1954.

Dated: December 7, 1953.

WENDELL B. BARNES,
*Acting Administrator.*

[F. R. Doc. 53-10368; Filed, Dec. 11, 1953; 8:49 a. m.]

[Declaration of Disaster Area 7]

LOUISIANA

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about November 22, December 3 and December 5, 1953, because of the disastrous effect of tornadoes, damage resulted to residences and business property located in certain areas in the State of Lousiana; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now, therefore, as Acting Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Office below indicated from persons or firms whose property situated in the following parishes (hereinafter referred to as "the disaster areas") suffered damage or other destruction as a result of the catastrophe above referred to:

Parishes of Union, Lafayette, Ouchita, LaSalle, Grant, Vernon, Franklin, DeSota, Rapides: Small Business Administration Regional Office, 1114 Commerce Street, Dallas 2, Texas.

2. A special field office will be established in Vicksburg, Mississippi, to receive and process applications, and additional field offices will be established if required.

3. No disaster loan application from any resident or firm situated in the disaster areas will be accepted under the authority of this order subsequent to June 30, 1954.

Dated: December 7, 1953.

WENDELL B. BARNES,
*Acting Administrator.*

[F. R. Doc. 53-10367; Filed, Dec. 11, 1953; 8:49 a. m.]

[Declaration of Disaster Area 8]

TEXAS

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about December 1, 1953, because of the disastrous effect of tornadoes, damage resulted to residences and business property located in certain areas in the State of Texas; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now, therefore, as Acting Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Office below indicated from persons or firms whose property situated in the following county (hereinafter referred to as "the disaster area") suffered damage or other destruction as a result of the catastrophe above referred to:

County of Ashley: Small Business Administration Regional Office, 1114 Commerce Street, Dallas 2, Tex.

2. A special field office will be established in Vicksburg, Mississippi, to receive and process such applications and additional field offices will be established if required.

3. No disaster loan application from any resident or firm situated in the disaster area will be accepted under the authority of this order subsequent to June 30, 1954.

Dated: December 7, 1953.

WENDELL B. BARNES,
*Acting Administrator.*

[F. R. Doc. 53-10369; Filed, Dec. 11, 1953; 8:49 a. m.]

[Declaration of Disaster Area 9]

ARKANSAS

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about December 5, 1953, because of the disastrous effect of tornadoes, damage resulted to residences and business property located in certain areas in the State of Arkansas; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now, therefore, as Acting Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Office below indicated from persons or firms whose property situated in the following counties (hereinafter referred to as "the disaster areas") suffered damage or other destruction as a result of the catastrophe above referred to:

Counties of Guadalupe, Lee, Washington: Small Business Administration Regional Office, 1114 Commerce Street, Dallas, Tex.

2. Special field offices will be established to receive and process applications if this is determined to be necessary.

3. No disaster loan application from any resident or firm situated in the disaster areas will be accepted under the authority of this order subsequent to June 30, 1954.

Dated: December 7, 1953.
